Robust oberst got a new monocle, still sees things angrily, tries to shout down the NCTA...wants to "see papers" of newsgroup people. Oberst Heil not demand "papers" of BVD or Quitbad...or of Leo or you or any other name he can remember. :-)

Rev. Jimmie is making like interviewing for Washington Post or U.S. News & World Report with long, lonnng, lonnnnnng posts on all things NOT amateur radio. Hope he gets new job...national politics, economy, etc., needs injection of morsemanship to bring back the good old days of the past.

Coslo is hanging in there, trying to play both sides but keeps getting tossed in penalty box for sticking. He should get a copy of Dave Barry's new book, "Boogers Are My Beat" to learn about humor.

NURSIE rehashes old anger in usual obsessive fashion, trying for one-upmanship but his ship never gets out of dry-dock. Poor NURSIE, still bent out of shape so far that a 10-ton hydraulic press can't get him straight.

Modern American amateur radio on display in all its PCTA gory.

Makes one want to get that ham license "more than anything else in the world?" On morse code, Jimmie once intoned (in an attempt at "with-it" humor), "Try it, you'll like it!" Hardly.

MIghty macho morsemen these PCTA extras, all with the Double Standard banner of self-righteousness...and now beginning to hide in anonymity, their courage depleted. Tsk.

His emotional status peaks and dips at least 3 times each day. But he
doesn't control it. It's on autopilot.

Pass the plate and maybe we can get him some help.

So you see no difference between you and Lenover21 writing in the strange manner that you have taken to lately; to toss out perjorative names at anyone that disagrees with you, and this banter that is simply fun stuff?

You have spoken.

True. NURSIE very simple but have complex problem.

Things are looking up, though, NURSIE are learning how to "dial authorities" to put "enemies" in asylums! :-)

NURSIE say he gonna do it...now he gonna learn how...

Stay tuned to this CHANNEL for the latest development from that very dark darkroom of nursie's...

No, John, it is the slurred pronunciation of RACIST. [we have to
talk like that so that NURSIE understands everything, otherwise
he gets very confused]

Like ham radio, there is very little gender among raisins.

Raisins are "grapes with experience." :-)

He's a big ace in CAP, remember? Knows ALL about piloting cuz'
he got a FAA *CREDENTIAL!* :-)

>Pass the plate and maybe we can get him some help.

Not me. NURSIE hasn't finished his big, big plate of CROW yet.

Why he not finish?

Maybe he's all tired out from those "seven hostile actions?"

Or trying to tell the DoD that MARS >>IS<< amateur radio?

Or trying to tell all that amateur radios work by different
physics than those in other radio services?

Those are mind-boggling superhuman tasks he undertook.
He be amateur undertaker......dig? :-)

You make no sense. If you perceive that Mikey is upset from his post,
you are a retard.

Mikey is dull and unimaginative. He writes stupid poetry. He doesn't
appear to get upset though.

You have an anger issue.

> Understood that we may NOT negatively comment on PCTA
> output. Such is perceived as INSULTS and PEJORATIVES!

You should understand that your posts are supposed to make some sense.
If you confront your issues, you can start to cure yourself.

I am

Blackguard Vox Deus

Some time was required for us
to see and understand it,
but finally the incandescent
brilliance of Blackguard Vox Deus
became apparent.

Calls himself (or herself)
"scoundrel" and "blackguard"
but does not behave as either.
Doing so disarms those who
would call names and fling
insults.

For what insult or name can be
hurled at those who openly
and freely describe
themselves as "blackguard"
and "scoundrel"?

>> > Blackguard: the scoundrel
>> >
>> > Vox: as in voice of course
>> >

FCC has always accepted input
from all interested groups. Your
knowledge of the past seems to
have missed that. Your recall of
amateur radio regulatory history
is incomplete and defective.

ECFS has existed for at least six
years, but it simply represents a
convenience compared to paper-
and-mail comment filing.

> Changes are coming....

Changes are always coming.
However, not all of us are
neophiliacs like you.

> Will NURSIE be able to change with the times?

Will you?

I am a Nurse.

I am eternally hopeful for the well-being and the healing of those who suffer from illness, injury or mental defect. Brain seems to be batting about .666 in that regard. (Ironic, the average, eh...?!?!?) He's obvioulsy hurting from some untold trauma and he needs some encouragement to overcome it.

I know that short of having a steel rod driven through his head, Brian Burke can do better. He HAS done better. He was off to a really good start the other day. But just as soon as I started returning his civility in kind, he turned around again.

I think the idea of having to live up to his OWN rhetoric about the tone and temperment of the exchanges was more than he could handle. Lennie's hand must have slipped out of the pocket long enough to let Brian act independently, but he obviously got it back in before Brian could really get a good running start.

Too bad. Now he's babbling again. And he accuses ME of being "off your meds".

Sheeeesh.

Don't hold yer breath, Dave!

>You're still not a participant after decades of self-declared
>interest. You're still not involved despite a boast of getting an
>"Extra right out of the box" years back.

January 19, 2000, to be exact. Right in this-here newsgroup. Of course he was
"Lenof21" then.

>Some changes must come very slowly.

Fun facts:

- Despite his claims of being online since dirt was new, Len could not get ECFS
to work for him back in early 1999. Couldn't keep up with the times, I suspect.
Most of us poor old backward hams got ECFS to work for us, though. He wound up
submitting his 98-143 comments by US mail, on disk and paper. He's been a busy
wordsmith since then, though, deluging the FCC with commentary. Most of it is
obvious cut-and-paste. Poor Bill Cross.

- FCC got about 2500 comments on 98-143, the last big restructuring. Back in
the mid-1960s, FCC got over 6000 comments on "incentive licensing", most of
them from individuals, even though there was no ECFS back then and all
commentary was plain old words-on-paper.

- ARRL lobbied to increase the code test speed from 10 to 12.5 wpm in 1936.
That was the last time ARRL lobbied for an increase in code test speeds.
Indeed, the 1963 ARRL incentive licensing proposal called for no increase in
code test speeds (full privileges would have been allowed to Advanceds under
that plan) and ARRL *opposed* the FCC idea of a new 16 wpm test for "Amateur
First Class" which FCC wanted in 1965.

- No class of US amateur radio license has required more than 5 wpm code test
since 2000. No class of US amateur radio license has required more than 5 wpm
code test since 1990 (with an easily-obtained medical waiver, and a long list

of possible accomodations).

Yet Len's sole involvement is the harangue of an outsider. Kibitzer. Sidewalk superintendent.

Gladys Kravitz effect.

"Not that there's anything wrong with that!"

>hang bags of fluid and push drugs...

Wow! Isn't NURSIE in a dark, dark mood this year.

Last time before last I was in an ER was in Wisconsin, near Fontana, accompanying my wife in 2000. Maybe it was my imagination, but I seem to remember a shrine next to the lobby, featuring a 5' x 8' color photo of a scowling fiftysomething wearing a flight suit. No name below it other than (in gold letters) the phrase "We Will Never Forget..." about a foot high.

The folks wearing scrubs couldn't remember "The Unknown Nurse," hero of medicine and savior of amateur radio.

How quickly they forget...

The last time I was in an ER was at St. Joseph's in Burbank, my mother moved from the nursing home with a life-threatening blood clot. That was in early 2001 and she died four days later.

Now, in the press of things then, I didn't ask around either ER or on the "terminal floor" to find out if anyone knew of you, in scrubs

or in uniform. I did call down just now to ask (it's a local call) if anyone "knew of you."

Apparently no one did. [response over the phone was (edited) "what the #$%^!!! are you talking about?!?!?"]

Fame is fleeting.

Toss it in the Sharps on your way out the door...

> Remeber... that's the last thing Timothy McVeigh saw....

"Remeber" to turn on your spell-checker before hitting "Return."

You seem to forget doing that way too much. Tsk.

Now keep stirring that mix with ammonium nitrate and keep working that rare DX on HF with CW...folks will "remeber you" lots... :-)

>tube-type twansmitter?

NURSIE know not of other radio, especially military, only amateur.

Pity that considering the first fielded application of the Collins Radio
T-195, with Bruene detector for automatic antenna tuning, was done
under a USMC contract in the early 1950s. :-)

Made QSYs very easy, USMC radio ops didn't have to think as
much...that thread apparently kept on evolving until it got to the
"no-brain" channel-changing stuff of yesterday's murine. :-)

[Kellie...U.S. jeeps had been converted to 28 VDC by then, unlike
the 6 VDC of WW2 times...:-)]

I never got to play with the new AN/GRC-19 with that automatic
antenna tuner, just saw a demonstration in the Fall of 1955. Most
impressive.

I was equally impressed the first time I played with the AN/PRC-104, today's land-forces manpack HF transceiver. It too has an automatic antenna tuner...in a little to-the-right-side box next to the R/T in that battery-powered 20 W rig designed and made by Hughes Aircraft Ground Systems. Uses little magnetic latching relays in a binary-sequence switching of capacitors and inductors. The mismatch detector is on the same principle of the Bruene magnitude and phase detector of the old T-195 and in many amateur HF antenna autotuners. PRC-104 is entirely solid-state, has nearly 20 years of service in the U.S. military, proving the basic design is long-lasting.

Of course, for today's U.S. land forces, the main small-unit (company and smaller size) communications radio is the AN/PRC-119 family (known by NURSIE's hated name of SINCGARS)...VHF, full CommSec features plus FHSS capability...excellent for communication security in the field. A quarter million SINCGARS transceivers built and fielded since 1989 and NURSIE never operated a single one of them. Sunnuvagun!

But, for the HF radio equipment operators of the 1950s, using radios of WW2 and before, every operation was MANUAL, none of that "channel changing" alleged by those who never tweaked a military comm radio during any of their "hostile actions." :-)

NURSIE doesn't want to hear any of that...it detracts from his ranting. His "operating skill" consists mainly of emotional shouting and yelling about "expertise in fine-tuning receivers" and such as he's read in QST (a "technical journal" of interest to Archaic Radiotelegraphy Relay League members).

Yet you claim that tuning a military tube transmitter is substantially
different from tuning an amateur transmitter because you deny that
military radio experience is substantially different than amateur
experience.

In a sense, that is correct. Military radio experience is superior to
amateur radio experience. Except in Kelly's unique case.

But you choose to downgrade it.

Your loss, because you're an idiot.

>
> Don't hold yer breath, Dave!

Oh, I won't. I don't expect Leonard (despite often writing of "getting
into" amateur radio) to actually obtain a license during his present
incarnation.

> >You're still not a participant after decades of self-declared
> >interest. You're still not involved despite a boast of getting an
> >"Extra right out of the box" years back.
>
> January 19, 2000, to be exact. Right in this-here newsgroup. Of course he was
> "Lenof21" then.

I remember that one and Cutey Boy's memorable statement. They are,
you'll have to admit, quite similar in outcome.

> >Some changes must come very slowly.
>
> Fun facts:
>
> - Despite his claims of being online since dirt was new, Len could not get ECFS
> to work for him back in early 1999. Couldn't keep up with the times, I suspect.
> Most of us poor old backward hams got ECFS to work for us, though. He wound up
> submitting his 98-143 comments by US mail, on disk and paper. He's been a busy
> wordsmith since then, though, deluging the FCC with commentary. Most of it is
> obvious cut-and-paste. Poor Bill Cross.

It'd be interesting to see if our resident r.r.a.p. g.o.m. (grumpy old
man) is the most prolific of commenters.

> - FCC got about 2500 comments on 98-143, the last big restructuring. Back in
> the mid-1960s, FCC got over 6000 comments on "incentive licensing", most of

> them from individuals, even though there was no ECFS back then and all
> commentary was plain old words-on-paper.

Did Leonard comment on incentive licensing? His declared interest in
amateur radio would have taken him back to that era.

> - ARRL lobbied to increase the code test speed from 10 to 12.5 wpm in 1936.
> That was the last time ARRL lobbied for an increase in code test speeds.
> Indeed, the 1963 ARRL incentive licensing proposal called for no increase in
> code test speeds (full privileges would have been allowed to Advanceds under
> that plan) and ARRL *opposed* the FCC idea of a new 16 wpm test for "Amateur
> First Class" which FCC wanted in 1965.

So the mythical "Church of St. Hiram" isn't at all as Len has attempted
to portray it?

> - No class of US amateur radio license has required more than 5 wpm code test
> since 2000. No class of US amateur radio license has required more than 5 wpm
> code test since 1990 (with an easily-obtained medical waiver, and a long list
> of possible accomodations).
>
> Yet Len's sole involvement is the harangue of an outsider. Kibitzer. Sidewalk
> superintendent.

I've pointed that out to him on numerous occasions. Len could have
easily passed a no code exam. I feel sure that, despite the enormous
obstacle of a 5 wpm code test, he could have met the qualifications of
at least one of the HF license classes. He hasn't. If his intention is
to wait until there is no code test for an HF amateur radio license,
fine. He's really showing us.

> Gladys Kravitz effect.

Does Len have a chin?

> "Not that there's anything wrong with that!"

Amateur Radio Newsline™ Report 1411 August 27, 2004

Amateur Radio Newsline report number 1411 with a release date of
Friday, August 27th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. A ham radio operator looses his house and
tower in a fire and an urban terrorist is the suspect. Also,
interference to a ham could lead to a fine for an uncooperative
neighbor and lots happening on the B-P-L front. Find out the details
on Amateur Radio Newsline report number 1411 coming your way right
now.

(Billboard Cart Here)

**

ALL POINTS BULLETIN: ARSONIST BURNS DOWN HAMS HOUSE

An arsonist with a grudge against radio has burned down the home of a
Vancouver, Washington ham. Amateur Radio Newslines' Mark
Abramowicz,
NT3V, has the details:

--

A $10,000 reward is posted and the Clark County Fire Marshal's office
is tracking any and all leads it hopes help them capture someone who
has been setting fire to communications towers in the Vancouver area
since the beginning of the month.

Until recently, investigators say the targets have primarily been
state government, telephone company and cellular telephone towers.
But it was an Aug. 20 fire at the home of John Stein AB7F that now
has alarmed the ham radio community in Vancouver.

The fire marshal's office says Stein's amateur radio tower was
apparently targeted. It believes the fire was set at the base and
spread upward along the feed line. Flames fell from the melting
cables and spread to Stein's home.

Fortunately, authorities say, Stein was awake when the fire broke out
about 11:30 p.m., got out, called 9-1-1 and tried to get a start on
putting the fire with a garden hose. But the fire took off quickly
and, unfortunately, the home sustained extensive damage in excess of
$50,000.

The fire marshal's office says Stein told them he spotted somone
running away from his home and he gave them a description.

Clark County Deputy Fire Marshal John Dunaway is leading the investigation into the communication tower fires.

At this point, the fire marshal's office will confirm basic details about the fires. But the fire marshal's office says there is certain information it cannot release at this time because it doesn't want to jeopardize the case it hopes to eventually bring against the arsonist.

Stein's home was not far from the fires at the other communications towers, the most spectacular of them on a more than 200-foot tall tower in Vancouver. That's shared by the Washington State Patrol and the Washington State Department of Transportation headquarters.

Officials say while the state patrol's communications in Clark County were disrupted by the fire, 9-1-1 communications were not affected. Damage in that fire was estimated at more than $100,000.

That blaze prompted the $10,000 reward offer from a foundation. Ham operators in the Vancouver area are very concerned and fear anyone with a tower could become the next victim. They've been transmitting word about what's been happening via repeater, HF radio and the internet across the region. They're urging hams with towers to be especially vigilant and take precautions to protect their feedlines, but more importantly their homes and their lives.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

There is general agreement that this anti radio fire bug has to be stopped before someone to loose their life in one of his blazes. If any one has information regarding these fires or the person setting them please call the Crime Information Tip Line at 877 - 274 - 6311 or the Clark County Washington Fire Marshal's Office at area code 360 - 397 - 2186 and ask for extension 3396. You may remain anonymous on either line. (ARNewsline ™, CGC, others)

**

ENFORCEMENT: FCC WARNS NEIGHBOR OF HAM OVER INTERFERENCE

A neighbor of a ham radio operator who refuses to clean up interference he is causing could now face a stiff fine. The FCC'as
Daryl Duckworth, NN0W, says that the agency is giving the neighbor one last chance to comply:

--

Duckworth: "A follow-up warning letter went to a resident in Friendwood, Texas, concerning interference to William Cooper, W5ZAF, from a battery charger. The amateur had supplied ferrite beads earlier to the resident which did solve the problem. Evidently, the

resident changed his mind and tossed the ferrites back over the fence."

--

The FCC says that if the interference is not corrected by September 15th, it will have its Field Office investigate the matter and possibly issue the uncooperative neighbor a hefty fine. It also suggested that he consult an attorney regarding the FCC rules that control radiation from unlicensed devices like the battery charger that's causing the problem to the ham next door. (FCC, RAIN)

**

THE BPL FIGHT: ARRL ASKS FCC TO CLOSE DOWN AZ. BPL TEST

Some important developments on the B-P-L front. First to Arizona where the ARRL is calling on the FCC to immediately shut down a Broadband Over Powerline field trial in the Cottonwood. This, because it's causing severe interference to Amateur Radio communication in the area.

The ARRL Letter says that Electric Broadband LLC and utility A-P-S have been operating the B-P-L experiment at two sites since June under a Special Temporary Authorization the FCC granted Electric Broadband in March. Michael Kinney, KU7W, filed the first Amateur Radio complaint in June. It cited testing by the Verde Valley Amateur Radio Association in the 1.8-30 MHz range to show that B-P-L interference made attempts at ham radio communication useless. The interference on typical Amateur Radio equipment shows received undesired signal levels in excess of 60 dB over S9.

According to the ARRL, both the utility and Electric Broadband were contacted, and no response was received. The ARRL says that both companies are aware that the B-P-L field trial has been causing harmful interference and neither has taken any steps to either resolve it or terminate the test. (ARRL)

**

THE BPL FIGHT: BAD NEWS FROM DOWN UNDER

Meantime, Broadband Over Powerline and its introduction in Australia has that nations hams on the alert. This, because little has been known about what has been occurring behind the scenes as power companies prepare to adopt the B-P-L technology and the Australian Communications Agency considers rules to govern it. Now, WIA Newsman Jim Linton, V-K-3-P-C has uncovered an almost terrifying development. One that could mean the end of H-F operations down-under for many V-K hams.

--

The future introduction of Broadband Powerline Communications (BPL) in Australia could be on the condition that "less significant" HF radio users such as radio amateurs and four wheel driver clubs would not be protected from any interference it causes.

The Australian power industry has a real concern about the added expense required to address interference that could affect amateur radio stations and other recreational radio users. Its arguments include that to remove amateur radio frequencies from a BPL system will add cost and reduce the capacity and potential data rate. The power industry is requesting that the Australian Communications Authority (ACA) outweigh the concerns of recreational or "less significant" HF radio users with the higher community benefit of providing greater access to broadband-enabling technology.

The ACA, in response to the power industry concerns, is now examining the legal possibility of allowing BPL networks to cause substantial interference to "less significant" radio services, while other radio services would continue to be entitled to interference protection. Presumably if this becomes reality the Amateur Service could lose its protection against harmful powerline interference too. After all, were are in the eyes of some just a "less significant" radio service.

This has been Jim Linton VK3PC for WIA National News.

--

If this does happen it could mean a lot fewer V-K callsigns will be heard on the Hiugh Frequency and low VHF bands. (WIA News)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the repeaters of the Rocky Mountain Radio League serving Denver and Bloomfield, Colorado.

(5 sec pause here)

**

RESTRUCTURING: ARRL PROPOSES BANDWIDTH DEFINED HAM SERVICE

The ARRL has released a synopsis of its petition to the FCC aimed at restructuring the Amateur service along bandwidth defined lines. While what has been made public is highly abreviated, a drafted, the ARRL's bandwidth petition would preserve double-sideband AM and would stop short of opening the phone bands to digital and other modes of the same bandwidth.

The ARRL's petition also proposes to limit bandwidth in the CW subbands to 200 Hz, which also will accommodate data modes such as PSK31. It also suggests to limit bandwidth in the

existing "RTTY/data subbands" to either 500 Hz or 3 kHz, with phone emissions specifically prohibited in certain subbands where 3 kHz would be permitted.

Obviously this will be an ongoing story. More on this next week as reaction comers in. (ARRL)

**

HAM RADIO IN SPACE: HURRICANE CHARLEY WRECKS AMSAT LAB

Hurricane Charlie has also taken its toll on the Amateur Radio space program. This, with word that the storm destroyed the building housing the lab used to assemble the latest series of ham radio satellites.

Hurricane Charlie hit Orlando, Florida at about 8 p m Eastern on Friday, August 13th packing sustained winds estimated at close to 100 miles per hour. One of the places sustaining damage was Orlando Executive Airport. This was home of the AMSAT Laboratory. The place where ham radio satellites have been assembled and tested prior to launch.

Rick Hambly, W2GPS, reports that AMSAT members in the area survived with relatively minor damage but the building that houses that AMSAT Lab suffered severe structural damage from Charley's onslaught. It
has now been condemned and will have to be torn down.

W2GPS says that the equipment and parts inventory at the lab are in good shape but AMSAT was given less than two weeks to move out and find temporary storage for its equipment. The Amateur Radio space agency also must begin a search for a new building to support development of the Eagle ham radio satellite and future projects.

Complicating matters is that AMSAT's insurance does not cover the costs of temporary storage or of moving to a new facility. So, they are asking the Amateur Radio community to keep ham radio space projects alive by sending a donation to AMSAT's Hurricane Fund. Hambly says that the money collected will be used to get the lab back in operation as soon as possible.

AMSAT North America is a federally charted 501(c)(3)not for profit organization. Any donation should be tax deductible in the United States. Information on the fund and how to donate is in cyberspace at www.amsat.org. (AMSAT-NA, W2GPS, W5DID)

**
RESCUE RADIO: RADIO STATIONS GET PRAISE IN CHARLEY AFTERMATH

Broadcasters in Florida have been getting involved as the clean-up following Hurricane Charley. One has taken on being the voice of the storm ravaged area.

According to the CGC Communicator, FM radio station Seaview-104.9 in Punta Gorda, Florida and four of its sister stations are all owned by Clear Channel Communications. Seaview-104.9's studios were damaged and the station was knocked off the air by Hurricane Charley, but service was restored within hours. According to a report in the St. Petersburg Times, once the storm had passed, General Manager Mike Moody returned to the building housing his station. The roof was shredded and the ceiling collapsed. But one studio, no bigger than a walk-in closet, was in working order.

Moody said that there was no power but using a generator he got the studio on the air. He also found a phone outlet reserved for a FAX machine operating so he plugged in a phone, put the receiver to the microphone and then let callers unravel their tales of storm survival.

The studio is the only one based in Charlotte County. Because of this it has become a lifeline for residents searching for information to help them cope with the storm's aftermath and listeners like Ron Hall, KP2N, have rallied around the station in support of its vital post storm activities. (CGC)

**

RESCUE RADIO: UK GROUP ACTIVATES FOR FLOODS

Meantime, over in the U-K, a ham radio emergency communications unit was activated. This, after severe rains caused flooding near the town of Boscastle. Jeramy Boot, G4NJH, is in Nottingham with more:

--

Cornwall Raynet Groups were put on standby by their Emergency Planning Unit on the evening of Monday, 16th August, following communications difficulties resulting from the massive flooding at Boscastle. Eleven volunteers were available to proceed to the emergency, but were stood down later as the communications difficulties had been resolved.

Jeramy Boot, G4NJH

--

For those not aware, RASYNET is the U-K equivalent of ARES and RACES here in the U-S-A. (GB2RS)

**

HAM RADIO ON THE NET: MORE CHANGES AT QRZ.COM

More changes have come to the QRZ.com super site. This, as its owner Fred Lloyd, AA7BQ, announces some policy changes regarding the callsigns that are listed in the QRZ Callsign database.

--

According to QRZ's Lloyd, the site will no longer accept callsign designators, prefixed or suffixed, as independent callsigns. This would include reciprocal calls such G 3 slash K6PZW -- a call I might be assigned if I were visiting England.

Lloyd says that these listings were problematic for both the QRZ website and the QRZ CD ROM, and they were of questionable value to begin with. As of the latest software update, the server will no longer accept or record such entries. The logic is that anybody wanting to contact the callsign holder could just as easily look them up by their primary callsign.

Also gone will be non ham call signs such as those self issued by individual SWL's, Weather watchers, and others. Lloyd says that Q-R-
Zed will continue to accept SWL listings as long as they are issued by a formal body, and so long as they have an alphanumeric format. But Lloyd says that an SWL callsign cannot be a primary login account name to a website that manages amateur radio callsigns.

The bottom line: Non-amateur callsigns will continue to be excluded from the QRZ CD ROM and will take last priority with server management resource. In other words, they will be listed on a time and space available basis, only.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

These changes are in addition to the posting policy changes that Lloyd announced two weeks ago. (QRZ.com)

**

RADIO LAW: SENATE WARNING ON CABLE RATES

The Senate says that it will consider new regulations for cable television unless the industry addresses soaring prices and allows consumers more channel choices. Members of the Senate Commerce Committee said pressure from angry constituents is leading them to look at ways to hold down cable rates and let subscribers choose individual channels rather than packages set by operators.

Since Congress deregulated the industry in 1996, cable rates have increased by 53 percent while inflation has risen 19 percent. Cable operators said the jump reflected higher programming costs, more channels and system improvements such as rewiring to provide digital TV. (Published reports)

**

RADIO LAW: BETTER CELLULAR SERVICE

The government says wireless companies are doing a better job of switching customers who want to keep their cell phone number. In the first month after the change took effect, the Federal Communications Commission received 24-hundred complaints. Most were from people who said the transfers were taking too long. In the past month, the number of complaints has fallen to 400. Customers have had the option of keeping their phone numbers when they switch to a new carrier since November. (Science OnLine)

**

EMERGING TECHNOLOGY: PERSONALIZED PHONE MUSIC SERVICE FROM SONY

Meantime Sony Corporation has announced what it called the first personalized radio service for mobile phones. Under the still-unnamed music streaming service, subscribers would not own any of the songs but could create a customized channel to listen to the music they want, storing favorite tunes in personal playlists. Users would also be able to listen to music from a collection of predefined channels. A "smart personalization" feature could also keep track of the subscriber's music preferences and make song suggestions. (Sony)

**

THE SOCIAL CIRCUIT: TENNESSEE IN AUGUST

Turning to the ham radio social calendar, word that Tennessee's Short Mountain Repeater Club will be sponsoring the Cedars of Lebanon Hamfest on August 28th. This, at the Gladville Community Center in the town of Gladville Look for vendors, a large tail gate sales area and lots more. For more information e-mail keharris@netc.com or take your web browser to www.qsl.net/smrc (E-mail)

**

THE SOCIAL SCENE: LIGHTHOUSES OF AUSTRALIA 2004 ANNUAL DINNER WEEKEND

And if you want to travel a bit, this year's Lighthouses of Australia Dinner will be held in Launceston, Tasmania on Saturday, October 2d. The event will include a trip to the National Archives Office Touring Exhibition on Australian Lighthouses known as "Beacons by the Sea." It will also include visits to the Low Head Light and the Pilot Station Maritime Museum also at Low Head the same weekend. (GB2RS)

**

THE SOCIAL CIRCUIT: GERMAN VHF CONVENTION HAS NEW DATE

And from Europe word that Germany's Weinheim VHF Convention, which
had originally been scheduled for August 28th and 29th will now take place on 11th and 12th of September. The new venue is Bensheim which is 10 kilometers north of Weinheim. Full details are on the web at

www.ukwtagung.de (DARC)

**

BREAK 2

This is ham radio news for today's radio amateur. From the
United
States of America, We are the Amateur Radio Newsline with links to
the world from our only official website at www.arnewsline.org and
being relayed by the volunteer services of the following radio
amateur:

(5 sec pause here)

**

WORLDBEAT: CB SPECTRUM SHARING IN THE UK

There may soon be some new sounds on 27 MHz C-B in the United
Kingdom, and they won't be saying 10-4 Good Buddy. In fact they
may
be very formal sounding. This, as British telecommunications
regulator Ofcom proposes to allow local religious and community
organizations to operate one-way low power broadcast stations within
the U-K Citizens' Band allocation. Our producer, Bill Pasternak,
WA6ITF, has more:

--

No. Its not a joke. And Great Britain's Office of
Communications --
Ofcom -- says that this is how the new shared C-B service will work.

At first a small number of organizations will be licensed to transmit
religious services in a limited number of pilot areas. These would
be called Community Audio Distribution Systems or C-A-D-S. Their
specific purpose will be to allow house-bound religious congregation
members -- people unable to travel to a house of worship but who
wish to hear local religious community services -- the ability to do
so.

If proven effective, Community Audio Distribution Systems would be
expanded as a short-range and inexpensive wireless public address
systems. The U-K radio regulator says evidence of demand for such
arrangements has arisen primarily from within religious communities
and this is where Ofcom expects the majority of use to be. But its
not making this a religious-only radio service. In fact it is
encouraging other community groups could also use the system for
other similar purposes.

To test these plans, Ofcom is proposing a closely monitored year-long
pilot program in the areas where interest has been most widespread
and sustained. This includes West Yorkshire in England and all of

Northern Ireland. In those regions C-A-D-S users will share spectrum with the Citizens' Band users in a way that Ofcom says will provide the flexibility required to transmit religious and community service material while protecting other spectrum users from harmful interference. At least it will try its best to do so.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, reporting.

--

Can something similar happen here in the U-S-A. Not likely. At least not very soon. C-B is still to crowded, unruly and unstructured a band to effectively share. But it is expected that other administrations world-wide will be watching this United Kingdom C-B sharing experiment with an eye to introducing similar services in their nations as well. (RSGB)

**

WORLDBEAT: BIG VHF TECH SYMPOSIUM DOWN-UNDER

The Wireless Institute of Australia's Central Region is holding a Technical Symposium Saturday October 2nd. Rex Moncur VK7MO will discuss Digital enhancement of VHF signals, Doug Mc Arthur VK3UM EME Techniques, Joe Kasser VK5WU Computers for Amateur Radio and David Giles VK5DG will explain that Amateur Satellites are really only high tech repeaters on orbit. The venue is the Modbury Heights School with talk-in on 148.850 MHz. (WIA News)

**

HAM RADIO IN SPACE: INDIA'S HAMSAT READIED FOR LAUNCH

A Dutch student is helping India put its first Amateur Radio satellite in orbit. Willian Lijenaar, who has graduated as an electronics engineer, has provided a transponder to the satellite.

According to the W-I-A News, the Indian project is called HamSat and is scheduled for launch in four or five months. Reportedly, the coordinator of HamSat had asked the young Dutch engineer to design and build the transponder. Along with Lijenaar's unit an Indian built transponder will be part of new bird as well. (WIA News)

**

RADIO SCIENCE: NASA TO SAVE HUBBLE

NASA has decided to try to save the orbiting Hubble Space Telescope. Possibly by sending a Canadian made robot to fix it.

Nasa Administrator Sean O'Keefe told researchers at the agency's Goddard Space Flight Center in Maryland about the plan. He also has instructed engineers to begin work to put the robotic mission into orbit by 2007. (NASA)

**

DXCC: SOMALIA NOW ACREDITED

Some good news for D-Xers. Effective immediately, the ARRL DXCC Branch will accept QSL cards for operations taking place in Somalia using the 6O / T5 prefix and suffix. This includes the Somaliland which is north-western Somalia and Puntland in north-eastern Somalia. These are autonomous areas but will be accepted along with the southern and central areas of that nation.

The DXCC will also accredit operations possessing written permission from any recognized authority that is acknowledged to be in control of a particular region of Somalia. All cards will count for the Somali Democratic Republic. And says the DXCC, QSL's for past operations will be accepted where proper documentation has been submitted.

Of coarse this is subject to change based on future developments in Somalia. We quill have more D-X news a bit later on. (ARRL, GB2RS)

**

DX

In D-X, word that Kris Partridge, G8AUU, is working in Baghdad and has received the callsign YI9AU. Kris is reported to be active on the High Frequency bands using 100 watts to a long wire but hopes to improve his antennas soon. He is also hoping to become active on Echolink and says that he be in Iraq until early or mid-September.

And G0JMU is again active from Malawi as 7Q7HB. Reports say that he will be there until at least the 22nd of September.

Also, news that 5B4AFM will operate as J42004A from Skopelos and Athens through the 1st September. The island of Skopelos counts as EU-072 for the RSGB Islands on the Air award program.

Lastly listen for the Cook Islands to be on 6 meters with a better signal in coming weeks. This as KC5YKX reports over the VHF Reflector that he has shipped a 5 element beam there for ZK1CG to use. ZK1CG should be on the Magic Band as soon as the antenna arrives. QSL all of these operators in these stories as directed on the air.

(All aboveDX from various DX sources)

**

THAT FINAL ITEM: ECHO - THE TONE ACCESS HAM RADIO SATELLITE

And finally this week a rhetorical question. Why use continuous tone coded squelch access to talk through a ham radio satellite? AMSAT says that there are several very good reasons and Amateur Radio Newsline's Norm Seeley, KI7UP, has them in this report:

--

Continuous tone coded squelch is better known in ham radio circles under its Motorola trade name of P-L or Private Line. And AMSAT says that there are several good reasons to use it on the new Echo ham radio satellite.

First, and simply, is on orbit power management. The ability to minimize the amount of power used by the satellite.

Recent data collection shows that on average, Echo's tone access FM repeater transponder is on for less than 40% of an orbit. There are orbits where that number is as high as 65%, but the average is below 40%. That means the satellite is conserving over 60% of the power that would have been consumed by the transmitter if it were being keyed up by every random signal passing through its receiver. Since you cannot easily change rechargeable batteries on a satellite like you can on a terrestrial H-T, power management is crucial to the long term stability of Echo or any man made satellite.

The second reason kind of tag's onto the first. Its the idea of minimizing the three letters dreaded by hams world wide: Q-R-M.

In the tone access mode Echo does not have to listen to other traffic on the Amateur bands or any other signal not intended for the satellite to relay. While the satellite still has to compete with these R-F sources to capture the receiver, they are not retransmitted downlink. This means you do not have to listen to taxi cabs being dispatched in some third-world nations where the V-H-F Amateur bands have more business going on than ham radio contacts being made. A problem that the world wide Intruder Watch program has been fighting for years.

Yet another reason for tone access on Echo. By closing the audio path when no access tone is present the ground based user hears a short unmodulated carrier for the duration of the squelch tail. This can be used as a good measure of how well you are actually hearing the satellite.

Without tone access filtering, uplink band noise is heard. And, any ham who has heard a carrier access repeater where the squelch is open knows what that sounds like. Amplified noise that is sometimes difficult to differentiate from the actual band noise. In the case of a ham radio satellite it means not knowing if you are hearing the bird at all.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

After Echo's launch there was talk on some terrestrial repeaters that
AMSAT had put a private P-L repeater in space. This is far from the

case. Without tone access, the lifespan of Echo would be significantly reduced and fewer hams would have their chance to make contacts through it. (ANS)

Not true, but one again you try to divert from the true
subject...Your lack of knowledge and experience of Amateur
practice...Not to mention this IS an AMATEUR RADIO forum.

> NURSIE doesn't want to hear any of that...it detracts from his ranting.
> His "operating skill" consists mainly of emotional shouting and yelling
> about "expertise in fine-tuning receivers" and such as he's read in
> QST (a "technical journal" of interest to Archaic Radiotelegraphy
> Relay League members).

Don't want to hear WHAT? Your 15,354th telling of stories from
1950's era Army radio...No, I don't. It's was "interesting" the first
couple of times around, but it's now tedious and lackluster.

And unlike you, I exist in the 21st Century.

The one "archaic" HERE IS YOU, Lennie. Can't seem to get out of
the rut, and you'll ALWAYS be a day late and a dollar short when it
comes to Amateur Radio and 21st Century radio.

Had you been able to make that transition in your "professional"
career, maybe you wouldn't have made another career trying to
"impress" the "unwashed masses" with your "superior intellect" in this
forum.

You're a loser, Anderson. Always have been, always will be.

It really is THAT simple.

Steve, K4YZ

Perhaps he CAN'T do better.

I'd rather think he's just operating with diminished mental
capacity. That WOULD explain a lot.

> Q: How many therapists does it take to change a lighbulb?
> A: Just one - but the lightbulb has to want to change.

Brain is the kid who always picked his nose just to see if he
could "gross" someone out regardless of what it did to his own
reputation.

He's still doing it.

Nope.

>> >Sorry.
>>
>> Yes, you are VERY sorry.
>
>Yet I was amember of the U.S.A.F.; an >>>INSIDER<<<<!

So have I been, Brain.

Not only as a member of CAP, but as a member of the USMC attached to the
USAF at one time.

(Before you go off on a tirade about how the CAP is not "part of the
USAF", you'd better read CAP's Constitutional Charter and see waht SecAF has to
say about it...)

>> Sucks to be you, Brain.
>
>Yet, I am not Brain. Must suck to not be able to spell.

Oh, you are NOT "A" Brain to be sure.

But I "spell" just fine. I get my point across. Without yelling, even.

>> Wanna try for another 12 hours of being a man again, or did the other
>day
>> scare you off?
>
>Steve, I've been a man all of my adult life.

No, you've been a MALE all of your adult life.

The societal obligations of "being a man" require one to be truthful,
trustworty and honest.

Your conduct herein has been far from that.

You unwillingness to act like one even furhter distances you from the
crowd.

>You are a mere shell of a man. Between your seven hostile actions and
>personal tragedy, you are barely recognizable as human.

Uh huh. Right.

>Go get yourself fixed.

Really irks you to keep getting backed into the corner with your own
newsgroup cowpies, doesn't it, Brain?

Maybe if you stopped dropping them, you'd stop stepping in them...

Steve, K4YZ

Oh?

Gee, Brain...I finished my Private checkride in August 1974. That's over
30 years without so much as a flat tire in an airplane that I have been
pilot-in-command of.

To what were you refering?

>amateur radio experience. Except in Kelly's unique case.
>
>But you choose to downgrade it.
>
>Your loss, because you're an idiot.

It's not MY loss, Brain.

I was NCOIC of an HF net control station on Okinawa. Contrary to Lennie's assertions otherwise, I HAVE spent time doing military communications.

I know what Lennie did...It did not require any "skill" in order to "work" stations. They pointed or selected the antenna of choice, chose the frequency most likely supported by the MUF for that time of day, and

I have also spent 32 years in Amateur Radio.

>> You can't.
>
>You can't... tune a tube type transmitter.

Sure I can.

Care to see...!?!?

Oh wait...you said you don't want to be anywhere NEAR me...

Ooooops. Guess you lose. But you DO get an extra 25 NF messaging points for SPELLING "tube" correctly. Or did Lennie help you with that?

>> Leonard H. Anderson = Pathological Liar. Again.

>Universal Truth: Steve Robeson = Whacko!

I am sure you wished it was true.

Actually, he's sounding more and more like N0IMD (which is pretty much
the same thing). I'm surprised that he seems to identify with my
fictional PTCA hero, Billy Beeper, to the point that he has hijacked
that name for his rrap identity. Go figure!

Yes - some version of that.

Kim:
>I actually would like to see that
>implemented here in the United States; however, since the government is
>generally way too administrative heavy and costs for services and goods are
>usually way out of line with reality, I don't think it would be worth the
>hassle of going through it. Ooooo, that just makes me shudder...

Jim:

Yet we may have to go through it sooner or later.
Just one example:
Many prescription drugs are *much* cheaper in Canada than in the USA.
As in 1/2 to 1/3 the price, or more. These aren't knockoffs or generics -
they're the *exact same drugs*, made in the same factories by the same
companies. They cost more here because the market will bear it. Note that the
Bush Administration's prescription drug bill for Medicare specifically
prohibits Medicare from negotiating for lower prices.

But the biggest shocker is this: It's against the law for American citizens to
go to Canada, buy drugs there, and bring them back into the USA. Even though
they are the same drugs from the same factories, the law requires us to buy
them here. Which may not be a big deal - unless you have a chronic condition
that requires a number of expensive drugs. More and more senior citizens are in
that situation, coupled with a limited income, and they're simply breaking the
law in order to live.

Can't we come up with a better system than that?

>[speaking of poor food shopping choices and allowances on the Food Stamp

>of my friends who have. I don't know what "level" of home one must have to
>spend that much on interest, but I've always wondered *cough* who the
>beneficiary is of this.

You'd be surprised! A lot of it has to do with regional variation, interest rates, etc.

I know places where $100,000 buys a mansion, and others where $200,000 won't buy a starter home. And I'm not talking high-end hoity-toity neighborhoods, either. Surf around realtor.com - it's wild.

I've been a homeowner since 1978. In that time I've seen home mortgages go from 9% to 17% and back down to under 5%. Houses that once sold for well under $100K go for over $300K five years later. All depends on a whole bunch of variables.

Spending $5000 a year in interest is absurdly easy - the banks will lend you enough to get you in way over your head! But that's not the point.

Point is that our tax system rewards certain expenditures and not others. Buy a new car and the interest isn't deductible - so if you bought the new car so you could live further out and commute, you'd be financially better off putting the money into a closer-in house. Etc., etc., etc.

I remember a time when *all* consumer interest was deductible. And sales tax. And gasoline tax. And all medical expenses above 2% of AGI.

All gone now. "Tax simplification" a la Reagan.

>>
>> Jim:
>>
>> My point is that when you start to take people's deductions and tax
>> credits away, they'll fight you every inch of the way.

Kim:
>Well, that pain would be OK to go through IF this governmental system
>weren't so handily influenced by the influential. We, the people (those in
>the mainstream and the largest majority--I believe) are stuck in the middle
>of the rich and the poor. We support both ends of the rope, and I say
>poppycock.

Jim:

Yet it is we who benefit most from certain deductions. A truly poor person cannot amass enough capital or credit to buy a house - they're too poor. Those who do get started in home ownership often don't save that much in taxes anyway. (Every bit helps, though!) The truly rich live at a level where such things are more an annoyance than a real problem.

It's those in the middle who get the most benefit.

>>
Kim:
>Hmmmm, yeah, I see your train of thought, I believe.

Jim:

Great pun!

Kim:
> If we had a "goods"
>based system, either the industry would be paying their fair share, or the

>people who buy the products would pay, instead of making *everyone* pay
>through a general tax contribution. Right?

Jim:
Exactly. Actually, the cost would be passed on to the buyer *directly*, rather than through taxes.

And we have to ask: How much of an item's cost is the transportation? If highway users had to pay their fair share, just how much would consumer prices really rise? 10%? 50%?

There's also the fact that such indirect subsidy kills competition and the impetus for more efficient transport modes. Also hurts localized industry. If it only costs 10 cents a head to get the lettuce to your supermarket, who cares where it's grown?

>> Jim:
>>
>> Basically, it would mean that you can't just leave unsecured weapons lying
>> around.

Kim:

>Exactly! And, how can that possibly be unreasonable and, more important,
>"unAmerican?"

Jim:

At first I tended to agree with you, but now I've had second thoughts.

Basically what you're proposing sounds like a restrictive set of gun safety rules. Enforcement would be hard-to-impossible. I doubt there would be any real improvement in gun safety, either. But I could be mistaken.

>> Kim:
>> >But, if we could all get on board with supporting this in a whole

>> >would mean a poor person would have as much intellect as they. I'm
>> >sorry, but I didn't get that threat.
>>
>> Jim:
>>
>> I agree 100%!

And I do understand the threat. Equality of opportunity is actually very scary for some because it means more competition for the goodies. Also means the cost of doing some things will actually rise.

For example, I owned a 1923 vintage house for over 20 years. It took a lot of maintenance - painting, particularly. It was a great house, though - stone walls, hardwood floors, plaster walls. I wondered why houses of that era were so labor-intensive, both to build and to maintain.

Friend of mine in construction explained it simply: In those days, there was plenty of cheap immigrant and minority labor to build and maintain houses like mine. It didn't matter if the guy painting the eave overhang had the intellect to be a good architect - he'd never get the chance to even try. That's all changed now.

>> But the problem is that what you propose and I support would cost big
>> bucks.
>> *Somebody* would have to pay to bring the not-so-hot schools up to the
>> standards of the good ones. In many districts, the schools have to fight
>> for
>> minimal funding because the voters just don't value public education as
>> much as in other districts.

Kim:
>IF, and this is a huge IF, yes, the people of these United States would
>start waking their asses up and see what is happening to them, they'd be
>able to find those big bucks in the crappy spending habits of our
>government--and I don't care who the heck is in office; our government
>wastes tons and tons and tons of money. That's what I meant by this thread
>could get real deep real fast.

Jim:
I heard a radio ad the other day telling about how much was being spent in Iraq to (re)build schools, roads, water supplies, hospitals, etc. Then it equated various dollar expenditures to what could be done here with the money. For example, $10 billion is tossed about like it's nothing, but $10 billion would pay the salaries and benefits of *100,000* teachers at $100,000 each. Or build and equip *400* new schools at $25 million each. Or *50,000* Ivy-League-level 4-year college degrees at $200,000 each.

You get the point.

Kim:
>The hugest spending program there is, that we could probably cleanse first
>and get millions from, is the "government funding" program. Do you know
>that I once read where a government funded study was conducted to find out

>what toothpaste most Americans use? This was years ago...but crap, WHY?
>Cut it out!!!! What is it that John Stossel says,? "give me a break."

Some of that stuff is very worthwhile. Some is pure crap. The rest is in the middle.

For example, consider the whole pollution/environment problem. What it the "good science" on each issue? Industry isn't going to willingly fund studies that may very well show they are defacing the earth - and even if they do, such studies will be viewed skeptically as being influenced by the sponsors. Yet environmental protection groups probably don't have the resources to do the studies either, and if they do, their results should be viewed with similar skepticism. So it becomes a function of govt. to do the job, as an arbitrator of commerce and justice.

>> And we also have the problem of focusing on the wrong issues. Some places
>> get
>> all worked up over teaching evolution, and insist on the inclusion of
>> psuedosciences like "creationism". Meanwhile the math program is terrible.
>>
>> How do we cure that sort of problem?

Kim:
>Oh, now you're really trying to get me in trouble.

Jim:
No, just asking a question.

Kim:
>God is for getting
>taught about in your religious school or church (and, incidentally--the idea
>of "faith based intitiative" makes me cringe) and our public schools are for
>learning whatever it is that the public generally agrees should be taught.

Jim:

Even if what "the public generally agrees should be taught" is false?

Kim:
>If I were asked to vote, and to support politicians who think my way, it
>would be for pretty much nothing on evolution OR creationism; but a solid
>foundation in general sciences, biology, chemistry, etc. If you ask me, the
>amount of time that is spent on evolution or creationism is a cop out and a
>huge WASTE of time.

Jim:

I disagree strongly! Here's why:

Like it or not, evolution *is* part of general science. It's a good theory - all of the observed phenomena support evolution. Of course the theory is constantly being revised as new data comes in, but that is the way science works.

The various forms of creationism are almost universal attempts to reconcile a particular Book to observed phenomena. That said Book was not meant to be taken literally is not up for discussion.

Now if people want to believe that the Earth was created in six 24 hour days and is less than 7000 years old, that's their right. Just as it's their right to believe in a geocentric universe, the Loch Ness monster, UFOs, 'ether theory' (as opposed to relativity) and almost anything else. Just don't call such things "science", as if they meet the requirements of scientific disciplines.

That's what the evolution/creationism thing is really all about. It's not a new thing - Galileo ran into essentially the same problem ("don't contradict our interpretation of our Book") centuries ago. That's why it's important.

Kim.
>Sports is another ache of mine. Too much emphasis and too much sacrifice of
>learning to play the sports. The "pass or play" program is a good one, but
>we never should have let it get to that in this country. Generally, if some
>sports hero is getting interviewed on TV, I just makes me wonder, "who in
>the world would want to sound like that as an adult?"

Jim:

I see it differently. I think sport is *very* important, and that we need more, not less, in schools. But my concept of sport is that every child should participate, not that a small elite should do so, and be raided to the level of near-gods for doing so, while others sit on the sidelines.

(I'm a little aware of what high-school football is like in Texas, so I know where you're coming from).

To me, there's just something not-right with college and even highschool sport serving as a minor-league farm system for professional sports teams. We have minor league baseball, which is not funded by educational systems. Why should education fund what are essentially minor-league basketball and football leagues?

>> Jim:
>>
>> Good points, all! It is the lack of tolerance - the demonization of the
>> opposition - that is most unnerving.

I just reread and finally understood that last bit about the "living opinion". I'd express it this way:

I recall the aftermath of when JFK was shot in 1963. After he was gone and the shock subsided, I noticed that it became almost unAmerican to say anyhting negative about JFK, his decisions, policies, etc. All sorts of things were named or renamed for him, even in places where he could not have gotten elected dog catcher. Supposedly this was out of respect for a fallen leader, but it went far beyond that. Even at that young age, I found myself wondering what had come over all the people who had so vehemently opposed and criticized JFK just a few months earlier. To have read the news in 1964, you'd have thought the entire country loved JFK like a dear close relative, and revered him as a hero.

Were they all hypocrites? Or was it guilt of some kind? Or were they simply trying to deal with the shock? (Remember, in 1963, the last President to die in office was FDR, 18 years earlier, and it had been about 60 years since the last one was killed in office.

>> Kim:

Well, at least you aren't focused on my genitalia per usual.

Steve was the kind of kid who might set fire to a doghouse (with a dog
in it) just to see if he could scare and intimidate the other kids.
He wasn't big enough to physically bully them. He desperately needed
a reputation.

Snorkle as you wish, and then do a reality check.

A $150,000 home (a typical "starter" home in the Mpls/St Paul metro
area) with 20% down would require a mortgage of $120,000.

If you could find a 5% APR mortgage (with no points) your first year
deduction for mortgage interest would approach $6,000.

Snorkle. *cough*

To allow him and Lennie a forum without challenge leaves them the only
ones being heard. Not a good alternative.

Pointing out thier errors and thier irresponsible behaviour is a far
better response.

And they DO give us plenty of opportunities to do THAT, don't they... ! !

You still have no right to just demand that he just give his books to you.

You have made no effort to get him to do so via legally provided-for
channels. I know this because I asked him.

You have no evidence other than some ill defined suspicion. Your obviously tainted personal bias doesn't even remotely approach enough "resonable doubt" as to get law enforcement to do anything on thier own volition.

You're barking at the moon...Again.

> You still have no right to just demand that he just give his books to you.

You obviously didn't follow Dieter's suggestion to read the Code. I'll make it easy for you; it's pasted below. All Dieter needs to do is walk into their office and demand to inspect the documentation. And to make it really easy for you, I capitalized the relevant phrase. When it comes to tax law, Dieter knows what he's talking about.

26 USC 6104(d). Public Inspection of Certain Annual Returns and Applications for Exemption.
(1) In general.--In the case of an organization described in subsection (c) or (d) of section 501 and exempt from taxation under section 501(a)--
(A) a copy of--
(i) the annual return filed under section 6033 (relating to returns by exempt organizations) by such organization, and
(ii) if the organization filed an application for recognition of exemption under section 501, the exempt status application materials of such organization, shall be made available by such organization for inspection during regular business hours by any individual at the principal office of such organization and, if such organization regularly maintains 1 or more regional or district offices having 3 or more employees, at each such regional or district office, and
(B) upon request of an individual made at such principal office or such a regional or district office, a copy of such annual return and exempt status application materials shall be provided to such individual without charge other than a reasonable fee for any reproduction and mailing costs.
The request described in subparagraph (B) must be made in person or in writing. IF SUCH REQUEST IS MADE IN PERSON, SUCH COPY SHALL BE PROVIDED IMMEDIATELY and, if made in writing, shall be provided within 30 days.

Combine that with doing
a better job of it than they.

Perhaps you recall a
film of years past called
"Roxanne".

An updating of the classic
tale of Cyrano de Bergerac.

Steve Martin played a small-
town fire chief with a large
nose. And impressive martial
arts skills.

Bully-in-a-bar one night calls him
"big nose".

Rather than becoming enraged,
he is disappointed that with such
inspiration, all the bully can muster
for an insult is "big nose".

He then proceeds to rattle off 25
highly creative insults all based on
oversized proboscis.

The bully is completely outclassed.
Also embarrassed and shamed.

>> >> >> But, you and this "Quitefine" deserve each other.
>>
>> We take that as praise, bordering
>> on flattery.
>
>He praises without knowing it. Yes!

Without knowing or intending.
Yet another historic precedent.
In the early days of the past century,
the term "ham" as an adjective was
usually an insult.

Ham radio operators turned the insult
on its head, making it a badge of honor.

>There is yet more truth to come. To use Morse code as an excuse for
>dumping the excrement of a black soul is where a truth needs exposed.
>It is not the Morse, it is the hatred.

"It is not the Morse, it is the hatred"

> Amateur Radio APPLICATION >>IS<< different that military applicaitons,
> Brain.

>And there it is! Grids and dips are different between the two
"applicaitons!"

>You're such a liar and an idiot.

You're the idiot, Brian. Refer to any "Websters" and enlighten
yourself on the difference between "application" and "operation".

The APPLICATIONS of radio in the Armed Forces are to support and
conduct the tactical and strategic prosecution of military force

against an armed foe.

The APPLICATIONS of radio in AMATEUR Radio are many and varied, however NONE of them include the use of armed force and ONLY support the Armed Forces with health and welfare traffic for it's members.

Would it be any MORE clear if I used the adjective "OBJECTIVES" in place of "APPLICATIONS"...?!?! Or is that still too many syllables for you?

Now...I have NEVER said that there is ANY difference in "physics" between Amateur Radio and any other means of electromagnetic communications, Brain. Nor have I suggested that the OPERATION of the radios themselves is any different.

THAT is a diversion your bunk buddy is trying to pass off.

It seems YOU are the only one who bought into it.

I know it's going to hurt, Brain, but get yuor head out of your butt.

READ what is in fornt of you, and TRY to reamin objective...THINK about what you are saying BEFORE you hit that "SEND" key and you won't be left with your hiney out in the breeze...again...

And deal with those anger issues elsewhere.

Okay, I read it. There are certainly a lot of "ifs" and "exceptions".
If you believe it applies, do something about it. Your continuing
carping
on the issue leads me to believe that it is only you with a problem
regarding Bill Pasternak.

If you don't or won't act, you have no one to blame but yourself.

Maybe he does; maybe he doesn't. He hasn't told us of his knowledge of
where Bill Pasternak's operation falls under all of those "ifs" and
"exceptions". You'd think if the issue is important to him, he'd act.
He hasn't and my belief is that he won't.

His frequent posts on the matter read like the rantings of a guy wearing
an aluminum foil cap.

You don't think that I shall?

Well, tell me then why I have the following information (and now make public
here - from the electronic version of IRS Publication 78):

AMATEUR RADIO NEWSLINE INC
28197 ROBIN AVE
SAUGUS, CA 91350
EIN: 95-4867766

Did I merely look that up for "my health?"

It's not about me reading the code.

It's about Dieter not having the intesitnal fortitude to do it.

He's been whing about Bill for at least two years or more and
hasn't taken step-one to get anything done EXCEPT whine...Oh, and to
"Call Bill out" in THIS forum, which isn't covered in ANY code.

> I'll make it easy for you; it's pasted below.

And it's still irrelevent.

I bet you've looked up more than one skirt in your life too,
Dieter, but it doesn't make you a gynecologist, either.

We'll see what you "do" with it.

First of all, I seriously doubt you "do" anything.

And even if you do, I seriously doubt that anything will ever
come of it.

We'll see.

Hello! I just happened accross this page by accident and it's nice to
see people attempt to write haiku. Haiku is a 17 syllable poem based
on a 5-7-5 syllable format. For more information about Haikus, go to
http://www.toyomasu.com/haiku/#whatishaiku . There you will find more
information on how to write good haiku. Here is my attempt;

As I scan the bands,
I hear the voices of Hams.
I LOVE this hobby.

His ONLY operating has always been dependent upon the STATION
license or other federal grant or approval.

That grant has always specified the mode and power. Lennie has
never had the discretion of choosing the mode, time, power or
application other thanwhat the grant allowed.

> > Poor Bill Cross.

I imagine a person in Mr Cross' position can seperate the bull
from the bullstuff. His protestations to the contrary, Lennie's own
"replies" are pretty much "kill the messenger" kinda stuff.

What happened Lennie?

Trip and stub your toe after this?

Tried to pull yet another fast one and got tripped up over that
"LACK OF PRACTICAL EXPERIENCE" thing...Of course it's been discussed
in here on more than one occassion, and HAD you been paying atention,
you MIGHT have clued yourself in.

You have yet to explain how your friend's Extra Class license is
any more "real" than anyone elses. I checked Part 97, and I didn't
find one single sentence that suggests that his license has so much as
one cycle more of "realness" than mine or anyone elses.

Of course compared to YOUR Amateur license, his IS more "real"...

Steve, K4YZ

The Amateur Operator tries to send messages from here to there.

But the Military Operator is different. He merely tries to send
messages from here to there.

Oh, now I see just how different they really are. Thanks for your
enlightenment on the subject.

You've proved yourself again an idiot and liar.

> Now...I have NEVER said that there is ANY difference in "physics"

Then what are you talking about? Do you even know?

Specifically, why is the experience of a military operator
inconsequential when compared to an amateur operator.

This is your one big opportunity to back out of your lies. Are you up
to it?

> come of it.
>
> We'll see.

Well, I will say this:

No one here was able to provide anything that directly refuted my conclusion.

The last time I did this (or anything like it) was to a local repeater coordinating body which was acting "less than responsibly" (i.e. no meeting, no acknowledgements for RFC's nor any OTHER responses to coordination requests, etc.). They WEREN'T listed in the IRS's public charity database, and I verified that when I filed an IRS form 4506-A to get a copy of their last 990-series return. That request came back "entity does not exist" (IRS response dated April 11, 1996). [That also means that they NEVER filed for non-profit status ever.] I then challenged their coordinator status before the NFCC (during its first year of existence: FY 96/97). I could have equally complained to the IRS also at that point, but decided to defer that for the time an appeal of the NFCC decision regarding my complaint to the FCC would be appropriate; the government doesn't like to get involved except as a last resort.

Guess what? That frequency/repeater coordinator group now has [annually] held general meetings on a regular schedule since 1997, has cleaned up its act by issuing acknowledgement postcards to every piece of mail sent to its P.O. Box (not just RFC's), and timely responds to RFC's and other issues, ...; i.e. it is now acting "responsibly." I will grant you that my actions on their situation may not have been 100% responsible for this as there was a period where a competing coordinating group was set up (the "440 FCA" of San Dimas, CA), but my actions were probably at least 33% contributing. [BTW, the group in question was SCRRBA - not TASMA, which also had a competing coordinating group in the 1990's for about 2 years.]

Be careful of what you wish for (or push others into doing) - you might get it.

Do you really think that I would dare publicly make such an accusation if I lacked a reasonable basis for doing so? All you would rather do is fight with me over my conclusion WITHOUT introducing a reasonable, alternative explanation. [No one else has suggested one either.] All AR Newsline has to do is to voluntarily disclose, and if they do so and have a reasonable explanation which is publicly acceptable, the issue goes away. However, if my conclusion were correct (it hasn't been proven so - yet), they can't disclose, even if I choose to compel disclosure under the federal statute previously cited.

Except they weren't "his" operations. Len did not design, build, or pay for
ADA, for example. Nor did he "operate" the transmitters there, in the sense
that hams "operate" their stations.

If you read his exploits carefully, you begin to realize that in most
situations he was one of a large group, not an independent operator. Not that
there's anything wrong with either.

I wonder at Steve/K4YZ's repeated challenges for Len to get a ham license.
Would Steve rather have Len on the ham bands or here?

>> >I remember that one and Cutey Boy's memorable statement. They are,

>
>Precisely.

So why get all upset? I sure don't. Len's not going to show up on the ham
bands. He's not going to write any new technical articles of any consequence
for amateur radio publications. He's not going to show up on 7037 kHz CW, nor
best any of us in a contest or DXCC.

Sure we have.

You have said that Bill's not using the funds appropriately.

I (and others) have pointed out that Bill's "service" routinely and
reliably puts it's reports out. Ergo he's obvioulsy spending the money on the
work he claimed he wanted the funds for.

The "burden of proof" for anything else is on YOUR shoulders. You're
making these fanciful assertions, so it's up to YOU to prove it.

>The last time I did this (or anything like it) was to a local repeater
>coordinating body which was acting "less than responsibly" (i.e. no meeting,

Were they soliciting funds AS a charitable organization? Did they alledge
to have 503(c) status?

And who is Dieter Stussy to decide what's "responsible" in the actions of
any entity?

>They WEREN'T listed in the IRS's public charity database, and I

And I am sure they just jump to the microphone any time you sign on the
repeater.

>Be careful of what you wish for (or push others into doing) - you might get
>it.

Consider yourself pushed, Dieter. I still say you're barking up the wrong
tree.

>Do you really think that I would dare publicly make such an accusation if I
>lacked a reasonable basis for doing so?

Considering THIS forum, absolutely!

So far your "reasonable basis" has been "I hate Bill Paternak" and nothing
else. Not a single shred of verifyable, attestable fact.

>All you would rather do is fight
>with
>me over my conclusion WITHOUT introducing a reasonable, alternative
>explanation. [No one else has suggested one either.]

I am "fighting" with your assinine whinigns about Newsline publishing it's
releases in a forum ABOUT Amateur Radio...You're the one who keeps whining
about ARN's alleged abuses of it's solicitations.

I can SEE and HEAR the results of thier solicitations, Dieter.

>All AR Newsline has to
>do
>is to voluntarily disclose, and if they do so and have a reasonable
>explanation

I still say you're going to do nothing but create hate and discontent for no other reason but to salve your wonded ego over some absolutely assinine local issue that peripherially involved Bill Paternak.

But you go right ahead. If you're right, I'll most gladly render a sincere "I stand corrected". However when it goes the way >>I<< think it will, I would expect YOU to do the same.

Steve, K4YZ

>If you read his exploits carefully, you begin to realize that in most
>situations he was one of a large group, not an independent operator. Not that
>there's anything wrong with either.

Nope. IF he had done them. His MOS was as a radio tech...Not an
"operator". I doubt he ever got any closer to radiating RF than loading up the
rig into a dummy load.

>I wonder at Steve/K4YZ's repeated challenges for Len to get a ham license.
>Would Steve rather have Len on the ham bands or here?

What's to worry? Lennie can't pass the test anyway, so none's-to-worry.

>>> >I remember that one and Cutey Boy's memorable statement. They are,
>>> >you'll have to admit, quite similar in outcome.
>>>

It isn't a matter of "was able". It's more a matter of "doesn't care".
So far, you're the only person remotely interested in your "conclusion".

I'll just assume that you actually have a life.

> Be careful of what you wish for (or push others into doing) - you might get it.

I haven't wished for anything and I'm pretty sure that Steve hasn't
wished for anything. I certainly haven't pushed you into anything. If
my words have that kind of influence over you, you have other issues
which need to be addressed.

I don't find Pasternak's amateur radio news posts offensive. You do.
I view your carping and whining far more annoying than anything
Pasternak does.

> Do you really think that I would dare publicly make such an accusation if I
> lacked a reasonable basis for doing so?

Sure. There's plenty of precendent all around.

> All you would rather do is fight with
> me over my conclusion WITHOUT introducing a reasonable, alternative
> explanation. [No one else has suggested one either.]

I don't view this as a fight. I don't owe you a reasonable or alternate
explanation.

> All AR Newsline has to do
> is to voluntarily disclose, and if they do so and have a reasonable explanation
> which is publicly acceptable, the issue goes away.

Go ahead and force his hand, Don Q.

> However, if my conclusion
> were correct (it hasn't been proven so - yet), they can't disclose, even if I
> choose to compel disclosure under the federal statute previously cited.

Well, the excitement and melodrama continue to build over this molehill.

The operators operated. Len maintained.

> If you read his exploits carefully, you begin to realize that in most
> situations he was one of a large group, not an independent operator. Not that
> there's anything wrong with either.

The station operated 24/7. Through the years, Len has modified that to
show that *he* operated 24/7.

> I wonder at Steve/K4YZ's repeated challenges for Len to get a ham license.
> Would Steve rather have Len on the ham bands or here?

Len's lucky it doesn't come down to a vote on either.

C'mon, Jim. You're just restating the obvious. Did you ever find it
strange, given the facts contained in your statement, that Len is driven
to make changes in the regulations which govern amateur radio?

> >> >> >Some changes must come very slowly.

I'd have to correct that to read: "Somebody at the FCC is supposed to
read all of it". That doesn't mean that anyone at the FCC is compelled
to act on any of it.

> >> >> - FCC got about 2500 comments on 98-143, the last big restructuring.

"Putz", as your bunk buddy Lennie will attest, is NOT the proper name for genitalia of either gender.

Details, Brain...Ya gotta work on getting the details right.

So far, you're waaaaaaaay behind.

Steve, K4YZ

>

> You've proved yourself again an idiot and liar.

No, Brain.

YOU just proved how limited YOUR scope of knowledge is about what
Amateur Radio is, how it is used, and what people get out of it.

If you think that all Amateurs do is "...sned messages from here
to there", then you're even MORE ignorant and MORE assinine than I
allowed myself to believe.

> This is your one big opportunity to back out of your lies. Are you up
> to it?

Again, there are no lies to "back out of", Brain.

> I'm not the one capitalizing every third word and making tons of
> typo's. Either a spell checker or some meds might help. Or both.

No, you're not the one "capitalizing every third word and making
tons of typo's"....

BTW...it's "typos", not "typo's". Since you're making an issue of
spelling, you OUGHT to get it right...especially in the very sentence
where you are chastising someone else for it! ! ! ! !

You're the one insisting he operates "legally" from DX locations
for which he cannot validate or substantiate ANY operation, legal or
otherwise.

You're the one who has expressed public admiration for a known
pathological liar.

You're the one who thinks "...Part 15 devices play a major role
in emergency comms"..No proof on that one either.

I can go on, Brain. Haven't you had enough yet? Do you ENJOY
being humiliated with your OWN words??? You must...You leave yourself
open to it EVERY day.

EVERY day.

What's next?

Steve, K4YZ

>>there's anything wrong with either.

Make up your mind, nursie. First you lie and say I was a "radio clerk."

Now you say I was "one of a large group."

A Signal Battalion has about a thousand servicemen in it. "Large" is a subjective word. Try to focus.

> Nope. IF he had done them. His MOS was as a radio tech...Not an
>"operator". I doubt he ever got any closer to radiating RF than loading up
>the rig into a dummy load.

How about that. Nursie, who knows some imaginary "real truth" to the military ("Sorry, Hans, MARS >>IS<< amateur radio") now wants to "revise" old U.S. Army Military Occupation Specialty descriptions!

MOS 281.6 - Microwave Radio Relay Operations and Maintenance
Supervisor. [the ".6" denoted the supervisory level]

That was on the record, along with brevet MOSs of Fixed Station
Communicaitons Operations and Maintenance Supervisor and
VHF-UHF Radio Relay Operator and Maintainer.

A four-hundred foot rhombic antenna is not a "dummy load" except
to a dummy who never loaded one up. With 40 KW of RF feeding it
it will radiate a bit.

Now, in truth, a 12 Watt 1.8 GHz microwave terminal transmitter
feeding 250 feet of 1 5/8" pressurized rigid coax results in a bit
less than 4 Watts at the 10 foot parabolic reflector antenna. In
that sense it might be somewhat like a "dummy load."

Army station ADA was, in the 1950s, only the third largest Army
station in the Army Command and Administrative Network (ACAN),
but the radiated RF at the transmitter site antenna field was about
350 KW total...and there 24/7.

> Lennie's last foray into Amateur Radio publishing wound up contributing
>to the demise of that same journal. Who would WANT to "publish" him...?!?!

Woefully WRONG. Tsk, tsk.

The amateur radio advertising monies were not there to support all the
independent publications. Publisher Skip Tenney had two monthlies
in the press at the time and the ad income was dropping. HR was
sold to CQ Communications. That was in 1990.

I had to quit HR as an Associate Editor in 1988 due to other job
requirements. I was never there physically at HR hq; most "staffers"
worked at home with everything sent by mail back and forth, plus
telephone calls. Common method in the hobby publication trade.
My work spoke for itself and that is how I was "hired." I never met
Jim Fisk (ex-W1HR, SK) nor Alf Wilson nor Rich Rosen nor Terry
Northrup in person.

Ham Radio magazine was an independent amateur radio interest
publication that survived for 22 years. It gained a solid reputation
during those 22 years and is still respected by radio amateurs who
know anything about the technology of radio. A full set of articles
from those 22 years of independent publishing is available from
CQ for $150 (for all three CDs). ARRL also resells it.

>
>Except they weren't "his" operations. Len did not design, build, or pay for
>ADA, for example. Nor did he "operate" the transmitters there, in the sense
>that hams "operate" their stations.

Broadcast engineers don't "operate" their stations like hams do.

Commercial communications people don't "operate" their stations
like hams do.

Former USN radio operators didn't "operate" their stations like
hams do.

Government employees, such as those with Department of State,
don't "operate" their stations like hams do.

Sunnuvagun!

>If you read his exploits carefully, you begin to realize that in most
>situations he was one of a large group, not an independent operator. Not that
>there's anything wrong with either.

False. In here, nothing can escape the Glory and Majesty and Nobility
of Operating Like Hams Do in amateur radio!

Such as walking into an HRO with a credit card, then walking out with
everything and doing the plug-and-play at home...doing it as Hams
Do! :-)

Tsk. Right, I've never been an "independent operator," not even with
a PLMRS business radio. As a partner in a business I wasn't the
sole "owner" of that radio. How sad... :-)

>I wonder at Steve/K4YZ's repeated challenges for Len to get a ham license.
>Would Steve rather have Len on the ham bands or here?

Tsk. Wrong handle. QUITEFINE is supposed to ask the leading
questions. Anonymouses do that.

>>> >I remember that one and Cutey Boy's memorable statement. They are,
>>> >you'll have to admit, quite similar in outcome.
>>>
>>> You mean neither has yet made good on what they said they'd do.

>
>So why get all upset? I sure don't.

Yes you do. The Quitefine pseudonym is a sure sign of that. :-)

>Len's not going to show up on the ham bands.

Already been on those bands. Legal and not as an amateur. :-)

>He's not going to write any new technical articles of any consequence
>for amateur radio publications.

True. They sure as heck don't pay enough. :-)

>He's not going to show up on 7037 kHz CW, nor
>best any of us in a contest or DXCC.

Absolutely no one could beat the PCTA at CW contests.

Why would they? :-)

>What's interesting, too, is that back in those pre-ECFS times, FCC got more
>than twice as many comments, even though there were far fewer hams and far
>fewer Americans than today.

Tsk. Still in the past. Try looking back just a half year. :-)

18 Petitions up for Comment at FCC and easily overwhelming the old
docket 98-143 comments. :-)

>So Len does, indeed, promulgate myths.

The League is your shepherd...you shall not want.

You are not led into temptation.

Now lay face down on the floor in the sign of the cross and take your
Vows for life...

LenAnderson@ieee.org

Lots of "challenge" walking into an HRO, presenting a plastic
card, taking home everything ready-built, following hook-up
instructions... :-)

About as "challenging" as setting up a CB base station.

About as "challenging" as setting up a new personal computer.

About as "challenging" as installing a home music system
stereo receiver.

Ho hum.

>>> >You're still not a participant after decades of self-declared

>>fine. He's really showing us.

Tsk. More imaginative rambling. :-)

My "case" in here was simply to argue against a morse code test.

Since so many PCTA extras inhabited this din of inequity, that was all but impossible in the torrent of personal abuse rendered against all NCTA.

The PCTA extras could never, ever make their case for maintenance of the morse code test...but they cannot ever lose any argument so the personal abuse levelled against NCTA continues...and continues.

>
>Does it ever stop?

Seemingly, not.

Nursie fantasyland social mores are quite different than in reality.

Despite an issue worth discussing ("ARRL to propose subband-by-
bandwidth regulation"), everything seems to wind up with nursie
insulting everyone she doesn't agree with. Nearly every thread gets
like that.

No wonder Robert Casey, among others, is irritated.

Nope, they can't, Robert.

The vultures have smelled carrion and swooped in for their share
of the "kill" this weekend. :-)

Bon apetit. Enjoy.

>Ahh, I see that you and Steve, (or is it Steve and Steve?) are focused
>on the male genitalia. The only Jimmy approved word for such is
>"Putz!" Get with the program.

The anonymouses, thinking their "identity" is "hidden," let out
their true feelings. Hence the focus on male genitalia.

It's true that all must use the Jimmie-approved words and phrases.

Not doing so might invoke yet another anonymouse or, at worst,
terribly-long essays on the Whichness of the What from Jimmie.

Might be another Sermon on the Antenna Mount from his holiness.

>> > We've still got Steve with his turette's syndrome and he isn't going to

>>
>> He doesn't need help. You don't want him to get help.
>
>Yes he does. Why wouldn't anybody?

Like the anonymouses, the unreal fantasyland dwellers like it the
way they have it. Psychological survival stuff, retreating into a
fantasy helps them cope with frustrations of reality.

>> End it. Quit posting to him.
>

Irrelevant. Gene has been around a long time, retired from a
career at the FAA, had an amateur radio license for a long time,
too. Checked out with multi-engine rating as a civilian. :-)

Poor nursie. Still trying to insult and demean those who were
working REAL HF communications a half century ago. Tsk.

> What happened Lennie?
>
> Trip and stub your toe after this?

Irrelevant. This is not a forum for podiatry.

Despite nursie putting foot in mouth so much...

> Tried to pull yet another fast one and got tripped up over that
>"LACK OF PRACTICAL EXPERIENCE" thing...Of course it's been discussed
>in here on more than one occassion, and HAD you been paying atention,

>any more "real" than anyone elses. I checked Part 97, and I didn't
>find one single sentence that suggests that his license has so much as
>one cycle more of "realness" than mine or anyone elses.

You are unreal, nursie. :-)

> Of course compared to YOUR Amateur license, his IS more "real"...

No problem. This newsgroup isn't reality. It is a din of inequity filled
with fantasizers like yourself trying to enoble a hobby far beyond
what it really is...such as calling yourself "pilot in command" instead
of simply a private pilot.

"Pilot in command?" Of a two-seater, single engine light general
aviation aircraft?

That has nothing to do with amateur radio. Neither does nursing.

Back to your dreamings of glory, nursie. You waste everyone's time.

>How do you like your crow???

No crow, Brain.

You continue to repeat that over and over all-the-while leaving out the
parts wherein I went on to say that MARS is the very essence of the spirit of
Amateur Radio, and that without Amateur Radio, MARS would not exist.

Both of those sentiments have been verbalized by members of MARS before.

There's no crow to eat, Brain. But you go right on ahead and keep trying
to pass that off as some "lie"...You keep trying, since it's about all you can
pull out of your hat.

Now...where's the documentaiton on your T5 operation?

2884. Canadian No Code Proposal Open For Comment

Newsgroup: rec.radio.amateur.policy
Date: 2004-08-30 22:22:07 UTC
From: Avery Hightower <Hightower@cosmos.net>
Message-ID: <jMNYc.8692$6o3.1454@newsread2.news.atl.earthlink.net>
Source record: 96561

RAC Bulletin 04-22E - Industry Canada Gazette Notice DGRB-003-04 on Morse Code.

On Saturday, 28 August, 2004, Industry Canada published Canada Gazette Notice DGRB-003-04 - Consultation on "Recommendations from Radio Amateurs of Canada to Industry Canada Concerning Morse Code and Related Matters", and invited comments. Amateurs have sixty days in which to respond.

The RAC Proposal deals with the WRC-2003 decisions concerning Morse as a mandatory qualification for HF operation in the Amateur Service. RAC has recommended that Industry Canada delete the mandatory requirement for Morse testing but leave it as a voluntary qualification as it may be required for reciprocal operation in those countries retaining a Morse requirement.

Amateurs should address comments to Industry Canada as directed in the Notice. RAC recommends that Canadian amateurs endorse this proposal.

Amateurs with questions for RAC should direct them to their regional RAC Director.

Proper or not, you're the one constantly using it. And Webster's
defines it as "penis." Unless you're referring to guys wearing
skirts. Oh, nevermind - don't want to go there with you!

And then there's that reference to homosexuality again. The one that
you claim not to make, and have never made.

You sure are a nut.

Make up your mind, nursie. First you lie and say I was a "radio clerk."

Now you say I was "one of a large group."

A Signal Battalion has about a thousand servicemen in it. "Large" is a subjective word. Try to focus.

> Nope. IF he had done them. His MOS was as a radio tech...Not an
>"operator". I doubt he ever got any closer to radiating RF than loading up
>the rig into a dummy load.

How about that. Nursie, who knows some imaginary "real truth" to the military ("Sorry, Hans, MARS >>IS<< amateur radio") now wants to "revise" old U.S. Army Military Occupation Specialty descriptions!

MOS 281.6 - Microwave Radio Relay Operations and Maintenance
Supervisor. [the ".6" denoted the supervisory level]

That was on the record, along with brevet MOSs of Fixed Station
Communicaitons Operations and Maintenance Supervisor and
VHF-UHF Radio Relay Operator and Maintainer.

A four-hundred foot rhombic antenna is not a "dummy load" except
to a dummy who never loaded one up. With 40 KW of RF feeding it
it will radiate a bit.

Now, in truth, a 12 Watt 1.8 GHz microwave terminal transmitter
feeding 250 feet of 1 5/8" pressurized rigid coax results in a bit
less than 4 Watts at the 10 foot parabolic reflector antenna. In
that sense it might be somewhat like a "dummy load."

Army station ADA was, in the 1950s, only the third largest Army
station in the Army Command and Administrative Network (ACAN),
but the radiated RF at the transmitter site antenna field was about
350 KW total...and there 24/7.

> Lennie's last foray into Amateur Radio publishing wound up contributing
>to the demise of that same journal. Who would WANT to "publish" him...?!?!

Woefully WRONG. Tsk, tsk.

The amateur radio advertising monies were not there to support all the
independent publications. Publisher Skip Tenney had two monthlies
in the press at the time and the ad income was dropping. HR was
sold to CQ Communications. That was in 1990.

I had to quit HR as an Associate Editor in 1988 due to other job
requirements. I was never there physically at HR hq; most "staffers"
worked at home with everything sent by mail back and forth, plus
telephone calls. Common method in the hobby publication trade.
My work spoke for itself and that is how I was "hired." I never met
Jim Fisk (ex-W1HR, SK) nor Alf Wilson nor Rich Rosen nor Terry
Northrup in person.

Ham Radio magazine was an independent amateur radio interest
publication that survived for 22 years. It gained a solid reputation
during those 22 years and is still respected by radio amateurs who
know anything about the technology of radio. A full set of articles
from those 22 years of independent publishing is available from
CQ for $150 (for all three CDs). ARRL also resells it.

>Except they weren't "his" operations. Len did not design, build, or pay for
>ADA, for example. Nor did he "operate" the transmitters there, in the sense
>that hams "operate" their stations.

Broadcast engineers don't "operate" their stations like hams do.

Commercial communications people don't "operate" their stations
like hams do.

Former USN radio operators didn't "operate" their stations like
hams do.

Government employees, such as those with Department of State,
don't "operate" their stations like hams do.

Sunnuvagun!

>If you read his exploits carefully, you begin to realize that in most
>situations he was one of a large group, not an independent operator. Not that
>there's anything wrong with either.

False. In here, nothing can escape the Glory and Majesty and Nobility
of Operating Like Hams Do in amateur radio!

Such as walking into an HRO with a credit card, then walking out with
everything and doing the plug-and-play at home...doing it as Hams
Do! :-)

Tsk. Right, I've never been an "independent operator," not even with
a PLMRS business radio. As a partner in a business I wasn't the
sole "owner" of that radio. How sad... :-)

>I wonder at Steve/K4YZ's repeated challenges for Len to get a ham license.
>Would Steve rather have Len on the ham bands or here?

Tsk. Wrong handle. QUITEFINE is supposed to ask the leading
questions. Anonymouses do that.

>>> >I remember that one and Cutey Boy's memorable statement. They are,
>>> >you'll have to admit, quite similar in outcome.
>>>
>>> You mean neither has yet made good on what they said they'd do.
>>
>>Precisely.
>
>So why get all upset? I sure don't.

Yes you do. The Quitefine pseudonym is a sure sign of that. :-)

>Len's not going to show up on the ham bands.

Already been on those bands. Legal and not as an amateur. :-)

>He's not going to write any new technical articles of any consequence
>for amateur radio publications.

True. They sure as heck don't pay enough. :-)

>He's not going to show up on 7037 kHz CW, nor
>best any of us in a contest or DXCC.

Absolutely no one could beat the PCTA at CW contests.

Why would they? :-)

>What's interesting, too, is that back in those pre-ECFS times, FCC got more
>than twice as many comments, even though there were far fewer hams and far
>fewer Americans than today.

Tsk. Still in the past. Try looking back just a half year. :-)

18 Petitions up for Comment at FCC and easily overwhelming the old
docket 98-143 comments. :-)

>So Len does, indeed, promulgate myths.

The League is your shepherd...you shall not want.

You are not led into temptation.

Now lay face down on the floor in the sign of the cross and take your
Vows for life...

LenAnderson@ieee.org

Lots of "challenge" walking into an HRO, presenting a plastic
card, taking home everything ready-built, following hook-up
instructions... :-)

About as "challenging" as setting up a CB base station.

About as "challenging" as setting up a new personal computer.

About as "challenging" as installing a home music system
stereo receiver.

Ho hum.

>>> >You're still not a participant after decades of self-declared

>>fine. He's really showing us.

Tsk. More imaginative rambling. :-)

My "case" in here was simply to argue against a morse code test.

Since so many PCTA extras inhabited this din of inequity, that was all but impossible in the torrent of personal abuse rendered against all NCTA.

The PCTA extras could never, ever make their case for maintenance of the morse code test...but they cannot ever lose any argument so the personal abuse levelled against NCTA continues...and continues.

>Does it ever stop?

Seemingly, not.

Nursie fantasyland social mores are quite different than in reality.

Despite an issue worth discussing ("ARRL to propose subband-by-
bandwidth regulation"), everything seems to wind up with nursie
insulting everyone she doesn't agree with. Nearly every thread gets
like that.

No wonder Robert Casey, among others, is irritated.

Nope, they can't, Robert...even though, as the subject title says,
they have gotten "boring guys" in here. :-)

The vultures have smelled carrion and swooped in for their share
of the "kill" this weekend. :-)

Bon apetit. Enjoy.

Unfortunately for most readers, you are...

> And you haven't answered my questions. (As if we didn't already
>know the answers, but I'll ask anyway...) Does your wife ever read
>any of this? Your kids? What would they think if they knew what a
>fool thier father made of thier family in public?

Tsk. Still don't use the spell-checker?

The problem is not the hastily-typed-in-anger "replies" by nursie,
it is the attempts at ridicule of others to cover up an inability to
discuss subjects coherently.

Vultures are carrion eaters. Bon apetite, PILOT IN COMMAND.

:-)

Irrelevant. Gene has been around a long time, retired from a career at the FAA, had an amateur radio license for a long time, too. Checked out with multi-engine rating as a civilian. :-)

Poor nursie. Still trying to insult and demean those who were working REAL HF communications a half century ago. Tsk.

> What happened Lennie?
>
> Trip and stub your toe after this?

Irrelevant. This is not a forum for podiatry.

Despite nursie putting foot in mouth so much...

> Tried to pull yet another fast one and got tripped up over that
>"LACK OF PRACTICAL EXPERIENCE" thing...Of course it's been discussed
>in here on more than one occassion, and HAD you been paying atention,

>any more "real" than anyone elses. I checked Part 97, and I didn't
>find one single sentence that suggests that his license has so much as
>one cycle more of "realness" than mine or anyone elses.

You are unreal, nursie. :-)

> Of course compared to YOUR Amateur license, his IS more "real"...

No problem. This newsgroup isn't reality. It is a din of inequity filled
with fantasizers like yourself trying to enoble a hobby far beyond
what it really is...such as calling yourself "pilot in command" instead
of simply a private pilot.

"Pilot in command?" Of a two-seater, single engine light general
aviation aircraft?

That has nothing to do with amateur radio. Neither does nursing.

Back to your dreamings of glory, nursie. You waste everyone's time.

Actually, what Riley said was, Baxter's bulletin was not
illegal, but promoting his various "businesses" using ham
radio is illegal. He also said it was illegal to fire up on
top of other amateurs, and to use the radio to harass other
amateurs.

>Amateur Radio, and that without Amateur Radio, MARS would not exist.

MARS began as a prototype IN the U.S. Army.

The first letter of the acronym stands for MILITARY, not civilian.

The secnond letter of the acronym stands for AFFILIATE, not
amateur.

MARS continues to exist whether or not there are civilian amateurs
volunteering to help the military.

See Department of Defense Directive 4650.2 dated Nov 2003.

You have NO authority to demand any "authorization," let alone
"documentation."

Remember that you are NOT in the military anymore.

"Sned" him the proper directives on chastisement... :-)

>>Get help.
>
> Get your head out of your butt, Brain. You embarrass your family name as
>it is...Don't you think THEY deserve a break? WE sure do!

So...NURSIE's personalities took a poll of the "we?"

You have done far worse embarrassment to your "family name," perhaps
greater than brother Paul...

You've consistently brought "family" into this rant of yours. That's
irrelevant to anything. Nobody's "family" is involved in any of this.

Would Mrs. Nursie approve of the way you handle yourself in here?

If she found out, you might be looking for a THIRD Mrs. Nursie.

Hope the alimony payments are as small as possible. How else can you afford the avgas to be "pilot in command" of that two-seater, single-engine aircraft? [may sell some of the badges off your poopy suit to make extra money? tsk]

Crow, Steve.

> You continue to repeat that over and over all-the-while leaving out the
> parts wherein I went on to say that MARS is the very essence of the spirit of
> Amateur Radio, and that without Amateur Radio, MARS would not exist.

I'm merely repeating what you said. If it's untrue, then you have
only yourself to blame.

> Both of those sentiments have been verbalized by members of MARS before.
>
> There's no crow to eat, Brain. But you go right on ahead and keep trying
> to pass that off as some "lie"...You keep trying, since it's about all you can

Decent attempt at diversion. You have yet to "verbalize" how military
radio operations and amateur radio operations are substantially
different.

> >> >> THAT is a diversion your bunk buddy is trying to pass off.

And if you are going to do the same, you might want to start with
"thier."

Now tell me about "bunk buddy" and how you've never made homosexual
inuendo before. BTW, why do you keep snipping that out?

> >Get help.
>
> Get your head out of your butt, Brain. You embarrass your family name as

I've noticed a drastic reduction in his use of the Yiddish word for
penis.

Jimmy Who must have faxed out a white paper on it.

The question is, "Can Jimmy Who control Nefarious Yell DMC?"

Katapult King Kellie was doing intel photo work for the USN, not
the USAF...and dining with the Captain, leaving all the "drudge"
work to the enlisted folk.

Nursie really needs to consult with Rev. Jim since Jimmie read
all the "Jane's" books on military things and probably is as
"renowned" on that history as he is on all of radio. That's a
natural since Jimmie had all this military service experience,
worked military comms, even became an expert gury on Space
from his years in aerospace!

Error! Error! Jimmie did not. No matter, Jimmie will say anyone
talking against him is in "error" anyway... :-)

Whatever nursie does is "great!" :-)

Remember, he became a PILOT IN COMMAND as a civilian!

Probably got a set of wings with the laurel wreath around the
star above the shield to denote "COMMAND PILOT!" :-)

Somehow that (in his imagining) makes him an ichiban Hero
in ham radio? Hai, hai! :-)

>> >> (Before you go off on a tirade about how the CAP is not "part of

Nursie seems adamant on requiring all entering ham radio to get
a sperm count and have that passed in order to complete a license
application. Nursie is always into matters of SEX. Strange.

>Jimmy Who must have faxed out a white paper on it.

Jimmie "sned" him a copy...

>The question is, "Can Jimmy Who control Nefarious Yell DMC?"

Impossible!

Jimmie heartily approves of such behavior as done by nursie.

Saves him having to step down from posing as Mother Superior
in here under his real callsign. Doesn't stop him from joining in
as an anonymousie with haiku-like spacing...that anonymousie
approves of gunnery nurse Yell-yell's behavior and gives him high-
fives verbally. Hypocritical, but such is life in the newsgroup.

>>
>> LenAnderson@ieee.org
>
>I would like to oblige Robert Casey. Steve should leave this group.

I'll second that. Nursie just doesn't present a good image for
U.S. amateur radio of today.

Amateur radio can be a fun hobby and enjoyed by thousands. But,
unlike what the PCTA extras contend, it is not a job, not a profession,
not a guild, not a craft, not a union, and certainly not some kind of
boot camp or basic training. Amateur radio is a civilian hobby, not a
military one.

U.S. amateur radio does not require anyone to be employed as a
nurse. U.S. amateur radio does not require anyone to have a pilot's
license (with or without being a "pilot in command").

U.S. amateur radio operates by the very same physical laws as do
all othe radio services. Prior experience in other radio services is
helpful in understanding that physical law and theory but no more
essential to the hobby than nursing as a profession or having civilian
pilot licenses.

U.S. amateur radio is regulated by the FCC, an agency chartered to
regulate all U.S. civil radio. Absolutely no FCC commissioner or
staffer is required to hold any amateur radio license in order to regulate
U.S. amateur radio.

Morse code proficiency is NO LONGER any indicator of "qualification"
to operate on any HF bands. For most radio services it was NEVER
a requirement. While that is heretical in terms of worship of the Church
of St. Hiram, it is nevertheless true.

Having a valid U.S. amateur radio license does NOT automatically
make anyone any kind of "expert" on any subject outside of U.S.
amateur radio. In fact, it is not a guarantor of expertise within U.S.
amateur radio.

>Decent attempt at diversion. You have yet to "verbalize" how military
>radio operations and amateur radio operations are substantially
>different.

He can't. Not having done any military communications puts him at
a disadvantage...so he misdirects and tries to divert discussion.

The Department of Defense Directive on MARS as well as individual
military branch regulations on MARS clearly show that MARS is a
MILITARY system, not a civilian one.

In today's U.S. military activity, MARS is no longer a PR-gesture to
get civilians involved with the military, but is an auxilliary liason
service of communications with other U.S. government and civlian
agencies for any sort of emergency communications efforts.

MARS can and does operate very well independent of civilian
amateur radio hobbyists. The individual U.S. military branches
say that...especially the Army and the Army started the whole
thing back before WW2.

Seven hostile actions.

2918. Melbourne, FL - Radio Exams cancelled for 9/4.

Newsgroup: rec.radio.amateur.policy
Date: 2004-09-01 01:52:39 UTC
From: Bill Newkirk <wnewkirk@bellsouth.net>
Message-ID: <TW9Zc.44390$N11.24664@bignews5.bellsouth.net>
Source record: 96594

Since the current tracks take Frances to even near here by Saturday morning, there won't be radio examinations in Melbourne this Saturday (9/4).

Possible Cat 4 storm on the horizon and people will have better things to do than to get out in the wind for a test that will be available again next month (and possibly at the Hamfest the next week.).

Exactly! Here's his 3rd rate attempt at diversion:

Steve: Now...I have NEVER said that there is ANY difference in
"physics"
between Amateur Radio and any other means of electromagnetic
communications, Brain. Nor have I suggested that the
OPERATION of the
radios themselves is any different.

bb: Then what are you talking about? Do you even know?

Specifically, why is the experience of a military operator
inconsequential when compared to an amateur operator.

This is your one big opportunity to back out of your lies. Are
you up
to it?

Steve: There's no lies, Burkie.

The APPLICATION of radio communications as it pertains to the
Armed
Forces is NOT the same as AMATEUR RADIO.

bb (quoting Steve): "Sorry Hans, MARS >>>IS<<< Amateur Radio!"

bb: Which time were you wrong? Then or now?

Steve won't stay on topic. He snips those questions and comments that
prove him to be the liar that he is, then hopes no one will notice.

I'm not Canadian, but I think it fails to follw the KISS principle. They
want to add an Intermediate licence to their Basic and Advanced. Why don't
they just abolish the 'Plus' categories (i.e. plus Morse)? That would be
much simpler.

1) Perhaps things aren't always that simple.

2) Perhaps they see some value in it, hence "plus Morse."

Agree on all points. Steve is a bad ambasador for the world's best hobby.

When will Steve be daparting?

I would like to get a "farewell and good luck" card and have everyone sign it.

That's forgivable.

Running exam sessions faster than the regulations allow is unforgivable.

I'm not Canadian, nor do I play one on TV, but this is an interesting
proposal.

It proposes full access to HF without a Morse examination. I'm in
favor.

It proposes to enhance the technical qualifications of applicants. I'm
in favor.

It neatly avoids the "great giveaway" syndrome of the ARRL proposal.
I'm in favor.

Good job, RAC! ARRL, are you listening?

I'm not Canadian either as a "Carbo-American," but I think the "plus" category is a sop to the existing Canadian mighty morsemen. Canada must have its share of olde-fahrt hamme morsemen and those must be "satisfied."

I have to agree with Hans Brakob in that our northern neighbor in Norse America is doing the right thing for their future. Modernization is long overdue. [excuse me...NORTH America...;-)]

Industry Canada has much simpler regulations for their radio amateurs but accomplish the same thing in the hobby.

>>
>> ...not to mention womankind. :-)
>
>I wonder if any or all of his ex'es would care to comment?

We'd never know if their "messages" were real or FAKE. :-)

No authenticators.

Except...nursie will "swear" the FAKE was real but everything
anyone else says against it is all a "lie." :-)

Nursie loves to heap abuse on others' spouses, especially
wives. Lately that's become a consistent thing. Insult seems
to be his Way of Life.

Not to worry. "Quitefine," the renowned historian and lecturer
on anonymousies will be along shortly to "defend" his "honor." :-)

:-)

For the benefit of readers who weren't here a few years ago,
Mike Deignan once had a "residence" in Hawaii courtesy of
Jeffie Herman and his postbox of renown. :-) Deignan also
had a lot of "club" calls from Hawaii addresses...despite living
in tropic Rhode Island. FCC gave him some notices and Mikey
cancelled them.

Brian, you forgot the TITLE add-on following Jeffies' "signed"
name.

Namely, "Mathematics Lecturer, University of Hawaii." :-)

"Lecturer!" Jeffie used that a few years ago as a two-year
junior college INSTRUCTOR. Then the school had a website
with all the INSTRUCTORS listed and their classes. Ordinary
INSTRUCTOR, but he had to write "Lecturer" in here. :-)

Also, now he's supposed to be "Chief Petty Officer, USCG."

Lots of "Chiefs" in here, but Hans Brakob qualifies as a
Master Chief, USN, with some years under his belt. Very few
can approach that in experience, yet so many try to "out-title"
him. :-)

Jeffie didn't comment - also back a few years - on complex
number arithmetic rules. Complex number quantities are
essential to working with impedances or admittances for best
match and power transfer (as in antennas or stages of a
transmitter). Jeffie is supposed to be a Big Lecturer on
mathematics so I wonder why he never took up that? Tsk.

Wonder if Jeffie still lives on his little boat? :-)

LenAnderson@ieee.org

PS:

Retired (from regular hours) electronics engineer person
Life Member, IEEE (all for free now, no extra payments, no dues)
Veteran, United States Army (voluntary enlistment)
Managing partner of PINETREE, a small company performing
technical services for consultants willing to pay the fee.
Former associated editor of the finest amateur radio technical
publication ever, HAM RADIO magazine, in independent
publishing for 22 years.
First on-the-air on HF 51 years ago.
First-class commercial radiotelephone license granted (one test
sitting) in 1956.
Happily married to my high school sweetheart.

I suppose I could generate some more "titles" given some thought.
I was once the entire staff of WMCW, "the voice of Boone, McHenry,
and Walworth Counties," in Harvard (Illinois). [WMCW remains on
the air daily at the top of the AM band with "studios" in "downtown
Harvard"]
I was once "Chief Engineer" at Birtcher Instruments, Monterey Park,
CA...had to be, was the only one... :-)

Never did make "Pilot in Command" wings as a civilian...or military
person...of a two-seater, single-engine general aviation craft. :-)

Never once did I need to know morse code nor did I use it to
communicate on HF...or VHF or UHF or MF or LF or VLF or in
the microwave frequency region in all of 51+ years. However, to
be a "real" ham to these mighty macho morsemen in here one
MUST give in to the dark side of the Force and do morse. :-)

Morse and all those TITLES must be what "real" (morsemen)
hams are about...?

I am :) - and fully agree with your observation that there are -um-
a fair number of 'old school' amateurs up here, who do not believe in
the abolishment of the Code Test (approximately a third of the
respondents to the RAC survey on this subject). The RAC proposal
attempts to meet the needs of both the "Pro Morse" and "No Morse"
factions of the hobby - in quite an interesting way. Both sides win -
either path leads to a full HF-access Amateur license.

Now dat's a typically Canadian solution, eh? :)

I believe that the proposal is a good one - inasmuch as it provides
access to HF without the requirement of Morse testing. It does
recommend that Morse testing be made available should the applicant
desire it - I have no problem with that. Status quo - or not. Your
choice.

It recommends raising the pass marks on the exams - good idea, most
believe that they are way too low right now (60% is a pass on both the
Basic and Advanced tests currently). No issue there.

It is indeed a compromise intended to satisfy both the Morse and No
Morse factions of the hobby - but it does so with considerably more

elegance than the ARRL proposal, in my opinion.

I'm in favour of it - and my comments to that effect have been filed
with IC, as of today.

Even though you know how to spell my name correctly, you choose to
spell in wrong.

That makes lie #3,496.

> you have yet to prove ANYthing I've said is a lie.

Most things you say are lies.

We'll just chalk it up as 25 more lies. Lies #3,497 through #3,521.

> You keep SAYING things are untruthful, but then I simply provide a
> reference to prove it wrong.

You've never done so. Lemme me think...

That's lie #3,522.

> Just like you "yelling" about the above.

No "yelling."

That's lie #3,523.

> You're an idiot, Burke.

Lie #3,524.

> Accept it...embrace it...We have.
>
> Steve, K4YZ

When you say, "we," do you refer to K4CAP? or Quitefeind? or ...?

And please, no embraces from a guy whose foremost thoughts on RRAP are about penises. I'm just not into that scene. Like I told the Chief's Group, Air Force Senior NCO's have more dignity than that.

I may not "have" you doing it, but you're doing it none-the-less.
Feel better?

> I'm not running at all. I'm sitting
> in a comfy chair. As to commenting on peoples' roles in amateur radio,
> they first have to be radio amateurs in order to have a role.

Tell me about Quitefine. Is she an amateur?

(Please refer to Jimmy Who's Point Paper that was faxed out late
Sunday)

> Len doesn't have a role in amateur radio. Whether Leonard H. Anderson posts
> here or doesn't post here, amateur radio goes on. Morse code goes on.

Does it go on with or without Quitefine?

> > So what is Quitefine's role? Unless you're just here to give her a
> > pass.
>
> I'm not Quitefine.

I'm not Quitesure.

Are you Quitesure?

> You have a bad habit of directing your questions to
> the wrong people.

Actually, no. You have the bad habit of enabling anonymous people to behave badly, while crying foul with respect to some people who do identify themselves.

> You need to ask Quitefine. You may or may not get an
> answer.

I asked you. I won't get an answer because you have a history of enabling bad behavior. Re: working out of band French ops on 6M.

"Sorry Hans, Working French Hams Out-Of-Band >>>IS JUST LIKE<<<
Working French Hams In-Band!"

Hi, hi!

You sure have a lot of jobs on your resume. Maybe 30 years of 1 year's
experience. Is there some particular reason that you couldn't have
remained stable at one place of employment for several years? Has a
job interview at a major company ever asked you that?

Also, the IEEE stuff doesn't count for much. It's just a
management-funded front organization to keep the various Colleges of
Engineering well-enrolled, chiefly by publishing overblown starting
salaries and predicting Engineer shortages (5 years from now, every
year). This has been to keep the engineers' salaries low (compare IEEE

to the AMA or ABA and you will see the difference). IEEE has now decreased significantly in importance due to increased off-shoring of engineering professional positions to China, India and other foriegn shit holes, to people who don't even have BSEE degrees in the traditional sense.

Regarding your statements on complex math: No, it is NOT essential (mandatory) to learn for the calculation of impedances, admittances etc.. Instead of using the x + yj complex math cartesian approach, it is very possible to suffer through the calculations and obtain the exact same answers using the trig. phase angle approach. Complex math knowledge becomes 'useful' but it is only a tool that assists in using other tools such as the smith chart. But it is by no means 'essential' or mandatory, as you state.

> Never once did I need to know morse code nor did I use it to

So you can't do Morse. You sound proud of it. Hey, I can't speak Chinese. So should I go all over Usenet screaming about how proud I am that I CAN'T speak Chinese? Geese.

> Morse and all those TITLES must be what "real" (morsemen)
> hams are about...?

Then it follows that the lack thereof, are what others' are not about.

>Some things never change.

True.

Back around 1997 onwards to Fall, 2001, the morsemen were
chanting the morse mantra that morsemanship is "necessary"
for emergencies. Along came the Attack on America and
morsemanship didn't play any part in any attempt to thwart such
a terrible thing and didn't do much good after 11 Sep 01.

Even then the mighty macho morsemen were outraged and angry
that anyone could ever think of such a thing as eliminating a
morse test for a U.S. license. Then came WRC-03 and the last
great rationale for keeping any administration's morse test went
into the dumpster.

Morse code was boring 50 years ago, 40 years ago, 30 years ago,
20 years ago, 10 years ago, and just a few minutes ago. That
along with all those catechisms of the Church of St. Hiram have
continued to be boring, boring, boring...

Ptui on morse code testing.

I'm not familiar with that sort of "typicalness." Been in here
in this ultra-conservative retro-tech newsgroup too much. :-)

I would say instead it is a GOOD COMPROMISE and to the
credit of the Radio Amateurs of Canada and Industry Canada.

>I believe that the proposal is a good one - inasmuch as it provides

That's fair and equitable in my viewpoint.

Mighty macho morsemen will disagree and ignite (again) Flame
Wars instead of simple bonfires.

>It recommends raising the pass marks on the exams - good idea, most
>believe that they are way too low right now (60% is a pass on both the

ARRL is not fully into this new millennium. :-)

Some wonder if they ever made it into the last millennium...

>I'm in favour of it - and my comments to that effect have been filed

Norsemen were the first European discoverers of North America.

Settled in what is now Canada (New Foundland) for a while.

Dunno why they left...maybe they objected to speaking French?

:-)

>> Industry Canada has much simpler regulations for their radio
>> amateurs but accomplish the same thing in the hobby.
>
>Well said. The less regulations, the better the hobby!

Band limits and other technical necessities should be enough.

BTW, that electronic test that can run on any PC looked rather
neat! Simple way to do it and the computer does most of the
paperwork as well as keeping a record of it being done and
when.

Learning skills of long ago just to get a license in here and now
is nowhere close to being progressive and just doesn't keep up
with the times.

>> LenAnderson@ieee.org
>
>73, Leo
>
>PS - WTF is a "Carbo-American"? - never heard that one before!

Came from a couple of comic strips running in the L.A. Times as
well as elsewhere. Backlash to the "Adkins Diet" craze. :-)
[or "Atkins Diet" or whatever..."zero carbohydrates"]

BTW, the Olay cosmetics company now has a body wash product
called "Ohm." [just saw it on the shelves at market today] I think
that will meet with some resistance in some U.S. ham circles... :-)

What are you, Susan Sarandon? Barbra Streisand?
I'm not buying your "enabling" scenario. I'm responsible for my
actions.
You are responsible for your actions.

> > You need to ask Quitefine. You may or may not get an
> > answer.
>
> I asked you.

That was a poor decision on your part. You keep making the same mistake
of seeking information from the wrong source.

> I won't get an answer because you have a history of
> enabling bad behavior. Re: working out of band French ops on 6M.

You won't get an answer because I'm not the person posting as
"Quitefine".
French authorities are responsible for what French radio amateurs do.
That's been pointed out to you any number of times. It doesn't say much
for your intelligence that you've been unable to grasp this basic
concept.

> "Sorry Hans, Working French Hams Out-Of-Band >>>IS JUST LIKE<<<
> Working French Hams In-Band!"

Hans? He isn't involved. He's already advised you that he thinks
you're all wet on this one too, "Bill".

>amateur radio.

Jahwohl, Herr Oberst. Nicht gehabben ein Kanada amatur license!

<click, click>

I've "not been involved in radio" before 1947, other than listening to it.

51 years ago I got assigned to a major HF communications station
and was in that for three years. Got out of the Army and got into
commercial radio and the electronics-aerospace industry and
continued working in that until retirement.

I've had a commercial (professional) radio license for 48 years!

Of course that cannot possibly top your magnificent 41 years as
an amateur, can it?

By the way, since your Lordship doesn't understand it, I'm NOT
itching to get that mighty Nobel-quality amateur license...I'm just
trying to argue for the elimination of the morse code test for any
radio operator license.

I keep saying that but you refuse to believe it.

Either you are so damn dumb that you can't believe it...or you are
so corrupt and can't counter any arguments for the morse code
elimination that you INVENT other "causes" you claim I have.

Which is it?

"No matter what job, educational level, employer, or
government/military service that anyone has, if said anyone

Geez...I missed that FAX!

Like the vast majority of citizens, I'm "not involved" with anything
in amateur radio! (according to the not-so-robust oberst).

>> Len doesn't have a role in amateur radio. Whether Leonard H. Anderson posts
>> here or doesn't post here, amateur radio goes on. Morse code goes on.
>> Chasing DX goes on.
>
>Does it go on with or without Quitefine?

It must! Oberst Heil permits it!

"Quitefine" IS INVOLVED with ham radio! So is "BVD!"

Both are "identifiable" by Oberst Heil since their "papers" are in order!

>> > So what is Quitefine's role? Unless you're just here to give her a

See? There you are talking about a non-entity NOT INVOLVED.

Tsk.

>> > > So what is Quitefine's role? Unless you're just here to give her a

You have RULES and seek to rule over others that you don't like.

That must mean you like this Quitefine. (does your wife know this?)

Prove Quitefine's INVOLVEMENT through licensing in amateur radio.

>> I won't get an answer because you have a history of
>> enabling bad behavior. Re: working out of band French ops on 6M.
>
>You won't get an answer because I'm not the person posting as
>"Quitefine".

Everyone KNEW that. :-)

Quitefine doesn't have an SS uniform and doesn't imitate Otto
Preminger.

>French authorities are responsible for what French radio amateurs do.
>That's been pointed out to you any number of times. It doesn't say much
>for your intelligence that you've been unable to grasp this basic
>concept.

Tsk, tsk.

Heil has NOT been grasping that I'm NOT grasping after any amateur
license. I've had a commercial/professional license for 48 years.

I'm just advocating the elimination of the useless morse code test
for any radio operator licensing.

You can't...or won't...grasp that simple fact.

You blither on in an arrogant, accusatory tone about "not being
involved in radio due to not having an amateur radio license."

That's bullshit, Heil, an artificiality you manufactured to try to win message points in here.

I've enabled my professional career. I just went ahead and did it. And retired from regular hours.

"No matter what job, educational level, employer, or government/military service that anyone has, if said anyone opposes Heil's views, he/she will be the target of Heil's insults, ridicule, name-calling, factual errors, ethnic slurs, total lack of emoticons and social-interaction graces, acting in an arrogant, elitist manner...for years" :-)

You've got a good point. He deserves no fond farewells.

But I'd buy the card, sign it, put postage on it, and maybe even
include a box of fine chocolates just to get rid of that crazy
bastard.

But would he stay away?

Gotta love it. John Street the mayor is well known as a bit of a kook,
he's maybe a tad shady and he's a technology junkie but he's actually
been doing a pretty good job overall. My bet is that this maneuver
will fly.

If the FCC sits on BPL as long as it's been sitting on the code test
BPL will be history having been leapfrogged by Wi-Fi. Works for me.

(a) Where was it stated that they are going to use the 2.4 Mhz band?

(b) How many hams are operating in the 2.4 Ghz ham alloctaions?

(c) Answer: Close to zip.

(d) Ask me if I'd trade ham acess to 2.4 Ghz for BPL on 40 & 20.

Under this plan, will the city become an ISP, or just a PoP for
broadband access?

>Decent attempt at diversion. You have yet to "verbalize" how military
>radio operations and amateur radio operations are substantially
>different.

I already have.

But since you need your nose rubbed in it, here it is again.

The purpose of military communications is to support and prosecute the use
of armed force against an armed foe.

The applications for Amateur Radio are many and varied, but none of them
include the use of armed force.

>> And if you're going to chastise others about thier spelling errors,
>Brain,
>> you need to actually do it right yourself...ESPECIALLY in the sentence
>wherein
>> you do the chastising...

>"thier."
>
>Now tell me about "bunk buddy" and how you've never made homosexual
>inuendo before. BTW, why do you keep snipping that out?

Here's the whole thing again, Brain.

The suggestion that Lennie has his hand up your backside is a reference that you are his puppet, a ventriloquit's dummy, and that he's making your mouth move.

If you extrapolated "homosexuality" from that, then I contend that YOU are the one centered on that concept.

And the term "bunk buddy" suggest that you two are "in bed with each other" interms of your opinions and representations of Amateur Radio.

Again, if YOU extrapolated "homosexuality" from that, I respectfully suggest that YOU are the one with the fixation on homosexuality, not I.

>> >Get help.

Seems to me YOU are the one with a problem on "stay(ing) on topic", Brain.

You insisted that I have suggested that the OPERTION of a military radio
was different from the operation of an Amateur radio.

I never said that.

I DID say that the APPLICATIONS of Amateur Radio differ from the Armed
Forces.

You have yet to DISprove that.

>> The Department of Defense Directive on MARS as well as individual
>> military branch regulations on MARS clearly show that MARS is a
>> MILITARY system, not a civilian one.
>
>He's a fool to think otherwise.

MARS is promulgated by the Department of Defense.

MARS, >>WITHOUT<< Amateur Radio, would, in it's present manifestation,
cease to exist.

It really is THAT simple.

>But would he stay away?

The great unknown.

This newsgroup essentially ceased to become any sort of discussion forum quite some while ago. Certain individuals asserted (and inserted) themselves as "leaders" and "knew what was good for everything" (defining that whatever They did was "good" and what They didn't like was "bad").

This newsgroup was created some years back to catch the "discussions" on the Morse Code Test Issue, transferring it from rec.radio.amateur.miscellaneous. Personal denigrations of those against retaining the code test were numerous and rather ripe with invective and insulting inuendo from those that championed the mighty morse modes. That was long ago when the mighty morse ruled the rank, status, privelege "qualifications" of amateurs in that incredible multi-tiered license structure of pre-restructuring circa 1997. No less than six classes of license for a hobby activity...greater than the number of classes for commercial radio operator licenses.

Those that had Made It Through all the tests and "qualifications" entrenched themselves behind the "safety" of their mental barricades and mighty accomplishments (greater than anyone could possibly be in non-amateur radio). They claimed "turf" and bragging rights and "ownership" of What All Good Hams Must Do.

Those "masters" were aided by the self-promoting prose of the ARRL (which had yet to get as many as a quarter of all U.S. hams in membership). ARRL stressed morse as the epitome of ham-ness as it had ever since Hiram had been elected president-for-life. It was a continuation of the equation ham = morseman, the unstated but constantly implied ultimate goal that "should" be a part of amateur life.

In other words, the ARRL continued on the ultra-conservative path of keeping the past as present...and naturally promoting themselves as "leadership" for all "right-thinking hams" who should join ARRL. That's just a natural survival tactic of any fraternal order...to survive they need membership and attraction to the league "product" is to tell others what those others what the league leadership thinks they want newcomers to hear. ARRL went a bit too far.

The no-code-test Technician license class never really stopped growing since 1991. That class has become the Majority of all U.S. amateur licensees...regardless of the rationalizations of the pro-coders trying to play numbers games after the Restructuring.

Pro-coders just couldn't believe the reality. "No-code" went against their religious concepts, personified by the equation ham=morseman! All "real" hams knew, loved, had tested for "code" so that was a universal, divine thing they seemed to think. An amazing aberration of theirs, clinging to past standards and practices as if to life itself.

Meanwhile, the rest of the radio world, every other radio service, either never adopted any morse modes or just quit using morse for communications. The Maritime radio community itself voted in the new GMDSS to replace the old, dramatic, fabled-in-story 500 KHz morse distress frequency. When that was done there was no real need for morsemanship anywhere...except in the religious beliefs of the mighty macho morsemen, themselves angry and distressed that their Nobel-grade accomplishments were not revered. Some became outraged and vented on all "no-coders" in barrages of invective. Pro-coders relieved themselves in public in disregard of all, blessed by Those Of Their Kind.

The tombstone of morse code testing was put in place at WRC-03 when most of S25 was revised. Internationally. R.I.P. code testing.

Except, like some undead ghoul of the air, the pro-coder zombies continue to haunt, to try to keep alive that equally-dead equation ham=morseman. They vow revenge and retribution for themselves not understanding that their anger is about their own False Beliefs. They continue to take out that anger, relieving themselves by denigrations of all who are "no-code." We are awash in their "relief" to this day. No relief tube in sight.

Amateur radio is essentially a hobby, a pleasureable activity involving radio communications arts done for personal enjoyment. Licensing and regulations thereof are a result of the physics of all radio, to keep order in what would (and was) an EM chaos. Licensing regulations, like all laws, were never fixed, immuteable, imposed by a divinity. Regulations must remain open to change just like all laws must remain open for change.

Pro-coders are resistant to change. They want to fight to the death for their "principles" (false religious beliefs) of having all desiring to be involved in a radio hobby to be licensed like the pro-coders were

licensed. No less. They were "champions" of their day and want to keep their self-perceived crowns. They are mighty...hear them roar!

Will that stop any pro-coder from relieving themselves in public? I doubt it. Their code keys will have to be pried from cold, dead fingers.

Will that stop any olde-tyme hamme from relieving themselves in public? I doubt that, too. They have proclaimed Themselves as "masters," a kind of royalty that will never, ever abdicate their thrones. They Know What Is Good For All...Believe in what They Believe. They are the Elite. Their blood is blue...cyanotic.

Independence of thought is a no-no, unthinkable. There is only One Belief. That of a minority within another minority of hobbyists headquartered in a small New England town. They lead. All other hobbyists must follow. They say so. Only They Know What Is Good For All. So be it.

> inserted) themselves as "leaders" and "knew what was good for
> everything" (defining that whatever They did was "good" and what
> They didn't like was "bad").

Perhaps that was due to a determined effort by a certain unlicensed individual to berate, antagonize, humiliate and otherwise manipulate the newsgroup in a further effort to position himself a Lord, King and God or All Radio Knowledge.

> This newsgroup was created some years back to catch the
> "discussions" on the Morse Code Test Issue, transferring it from
> rec.radio.amateur.miscellaneous.

And of course any attempt to let IT evolve to anything ELSE is criminal.

Oh...wait...LENNIE is the one accusing AMATEURS of not evolving with changes in technology and practice...but it's OK for HIM to insist that RRAP not be used for any other purpsoe save one....

Well..ain't THAT a switch...?!?! (Not really...Lennie's as two-faced as anyone can be...)

> Personal denigrations of those
> against retaining the code test were numerous and rather ripe with
> invective and insulting inuendo from those that championed the
> mighty morse modes.

As were personal denigrations uttered by those who champion the removal of Morse Code testing.

> That was long ago when the mighty morse
> ruled the rank, status, privelege "qualifications" of amateurs in
> that incredible multi-tiered license structure of pre-restructuring
> circa 1997.

Whooooops. There goes Lennie's "I Hate Amateur Radio Rank, Status and Priviledge Because It Diminishes My Commercial Rank, Status and Priviledge" rant.

> No less than six classes of license for a hobby
> activity...greater than the number of classes for commercial radio
> operator licenses.

And now there's only three.

Three more than YOU have, Lennie.

> Those that had Made It Through all the tests and "qualifications"
> entrenched themselves behind the "safety" of their mental
> barricades and mighty accomplishments (greater than anyone
> could possibly be in non-amateur radio). They claimed "turf" and
> bragging rights and "ownership" of What All Good Hams Must Do.

Of course YOU would have us all spending 14 years in night school with and a GROL to BE "qualified".

Not necessary. Just $10 and an hour ata a VE session.

> Those "masters" were aided by the self-promoting prose of the
> ARRL (which had yet to get as many as a quarter of all U.S.
> hams in membership). ARRL stressed morse as the epitome of
> ham-ness as it had ever since Hiram had been elected president-
> for-life. It was a continuation of the equation ham = morseman,
> the unstated but constantly implied ultimate goal that "should" be
> a part of amateur life.

The only "prose" in Amateur Radio passed away a while back. was great on a keyer, even in his late years.

> In other words, the ARRL continued on the ultra-conservative path
> of keeping the past as present...and naturally promoting themselves
> as "leadership" for all "right-thinking hams" who should join ARRL.

FCC records on such things prove otherwise, but of course Lennie tends to ignore things archived in federal documents.

> That's just a natural survival tactic of any fraternal order...to survive
> they need membership and attraction to the league "product" is to
> tell others what those others what the league leadership thinks
> they want newcomers to hear. ARRL went a bit too far.

If this were true, the ARRL could have taken the "sure-bet" path years ago and pandered to the lowest common denominator.

Other Amateur Radio organizations and periodicals have tried that and
suffered for it. "Ham Radio", "Ham Radio Horizons", "73", et al.

League membership is around 170K.

Thier next closer competitor is "CQ" magazine, known for it's more "center
of the road" positionings, yet they only report a TOTAL printing of about 44K,
not even a third of the League's membership (of which we assume a magazine
"subscription" for each)

> The no-code-test Technician license class never really stopped
> growing since 1991. That class has become the Majority of all U.S.
> amateur licensees...regardless of the rationalizations of the pro-
> coders trying to play numbers games after the Restructuring.

The "rationalizations" are bilateral, Your Putziness. You are evidence of
that.

> Pro-coders just couldn't believe the reality. "No-code" went against
> their religious concepts, personified by the equation ham=morseman!
> All "real" hams knew, loved, had tested for "code" so that was a
> universal, divine thing they seemed to think. An amazing aberration
> of theirs, clinging to past standards and practices as if to life itself.

Nothing about Amateur Radio has remaind unchanged, Lennie, except for the
term "Amateur Radio" or "Ham".

The rest has been an almost 90 year history of fluidity.

> Meanwhile, the rest of the radio world, every other radio service,
> either never adopted any morse modes or just quit using morse for
> communications.

This forum is about AMATUER RADIO...not the LEMMING Radio service.

Factors exist in the AMATEUR RADIO service that lend itself to the
continued testing for and implementation of Morse Code.

> The Maritime radio community itself voted in the
> new GMDSS to replace the old, dramatic, fabled-in-story 500 KHz
> morse distress frequency. When that was done there was no real

> all, blessed by Those Of Their Kind.

Of course pointing out that the retention of Morse Code testing was
mandated by international treaty, of which the United States was signatory.

That law has been changed and the US Government has it's regulatory wheels
churning to determine how to accomodate that.

Again, yet another fact you refuse to acknowledge.

> The tombstone of morse code testing was put in place at WRC-03
> when most of S25 was revised. Internationally. R.I.P. code testing.

When will be see "RIP Lennie Anderson"...?!?!

That would do more to promote the appeal of ANY radio participation.

> Except, like some undead ghoul of the air, the pro-coder zombies

You're the one trying to use the relief tube Lennie...in the same way
1930's fighter pilots used to communicate between the cockpits.

> Amateur radio is essentially a hobby, a pleasureable activity involving
> radio communications arts done for personal enjoyment.

Wondering where you got that from, Lennie, in as much as you are not a
part of it.

> Licensing
> and regulations thereof are a result of the physics of all radio, to keep

You can hear them "roar" on the bottom ends of the more popular HF bands.

> Will that stop any pro-coder from relieving themselves in public?
> I doubt it. Their code keys will have to be pried from cold, dead
> fingers.

As will be your keyboard, no doubt.

> Will that stop any olde-tyme hamme from relieving themselves in
> public? I doubt that, too. They have proclaimed Themselves as
> "masters," a kind of royalty that will never, ever abdicate their
> thrones. They Know What Is Good For All...Believe in what They

I just KNOW you can provide SOME reference to where this proclamation was
made.

> Independence of thought is a no-no, unthinkable.

Only on 10048 Lanark, Sun valley, CA...and in most Islamic nations.

> There is only
> One Belief. That of a minority within another minority of hobbyists
> headquartered in a small New England town. They lead. All
> other hobbyists must follow. They say so. Only They Know What
> Is Good For All. So be it.

Regardless of the "minority within a minority", it will always be a MAJORITY compared to the Leonard H. Anderson's licensed AND experienced in the Amateur Radio Service.

And we are still waiting for Lennie to provide the NG some links to the posts where the alleged "proclaimations" have been made.

(Hint: They don't exist...except in the flailing, failing mind of a very lonely, very angry old man in Sun Valley, CA.....)

Is that "something up with which you will not put?" :-)

Nursie has NEVER explained the Where or When of his claim to
engaging in "seven hostile actions."

Tsk. He evades the question AGAIN by misdirection to some
supposed "fault" of Brian's.

In other words, nursie made a LIE and cannot back it up. Tsk.

Nursie is in her own "corner" and can't get out. Tsk.

> Putz.

Again with the Yiddish pejorative referring to penis.

Is nursie Jewish? Is nursie of Yiddish ancestry?

Nursie has NO PRACTICAL EXPERIENCE IN BEING YIDDISH.

Tsk.

PCTA extra Double Standard. QED.

>>>
>>> >> There's no lies, Burkie.
>>
>>Yes, there are. Every time you post here there are lies.
>
> Yes, there are...when I re-quote any of them from you.

Incorrect. Nursie has LIED repeatedly, has refused to reference or back up her LIES in this newsgroup.

>>Decent attempt at diversion. You have yet to "verbalize" how military
>>radio operations and amateur radio operations are substantially
>>different.
>
> I already have.

Incorrect. Nursie has NO PRACTICAL EXPERIENCE in military radio communications, therefore cannot possibly expostulate on any comparisons about what military radio communications is...

> The applications for Amateur Radio are many and varied, but none of them
>include the use of armed force.

With the exception of the "mad as hell PCTA who are not going to take it anymore" and who wish death and destruction to all NCTA.

:-)

>>And if you are going to do the same, you might want to start with
>>"thier."

>>
>>Now tell me about "bunk buddy" and how you've never made homosexual
>>inuendo before. BTW, why do you keep snipping that out?
>
> Here's the whole thing again, Brain.
>
> The suggestion that Lennie has his hand up your backside is a reference
>that you are his puppet, a ventriloquit's dummy, and that he's making your
>mouth move.

Poor nursie. Cannot comprehend that distant individuals can
see the error of nursie's ways... :-)

Poor nursie. Not used to individuals of independent thought actually
talking back to the mighty macho morseman gunnery nurse! Tsk.

More tsk. Independent thought is contrary to the teachings of the
Church of St. Hiram, is on the daily roster of action items to
suppress and disable all independence! All shall be as given in
the Orders of the Day!

> If you extrapolated "homosexuality" from that, then I contend that YOU
are
>the one centered on that concept.

Tsk. Like a bad joke. The above was said by the pervert being
tested by a shrink using ink blots. Pervert kept describing ink
blots as sexual acts. Doctor asked about that. The pervert said
"It's YOUR fault, Doc, YOU have all the dirty pictures!"

It's always "someone else's fault" when nursie is taken to task. Tsk.

> And the term "bunk buddy" suggest that you two are "in bed with each
>other" interms of your opinions and representations of Amateur Radio.

Tsk. There are MANY other little terms and phrases nursie could
have used. She prefers the ones with sexual connotations. :-)

"It's our fault!" :-)

Tsk. Nursie gets spattered with ink and thinks it is about sex.

> Again, if YOU extrapolated "homosexuality" from that, I respectfully
>suggest that YOU are the one with the fixation on homosexuality, not I.

Has nursie any PRACTICAL EXPERIENCE WITH HOMOSEXUALITY?

Under nursie rules of engagement, all have to have PRACTICAL
EXPERIENCE to make any comments.

Tsk.

What has all this personal insulting of Brian Burke to do with
amateur radio?

Answer: In nursieworld fantasizing, nursie rules have contradictory meanings...anything that nursie says has "everything to do" with amateur radio but no one else can say anything against that.

A MALE GYNECOLOGIST HAS NO PRACTICAL EXPERIENCE AT
BEING FEMALE.

Is that true or not?

If you argue that a Medical Doctorate makes a male a female, then you
must be truly insane.

Try to understand this: Medical doctoring has NOTHING to do with
amateur radio or with Amateur Radio Newsline.

YOU ARE NOT A MEDICAL DOCTOR.

The general subject of RADIO does apply in this newsgroup since
all radio operate by the same physical laws, regardless of the
various adminstrations' law on use of radios.

> Neither of you still not making any sense.

Nursie never has, it seems...

> You have yet to DISprove that.

Tsk. Since nursie has never worked any military communications,
where is his reference to prove what nursie said?

In reference to DoD Directive 4650.2 on MARS, you will, absolutely,
contradict yourself later in your same message...

>>> The Department of Defense Directive on MARS as well as individual
>>> military branch regulations on MARS clearly show that MARS is a
>>> MILITARY system, not a civilian one.
>>
>>He's a fool to think otherwise.
>
> MARS is promulgated by the Department of Defense.

DoD *defines* it, not just "promulgating" it.

The "M" in MARS stands for MILITARY.

The "A" in MARS stands for AFFILIATE.

The "A" does NOT stand for "amateur." You will have to up your A.

> MARS, >>WITHOUT<< Amateur Radio, would, in it's present manifestation,
>cease to exist.

MARS exists very well on its own. MARS' primary mission now is
that of providing another communications means with other agencies,
less of the public-relations aspect of getting individual radio amateurs
involved in the military.

For more on Army MARS, go to the Fort Huachuca website. The
headquarters of Army MARS is there.

> It really is THAT simple.

Tsk. Nursie's description is not only "simple," but WRONG.

Back in 1928, the U.S. Army began the predecessor to MARS with the Army Amateur Radio organization. That was supposedly to transfer "knowledge" of radio by civilian amateurs into military radio arts. In actuality, very little of that happened and the Army experiment evolved into a PR gig for themselves...which, by itself, was small scale since amateur radio in pre-war times was rather small.

With the creation of the USAF after WW2, USAF joined Army in this amateur radio interest effort and the organization renamed MARS. The Navy joined a few years later.

MARS *was* helpful in morale of servicemembers 30 years ago. The Army has it on-record that MARS did many messages back home from Vietnam three decades ago. [most MARS stations used newly-acquired AN/FRC-93 transceivers...which civilans know more familiarly as the commercial version of the Collins KWM2]

But, what is past is very much in the past, just history. With the advent of the Internet and the "information highway," plus the U.S. government's own "Internet" with the DSN, it is now possible for servicemembers anywhere in the world to contact their loved ones directly through computers. They share words AND pictures...even pictures of American atrocities in Iraqi prison camps...via the Internet.

MARS redefined itself somewhere a decade ago, possibly more. They are a second means of communications, a means for communications with other government agencies' radio nets and with civilian governments and agencies. MARS is a member of SHARES as an example. The most detailed description of what MARS' mission is and how they accomplish it is given at the Fort Huachuca website. The USAF is next with their MARS Hq at Scott AFB near St. Louis. USAF has an interesting "biography" of air force communications in the free-for-download illustrated book titled "From Flares To Satellites."

Now, if nursie wants to continue to argue her imaginations with the reality of the United States Military, it will not only be a task done by simpletons but just plain stupid.

LenAnderson@ieee.org

>Radio Knowledge.

Tsk, tsk. Nursie can't stand corrections. Worse yet, nursie can't stand anyone with more radio experience than she has...in the military.

Tsk, tsk. I've spent nearly all of my working career in radio-electronics, retired from regular hours at it, and kept radio-electronics as a hobby for all that time. I've had the assigned responsibility of radio design and fulfilled that completely. Suffice to say that I actually KNOW something about the subject. :-)

Poor nursie can't stand that. She keeps whining and carrying on, cussing snit rants because she is given correct information on radio regulations and radio theory. Tsk.

>> This newsgroup was created some years back to catch the
>> "discussions" on the Morse Code Test Issue, transferring it from
>> rec.radio.amateur.miscellaneous.
>
> And of course any attempt to let IT evolve to anything ELSE is criminal.

Incorrect. Evolution is evolution. Not subject to laws of mankind.

> Oh...wait...LENNIE is the one accusing AMATEURS of not evolving with
>changes in technology and practice...but it's OK for HIM to insist that RRAP
>not be used for any other purpsoe save one....

Nursie outraged that any professional might know more than she.

Tsk. Nursie do nothing about subject title, only use newsgroup
to constantly fight, fight, fight. Tsk.

>> That was long ago when the mighty morse
>> ruled the rank, status, privelege "qualifications" of amateurs in
>> that incredible multi-tiered license structure of pre-restructuring
>> circa 1997.
>
> Whooooops. There goes Lennie's "I Hate Amateur Radio Rank, Status and
>Priviledge Because It Diminishes My Commercial Rank, Status and Priviledge"
>rant.

Tsk. I have no need for titles, rank, status. I am secure in what I
can do...from practical experience doing it...successfully.

Nursie should explain WHY amateur radio needed so many classes,
so much emphasis on rank, status, and privilege?

Amateur radio is a HOBBY. It isn't a job. It isn't a union. It isn't a
guild. It isn't a craft. It is a hobby.

>> No less than six classes of license for a hobby
>> activity...greater than the number of classes for commercial radio
>> operator licenses.
>
> And now there's only three.
>
> Three more than YOU have, Lennie.

Tsk. Irrelevant what I "have" or "don't have."

If all nursie can argue is about pieces of paper (suitable for framing),
then she is very shallow indeed.

> Of course YOU would have us all spending 14 years in night school with
and
>a GROL to BE "qualified".

Tsk. Again with insults about "night school." :-)

Poor nursie sounds like she failed some "night school" classes. :-)

College Credit formal training classes have no stigma attached...
except to those who can't complete them. I've completed mine
whether they were in the daytime or at nighttime. College level
accreditation does not depend on the time of day a class is held.

There was NO "GROL" when I took and passed my one test for
a First Class Radiotelephone (Commercial) Operator's license in
1956. Poor nursie just can't stand that someone did something
better than she did long ago. :-)

> Not necessary. Just $10 and an hour ata a VE session.

Commercial radio operator licenses can only be done by COLEMs.
Consult Title 47 C.F.R. Parts 1 and 2 for details.

> FCC records on such things prove otherwise, but of course Lennie tends to
>ignore things archived in federal documents.

Incorrect. Tsk. Nursie beginning to trashmouth again... :-)

>> That's just a natural survival tactic of any fraternal order...to survive
>> they need membership and attraction to the league "product" is to
>> tell others what those others what the league leadership thinks
>> they want newcomers to hear. ARRL went a bit too far.
>
> If this were true, the ARRL could have taken the "sure-bet" path years
>ago and pandered to the lowest common denominator.

Nursie got in. That should say it all... :-)

> League membership is around 170K.

Still? Tsk. Less than a quarter of all licensed U.S. amateurs!

Coincidentally, the membership of the Academy of Model
Aeronautics is also about 170 thousand members.

Academy members mostly fly radio-controlled model aircraft.
They lobbied for and got a whole band of VHF frequencies for
such a fun hobby. AMA even has insurance for members and
clubs, sponsors all sorts of competitive meets of flyers.

>> The no-code-test Technician license class never really stopped
>> growing since 1991. That class has become the Majority of all U.S.
>> amateur licensees...regardless of the rationalizations of the pro-
>> coders trying to play numbers games after the Restructuring.
>
> The "rationalizations" are bilateral, Your Putziness. You are evidence
of
>that.

Poor nursie, just CAN'T take any contrary opinions, can she?

Tsk.

National numbers (archived by the FCC) belie nursie's assertion.

No-code-test Technician class was, by far, the fastest growing
license class in amateur radio. Now that class is the MAJORITY.

Sunnuvagun!

> Nothing about Amateur Radio has remaind unchanged, Lennie, except for the
>term "Amateur Radio" or "Ham".

Ham quality is regulated by the FDA in the USA. :-)

> The rest has been an almost 90 year history of fluidity.

...from all the mighty macho morsemen relieving themselves? :-)

> This forum is about AMATUER RADIO...not the LEMMING Radio service.

Tsk, tsk, tsk. Tell the ARRL that. :-)

> Factors exist in the AMATEUR RADIO service that lend itself to the
>continued testing for and implementation of Morse Code.

The only "factors" are the ultra-conservative stubbornness of the
olde-tyme hamme morsemen refusing to concede anything. :-)

> Of course pointing out that the retention of Morse Code testing was
>mandated by international treaty, of which the United States was signatory.

After WRC-03, at the end of July, 2003, the USA remains "signatory"
and there is NO international obligation to retain any morse code
test for amateur radio licensing by any administration.

Geez, that sure spoil nursie's Big Rant or what? :-)

> That law has been changed and the US Government has it's regulatory
>wheels churning to determine how to accomodate that.

tsk. Amateur phrasing, bad aphorisms. :-)

Part 97, Title 47 C.F.R. hasn't been changed to take out any code
test. No "churning" there...but it butters up the fantasies of the
olde-tyme hamme radio morsemen. :-)

> Again, yet another fact you refuse to acknowledge.

I acknowledge that the U.S. amateur morse code test has NOT
been eliminated.

Tsk. Nursie can't read properly or is on the wrong meds...?

> You're the one trying to use the relief tube Lennie...in the same way
>1930's fighter pilots used to communicate between the cockpits.

Tsk. Nursie has been reading too much pulp fiction left over from
the 1920s. :-)

It must be the CAP training of the Pilot In Command! :-)

> You can hear them "roar" on the bottom ends of the more popular HF
>bands.

NOT on the 6, 9, 11, and 15 MHz bands. :-)

Those are "shortwave broadcast" bands...and are the "most popular."

But, if your little transceiver can't tune those frequencies you will
never hear them...and thus they "don't exist." :-)

>> Independence of thought is a no-no, unthinkable.
>
> Only on 10048 Lanark, Sun valley, CA...and in most Islamic nations.

tsk, Tsk, TSK! :-)

Independence of thought and deed is, or should be, the watchword
of this nation. I prize it, even volunteered for military service to
insure its continuation.

Nursie make trashmouth again. Tsk.

> Regardless of the "minority within a minority", it will always be a
>MAJORITY compared to the Leonard H. Anderson's licensed AND experienced in
>the Amateur Radio Service.

Tell that to the FCC. No Commissioner or staffer is required to have
any amateur radio license to regulate U.S. amateur radio!

Sunnuvagun!

It's terrible when nursie's rants get ruined...

Poor nursie. All petulant and prissy when confronted with opposite
opinions. All she can do is trashmouth "opponents." Very little
thought required to do that, just do the yell-yell. :-)

I think I've finally got this BPL fiasco figured out. The political suck up
appointees at the FCC had to make it LOOK LIKE they were following
instructions. Knowing full well it (BPL) would fail. Or perhaps not... hi.

>
> Some wonder if they ever made it into the last millennium...

In some ways, only the first quarter of it.....

Frankly, they seem too concerned with playing politics than guiding
the hobby into the future.

The RAC proposal to IC was based on an Internet survey which was open
to all licensed Canadian amateurs (not just RAC members).

The ARRL proposal seems to have been developed autonomously by the
Directors, with little (if any) input from the Amateur community. No
wonder everyone was surprised when it was filed!

>
> Band limits and other technical necessities should be enough.

Fully agreed. Up here, bandplans for the various operating modes are
compiled by the RAC, and adhered to by gentlemen's agreement. It is
absolutely legal to operate SSB on 7.100 MHz, or CW on 7.250 MHz, but
it just isn't done! Peer pressure is the only enforcement tool
required.

>
> BTW, that electronic test that can run on any PC looked rather

> Under this plan, will the city become an ISP, or just a PoP for
> broadband access?

Dunno, it was announced just a day or two ago by the local news media
which didn't get into any of those kinds of details. Looks like the
Earthlink article is the most definitive so far. They're just at the
front end of working it through so I expect it'll be awhile until even
the basic plan is formulated and released. Philly is a big burg,
there's a lot of bureaucratic "inertia" involved in these processes,
it won't happen overnight.

The ruling class is a combination of conservative Democrats and
moderate Republicans both of which are comfortable with the
privatization of municipal services. Would not surprise me if the city
made the investments in the infrastructure and retained it's ownership
then jobbed out the ISP end of it.

The wild card I see is the huge concentration of academic institutions
around here which could jump on it and become the ISPs on a non-profit
basis. Which would be very "Philly".

That's nice for you. I'm sure you're very proud. It has, however,
nothing to do with amateur radio.

> I've had a commercial (professional) radio license for 48 years!

Nor does this have anything to do with amateur radio.

> Of course that cannot possibly top your magnificent 41 years as
> an amateur, can it?

Not in a newsgroup concerned with amateur radio or in amateur radio
itself it can't.

> By the way, since your Lordship doesn't understand it, I'm NOT
> itching to get that mighty Nobel-quality amateur license...I'm just
> trying to argue for the elimination of the morse code test for any
> radio operator license.

Your statement simply makes your posts here all the more peculiar. You
have no stake at all in amateur radio.

> I keep saying that but you refuse to believe it.

Oh, I believe it. I just love hearing you reaffirm it.

> Either you are so damn dumb that you can't believe it...or you are
> so corrupt and can't counter any arguments for the morse code
> elimination that you INVENT other "causes" you claim I have.

Did I invent your idea for a minimum age for amateur radio
participation?
Have I invented the personal attacks written by you in comments to the
FCC?

> Which is it?

I haven't recognized the validity of your premise.

That's pretty stupid, Len. You've stolen the words of another, used
quotations and inserted my name. That pretty well sums up your style.

Dave K8MN

I see it as internal politics, trying to preserve what they have and
who has it.

The league DOES do some good work. The anti-BPL work is
very good. BPL is a threat to ALL who use HF and should
transcend any politics.

For much of the rest of it, I see it as the league trying to survive.
They have failed to gain as much as a quarter of all licensed U.S.
amateurs as members over the last decade-plus. ARRL has
filed U.S. federal income tax showing that they are a $12 million
(in 2002) business. "Tax-exempt" status, yes, but a business
nonetheless. Membership dues aren't enough to keep the
buildings warmed, staff paid, electricity for the equipment bought.
Their major monetary source is QST ad sales (to keep QST afloat)
and PUBLISHING. If they lose that publishing arm they can kiss
their much-heralded free services for members goo-bye. Many in
Newington would be looking for new work.

>The RAC proposal to IC was based on an Internet survey which was open
>to all licensed Canadian amateurs (not just RAC members).
>
>The ARRL proposal seems to have been developed autonomously by the
>Directors, with little (if any) input from the Amateur community. No
>wonder everyone was surprised when it was filed!

That's the thing...the entrenched "we know what's best for you
(members) and everyone else" attitude. Many don't agree with that
and haven't joined even if they can afford the small annual dues.

The league got away with that for decades before the Internet went
public in 1991. They did all the interfacing with the FCC, most of
the lobbying, then promoted themselves as the Big Brother of all
U.S. hams. They managed to convince a hard core of Believers
who are outraged and ready to fight anyone who says the least
little negative thing about the league. [witness some of its Believers
in here]

There's a slightly different peer pressure active down here. :-)

Has much to do with personality conflicts and self-righteousness,
much less about actual radio technology.

>> BTW, that electronic test that can run on any PC looked rather

In amateur radio technology, the "outsiders," the designers and manufacturers (mostly off-shore to North America) are the ones doing it. Names like Icom, Yaesu, Kenwood, Panasonic (Matsushita), JRC, etc., etc. etc...in HF, VHF, UHF, and now beginning to get into the microwave region.

I chanced upon a 5.8 GHz cordless phone at Fry's Electronics (the huge consumer electronics supermarket chain of about a dozen in this corner of the U.S.). That's pushing into C band, something impossible to have on the consumer market with vacuum tubes. Full digital two-way, low-power radio with all the extra features of the L band cordless units. Affordable stuff.

There are so many cellular telephone subscribers down here that our Census Bureau reports that one in three citizens has one. A little, almost minuature, two way radio working at the bottom of the microwave region! Newer models complete with little cameras and keyboards built in. Those extras may be fluff to many but they've all been crammed into that little tiny package.

I'm still incredulous at the amazing leaps forward in technology since I first began working (way back when tubes were king). Getting equipment to work reliably at high UHF was an accomplishment worthy of much praise and doing the same in the microwave region was almost a miracle. Now its become an accomplished fact.

Way back when of the 50s, only the well-heeled hams could afford the near-precisely tuneable Collins rigs with their "PTOs" that could find their way to better than the nearest Kilocycle, receive or transmit. All others were stuck with approximations using squint-read dials and "bandspread" tuning set with the aid of a 100 KHz crystal "calibrator." Now anyone can get a direct digital readout down to 10 Hz of the correct frequency.

No sweaty-dah.

It used to be that tuning up a tube transmitter actually took
some finesse and a little experience to do. Now the transistor
PAs don't need it and have automatic protection in case the
VSWR gets too high. Need to match to a "funny" antenna?
No sweat, there's several automatic-tuning tuners on the
market, takes the worry out of getting as much as possible
into the antenna and out to the world. Push-button ease.

I'm a supporter of Krispy Kreme myself. :-)

Unfortunately their "two (boxes) for the price of one" on Tuesdays
went kaput with that no-carbo diet. One Tuesday a month would
let us fill up the freezer with the extras...8 seconds in the micro-
wave and there was a warm, yummy KK thing down the hatch.

>> BTW, the Olay cosmetics company now has a body wash product

I was wondering what inspired Olay's marketing types. I'm sure
that a product named "Farad" or "Henry" wouldn't be good. "Ohm"
is strange but sounds akin to "Ommm, mane padme ommmm..."
chanting. :-)

Southern California is ANYthing except "free thinking"...

Southern California ia very much a "conform or be scorned" place. I
know...I lived there...twice.

And as for ths NG being "retro-tech", there's only ONE person here who is
trying to "make due" with a 1950's era commercial repairman license and
"experience" from his 1950's era Army enlistment...

No "ruined rant" here, Lennie.

This is about you.

Not the FCC commissioners...

Not your "real extra" buddy in "Joy-zee"

Not your correspondence course shrink wife...

Not the CAP, OES, ADA, ARRL or IEEE.

You.

You are not licensed. That's a fact.

No license = No participation.

No participation = No experience.

No experience = Stupid Newsgroup errors.

Stupid Newsgroup Errors = Lennie Anderson.

Lennie Anderson = Putz.

And there you are.

> They didn't like was "bad").

One of those individuals, a Leonard H. Anderson of California has no stake whatever in amateur radio. Somehow, this total non-participant has appointed himself "advocate" for change within amateur radio. He purports to know how amateur radio should best be regulated. Whatever he says is "good" and whatever those who disagree with him say is "bad".

> This newsgroup was created some years back to catch the
> "discussions" on the Morse Code Test Issue, transferring it from

You have as much to do with one as the other.

> Personal denigrations of those
> against retaining the code test were numerous and rather ripe with
> invective and insulting inuendo from those that championed the
> mighty morse modes.

It is funny that your own personal denigrations of those for retention of a morse test go unmentioned. What of your invective and insulting inuendo directed at them?

> That was long ago when the mighty morse
> ruled the rank, status, privelege "qualifications" of amateurs in
> that incredible multi-tiered license structure of pre-restructuring
> circa 1997.

What do you know of it? You haven't an amateur radio license of any class. That'd include license classes requiring 20 wpm, 13 wpm, 5 wpm and even no morse exams.

> No less than six classes of license for a hobby
> activity...greater than the number of classes for commercial radio
> operator licenses.

How are you involved and why does the number of license classes bother you?

> Those that had Made It Through all the tests and "qualifications"
> entrenched themselves behind the "safety" of their mental
> barricades and mighty accomplishments (greater than anyone

> could possibly be in non-amateur radio). They claimed "turf" and
> bragging rights and "ownership" of What All Good Hams Must Do.

You aren't a ham. Why get all upset?

> Those "masters" were aided by the self-promoting prose of the
> ARRL (which had yet to get as many as a quarter of all U.S.
> hams in membership).

Why worry about the ARRL. You aren't a member.

> ARRL stressed morse as the epitome of
> ham-ness as it had ever since Hiram had been elected president-
> for-life.

Your statement cannot be backed up with evidence.

> The no-code-test Technician license class never really stopped
> growing since 1991.

Why would it? It appears that the Amateur Extra never stopped growing
either.

> That class has become the Majority of all U.S.
> amateur licensees...regardless of the rationalizations of the pro-
> coders trying to play numbers games after the Restructuring.

It only makes sense. It is the easiest to obtain.

> Pro-coders just couldn't believe the reality.

I believe the reality. A no-code Tech is the path of least resistance.

> "No-code" went against
> their religious concepts, personified by the equation ham=morseman!

My religion and amateur radio are two very distinct things.

> All "real" hams knew, loved, had tested for "code" so that was a
> universal, divine thing they seemed to think.

Is that why you have a problem? You aren't a ham.

> An amazing aberration
> of theirs, clinging to past standards and practices as if to life itself.

Tell you what, Len. I'll cling to standards. You cling to life itself.

> Meanwhile, the rest of the radio world, every other radio service,

> of the mighty macho morsemen, themselves angry and distressed
> that their Nobel-grade accomplishments were not revered.

You needn't worry about it. You're fertile imagination has manufactured
a world of angry and distressed, code-tested hams. You've even added
"Nobel-graded" accomplishments. It just seems that way to you as one
on the outside looking in.

> Some
> became outraged and vented on all "no-coders" in barrages of
> invective.

While you are a "no-coder", you aren't a radio amateur.

> Pro-coders relieved themselves in public in disregard of
> all, blessed by Those Of Their Kind.

They did what?

> The tombstone of morse code testing was put in place at WRC-03
> when most of S25 was revised. Internationally. R.I.P. code testing.

Well. It would. Appear that. Your facts are as. Dubious as your.
Sentence structure.

> Except, like some undead ghoul of the air, the pro-coder zombies
> continue to haunt, to try to keep alive that equally-dead equation
> ham=morseman.

Come now, Leonard. That isn't quite as scary as Len Anderson=radio
amateur.

> They vow revenge and retribution for themselves
> not understanding that their anger is about their own False Beliefs.

Is that what drives your anger, Len? Your own False Beliefs?

> They continue to take out that anger, relieving themselves by
> denigrations of all who are "no-code."

Is that why you believe you are the object of denigration by others?

> We are awash in their "relief"
> to this day. No relief tube in sight.

"We"? How are you involved?

> Amateur radio is essentially a hobby, a pleasureable activity involving
> radio communications arts done for personal enjoyment.

...or so you've been told.

> Licensing
> and regulations thereof are a result of the physics of all radio, to keep
> order in what would (and was) an EM chaos.

The physics of radio are certainly a part of the regulations. They, by themselves, are not the sum total of material making up amateur radio regulations.

> Licensing regulations,
> like all laws, were never fixed, immuteable, imposed by a divinity.
> Regulations must remain open to change just like all laws must
> remain open for change.

The regs have changed for as long as I've been a ham.

> Pro-coders are resistant to change.

...and you are for change for the sake of change. You have no stake in amateur radio.

> They want to fight to the death
> for their "principles" (false religious beliefs) of having all desiring to
> be involved in a radio hobby to be licensed like the pro-coders were
> licensed. No less. They were "champions" of their day and want to
> keep their self-perceived crowns. They are mighty...hear them roar!

Do you want to fight to the death championing your ideas of amateur radio regulation? Be my guest. Follow the false religious beliefs of a non-participant. I hear you roar. I don't perceive you as mighty.

> Doubt it.

Afraid you may be right. It didn't happen with code free
VHF. We'll need better advertising of ham radio in the
electronics press, and various radio rags. (even CB, eeeeK!)
I'm an ex-CBer from 1976. Decided I liked 2 way radio enough
to step up to a ham license.

Mention that the prospective ham should visit several ham
clubs to find one he feels comfortable with.

Not to mention that many of those units integrate several radically different cellular protocols seamlessly in that package - mine is AMPS 800 MHz analog, D-AMPS (TDMA) 800 MHz digital, and CDMA 1.9 GHz digital. All in a package that fits in your palm, and runs for a week on its dinky Li-ion battery. And free, with a three-year cell company contract!

Unbelievable technology, compared to just a few years ago. Absolutely phenomenal compared to 20 years ago.

>

Absolutely - my car radio has far better frequency stability than most of the test equipment that I operated back in the 70s.

> into the antenna and out to the world. Push-button ease.

I still use my old Heathkit SB-400 SSB tube transmitter on the air - with the antenna tuner, it's a handful to tune up, compared to the newer rigs. But, if I actually manage to raise someone with it, it's a minor miracle, and I feel much more a part of the process than if I simply turned the tuning knob on a more modern unit. Plus, I bought it DOA and completely overhauled it back to life - as a result, I'm very familiar with the inner workings of the thing.

My own personal contribution to the past, I suppose.....that, or I'm too cheap to buy a new rig - or both :)

You took the sexual connotation.

So did your buddy.

> "It's our fault!"

It's not your "fault". There was no "fault" to be assigned. You
simply looked for the worst possible response and ran with that.

Sucks to be you.

> > Again, if YOU extrapolated "homosexuality" from that, I respectfully
> >suggest that YOU are the one with the fixation on homosexuality, not I.
>

And in LennieWorld fantasy, Lennie is Loved and Reverered by All
Those Who Glorify His Infinite Wisdom.

Unfortunately, the facts are a bit more stark.

Very few people like Lennie because he's rude, dishonest and
irresponsible. What knowledge he does possess goes to waste becasue
he cannot share it without demanding Tribute and Devotion, and no one,
no matter how hungry for that knowledge, wants to be slapped around by
a geek with an attitude.

Sucks to be Lennie.

Poor nursie. Still bitter about the treatment he received at an HRO
in Van Nuys. Tsk. Nursie should not have worn the field uniform
and the camo greasepaint inside the door...

Or was it stuck out in the Mojave, the "middle desert" doing all
those "hostile actions" at a supply depot in mid-summer?

> And as for ths NG being "retro-tech", there's only ONE person here who is

Tsk. "Commercial repairman license?" :-)

To be honest, I have NEVER repaired any commercials. True.

Did a few voice-overs for them, though. No big bucks. Was fun.

Ooops...have to admit I spliced a commercial tape once. But just
once. Call it "magnetic first-aid." No MD credential required.

I've not commercialized any repairmen, either. :-)

>>You made the claim that you were somehow involved in seven hostile actions.
>
> No...YOU misunderstand.
>
> I already entrusted you to some of the information in private e mail.

Tsk, tsk. Nursie made the claim in PUBLIC.

Evidence of a PUBLIC claim is no good if presented in a single PRIVATE forum.

Without anything to reference your brag, that brag is just a LIE.

> You, like Lennie, violated my trust.

You had none from the beginning.

No one can "violate" a non-entity.

> Sucks to be you, Brain, but the trust is gone.

DEFUNCT?!?!? :-)

No problem. Went from nothing back to nothing. 0 = 0.

> Sorry.

You are. But, that's nothing new...

>> They didn't like was "bad").
>
>One of those individuals, a Leonard H. Anderson of California has no
>stake whatever in amateur radio.

Hmmm...poor PCTA extra has gotten more than one stake...should
not go out at night in that vampire suit...

>Somehow, this total non-participant
>has appointed himself "advocate" for change within amateur radio.

Just joining a whole heaping mob of others wanting to get rid of
the morse code test. :-)

>He purports to know how amateur radio should best be regulated.

I say amateur radio is best regulated by the FCC.

What does Herr Robust say? :-)

>Whatever
>he says is "good" and whatever those who disagree with him say is "bad".

Tsk, tsk. I merely state some opinions.

Herr Robust doesn't want anyone's opinions that disagree with him.

>> This newsgroup was created some years back to catch the
>> "discussions" on the Morse Code Test Issue, transferring it from
>> rec.radio.amateur.miscellaneous.
>
>You have as much to do with one as the other.

Tsk. I'm here. Herr Robust is very upset over that. Poor Robust.

>> Personal denigrations of those
>> against retaining the code test were numerous and rather ripe with
>> invective and insulting inuendo from those that championed the
>> mighty morse modes.

>
>It is funny that your own personal denigrations of those for retention
>of a morse test go unmentioned. What of your invective and insulting
>inuendo directed at them?

Hmmm...to the PCTA extras, anything said against morse code
testing is "invective and insulting inuendo."

On the other hand, PCTA extras can say anything to anyone else,
including Real invective and insulting inuendo!

PCTA extra Double Standard alive in this newsgroup!

>> That was long ago when the mighty morse
>> ruled the rank, status, privelege "qualifications" of amateurs in
>> that incredible multi-tiered license structure of pre-restructuring
>> circa 1997.
>
>What do you know of it? You haven't an amateur radio license of any
>class. That'd include license classes requiring 20 wpm, 13 wpm, 5 wpm
>and even no morse exams.

Tsk. Herr Robust is still all a-twitter over a manufactured "cause,"
aka "lack of amateur license."

Herr Robust ought to get working and MAKE those FCC people
all licensed in ham radio so they can regulate it!

Sunnuvagun!

>> No less than six classes of license for a hobby
>> activity...greater than the number of classes for commercial radio
>> operator licenses.
>
>How are you involved and why does the number of license classes bother
>you?

Who you who say who dat? :-)

Ach zo! Somebody holding a weapon on you, making you read all?

Tsk. This be free country, mein herr. Newsgroup has free access.

You want to check papers at the door? Ja?

>> Those that had Made It Through all the tests and "qualifications"
>> entrenched themselves behind the "safety" of their mental
>> barricades and mighty accomplishments (greater than anyone
>> could possibly be in non-amateur radio). They claimed "turf" and
>> bragging rights and "ownership" of What All Good Hams Must Do.
>
>You aren't a ham. Why get all upset?

I'm not a ham. I've got a beef. Your SS act sounds fishy.

Go vegetarian.

>> Those "masters" were aided by the self-promoting prose of the
>> ARRL (which had yet to get as many as a quarter of all U.S.
>> hams in membership).
>
>Why worry about the ARRL. You aren't a member.

Worry? What, me worry? :-)

>> ARRL stressed morse as the epitome of
>> ham-ness as it had ever since Hiram had been elected president-
>> for-life.
>
>Your statement cannot be backed up with evidence.

Ach zo, Herr Judge Roy Bean presiding out of the east... :-)

Many pounds of "evidence" exists in the periodicals called QST.

Much "evidence" exists in the history of the league, including
the public BoD transcripts.

You are in contempt in your own court, Judge. Case dismissed.

>> The no-code-test Technician license class never really stopped
>> growing since 1991.
>
>Why would it? It appears that the Amateur Extra never stopped growing
>either.

Tsk. Lack of understanding of simple arithmetic. :-)

License class totals show the no-code-test Technician class growing
far faster than any other. Now they are the majority class.

Herr Robust has no class. Not much in the way of social graces,
either. :-)

>> That class has become the Majority of all U.S.
>> amateur licensees...regardless of the rationalizations of the pro-
>> coders trying to play numbers games after the Restructuring.
>
>It only makes sense. It is the easiest to obtain.

There ya have it, Herr Einstein!

>> Pro-coders just couldn't believe the reality.
>
>I believe the reality. A no-code Tech is the path of least resistance.

You have been short-circuited!

>> "No-code" went against
>> their religious concepts, personified by the equation ham=morseman!
>

>My religion and amateur radio are two very distinct things.

Your statement is unsupported by evidence.

>> All "real" hams knew, loved, had tested for "code" so that was a
>> universal, divine thing they seemed to think.
>
>Is that why you have a problem? You aren't a ham.

I'm not a ham. I've got a beef. You act fishy.

Are you going to call the FDA or what?

>> An amazing aberration
>> of theirs, clinging to past standards and practices as if to life
>itself.
>
>Tell you what, Len. I'll cling to standards. You cling to life itself.

You are too much into cling-ons.

Use better toilet tissue.

>You needn't worry about it. You're fertile imagination has manufactured
>a world of angry and distressed, code-tested hams. You've even added
>"Nobel-graded" accomplishments. It just seems that way to you as one
>on the outside looking in.

Tsk. A god of radio is upset? A mere mortal causing god heil a
problem?

"No matter what job, educational level, employer, or
government/military service that anyone has, if said anyone
opposes Heil's views, he/she will be the target of Heil's insults,
ridicule, name-calling, factual errors, ethnic slurs, total lack of
emoticons and social-interaction graces, acting in an arrogant,
elitist manner...for years" :-)

>> Some
>> became outraged and vented on all "no-coders" in barrages of
>> invective.
>
>While you are a "no-coder", you aren't a radio amateur.

Not a licensed one. :-)

I've been a professional in radio for 52 years...also a hobbyist in
electronics and radio. Because of my interest in it all.

Tsk. Not good enough for Herr Robust! Haven't shown him
sufficient "interest!"

Herr Robust should try to understand why there's so little
"interest"...his mental bank account is near zero!

>> Pro-coders relieved themselves in public in disregard of
>> all, blessed by Those Of Their Kind.
>
>They did what?

You figure out. There's only so much we can teach you...

>> The tombstone of morse code testing was put in place at WRC-03
>> when most of S25 was revised. Internationally. R.I.P. code testing.
>
>Well. It would. Appear that. Your facts are as. Dubious as your.
>Sentence structure.

Tsk. Herr Headmaster needs to study written English better.

Not everything is by-the-book in perfect Strunk & White format.

You KNOW Strunk & White, don't you? :-)

>> Except, like some undead ghoul of the air, the pro-coder zombies
>> continue to haunt, to try to keep alive that equally-dead equation
>> ham=morseman.
>
>Come now, Leonard. That isn't quite as scary as Len Anderson=radio
>amateur.

Tsk, tsk, and a tut, tut to boot.

"No matter what job, educational level, employer, or
government/military service that anyone has, if said anyone
opposes Heil's views, he/she will be the target of Heil's insults,
ridicule, name-calling, factual errors, ethnic slurs, total lack of
emoticons and social-interaction graces, acting in an arrogant,
elitist manner...for years" :-)

>> They vow revenge and retribution for themselves
>> not understanding that their anger is about their own False Beliefs.
>
>Is that what drives your anger, Len? Your own False Beliefs?

What "false beliefs?" :-)

Tsk. I was doing years of HF communications before Herr Robust
got either his little ham ticket or that government job with State.

Never used morse code then nor did I have to use it then, or any
time afterwards.

Tsk and tut, tut. Herr Robust demands ALL to "show interest" in
radio by getting a ham license first!

Pity that so many engineers and technicians ignored your demands
and went to work in radio anyway...sans ham ticket.

Sunnuvagun!

>> They continue to take out that anger, relieving themselves by
>> denigrations of all who are "no-code."
>
>Is that why you believe you are the object of denigration by others?

"No matter what job, educational level, employer, or
government/military service that anyone has, if said anyone
opposes Heil's views, he/she will be the target of Heil's insults,
ridicule, name-calling, factual errors, ethnic slurs, total lack of
emoticons and social-interaction graces, acting in an arrogant,
elitist manner...for years" :-)

>> We are awash in their "relief"
>> to this day. No relief tube in sight.
>
>"We"? How are you involved?

Ah! The faintest glimmer of understanding from Herr Robust's
mighty intellect! :-)

>> Amateur radio is essentially a hobby, a pleasureable activity involving
>> radio communications arts done for personal enjoyment.
>
>...or so you've been told.

Oh, my, cancel the previous comment. No real understanding by
Herr Robust.

"No matter what job, educational level, employer, or
government/military service that anyone has, if said anyone
opposes Heil's views, he/she will be the target of Heil's insults,
ridicule, name-calling, factual errors, ethnic slurs, total lack of
emoticons and social-interaction graces, acting in an arrogant,
elitist manner...for years" :-)

>> Licensing
>> and regulations thereof are a result of the physics of all radio, to
>keep
>> order in what would (and was) an EM chaos.
>
>The physics of radio are certainly a part of the regulations. They, by
>themselves, are not the sum total of material making up amateur radio
>regulations.

Tsk. Without all those laws of physics, applied, ain't no ham radio.

>> Licensing regulations,
>> like all laws, were never fixed, immuteable, imposed by a divinity.
>> Regulations must remain open to change just like all laws must
>> remain open for change.
>
>The regs have changed for as long as I've been a ham.

Have you been age-stamped by the FDA?

>> Pro-coders are resistant to change.
>
>...and you are for change for the sake of change. You have no stake in
>amateur radio.

Tsk. Appears Herr Vampire has gotten more than one stake in
him while in this newsgroup!

>Do you want to fight to the death championing your ideas of amateur
>radio regulation? Be my guest.

Nah. I don't think your "guest" accomodations will ever make a
Michellin Guide rating. Zero stars.

Pity that you want to abridge the First Amendment so much. Makes
you very Un-American!

Is it due to all those years in the "foreign service?"

"No matter what job, educational level, employer, or
government/military service that anyone has, if said anyone
opposes Heil's views, he/she will be the target of Heil's insults,
ridicule, name-calling, factual errors, ethnic slurs, total lack of
emoticons and social-interaction graces, acting in an arrogant,
elitist manner...for years" :-)

Tsk. Nursie is the ruin.

> This is about you.

Really? I thought the subject was "ARRL to propose subband-by-bandwidth regulation." [look up at the title block...it's there]

> Not the FCC commissioners...

Sorry, but the FCC has to act on the ARRL petition. FCC is involved.

> Not your "real extra" buddy in "Joy-zee"

You mean N2JTV? Gene lives in Long Island, NY.

Maybe it's Jim Hall, KD6JG, in middle California's Gold Country?

Or Allan Walston, W6MJN, in Northridge, CA?

Maybe you need an atlas to help you navigate?

> Not your correspondence course shrink wife...

Don't have one of those.

> Not the CAP, OES, ADA, ARRL or IEEE.

How about the CIA, the FDA, the FBI?

> You.

I'm not the ARRL.

> You are not licensed. That's a fact.

WRONG. Got all sorts of licenses. That's a fact.

> No license = No participation.

Tsk.

> No participation = No experience.

Tsk, tsk.

> No experience = Stupid Newsgroup errors.

Tsk, tsk, tsk! :-)

"Sned" me some corrections on "amatuer radio," then...

> Stupid Newsgroup Errors = Lennie Anderson.

Tsk. No such person here.

There IS nursie having some more "hostile actions" action.

There IS nursie trying to correct the Department of Defense.

:-)

> Lennie Anderson = Putz.

Tsk. Still haven't gotten the right meds, yet?

Pity that, surrounded by real MDs and not availing himself of their expertise.

> And there you are.

I'm right here. Correct.

Not to the electronic industry although one editorial in Electronic
Design News made a mention of their website.

There hasn't been a lot of comment on BPL in the industry press.

One reason may be that BPL doesn't offer that much in the way
of possible new products to be designed and made...in comparison
to any of the many wireless schemes which have gotten the PR.

The through-the-AC-line schemes have shown up as NOT having
acceptance in the market...quite possibly for the fact that so few
actually work as advertised. What remains is the venerable X10
system and a couple copycats plus the new Black & Decker line
for remote controlling, all operating at much lower bandwidth.

>> For much of the rest of it, I see it as the league trying to survive.

>Yeah, I see that alright!

ARRL is 90 years old and they have not had much turnover at Hq.
That leads to "cronyism" in Hq and a resultant status-quo thinking
which has contributed to their lack of getting new membership.
St. Hiram hisself remained president since day one until he got too
old to show up at the office. Dave Sumner is "executive president"
and isn't votable out of office.

While there is a BoD at the ARRL, the publications arm takes its
direction direct from Hq staff. That leads to a concentration of
who-runs-what to the Newington group despite all the self-promotion
of "democratic principle" BoD "discussions." That publishing arm
is a mighty strong venue for getting readers to think the way the
Hq advisers say they should. Not that many publications left for
radio amateurs down here.

What many of the league disciples fail to realize is that whatever
gets published out of Newington is the decision of the editors, not
some etheral "will of the ham community." Hq staff have the very
final say-so on anything in print...and print with real ink on real
paper doesn't disappear or get revised easily. That is Real Opinion
Making Power!

>phenomenal compared to 20 years ago.

Agreed. But...

Several of the Believers in here will cuss at cell phones because
they aren't "real" radios one puts on a nice desk in the "shack" in
prominent view. Those same Believers will trashmouth VHF and
above the same way...HTs are called "the shack on the belt." :-)

Digital devices, in particular the family called microcontrollers, made
all of that possible in such small size. I doubt there is any "good"
transceiver for HF designed and made in the last decade that
doesn't have a microcontroller as the basic control and display
handler, the one that makes 10 Hz increment accurate tuning
possible by making the internal DDS control words.

>> I'm still incredulous at the amazing leaps forward in technology

>> No sweaty-dah.
>
>Absolutely - my car radio has far better frequency stability than most
>of the test equipment that I operated back in the 70s.

No one seems to think of the temperature extremes that an auto
or other vehicle goes through. :-)

The Phase Locked Loop made it possible and digital devices makes
the PLL practical. The first PLL was done in France in 1932. It
wasn't until the mid 1960s that they started appearing in radio
communications equipment...starting in low microwave
oscillator units using samplers to get the uWv into the loop.

That same PLL principle made the HP Vector Voltmeter possible
and the big line of self-calibrateable test systems that demand
accurate tuning returns to perform computer-controlled testing and
self-calibration. Frequency counters are digital instruments. Those
have shrunk to ridiculously small sizes in marrying a microcontroller
to an LCD display backlit by LEDs, using a maximum of four ICs.
AADE has a fine line of those little guys, well worth it to revitalize
an old mechanical dial read-out rig.

>> It used to be that tuning up a tube transmitter actually took

>
>My own personal contribution to the past, I suppose.....that, or I'm
>too cheap to buy a new rig - or both :)

There's nostalgia and then there's nostalgia. :-)

A long time ago I did those "tune-ups" the old fashioned way for
a couple years. Bloody nuisance when there's three dozen big
transmitters under your care and NONE of the is taken down out
of circuit unless some high rank says so. :-)

I can't see why anyone wants to trashmouth automatic antenna
tuners which would reduce the amount of knob-twisting to a
minimum. Solid-state PAs of today don't need any special
knob-twisting...and they have built-in coupler sensing to tell the
user if the VSWR is getting dangerous to the final.

Ah, so we are "bad" because we exist... :-)

Gotta love that PCTA extra Double Standard!

>> Answer: In nursieworld fantasizing, nursie rules have contradictory
>> meanings...anything that nursie says has "everything to do" with

>> amateur radio but no one else can say anything against that.
>
> And in LennieWorld fantasy, Lennie is Loved and Reverered by All
>Those Who Glorify His Infinite Wisdom.

There is NO "LennieWorld" nor any "fantasy," nursie.

That exists solely in your own mind.

> Unfortunately, the facts are a bit more stark.

Tsk. Nursie "facts" don't jibe with reality, only in her mind.

> Very few people like Lennie because he's rude, dishonest and
>irresponsible.

Isn't that so very terrible? Why, we should LOVE to be insulted
(as well as our spouses and friends) by the nursie! :-)

Good old PCTA extra Double Standard invoked again!

>What knowledge he does possess goes to waste becasue
>he cannot share it without demanding Tribute and Devotion, and no one,
>no matter how hungry for that knowledge, wants to be slapped around by
>a geek with an attitude.

Right...we exist only to serve the great master, Nursie Yell-yell.

Here's a suggestion for more knowledge: Night school!

Or maybe a nice correspondence course!

The latter is great for you. If you don't like your grades, you just
call the instructor "PUTZ!" in writing. That will win you all sorts
of things... :-)

> Sucks to be Lennie.

Tsk. The Shop-Vac, a Craftsman brand, still works fine...

That's simply a falsehood.

> That leads to "cronyism" in Hq and a resultant status-quo thinking
> which has contributed to their lack of getting new membership.

That many no-code Techs have as their sole amateur radio station, a single, under $200 hand-held 2m FM transceiver which they use only on local repeaters might itself be a contributing factor.

> St. Hiram hisself remained president since day one until he got too
> old to show up at the office.

Yeah. Dying will do that to you. HPM was in office for about 22 years. That's about thirty years less than you've been a PROFESSIONAL in electronics. Did you retire when you got too old to show up at the office?

> Dave Sumner is "executive president"
> and isn't votable out of office.

You'd better check your facts, Mr. Wizard.

> While there is a BoD at the ARRL, the publications arm takes its
> direction direct from Hq staff. That leads to a concentration of
> who-runs-what to the Newington group despite all the self-promotion
> of "democratic principle" BoD "discussions."

Self-promotion of "democratic principle"? BOD "discussions"? Why the quotation marks? The ARRL does indeed operate under democratic principles. Division Directors are voted in and out with regularity. BOD "discussions" are meetings of the board of directors.

> That publishing arm
> is a mighty strong venue for getting readers to think the way the
> Hq advisers say they should.

Yeah, that's it, Leonid: The readers have been brainwashed into thinking the way their Newington Masters want them to think. You really should get your own conspiracy talk show.

> Not that many publications left for
> radio amateurs down here.

Down where?

> What many of the league disciples fail to realize is that whatever
> gets published out of Newington is the decision of the editors, not
> some etheral "will of the ham community."

Really? Do you think the editors of "Gourmet" and the editors of "Time" and "National Geographic" engage in such practices? By golly, you may have uncovered one of the big scandals of all time! Come to think of it, I've been a member of the National Geographic Society for over thirty years. I've never had an opportunity to vote on any issue before the society. I've voted in ARRL elections for four decades.

> Hq staff have the very
> final say-so on anything in print...and print with real ink on real
> paper doesn't disappear or get revised easily.

I don't think any of us knew this. Are you telling us that once a magazine or book is published, the pages and ink can remain intact for long periods?

> That is Real Opinion
> Making Power!

Maybe you should start publishing your diatribes on real paper with real ink. Then you'd have some Real Opinion Making Power.

> Several of the Believers in here will cuss at cell phones because
> they aren't "real" radios one puts on a nice desk in the "shack" in
> prominent view.

They will? Cell phones are certainly real radios. They are low power transceivers which will work over relatively short ranges. One must pay in order to use them. Cordless phones are real radios too. Like yourself, neither are a part of in amateur radio.

> Those same Believers will trashmouth VHF and
> above the same way...HTs are called "the shack on the belt." :-)

Many, many of us own HT's. A ham whose only amateur radio station is an HT may be referred to as a "shack-on-a-belt" type. You aren't yet eligible for that status.

> A long time ago I did those "tune-ups" the old fashioned way for
> a couple years. Bloody nuisance when there's three dozen big

> Tsk. Herr Headmaster needs to study written English better.

I see. You make an error in sentence construction and I need to study written English. Well, I studied and studied on your "Internationally." effort. It is still short of a few items.

> Not everything is by-the-book in perfect Strunk & White format.

No, not everything you, the professional writer *chortle* puts together is in by-the-book, perfect Strunk & White form.

> You KNOW Strunk & White, don't you? :-)

The question seems to be: do you?

>
> >> They vow revenge and retribution for themselves
> >> not understanding that their anger is about their own False Beliefs.
> >
> >Is that what drives your anger, Len? Your own False Beliefs?
>
> What "false beliefs?" :-)

You know--the False Beliefs you hold in opposition to the views of others.
> Tsk. I was doing years of HF communications before Herr Robust
> got either his little ham ticket or that government job with State.

So? Odds are I'll be doing it after you are no longer drawing breath. That's the way life works. I had no control of the date of my birth.

> Never used morse code then nor did I have to use it then, or any
> time afterwards.

...and you bray about it as if that were some sort of badge of honor.

> Tsk and tut, tut. Herr Robust demands ALL to "show interest" in
> radio by getting a ham license first!

Actually, that's another falsehood. I've written of interest in amateur radio.

> Pity that so many engineers and technicians ignored your demands
> and went to work in radio anyway...sans ham ticket.

Sorry, Pops. This is not an engineering or technician newsgroup.

> >> They continue to take out that anger, relieving themselves by
> >> denigrations of all who are "no-code."
> >
> >Is that why you believe you are the object of denigration by others?
>
> "No matter what job, educational level, employer, or
> government/military service that anyone has, if said anyone
> opposes Heil's views, he/she will be the target of Heil's insults,
> ridicule, name-calling, factual errors, ethnic slurs, total lack of
> emoticons and social-interaction graces, acting in an arrogant,
> elitist manner...for years" :-)

Seriously, Leonard. Could you not compose an answer or were you just
embarrassed by the question?

> >> Licensing
> >> and regulations thereof are a result of the physics of all radio, to
> >keep
> >> order in what would (and was) an EM chaos.
> >
> >The physics of radio are certainly a part of the regulations. They, by
> >themselves, are not the sum total of material making up amateur radio
> >regulations.
>
> Tsk. Without all those laws of physics, applied, ain't no ham radio.

The physics of radio are certainly a part of the regulations. They, by
themselves, are not the sum total of material making up amateur radio
regulations.

> >Do you want to fight to the death championing your ideas of amateur
> >radio regulation? Be my guest.
>
> Nah. I don't think your "guest" accomodations will ever make a
> Michellin Guide rating. Zero stars.

You must have misunderstood. I'd rather have Al Gore, Hillary Clinton,
Susan Sarandon and Michael Moore as house guests.

> Pity that you want to abridge the First Amendment so much. Makes
> you very Un-American!

You've made your views known. That's are far as your First Amendment
rights go. They are no more important than mine.

> Is it due to all those years in the "foreign service?"

N2EY: "Besides, here's a simple, plain fact:

No matter what job, educational level, employer, or
government/military service that a radio amateur has, if said radio
amateur opposes Mr. Anderson's views, he/she will be the target of Mr.
Anderson's insults, ridicule, name-calling, factual errors, ethnic
slurs, excessive emoticons and general infantile behavior."

Amateur Radio Newsline™ Report 1412 September 3, 2004

The following is a message from the Amateur Radio Newsline Support Fund. Here's the funds administrator, Andy Jarema, N6TCQ.

--

Well, here I am again, so theres obviously another financial crisis that Amateur Radio Newsline is facing. And this time its a real doozie. Let me explain it to you.

During the summer many of you are away and donations dwindle to a mere trickle. At the same time, some of our biggest yearly expenses occur during July and August. This includes the Young Ham of the Year Award presentation that we host every year in Huntsville, Alabama. While we had planned ahead, we did not know exactly how much we would need and we were caught short. The price of airfares was up as was the cost of hosting the mini banquet for our recipient, her family and friends.

Added to that were higher than anticipated telephone costs to cover the breaking news stories we brought you over the summer. And right now that leaves us with less than $50 in the bank and several hundred dollars in outstanding bills that must be paid right now to keep Amateur Radio Newsline coming your way.

As we have said before, Amateur Radio Newsline is a federally charted 501(C)(3) and California state not-for-profit corporation. For most United States residents it means that your donation is tax deductible.

So please help keep the news on your local net, on your repeater and on your computer by making a donation to the Amateur Radio Newsline Support Fund. Its address is Post Office Box 660937, Arcadia, California. The zipcode is 91066.

Again that's the Amateur Radio Newsline Support Fund at Post Office
Box 660937, Arcadia, California, 91066.

On behalf of the entire all volunteer world-wide Amateur Radio Newsline team, I thank you for listening to this appeal and for your ongoing support that keeps the news of Amateur Radio coming your way.

I'm Andy Jarema, N6TCQ. Now Amateur Radio Newsline report 1412.

--

Thanks Andy. Now Amateur Radio Newsline report number 1412 with a release date of Friday, September 3rd, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. The ARRL bandwidth based restructuring proposal causes controversy and maybe some reconsideration. Find out more on Amateur Radio Newsline report number 1412 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: REACTING TO THE ARRL BANDWIDTH PROPOSAL

An ARRL proposal to restructure Amateur Radio along bandwidth lines has caused a lot of discussion in the nations ham community. And it may cause the League to rethink its position. Amateur Radio Newsline's Mark Abramowicz, NT3V, is in Philadelphia, and has the rest of the story:

--

Shortly after the ARRL began circulating the proposal and posted it on its website, the e-mails, phone calls, HF, VHF, and digital-mode traffic took off.

And now, Amateur Radio Newsline has learned the bandwidth proposal may be tabled for more study when the ARRL's executive committee meets next month.

That confirmation comes from W6OBB in Nevada. If the call sign isn't familiar, the name behind it might be. He's Art Bell, host of the weekend edition of "Coast to Coast AM" heard on more than 500 commercial radio stations across the nation.

Bell, who joined the fight against Broadband Over Powerlines several months ago, and featured the subject on his radio program, expressed concern about what he called a Draconian proposal that would over-regulate the ham bands. Bell tells me he relayed that concern in a phone call to ARRL President Jim Haynie W5JBP.

Bell characterizes the discussion as cordial and at the end, he says Haynie related he was re-evaluating the proposal based on many comments he had received.

"He indicated to me and told me I could pass on to you that they're looking into pulling this whole thing back and taking a harder look at it," Bell says.

While Bell says he believes the ARRL had good intentions with the proposal, it may have gone too far.

"What began as an examination by the League of how we could possibly encourage the digital mode, it went a little too far and began to over-regulate," Bell says. "I'd kind of like to see it go the other way and I'd like to see our bands freed up."

Haynie says he's gotten a lot of feedback on the proposal. He says it came from the League's desire to promote - not restrict - innovation and experimentation. He says it was also a response the Federal Communications Commission's desire to see more innovation from the ham community.

"I think we rose to the challenge," Haynie says. "We have demonstrated Software Defined Radio that just knocked their socks off, in my view.

"We have come up with some other stuff - Joe Taylor and some of his things for moon bounce. And I think the Amateur Radio community needed a wake-up call is what they needed and I think that's what we've gotten and were given."

Haynie says it's clear the digital modes like RTTY and PSK 31 need attention.

"Where do we want to go to the future?" Haynie asks. "And, as I mentioned a couple of years ago, I took my model 28ASR and took it to the scrap man. But that's the standard that's used today is 850Hz shift at 45 baud.

"Well, we don't do too much of that. I'm not saying there's not RTTY enthusiasts out there, there are and I appreciate that and I know that and I want to protect their rights to do those things."

Art Bell says he and others don't object to digital innovation. But he doesn't think the proposal hits the mark.

"There are many with differing interests who are not too pleased with the proposal and, on the face of it, it simply does not make sense," Bell says. "I agree that we should encourage the digital modes and development, but we shouldn't try to push something into place that is not techincally ready to happen yet."

Restricting bandwidth, Bell says, won't promote innovation.

"Why do we have to cut and slice and dice and regulate," Bell says. Why not just let anybody virtually go anywhere and let all of us just live together with some gentlemen's agreements which we have now and which work very, very well on most bands?

"So with that in mind, look at the Canadians. The Canadians have a 6khz limit and they can go anywhere on the band they want from the bottom to the top. And I don't see why that would not apply and work well in America."

Haynie says he wants to hear more from hams and he's encouraging all of us to get into the FCC's Part 97 rules and share input on the proposal at the ARRL's website, that's ARRL-dot-org.

"Look at the rule book and see what's there now, "Haynie says. "And, is there something that could be changed that would allow a new technology to be developed, then that's what we want to know."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More on the ARRL proposal and reaction to it in upcoming Amateur Radio Newsline reports. (ARNewsline(tm))

**

RESTRUCTURING: DROPPING CW TESTING IN CANADA

Meantime, to the north, another form of restructuring proposal is being considered by hams in Canada. This as telecommunications regulator Industry Canada publishes a Gazette Notice called "Recommendations from Radio Amateurs of Canada to Industry Canada Concerning Morse Code and Related Matters".

The Radio Amateurs of Canada proposal deals with the WRC-2003 decisions concerning Morse as a compulsory qualification for High Frequency operation in the Amateur Service. Radio Amateurs of Canada has recommended that Industry Canada delete the mandatory aspect of the requirement for Morse testing but leave it as a voluntary qualification. This, because knowledge of code may be required for reciprocal operation in those countries retaining a Morse requirement.

The notice was published on Saturday, August 28th and gives Canadian radio amateurs sixty days in which to respond. Radio Amateurs of Canada recommends that the nations ham community endorse this proposal. (RAC)

**

ENFORCEMENT: 10 METER INTRUDER WARNED

Here in the United States a commercial business has been warned to stay of the 10 meter ham band. The FCC's Daryl Duckworth, N-N-Zero-
W, explains:

--

Duckworth:"Dandy Service Corporation of Warrendale, Pennsylvania, was
issued a warning notice fot unlicensed radio operations on 28.085 Mhz. Two of their vehicles were the source of transmissions on August 5th of this year in Michigan on Interstate 94 at mile-marker 262."

--

Dandy Service was told to advise its drivers that operation of radio transmitting equipment without a license is a violation of the Communications Act of 1934. That it could subject the operator to fine or imprisonment, as well as an seizure of any non-certified radio transmitting equipment. Monetary forfeitures normally range

from $7,500 to $10,000. (FCC, RAIN)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N7VGS repeater serving Star Valley Wyoming.

(5 sec pause here)

**

THE BPL FIGHT: IT MAY BE COMING TO SO. CAL.

A heads up warning to hams living in the California counties of Los Angeles, San Diego and Riverside. According to ARRL officials in the Southwestern Division, Broadband over Powerline may be coming your way.

Writing in the latest issue of the division electronic newsletter, Director Art Goddard, W-6-X-D, and Vice Director Tuck Miller, N-ed-6-T, say that power companies in these areas may be considering BPL as a new business venture. The two officials add that the regions Amateur community needs to work together to see if they can head off these B-P-L flirtations before they become entrenched on the ham radio bands.

The report goes on to say that local ARRL Section Managers are already on top of the situation. The S-M's are reportedly forming Local Action Teams to work on all levels in handling the B-P-L threat to the area. (ARRL Southweestern Divisioon Communicator)

**

OPERATIONAL NEWS: TO PL OR NOT TO PL - THATS THE SERA QUESTION

Repeaters in eight states and the hams that operate through them may soon face mandatory use of continuous tone coded squelch. Then again, they may not. Amateur Radio Newslines Gary Pearce, KN4AQ, is in Raleigh, North Carolina, trying to sort it all out:

--

SERA, the SouthEastern Repeater Association, ignitied a furious debate when its Board of Directors voted to require the use of tone as a condition for frequency coordination for all repeaters in its territory. SERA is the frequency coordinating group for eight southeastern states: Georgia, Kentucky, Mississippi, North and South Carolina,| Tennessee, and parts of Virginia and West Virginia.

The SERA Board voted at its June meeting that some form of tone access will be a condition of coordination for all new repeaters effective immediately. Existing repeaters will need to adopt tone

within two years, by July 2006. The board was acting on a motion by Steve Grantham AA5SG, the Director from Mississippi. The goal of the policy was to reduce the number of complaints that SERA coordinators receive from repeater owners whose carrier access repeaters are keyed up by users of a co-channel neighbor.

In discussion at the meeting, the new policy was softened some when coordinators asked if this meant that repeaters would be automatically decoordinated if they decided not to use tone. The answer, according to an article in SERA's magazine the Repeater Journal, was "no, but…" SERA would not entertain an interference
complaint from repeater owners who remained carrier access.

The debate began in earnest when the August issue of the Repeater Journal began arriving and the ARRL published a story about it on their web site. Repeater owners argued the merits of tone itself, along with complaints that SERA didn't poll its members, and non-member repeaters, before making the decision.

The decision may not be final, according to SERA President Roger Gregory W4WRG:

--

Gregory: I've received, and we have received a lot of comments pro
and con about this policy. And all I can say right now is that we're
taking a second look at it and it's not really written in stone at
this time as to what kind of decision we're going to make one way or
the other."

--

SERA's next Board meeting takes place in January, but the group can
reach an earlier decision at any time through an e-mail ballot.

Reporting for Newsline, this is Gary Pearce KN4AQ in Raleigh, North Carolina.

--

So will the hams in SERA coordinated states have to use tone access on every repeater? Right now, the answer seems up in the air. (KN4AQ, ARNewsline(tm))

**

HAM RADIO IN SPACE: ISS GOES CROSS-BAND REPEAT

Speaking of repeaters. there's a new cross-band F-M system in space
and its home is on the International Space Station. This, as the ARISS program announces that the amateur radio equipment aboard the orbiting outpost is now on the air in repeater mode.

The downlink frequency remains 145.80 MHz. The new uplink frequency is 437.80 MHz and all frequencies are subject to Doppler shifting.

ARISS leaders say that they realize that many hams will miss the packet station that the cross-band F-M voice repeater replaces. Burt the groups leaders say that the cross-band repeater will allow further experimentation of the ISS amateur radio system.

For further information on working satellites and adjusting for Doppler shift, please review Emily Clark's (W0EEC) excellent presentation on AMSAT's website, http://www.amsat.org/amsat-new/information/faqs/Intro_sats.pdf (ARISS)

**

RADIO LAW: FCC ADOPTS RULES TO ENHANCE NETWORK OUTAGE REPORTING

Back on mother Earth in Washington, the Federal Communications Commission has adopted new rules requiring wireless, wireline, cable, and satellite telecommunications providers to report information about significant disruptions or outages to their systems to the Commission. The FCC says that these reports must be filed electronically. The Commission also ruled that all sensitive information collected as a result of these new rules will be protected from public disclosure. The full story is on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-250543A1.doc (FCC)

**

RADIO LAW: FCC REDEFINES DTV CONVERSION SCHEDULE

The FCC has also taken steps toward deciding exactly which channels broadcasters will end up with when they switch to digital television. By unanimous vote, the Commissioners have set up a timetable that will decide by June 2006 which channels people will tune in on to see their favorite programs. .

FCC chairman Michael Powell says that the vote signals that substantial progress has been made in switching television from its current analog transmission system to digital. He adds that the national dialogue has shifted from wondering if the DTV transition would ever end to exploring when it should end. (FCC)

**

RADIO LAW: CANADIAN GROUPS CHARGE THAT HD RADIO WILL HARM RECEPTION

Meantime, Canada charges that High Definition or Hi Fi digital Radio will harm reception of Canadian stations inside its own border. At least that's the headline from the August 30, 2004 edition of Inside
Radio.

According to the story that follows, both the Canadian Boadcasting Corporation and the Canadian Association of Broadcasters have asked the country's technical regulatory agency to protest iBiquity's In-Band On-Channel digital radio system. They allege harmful effects on current A-M reception, especially during nighttime hours. The whole story is on-line at http://tinyurl.com/6uubn and www.insideradio.com (CGC)

**

HAM AWARDS: THE RCC IS BACK AND ITS FREE

Some good news. The Rag Chewers Club or R-C-C award is back, but it will not be sponsored by the American Radio Relay League. Bill Pasternak, WA6ITF, has the details:

--

Its the Society for the Preservation of Amateur Radio -- better known by the acronym SPAR that will be sponsoring the new R-C-C. The group has announced that as of September 1st it will adnminister this fun award and will do so following the old ARRL rules.

According to SPAR, all a ham has to do to get an R-C-C is to present evidence of having had an actual one on one Q-S-O that lasted at least 30 minutes. The QSO can be made on any legal amateur frequency.

In early 2004 the ARRL announced it was discontinuing the Rag Chewers' Club Award due to a lack of interest. Conversations SPAR held with hams seemed to indicate that the lack of interest was due mainly to the cost of the award. So SPAR says that the award will be available free of charge to all licensed radio amateurs.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los
Angeles. Jim.

--

All certificates will be distributed by e-mail as Adobe P-D-F files that you can print and frame. The awards are numbered and endorseable by mode. Complete rules and an on-line application are on the SPAR website at www.spar-hams.org. (SPAR, QRZ.com)

**

NAMES IN THE NEWS: HAPPY 104 BIRTHDAY TO KJ6KQ

And less we forget, a belated birthday greeting goes out to Bill Diaper, KJ6KQ who turned 104 on August 12th. That's right, we

said
104, and probably making him the oldest living radio amateur in the United States, if not the world.

According to a posting on the Q-R-Zed dot com by Tom Ferguson, N6SSQ, website, Bill is a member of the Pacific Amateur Radio Guild and these days resides in the Masonic Homes in Union City, California. Tom says that there is a radio shack in the basement that Bill used up till a year ago but is very difficult for him to access now. That's because the station is in the basement next to the laundry room. Bill says it is dark and damp down there and must get assistance to get there and have someone tune and adjust the frequency on the rig for him.

N6SSQ adds that the Pacific Amateur Radio sent Bill a flurry of letters and cards on his birthday and that he was very pleased to get them. (QRZ.com)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United
States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM FAIR JAPAN ATTRACTS 30000 ATTENDEES

Turning to the ham radio social scene, Japan's largest hamfest, the JAIA Ham Fair, was held the weekend of August 21st and 22nd. The venue was Tokyo's Big Sight International Convention Center. Among
the highlights of gear being shown were Yaesu and Icom both showcasing their high end $10,000 H-F transceivers. Kenwood did not match in the super high end radio category but had a well attend ongoing demonstration of their ARCP-480 Radio Control Program.

But the manufacturers and dealers were only a small part of the show. Over 170 radio clubs also had booth space at the show. These ranged from large organizations like JAMSAT, the Japan Shortwave Club, and SEANET down to local organizations who use their booth for flea market sales.

Also present were a wide variety of organizations promoting every aspect of Amateur Radio. This included mountain-topping operators, microwave activity enthusiasts and antenna construction experimenters. Operations represented included facsimile, SSTV, ATV,

RTTY, 10M FM, 6 Meters, CW devotees, QRP, homebrewing, classic rigs, military surplus and even a contingent from the A-M community.

Ham Fair is Japan's largest annual gathering of radio amateurs from
the Pacific Rim. An estimated 25,000 to 30,000 attended this years event. (WIA News)

**

THE SOCIAL SCENE: WSWSS 2004 FALL CONFERENCE IN FRESNO CA

Back on this side of the Pacific, the Western States Weak Signal Society tenth annual VHF and UHF Conference takes place Saturday, October 9th. The venue is the M2 Antenna System Facility, at 4402 N. Selland Ave in Fresno, California. Registration starts at 8 AM with the conference program slated to begin at 9 AM. For more information write to David Peters, KI6FF, 14291 Middletown Lane, Westminster, California, 92683. You can also e-mail David to ki6ff@juno.com (VHF Reflector)

**

HAM RADIO BUSINESS: OAL NO LONGER REPPING DEM

In news from the ham radio business world, David Clingerman, W-6-O-A-L says over the V-H-F Reflector that his company known as the Olde Antenna Lab of Denver, Colorado is no longer representing Down East Microwave, Inc. Dave says to please refer your help questions, pricing information and orders directly to Down East Microwave in New Jersey. (VHF Reflector)

**

HAM RADIO NEAR SPACE: UK BALLOON LAUNCH LICENSED FOR SEPT. 12

G3ZHI reports that a license has been granted for a United Kingdom high altitude ham radio balloon flight. The project is now authorized for operation on 2.500 GHz on Sunday, September 12th. The license has special permission to operate at up to 50,000 feet instead of the usual flight ceiling of 2,000 or 5,000 feet.

The launch is scheduled to take place at about 1.30. Plans are still afoot to relay pictures via the new 13 centimeter GB3FT repeater if the system is completed and on the air in time for the flight. More information on this experiment as it becomes available. (G3ZHI)

**

WORLDBEAT - UK:: NEW RSGB ON -LINE

There's a new ham radio promotional video out and it has a definitely
British flair. And in an effort to help to promote amateur radio, the recently-created Essex Amateur Radio Club has started streaming

the new RSGB video "What is Amateur Radio" on the Internet.

The Essex group is providing it at speeds of 26 kb and 57 kb so it can be viewed by those using dial-up as well as broadband. If you want to take a peak it is available in cyberspace at www.essexamateurradio.org.uk (RSGB)

**

WORLDBEAT - NORWAY: HACKER DEFEATS AIRPORT EXPRESS

Meantime on the European mainland the same Norwegian hacker known for developing D-V-D encryption-cracking software has apparently struck again. This time his target is the security system that protects Apple Computer's wireless music streaming technology.

Jon Johansen has released a hacking system on his website that provides a key to unlock the encryption Apple uses for its AirPort Express. The unit lets users broadcast digital music from Apple's on-line iTunes Music Store on a stereo that's not plugged into an Apple computer. This permits other software applications from competitors to work with the proprioritary AirPort Express codec. Apple is reportedly considering taking legal action in the case. (Published reports)

**

RADIOSPORTS: HOST STILL NEEDED FOR 2005 ARDF GAMES

Turning to the world of radiosports, a reminder from Joe Mell, KZ0OV, that a group is still meeded to host the fifth U-S-A Amateur Radio Direction Finding Championship games. This, in the summer of 2005.

Some prerequisites for being the host include having suitable sites for 2 meter and 80 meter hunts along with the ability to provide foxhunting courses. There are also the organizational aspects to consider. These include providing registration services, housing for the contestants, meeting rooms, transportation to and from the hunt areas and lots more.

If your club is interested in hosting this event, please contact Joe by e-mail before September 15th to homingin@aol.com. Full details about the games and how to become the 2005 host is on line at www.homingin.com (ARNewsline(tm))

**

DX

In D-X, word that K3GV portable VY2 is active on 15 and 20 meters as from Prince Edward through the 12th of September. The island counts as NA-029 for the RSGB Islands on the Air award program. QSL's go to
K3GV at his callbook address. (RSGB)

And while this is short notice, the All Asian SSB contest will take place beginning at 00.01 U-T-C on Saturday, September 4th and will run for 48 hours. Operation is on 160 through 10 meters with stations in Asia trying to work the rest of the world. The official exchange for this one is a signal report and the operator's age. (WIA News)

**

THAT FINAL ITEM: NRC MEETS IN BATAVIA NY

And finally this week, a big meeting of broadcast band SWL's is taking place as we go to air. Here's Fred Vobbe, W8HDU, with the details:

--

Audio report only. Download the newscast at www.arnerwsline.org

--

Fred has promised to be here net week with a full wrap-up on this years gathering. (W8HDU)

3014. ARRL Walks Away From Bandwidth Restrictions

Newsgroup: rec.radio.amateur.policy
Date: 2004-09-05 07:30:51 UTC
From: hamop_62@hotmail.com
Message-ID: <792e029d.0409042330.1c1769e8@posting.google.com>
Source record: 96740
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.amateur.dx

The Newsline says that ARRL will give up its bandwidth restriction idea. This is in the current news.

RESTRUCTURING: REACTING TO THE ARRL BANDWIDTH PROPOSAL

An ARRL proposal to restructure Amateur Radio along bandwidth lines has caused a lot of discussion in the nations ham community. And it may cause the League to rethink its position. Amateur Radio Newsline's Mark Abramowicz, NT3V, is in Philadelphia, and has the rest of the story:

--

Shortly after the ARRL began circulating the proposal and posted it on its website, the e-mails, phone calls, HF, VHF, and digital-mode traffic took off.

And now, Amateur Radio Newsline has learned the bandwidth proposal may be tabled for more study when the ARRL's executive committee meets next month.

That confirmation comes from W6OBB in Nevada. If the call sign isn't familiar, the name behind it might be. He's Art Bell, host of the weekend edition of "Coast to Coast AM" heard on more than 500 commercial radio stations across the nation.

Bell, who joined the fight against Broadband Over Powerlines several months ago, and featured the subject on his radio program, expressed concern about what he called a Draconian proposal that would over-regulate the ham bands. Bell tells me he relayed that concern in a phone call to ARRL President Jim Haynie W5JBP.

Bell characterizes the discussion as cordial and at the end, he says Haynie related he was re-evaluating the proposal based on many comments he had received.

"He indicated to me and told me I could pass on to you that they're looking into pulling this whole thing back and taking a harder look at it," Bell says.

While Bell says he believes the ARRL had good intentions with the proposal, it may have gone too far.

"What began as an examination by the League of how we could possibly encourage the digital mode, it went a little too far and began to over-regulate," Bell says. "I'd kind of like to see it go the other way and I'd like to see our bands freed up."

Haynie says he's gotten a lot of feedback on the proposal. He says it came from the League's desire to promote - not restrict - innovation and experimentation. He says it was also a response the Federal Communications Commission's desire to see more innovation from the ham community.

"I think we rose to the challenge," Haynie says. "We have demonstrated Software Defined Radio that just knocked their socks off, in my view.

"We have come up with some other stuff - Joe Taylor and some of his things for moon bounce. And I think the Amateur Radio community needed a wake-up call is what they needed and I think that's what we've gotten and were given."

Haynie says it's clear the digital modes like RTTY and PSK 31 need attention.

"Where do we want to go to the future?" Haynie asks. "And, as I mentioned a couple of years ago, I took my model 28ASR and took it to the scrap man. But that's the standard that's used today is 850Hz shift at 45 baud.

"Well, we don't do too much of that. I'm not saying there's not RTTY enthusiasts out there, there are and I appreciate that and I know that and I want to protect their rights to do those things."

Art Bell says he and others don't object to digital innovation. But he doesn't think the proposal hits the mark.

"There are many with differing interests who are not too pleased with the proposal and, on the face of it, it simply does not make sense," Bell says. "I agree that we should encourage the digital modes and development, but we shouldn't try to push something into place that is not techincally ready to happen yet."

Restricting bandwidth, Bell says, won't promote innovation.

"Why do we have to cut and slice and dice and regulate," Bell says. Why not just let anybody virtually go anywhere and let all of us just live together with some gentlemen's agreements which we have now and which work very, very well on most bands?

"So with that in mind, look at the Canadians. The Canadians have a 6khz limit and they can go anywhere on the band they want from the bottom to the top. And I don't see why that would not apply and work well in America."

Haynie says he wants to hear more from hams and he's encouraging all of us to get into the FCC's Part 97 rules and share input on the proposal at the ARRL's website, that's ARRL-dot-org.

"Look at the rule book and see what's there now, "Haynie says. "And, is there something that could be changed that would allow a new technology to be developed, then that's what we want to know."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More on the ARRL proposal and reaction to it in upcoming Amateur Radio Newsline reports. (ARNewsline(tm))

> > I already entrusted you to some of the information in private e mail.
>
> Tsk, tsk. Nursie made the claim in PUBLIC.

Doesn't matter.

You yourself have demanded that "private e mail matters remain
private".

Of course YOU have no business making such comments.

YOU have made PUBLIC offers to provide copies of documents only to
supplant them with a "moon shot" (and I don't mean Apollo 11).

Brain is jsut behind you in "Loss of Trust".

> Evidence of a PUBLIC claim is no good if presented in a single PRIVATE
> forum.

Your boy insisted that anything said in private would be kept in
private.

He lied.

Just like you.

Aren't you sooooooooo proud?

> Without anything to reference your brag, that brag is just a LIE.

If you say so..

> > You, like Lennie, violated my trust.
>
> You had none from the beginning.

Uh huh...

> No one can "violate" a non-entity.
>
> > Sucks to be you, Brain, but the trust is gone.
>
> DEFUNCT?!?!?

Exactly.

> No problem. Went from nothing back to nothing. 0 = 0.

No, actually....

Brain actually had a fair amount of "benefit of the doubt". Then
he started emulating you, and it went from "benefit of the doubt" to
"no doubts about it" in the "untrustworthy" category.

> > Sorry.
>
> You are. But, that's nothing new...

Only sorry that I ahve to deal with creeps like you.

But that's nothing new either.

>
> Is that true or not?

Quite true.

But he STILL has PRACTICAL EXPERIENCE in dealing with female
related health issues.

> If you argue that a Medical Doctorate makes a male a female, then you
> must be truly insane.

A medical doctorate with a residency in gynecology makes him an
OB/GYN. That's a doctor with PRACTICAL EXPERIENCE in such matters.

> Try to understand this: Medical doctoring has NOTHING to do with
> amateur radio or with Amateur Radio Newsline.

YOU try to understand that your duties in the United States Army
in 1953 have NOTHING to do with Amateur Radio, then, now or in the
future.

YOU try to understand that your experience in "professional" electronics, other than discussions of a purely theoretical technical nature, have NOTHING to do with Amateur Radio.

YOU try to understand that your wife's alleged professional standing in the mental health industry does not qualify YOU as such, and in either case has nothing to do with Amatuer Radio.

YOU try to understand that your brief fling as a student pilot in the 50's did not result in an Airman's Certificate, did not qualify you in aerial navigation, and in any case has nothing to do with Amateur Radio.

YOU try to understand that your acquaintance with a "real extra" (who was nothing of the sort when you served in the Army with him the 50's) does not qualify you as "experienced" in Amateur Radio issues in the 21st century.

> YOU ARE NOT A MEDICAL DOCTOR.

Nope.

But Medical Doctors come to me to get the things done that save people's lives. Maybe even yours someday.

> The general subject of RADIO does apply in this newsgroup since
> all radio operate by the same physical laws, regardless of the
> various adminstrations' law on use of radios.

This forum is not about the "physical laws" of radio.

This forum is about Amateur Radio POLICY...The rules, regulations and programs of how Amateurs apply those physics.

While I am sure that you are eminently able to discuss the laws of physics as they pertain to radio design, you are grossly ill-prepared to discuss, from an informed perspective (read that "no practical knowledge") matters pertaining to those policies.

Your discussions herein solrely reflect your OPINION.

> > Neither of you still not making any sense.
>
> Nursie never has, it seems...

Obviously I have. You keep trying (unsucessfully) to unravel my posts.

Sucks to be you.

These are the number of unexpired FCC ARS
licenses held by individuals on the dates listed:

As of May 14, 2000:

Novice - 49,329
Technician - 205,394
Technician Plus - 128,860
General - 112,677
Advanced - 99,782
Extra - 78,750

Total Tech/TechPlus - 334,254

Total all classes - 674,792

As of September 4, 2004:

Novice - 30,510 (decrease of 18,819)
Technician - 263,752 (increase of 58,358)
Technician Plus - 57,119 (decrease of 71,741)
General - 139,064 (increase of 26,387)
Advanced - 78,968 (decrease of 20,814)
Extra - 105,739 (increase of 26,989)

Total Tech/TechPlus - 320,871 (decrease of 13,383)

Total all classes - 675,152 (increase of 360)

Izzat why you use the ieee.org sig line, remind us periodically of your membership and bring up your "name on the masthead" of 'Ham Radio' magazine from time to time? How does your history as a PROFESSIONAL appear so often?

> Amateur radio is a HOBBY. It isn't a job. It isn't a union. It isn't a
> guild. It isn't a craft. It is a hobby.

...one in which you are not involved.

> Tsk. Irrelevant what I "have" or "don't have."

Actually, in a newsgroup dealing with amateur radio, it would seem quite relevant that you are not a licensed radio amateur.

> If all nursie can argue is about pieces of paper (suitable for framing),
> then she is very shallow indeed.

One of those pieces of paper would make you a radio amateur. You haven't passed any exam which would provide one of those pieces of paper.

> There was NO "GROL" when I took and passed my one test for
> a First Class Radiotelephone (Commercial) Operator's license in
> 1956. Poor nursie just can't stand that someone did something
> better than she did long ago. :-)

Better? Naw, just different. Your First Class Radiotelephone ticket does nothing for you on the ham bands. For a guy who has no need of

status, you certainly bring up your "better than" First Phone often
enough.

> Nursie got in. That should say it all... :-)

You didn't get in. That says much more. :-)

> > League membership is around 170K.
>
> Still? Tsk. Less than a quarter of all licensed U.S. amateurs!
>
> Coincidentally, the membership of the Academy of Model
> Aeronautics is also about 170 thousand members.

Isn't that wonderful!

> Academy members mostly fly radio-controlled model aircraft.
> They lobbied for and got a whole band of VHF frequencies for
> such a fun hobby. AMA even has insurance for members and
> clubs, sponsors all sorts of competitive meets of flyers.

Wow! Another coincidence! ARRL has insurance for members and sponsors
all sorts of competitive events.

> > You can hear them "roar" on the bottom ends of the more popular HF
> >bands.
>
> NOT on the 6, 9, 11, and 15 MHz bands. :-)
>

I have indeed witnessed such behaviour amongst the true Desciples
themselves - I do not, however, count myself amongst their ranks.

ITo me, it's a hobby, not a religion - one does not need to believe
all of the doctrine, or any of it for that matter, to join in. Just
follow the law, and go for it!

Especially up here! :) Some cities, like Winnipeg, have parking
meters with elecreical outletsbuilt in, to plug the engine block
heater into. The outlet is energized only while the meter is active -
money runs out, outlet goes off, and engine begins to rapidly chill
down to ambient temp - which in Winnipeg in February go as low as -50
degrees F or so. The bottom line: pay the meter, or your car ain't
lokely to start when you get back to it!

I have one of the AADE kits - installed on an old Realistic DX-150B.
Works perfectly - a stable and accurate digital readout. Easy to
interface to the set too! Considering that the dial calibration was
pretty crappy on that set, and resisted every effort to tweak the
adjustments to fix that adequately, the freq readout masi it a
(relatively) useful piece of equipment again.

The kids DX with it sometimes, even still,,,,,,,

ARRL, of by and for the former CB and now ham
appliance operator.

ARRL, a dying organization, whose officials will grab all
the money they can before ARRL finally goes belly up.

ARRL loves suckers who keep mailing in membership
dues to a do nothing orgainization to line the pockets of
ARRL officials.

ARRL, an organization that screws ham operators at
every turn, if it means putting another dime in the pocket
of ARRL officials.

Send your dues in suckers!

Why do you specify only
"Canadian radio amateurs"?

What about Canadians who
are not radio amateurs?

Since most of us in this newsgroup are fully aware that almost all of the ARRL officials are volunteers and work for free, you have succeeded only in exposing yourself as the ignorant troll that you obviously are.

Nice try...and now it is my pleasure to cordially invite you to try the rec.radio.cb newsgroup, where you will fit in much better and might even become a respected regular, given enough time.

Greetings, All...

You know, over the past dozen+ years, I have drifted in and out of the various r.r.a. groups, just now returning after a better than 3 year vacation.

I see the same discussions (or arguments) still going on. Different people involved in some cases, but by no means all.

The flame wars, the doom-sayers, the Pollyanna's, the trolls.... They are still here.

And, after all this time, there are still no solutions, no right, and no wrong... Only biased and prejudiced opinions on all sides that have no desire to carry on mature and adult discussions with the aim of reaching a solution through compromise.

Am I, through this note, feeding the trolls? Maybe... But rest assured that over the past week or so of sand-bagging I have many already on block and it is, after all, a simple matter to block the ones that climb up on the bridge anew.

Take Care & 73

From The Desk Of
Marty Albert

I beleive that the same rules apply as in the USA. Non-amateur may
have an opinion, but that opinion is uninformed and is readily
discarded by the amateur elite.

There is no "amateur elite", unless, of course, you refer to folks like
W1RFI, K1EA, etc etc.

And NO opinons are "readily discarded", Brain...even yours.

But antagaonistic, spiteful insults are.

Your bunk buddy had to push a lot of buttons and hurl a lot of insults to
get himself to where he is today...scorned and dismissed by anyone who has even
the least amount of awareness of the factual circumstances of what the Amateur
Radio service is, what it has accomplished in the past and where it's going in
the future.

You're not far behind, but I think folks view you more as the Organ
Grinder's monkey...jumping when you hear your master's music play.

Steve, K4YZ

Eeww, flashback time!

1967, I was a 13 yo kid swimming at Parker Dam state park in Northcentral PA.

I was out near the end of the roped off swimming area, and felt something brush against my arm. I turn to look, and there it was! Freakin' brown turd that some jerk let off! Swam real fast to shore, run to the shower house, and didn't go back in the water for the rest of the week.

I still cringe at that one scene from "Caddyshack!! 8^)

Yup, they seem to come with the territory I guess. I don't mind - sort
of. I do wish the Len-Brian-Steve bar room brawl would confine itself to
a few threads, but it seems to have to spill over into everything.

The purpose of some here is not to have a mature and adult discussion.
It is to bait and insult.

Bob - do you really think the FCC will do something THIS TIME? !

ak

FEDERAL COMMUNICATIONS COMMISSION
Field Operations Bureau
Washington D.C. 20554

Honorable Howard Metzenbaum
10411 Federal Building
Cincinnati, Ohio 45202

Dear Senator Metzenbaum:

Thank you for your letter of November 30, 1992 on behalf of [ak] of West Chester, Ohio.

Mr. Glen Baxter, licensee of amateur radio station K1MAN, was cited on at least two occasions for observed rule violations including illegal broadcasting and deliberate interference. Substantial forfeiture amounts were levied.

The amateur rules prohibit stations from engaging in any form of "broadcasting" which is defined as the transmission of signals intended for reception by the general public, either direct or relayed. On the other hand, "information bulletins" are not considered a form of broadcasting and are authorized under the rules. An information bulletin is defined as "[a] message directed only to amateur operators consisting solely of subject

matter of direct interest to the amateur service."

The FCC monitoring network is continuing to observe the transmissions of K1MAN. If observed transmissions are "broadcasting" versus "information bulletins" then appropriate enforcement action will be undertaken. If Mr. [K] believes a particular segment constitutes broadcasting, he should immediately communicate with a staff member of the Commission's Belfast, Maine monitoring station at 207-338-4088.

We are committed to continued enforcement of the amateur radio rules. The transmissions of K1MAN will continue to be observed from time-to-time. As priorities permit, the channels are monitored and notices issued where appropriate.

Sincerely,
Richard M. Smith
Chief, Field Operations Bureau

Federal Communications Commission
Field Operations Bureau
1 Batterymarch Park
Quincy, Massachusetts 02169-7495
December 23, 1992

[AK]
West Chester, Ohio

Dear Mr. [K]: Refer to File: 93-BS 0027

This is to acknowledge your various correspondence to this office concerning Glenn Baxter of Belgrade Lakes, Maine, licensee of Amateur Radio Station K1MAN, activities in the Amateur Radio bands.

The Commission is well aware of Mr. Baxter's activities, and has taken action against him. Hopefully, when this action is completed, Mr Baxter will cease these activities.

Your concern about Mr Baxter's activities is appreciated.

Yours truly,
Vincent F. Kajunski
Engineer in Charge

Of course, I was not the first to ever complain to the FCC about K1MAN's operation. Glenn actually declared a national emergency for Bermuda when their own government had determined there was no national emergency (the hurricane missed). That sort of thing really doesn't make for good international relations.

ak

FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON. D.C. 20554
DEC 8,1987

Mr. [F L]
Brookfleld, Connecticut 06804

Dear Mr. [L]:
This is in response to your letter of November 15 1987, complaining about interference to your communications from amateur radio station K1MAN licensed to Glenn Baxter. The following Information would be helpful to us In evaluating your complaint:
(1), Did amateur station K1MAN transmit directly over ongoing communications? If so, did the content of amateur station KIMAN's communications (or any other Information) Indicate that the control operator knew that he/she was causing amateur station K1MAN to transmit over ongoing communications?
(2) Can you specify particular Instances when Interference occurred? If so, can you furnish tape recordings of those Instances?

You may send the information to us at the following address: Personal Radio Branch, Federal Communications Commission, Washington, D.C. 20554,Attention: File 7240-F.

Sincerely,
John B. Johnston
Chief, Personal Radio Branch

P.O. Box KM 1060,
Hamilton,
Bermuda.

April 25th. 1988

K1MAN, Glenn Baxter
Long Point Lodge

Belgrade Lakes, ME 04918
U.S.A.

Dear OM,

Yesterday morning at 12.30 UTC the Bermuda Net operated on 14275mHz, as it does every Sunday morning and has done so for the past ten years. At the time of the San Salvador disaster, we made way for you to operate emergency traffic and very happily co-operated as we always do for any station with such traffic. This evening at 21.58 UTC I was talking to G4WIS and at 22.00 UTC you again did a broadcast without ensuring that 14.275 mHz was clear.

You consistently come on this frequency at 13.00 UTC without checking whether the frequency is in use. Fortunately, you do not cause a problem insofar that we have QS0's with hams who have linears. They get through and have the great luck in not being able to hear your station. On a number of occasions we have telephoned you at home, but we do not get any reply, so can only assume that you are operating an unattended station.

If you want to broadcast, may I suggest that you contact the FCC for a license to operate on the Commercial bands, but please do not operate a broadcast type transmission on the ham bands which are for two way communication.

It is acknowledged procedure in Bermuda and most countries whose operators are ladies and, gentlemen, to enquire whether the frequency is In use, however if you do not fall into either category, then I understand the situation perfectly and there is no answer to such crass ignorance.

I hope that I can appeal to your better half to co-operate with the hams of the world, I do not say fellow hams because I do not think that you can be classified as such, and I request that you move into the Commercial areas as that happens to be your forte.

Best 73,
Antony [S] (IARU Region 2 Liaison Officer RSB)

>Troll Elmers? What????

I agree. It's way too easy to become a troll these days. Back in the
old days, you had to learn DOS commands first. None of this
point-and-click crap that's so easy even a child could do it, you had
to learn how to type, you had to learn about filenames and extensions,
you had to learn how to use a keyboard. Today's trolls are spoiled
because all they have to do is click their little mouse. Windows is
going to be the end of trolling as we know it, mark my words. They
ought to bring back DOS. That's what separated the real McCoys from
the wanna-be's back in the good old days - DOS.

Besides, what happens in an emergency? Your computer crashes and
Windows won't boot, you need to know DOS in order to get in there and
fix it. These trolls of today don't know squat about DOS, and when
they end up trashing their Windows they have to haul their computer
off to a club meeting to get a REAL troll to fix it. DOS works when
nothing else will work, that's why they should never have gotten rid

of it. Windows just made the Apple and Commodore riffraff from years ago think they are real computer users. Bring back DOS and let 'em all go back to their Commode Door 64 where they belong.

73 de John, KC2HMZ, Tonawanda, NY

Disclaimer: Any apparent similarity to the code/no-code argument is pure coincidence and is completely unintentional.

Jimmie Who is trolling with that "message," Brian.

Canada is a nation of democratic principles. A good neighbor.
Their amateur radio is not "ruled" by straight-laced olde-tymers
of radiotelegraphy. That irks the very non-independent thinking
Believers who only venerate the past and vilify those harboring
heretical independent thought. <shrug>

>Amen.

As an aside, the enmity between Lockheed Aircraft and the state
of California (state winning) resulted in a HUGE shopping center
in Burbank built on what had been their main production complex.
(Lockheed moved out, sold all their holdings). The electronics part
of the aerospace industry here migrated towards south and
northwest. Some of those going south emulated Silicon Valley
and began semiconductor production...fairly sizeable quantities too.

Nothing from the RSGB? :-)

Concentration of information dissemination is a very sharp two-
edged sword. The bad edge is that minimalization of venues
is a wonderful gift for those who would wish to dictate the proper
way to think and act. Those who publish periodicals control
everything in those publications. Everything.

:-(I have put such cold-weather thoughts out of my mind a long time
ago, moving to the sunbelt in late 1956. Northern Illinois temps aren't
as cold as farther north but they were cold enough.

If I want freezing temperatures on equipment, I just go down to the lab and pop the door to the Tenney chamber, adjust the dials, and viola, "instant polar temperatures!" :-)

>I have one of the AADE kits - installed on an old Realistic DX-150B.

>(relatively) useful piece of equipment again.
>
>The kids DX with it sometimes, even still,,,,,,,

Electronic etymology dept.: AADE isn't the first such application of a microprocessor adapted as a frequency counter. Those go back about 8 years to the UK and a non-ham electronic hobbyist, according to an Internet search. AADE is the big maker-seller now and does a very credible job at a very affordable price for frequency accuracy. Easy to order for most of the post-WW2 antiques. :-)

It's also a credit to Microchip Inc. and their extremely affordable microcontroller line (dozens of models) of "PIC" ICs. Microchip gives away their development software and all a hobbyist has to do is buy the simple development hardware. The rest is up to the hobbyist who has to learn a different "code," that of assembler instructions and putting them in the proper order to accomplish a function.

A big and growing electronic hobby is robotics. Fun thing and gets down deep to electronics guts. [I'm not into that but some of their ideas are interesting and useful] Microchip is vying with Atmel on micros there. Both makers also were used in "radio clocks" a few years ago, once a thing only for hobbyists until the off-shore consumer market producers (more than 30 brands now) put $20 and $30 [US] radio clocks on the store shelves. Microcontrollers do all the "heavy" work of filtering (via DSP), decoding of WWVB one-minute data, arithmetic and date-keeping. Most are very low-power, run on a couple dry cells for over a year.

Months back I heard one ham cussing up a storm on how radio clocks aren't "real radio!" Operate on 60 KHz, not "real radio frequencies," don't use "real radio circuits" and, worse, "don't use real code at 20 WPM, just some #$%^@@!! (hack, ptui) data at one bit per second!" :-) He was working up a real case of mouth frothing on the subject before he got sidetracked to another anger-venting discussion.

USA still doesn't have any LF ham bands, yet other countries do. ARRL apparently doesn't want to get involved in computer code, only morse code. Their foray into PC-compatible circuit analysis went DEFUNCT when "Radio Designer" selling was stopped. Tsk. [they couldn't call it a SPICE program which it was, but then they use different names for circuits and things that the rest of the electronics industry uses...SPICE core is absolutely free for

anyone to use]

>>>I still use my old Heathkit SB-400 SSB tube transmitter on the air -

>>
>> There's nostalgia and then there's nostalgia. :-)
>
>Heh!

Ben Tongue, co-founder of the Blonder-Tongue CATV company,
found a niche hobby in (of all things) "crystal sets." In his
pages on the Blonder-Tongue website he's done SPICE analysis
on various ways to hook up that awfully complicated, non-active-
device crystal receiver. :-)

>> heh heh heh...I'm waiting for one of my "fan club" to make more

>
>Won't be long now, I'll bet! :)

Didn't take them but a short time over our holiday weekend. :-)

I was gone but the "fans" were busy, busy, busy making me into
some radioactive Antichrist. :-)

>>>Heh. This reminds me of the story of Micro Henry, who took Millie Amp
>>>for a ride on his Mega Cycle - ah, the good old college days.....
>>
>> Old story, really, I think it goes back as far as WW2 days.
>
>I believe that - my experience with it only goes back to 1975!

A beat-up mimeographed copy was circulating around the
Fort Monmouth Signal School back in 1952. Might have been
a draft version from even earlier times. :-)

No xerography machines back then. U.S. military made
copies by first "cutting stencils" for mimeographing. Paper
was acidic and didn't last more than 30 years or so before
crumbling in open air. More better was the paper roll from
teleprinters with use-once flimsy carbon paper. Paper tape
lasted longest of all, could repro exactly via a p-tape reading
teleprinter.

Now we can get quality paper cheap, use inkjet printers
connected to computers and turn out camera-ready copy from
one of several WYSIWYG text editors...even spell-checked if
someone bothered to switch that in. :-)

There's all sorts of audio range recorders, from open-reel mag
tape to limited-time all-digital electronic memo-pad things. VHS
videotape has been adapted to recording multi-megabytes of
data, even archiving of PC files.

But...some radio amateurs insist and insist and insist that ALL
new radio amateurs MUST learn morse code to get that license.
Otherwise they "aren't real amateurs."
:-)

Well, personally, I think Hams should bombard Riely with
complaints, through the normal channels as well as a poliete
confrontations at hanfests he hits. I know he routinely hits the
Dayton Hamvention and I think that his travels take him to other
regional hamfests.
If enough people provide sufficient evidence of continued
interference (like several tapings made on the samr day and his
favorite frequency), then Riley will be spurred into action. Jusat
remember to mention the EB case number and the most recent warning
letters available on ARRL's enforcement logs pages.
As long as you're polite in explaining your frustration in
talking over the band when K1MAN is on and that the gentleman insists
on making illegal non-emergency related broadcasts and of an illegal
commercial nature (as long as he's conducting business that falls
under the Part 97 rules)
You can also make copies of the recordings and file a
complaint with the local branch office of the Department of Justice
or, if you are close enough, personally deliver tapes of the illegal
broadcasts to the nearest Federal Building/Courthouse and swear out a
complaint. When he has to start defending himself from multiple
complaints from around the United States, he'll realize that he's
going to spend more money defending himself than he would rake in.
Just as long as you're poliete with the Feds, you'll get some
action and that would also include the "in rem" siezure of his entire
shack as well as the antenna(s) he's using.
But, that's just a personal opinion, not meant to start any
flamewars (Flames will be totally ignored as a matter of business)

The spirit of what makes Amateurs "Amateurs" still is, despite your
efftorts to the contrary, pervasive in the MARS program.

The MARS programs, in thier current configuration, will cease to function
if the thousands of volunteer AMATEURS who man them suddenly elected to NOT
participate.

If only "Ham Radio" magazine were in publication today to run your

"Sorry Hans, MARS >>>IS<<< Amateur Radio!" and other idiotic ideas.

But hey, there's QST, CQ, and World Radio. Go for it.

Proposed three-step ARRL membership Application
process:

A. Join ARRL, send your $35 dues to Newington, you sucker.

B. Since you proved you are stupid, now send another $35 to
Kerry For President HQ.

C. Wow, stupid twice. Ok, send $100 and we will sell you a
bridge in Brooklyn.

Dave "just did it" WRT getting "Extra right out of the box."

Sounds to me like he just said he's been an Extra for almost 41 years, but then he posts this on the QRZ website:

"First licensed: WN8LET 1963, Oak Hill, WV."

But you won't see Steve in here yelling "Liar, liar pants on fiar!" or making homosexual and/or pedophile inuendo. Maybe he's already talked to Dave's wife?

It looks as if you're confused again, "William". Len not only isn't part of the amateur elite, he isn't part of amateur radio in the U.S. or Canada at all. Yet he has been quick to demand a say in how U.S. amateur radio is regulated. Wouldn't he automatically be interested in how non-radio amateurs in Canada think about their regulatory changes?

It looks like the old "William"/"Avery" double standard.

"Quitefine" (J. P. Miccolis) must have lectured everyone on the
subject. As long as all agree that PCTA extras "know what is best
for all," they are happy and content.

Let anyone disagree with PCTA extras, even the slightest, and there
is a cacaphony of phony screen names with unusual spacing. :-)

Dave approves of Steve's behavior. Miccolis approves of Steve's
behavior...despite a once-in-a-while slap on the wrist with a wet
hankie. Steve approves of Steve's behavior...which isn't saying
much because all his personalities live in a different elsewhere
and they are all more-or-less sociopathic. <shrug>

"Quitefine" (James P. Miccolis) approves of der uber-oberst Heil
because he is another PCTA extra. Snarling is allowed. Nasty-
grams are allowed. All is allowed. As long as they agree that
morse code testing must stay. Forever.

Independent thought is allowed in here, even cherished, as long
as the independency doesn't deviate from established norms of
olde-tyme hamme raddio. Their theme music might just as well
be "We all live in a brown sub-marine..." :-)

I say we re-activate the 14.313 kook wars of year's past.
Perhaps even parts of 75 Meters as well. Ratchet up the QRM
and goofyness on the HF bands, that will no doubt draw-off
much of the mayhem from off of the NG's. Just be sure to
not use your callsign and RH will not bother you.

Every American should have an interest in increasing the number of
potential emergency radio operators. You just never know when you
might need one, and Morse Code just isn't needed to be an effective
emergency radio operator.

Too bad you're still quoting out of context.

But I guess that's the ONLY way you can "make a point".

You failed with your "I operated legally from Somalia" stories and your
"Unlicensed devices play a major role in emergency comms" efforts.

You're doing just as badly with your out-of-context "MARS >>>IS<<<Amateur
Radio" recitings.

Still sucks to be you. Still not getting it right.

Oh well......

A very interesting proposal!

What I find most interesting is that the proposal does *not* simply say "drop the code test and leave everything else alone" - as did the NCI proposal. Instead, it beefs up the written requirements by requiring a higher passing grade. It also proposes *adding* license classes.... (So much for simplifying the rules...)

The analysis of the multiple-choice testing method and guessing is very interesting, showing how a limited knowledge of the material plus guessing can result in a passing grade. The 60% passing requirement seems low to me, but I suppose that our ~74% level would seem low to others.

It's a refreshing change from the ARRL "Great Giveaway" proposal, and the much much worse NCVEC "Much Greater Giveaway" proposal.

It will also be interesting to see how Canadians react to the proposal in their comments.

LHA continues to spew his bile and hatred.

Perhaps it serves him well and he is happy in it.

Then spew away.

Condemn him? - very well - but remember

Such hatred must be released, lest it burn his very soul to a crisp.
He is only doing what he must.

It might be channelled toward the good, but alas it is not.

Despite what some may say
I am
and so shall I remain

Again with the post containing much of the insulting behaviour you
profess to find in others.

Do not be too cruel to these people you disdain. You need them much
more than they need you.

> Pbthththth...

Brian, there's no use trying to argue with "Quitefine," an unconvincing
screen surrogate of James P. Miccolis. :-)

He is stuck in the morsemanship rut and not even a Land Rover can
yank him out.

Let him admire the code keys on display at the AWA and let him
live in the past pioneers' time, which he did not.

In article <cgktj01mck444mppsvjml1o8ajk1sdthls@4ax.com>, John Kasupski
<kc2hmz@wzrd.com> writes:

>> Good satire, John! I wonder how many will think that is a real
>> rant? :-)
>
>Are you sure that it wasn't?

Yes, quite sure. :-)

As one who still "has an interest" in personal computers, I built
my first one (Southwest Technical Products Company) 6800 uP
system in 1976 when the only "DOS" available was the Intel
development system using 8" floppy disks affordable only by
industry...and the just-beginning CP/M (Control Program,
Microprocessors) that was "standard" for a while. Having access
to an HP network analyzer in 1974, I've even had to manually
toggle in the initial loader for the P-tape "bootstrap" program to
bring the HP 2116 minicomputer heart of the analyzer up to
loading its main P-tape program. :-)

The Apple][+ purchased in 1980 was much easier to use than
the tape cassette "mass memory" storage of the SwTPc 6800
and it did use a DOS of sorts (final version 3.3) for the fantastic
143 KBytes of 5" floppy storage (one side, drive easily modified
to R/W from the other side). Got so "interested" I joined the
A.P.P.L.E. group (Apple Puget Sound Program Library Exchange)
and became a contributor to Call-A.P.P.L.E., their monthly mag.
With the Big Mac (macro Assembler plus Disassembler) I worked
out how the Applesoft numeric routines worked and learned 6502
instructions and independently disassembled their DOS 3.3 in
order to access certain features of it. Fun thing to do, intellectually
stimulating.

That led to an interest in FORTH, also a fun interpreter using RPN
notation that the HP pocket scientific calculators used. I'd already
joined the HP program library exchange and contributed a dozen
HP-67 programs to it. Harder to do since the number of program
steps were limited to 224 in that calculator. A local FORTH
interest group met once a week to trade ideas and programs.

The first of the "big" PCs was the "IBM" and I bit the bullet to get
one of those, coincidentally using only DOS-level commands. That
allowed the final version of LINEA released as shareware in 1993
(frequency domain circuit analysis) and the first of the LCie
sharewares (L-C filter design). Both LINEA and LCie are now

freeware, still operate at DOS level since I didn't bother to upgrade to high-level programming in C++ or Windows (Windows wasn't yet available when I got the first PC). LINEA and LCie were both done with MS FORTRAN 5.1, long since dropped by MS.

Windows 3.3 was my first fenestra into GUI, later upgraded to Win95, then to Win98, and finally Windows XP in the current PC box HD. Microsoft DOS is still accessible in WinXP but MS did remove a few niceties from the original which my FORTRAN developed programs could no longer access. :-) Rewrite was needed and that required some extended search and explore and to use MASM to write some Assembler routines to make them fit...which required learning the Intel instructions...completed only for LCie, the other four will have to wait in the time-share queue...:-)

A rather long time ago I was doing HF communications transmitting the old-fashioned way...manually, on tube equipment. HF radio changed but lots of olde-tymers couldn't. I began in personal computing via microprocessors and programmable calculators a quarter century ago and that changed. Dramatically. I know one PC olde-tymer who is still slogging along at DOS level, refusing to change to any form of GUI even though much younger than I and got into it later than I. Can't understand that.

Is there a relationship between DOS v. Windows on PCs and the all-manual, hold to morsemanship-at-all-costs-amateurs? Yes. I see it, have seen it.

Ergo, I rate your little message as a wonderful satire, John, good work at that. :-)

LenAnderson@ieee.org

"When I was young we made our own ICs, whittling them out of wood!" - [anon. tagline]

Jim, I've disagreed with Len without difficulty. I said that I liked
KH2D, even though I disagree with his position on the code testing
issue. Jim's a pretty decent guy.

Go to his website and read about the war. Very insightful (or should
it be inciteful?).

Maybe we should pull a Cecil, switch horses, and be part of the
in-crowd.

I wonder if Steve will still focus on male genitalia, homosexuality,
and pedophilia?

I certainly hope that that kind of thinking is his independent
thoughts and not a trait shared by all PCTA.

I beg to differ. ARRL is within the guidelines of Part 97 of
the Commission's rules and. last I checked, knows that the frequency
is clear before starting their programs. Also, it's widely known and
accepted that W!AW has scheduled "All Station" announcements as well
as Code practice. All within the bounds of the rules.
K1MAN, as I understand it, doesn't care about if the frequency
is is use and walks over everyone in an attempt to gain financially
from selling his equipment over the air.

Yet you choose to make daily statements to Len that it goes on without
him, but are (almost) silent when it comes to Quitefine. Perhaps
Quitefine has made contributions to Ham Radio magazine. Perhaps you
have, too.

> > > > So what is Quitefine's role? Unless you're just here to give her a

Great! Another alias. At least you admit to it.

> > > You have a bad habit of directing your questions to
> > > the wrong people.
> > >
> > Actually, no.
>
> Actually, yes you do.

Why are you the wrong person?

You seem to have so many opinions about so many things, but draw a
blank on this one. Hi, hi.

You even hold the opinion, stated above, that amateur radio, morse
code, and chasing dx go on without Quitefine.

Yet you haven't the "slightest idea" whether Quitefine is an amateur
or not.

> > You have the bad habit of enabling anonymous people to
> > behave badly, while crying foul with respect to some people who do

> > enabling bad behavior. Re: working out of band French ops on 6M.
>
> You won't get an answer because I'm not the person posting as
> "Quitefine".

I never thought that you were the person posting as Quitefine.

> French authorities are responsible for what French radio amateurs do.

French -radio amateurs- are responsible for what they do, not the
French communications authorities. And you are responsible for what
you do.

You can choose to use "Good Amateur Practice" or not. Although Riley
says that "Good Amateur Practice" is enforceable, you were lucky that
you were operating under a Tanzanian permit and not subject to U.S.
enforcement.

> That's been pointed out to you any number of times.

Many things have been pointed out to me any number of times. They are
often wrong.

> It doesn't say much
> for your intelligence that you've been unable to grasp this basic
> concept.

To think that French communication authorities are responsible for out
of band French amateurs and you carrying on on six meters is absurd.

Did they send you a nice QSL card?

> > "Sorry Hans, Working French Hams Out-Of-Band >>>IS JUST LIKE<<<

There was once a ham in Tanganika
whose DX knowledge was supposedly encyclopedica (hi, hi).
He worked out of band French
which stirred up quite a stench
and he disavowed any culpabilica.

So much for "civil discourse."

You're simply incapable of it.

Best of Luck.

A valid point.

However, Len does not
agree that amateur radio plays
any significant role in emergency
communications.

>You just never know when you
>might need one,

If so, why have any tests at all? Or
why have tests beyond the absolute
minimum possible?

>and Morse Code just isn't needed to be an effective
>emergency radio operator.

Morse Code has had a role
in some emergency communications
recently. These are well documented
by people who participated.

However, to claim that every
radio amateur must be tested on Morse
Code because there might someday be
a need to use it in an emergency is quite
a stretch of credibility.

It is clear that Len's interest goes far beyond
eliminating the Morse Code test.\

To quote a wise one:

"It is not the Morse, but the hatred"

Never seen a single RSGB publication on the newsstands so far! The
Brits do seem to have a monopoly on the electronics hobby magazines,
though, since the last North American one went belly up years ago.

Good construction plans, though pretty difficult to build without
wearing out the NTE substitution manual finding equivalents to all of
the European semiconductors......

Absolutely - a fact that is exploited in dictatorial countries - the
state controls the press.....the only news is what the state wants the
people to hear.

For the prposs of this group, the state seems to be CT :)

I have a copy of the ARRL Radio Designer program - not bad, and pretty
easy to use. It's unfortunate that they didn't keep that up!

Nowadays, they publish deeply technical articles that illustrate how
to replace a #47 bulb with an LED :)

Yup - I remember using one of the old Gestetner spirit duplicating machines back in public school. It worked, but wasn't pretty.....mimeographs were much better!

> Now we can get quality paper cheap, use inkjet printers

Time marches on, however - and mandatory Morse will go with it. Morse has been with us for a long, long time - but its time has come.

I'd bet that 20 years from now, people will still be using Morse on the bands. Not because the want to be 'real hams' - but because they are interested in it as a communications protocol. Or a curiosity.

I find that intriguing coming from a man who feels compelled to make
numerous posts, spanning the better part of a decade, to a newsgroup
dealing with an endeavor in which he has no part.

Dave K8MN

> the all-manual, hold to morsemanship-at-all-costs-amateurs? Yes.
> I see it, have seen it.

You might see something which you perceive as similar. Then again, you have no experience in morse code use or experience in amateur radio. That inexperience leads you to write things like "morsemanship-at-all-costs". Please explain what method you currently use under MS Windows (any version) to delete a file which the Windows program is using at that moment. Can you say "DOS"? ;-)

That's not correct. As I've already mentioned below, I'm not running
around.

> > > > I'm not running at all. I'm sitting

You don't believe that I have no idea about the background of someone
who has not been identified? You sound awfully silly, "William".

> > You need to address your question to Quitefine.
>
> Clue: I get to decide what I need to do.

Okay, decide. If you persist in asking me about "Quitefine", you'll
only look sillier.

> > > > Len doesn't have a role in amateur radio. Whether Leonard H. Anderson posts

> have, too.

Almost silent? I don't ever hear anything when I'm reading posts to
these newsgroups. Do you hear voices?

I don't know anything about "Quitefine". Perhaps he/she has made
contributions to the defunt "Ham Radio" magazine. I've not done so. I
wrote for "Ham Radio Horizons" and "CQ" and did cartoons for
"Radiosporting".

> > > > > So what is Quitefine's role? Unless you're just here to give her a

> > Actually, yes you do.
>
> Why are you the wrong person?

That would seem evident to all but you. I'm not "Quitefine" and I have
no knowledge of "Quitefine". Why do you find that so difficult to
accept?

> You seem to have so many opinions about so many things, but draw a
> blank on this one. Hi, hi.

I'm not "Quitefine" and I have no knowledge of "Quitefine". Why do you
find that so difficult to accept?

> You even hold the opinion, stated above, that amateur radio, morse
> code, and chasing dx go on without Quitefine.

That should be obvious, even to you.

> Yet you haven't the "slightest idea" whether Quitefine is an amateur
> or not.

What does it matter for the purposes of my statement?

> > > You have the bad habit of enabling anonymous people to

>
> I never thought that you were the person posting as Quitefine.

Then why would you continue to ask me for information when I've advised
that I know nothing of the person posting as "Quitefine"?

> > French authorities are responsible for what French radio amateurs do.
>
> French -radio amateurs- are responsible for what they do, not the
> French communications authorities.

Yes, you're right. The French authorities are charged with taking
action against those French ops who violate French regs.

>And you are responsible for what
> you do.

I've already stated as much. I'm not French and I broke no French,
Tanzanian or American amateur radio regs.

> You can choose to use "Good Amateur Practice" or not. Although Riley
> says that "Good Amateur Practice" is enforceable, you were lucky that
> you were operating under a Tanzanian permit and not subject to U.S.
> enforcement.

You're back to being silly again, "T5/William". I broke no Tanzanian
regs and I broke no U.S. regs. Some French ops apparently broke French
amateur radio regulations. Their government is responsible for any
action to be taken against them. Have you contacted the French
authorities yet to protest the outrageous behavior of French scofflaw
hams? Maybe you'd like to initiate an "amateur radio war crimes"
complaint so that a tribunal can be formed.

> > That's been pointed out to you any number of times.
>
> Many things have been pointed out to me any number of times. They are
> often wrong.

Your problems often begin because you fail to see the difference.

> > It doesn't say much
> > for your intelligence that you've been unable to grasp this basic
> > concept.
>
> To think that French communication authorities are responsible for out
> of band French amateurs and you carrying on on six meters is absurd.

You got part of it right. The part where you understood that the French
had any sway over my operations from Tanzania is absurd. The part where
French radio amateurs are out of their assigned frequency allocations
and that French communications authorities are responsible for taking
any action against them is not absurd at all.

> Did they send you a nice QSL card?

Of whom are you writing?

> > > "Sorry Hans, Working French Hams Out-Of-Band >>>IS JUST LIKE<<<

> Not a problem. As I pointed out above, many things have been pointed
> out to me any number of times. They are often wrong.

Let me know how this one turns out, Farnsworth.

> So, do you also have an opinion of Blackguard Vox Deus?

An opinion? Earlier you asked me if "Quitefine" is a radio amateur and
about his/her role in amateur radio. As with "Quitefine", I'm not sure
of the gender of "Blackguard Vox Deus" or whether he/she is a radio
amateur.
My *opinion* is that "Blackguard" doesn't care much for Len. I can
understand that.

Feel free to carry on with your James Carville impersonation.

I have more than a hundred horses. All out in the garage. :-)

Cecil is off in other newsgroups. I'm sure he got sick and tired
of the PCTA regulars in here. :-)

>I wonder if Steve will still focus on male genitalia, homosexuality,
>and pedophilia?

Nursie will use anything he can think of to insult anyone having
opinions opposite to his...or trying to deny he ever said anything
wrong. :-)

>I certainly hope that that kind of thinking is his independent
>thoughts and not a trait shared by all PCTA.

Not those exact thoughts but, observe in here...a "renowned"
amateur historian took to using a phony screenname and has
"conversations" with another phony screenname, talking of
little but nastygrams of certain others in here.

Der uber-oberst does very little in content in here except to
attempt denigration of you and I. One would think that, after
a whole heaping 41 years as an amateur, he might have
something constructive to offer on amateur radio policy...other
than holding the quo as status as he can.

The Coslonaut is busy working both sides of every aisle, but
not saying very much in any post. Spends time in the penalty
box for trying to stick others.

The newsgroup has all the PCTA in deep ennui, busy trying to fill dead air with old morsemanship slogans, then realizing those are so dead that it would be just necro-equine flaggelation.

A few newbie newsgroupies have shown up, see the PCTA extra regulars frothing worse than a latte machine, and leave for (hopefully) a better venue. Sigh.

This newsgroup isn't about radio. Or policy.

It's about domination. By the PCTA extras.

<shrug>

>Brits do seem to have a monopoly on the electronics hobby magazines,
>though, since the last North American one went belly up years ago.

Electronics hobbyists, as a general group, have shied away from
"ham radio" in terms of monthly periodicals. That started roughly
three decades ago as hobbyists found lots more fun things to do
pushing electrons around.

Other than a certain membership magazine on this side of the globe
there is only CQ for hams. Popular Communications isn't just for
hams (and many hate that). There's still the off-shoots from Radio
Craft and Radio Electronics News (as they were once called) but
Popular Electronics and company rather restrict themselves to
little electronics projects. Reminiscent of the "Tuna Tin 2" and the
"Herring Aid" kind of thing.

Oddly enough, model aircraft flying has continued unabated and
almost totally embraced radio-control for both pleasure and
competition. Those old model magazines are still around plus a
couple concentrating on R/C. AMA membership is still as many
as in the ARRL but has never been pretentious about what the

model flyers do. AMA has finished its Hq with museum in Ohio.

>Good construction plans, though pretty difficult to build without
>wearing out the NTE substitution manual finding equivalents to all of
>the European semiconductors......

That's getting to be a nuisance for the electronics industry as well.

Semi makers had reached impasse after impasse in the non-PC
field of electronics plus the off-shore semiconductor industry doing
big dents in specialty ICs. For example National Semiconductor
sold off its entire line of digital ICs to Fairchild. Motorola semi
split off into ON and Freescale (rather strange logo names?) but kept
a tiny part of their old product group. Intersil cut about a third of
their products. ST and Philips have long lists of discontinued part
numbers. Lansdale is in business of acquiring rights to and all
masks for certain legacy ICs, is keeping solvent. Lots and lots
of industry realignment in product lines. "Silicon foundaries" are
doing good making specialty semi products in big lots for OEMs,
all with house numbers.

Some on-line vendors are offering legacy devices as competitive
prices. Jameco is one. Jameco's products are sold to electronics
hobbyists, i.e. non-hams for the most part. They and JDR in the
San Francisco Bay area have been hanging in for a quarter century
doing that. Other on-line vendors that were once "ham radio"
product oriented have all added on non-ham electronics parts, just
to stay in business from my estimation.

J.W.Miller was once a source for all sorts of good "radio" parts that
had coil windings. IF cans to "shortwave coil sets" to slug-tuned
coils and blank forms. All of those left the Miller line-up (J.W.Miller
is a long-time Los Angeles company). Demand for those old "radio
parts" just evaporated and Miller had to change its line before it was
time.

>easy to use. It's unfortunate that they didn't keep that up!

Considering their contacts with long-time members, it's a wonder
they didn't get someone to use the SPICE core routines (free, no
copyright) and make their own "screen wrapper" routines. That's
how ALL of the commercial SPICE programs got started.

Roy Lewallen did a wonderful job taking the NEC core and wrapping
it with good I/O, display routines, then selling it as a package
called EZNEC (or whatever derivatives he has now). Roy is a long-
time ham, also an industry veteran (of Tektronix). NEC or Numerical
Electromagnetic Code was devised in Monterey, CA, by the USN
and, as a government work, isn't copyrightable.

>Nowadays, they publish deeply technical articles that illustrate how
>to replace a #47 bulb with an LED :)

Heh. Maybe in the early 1980s (late 1970s?) I chanced on a CQ
"construction article" (at best a half page as I remember it) on how
to make an electric cigarette lighter for the shack...use a 12 VAC
transformer and an auto ligher and socket in a handy box. Very
"technical." :-)

QEX, still a bimonthly, was augmented by Communications
Quarterly a few years ago. CommQuart got started on left-overs
from CQ buying Ham Radio magazine and all its rights. About the
only North American ham radio specialty technical publication is
QEX now but I will predict it will eventually go downhill like
CommQuart did a few years after the CQ purchase.

>Didn't know that - I'll have a look on the B-T site!

There's a logo name for ya...Blonder-Tongue! :-)

B-T got started in the mid-1950s with a premiere item that was
a UHF converter for existing VHF TV sets. Did right well at it.

B-T saw the "community cable TV" scene coming early and went
into that, made their big money in it. Cable TV equipment is a
specialty field but there's a LOT of it installed out there. All the
"pole equipment" has to withstand terrible environmental stuff yet
last and last.

But...cable TV "isn't 'real' ham radio" since it is above the
precious HF spectrum, can't "work DX" or have QSL cards. :-)

However, their spectrum occupancy is better than two decades
wide with terrible intermodulation problems (from all those
channels carried at once) and it must be reliable 24/7...the
stations and cable providers are and customers depend on that.

I suppose so. :-)

It wouldn't be so bad in here if the PCTA extras weren't so die-hard.
None of them resemble Bruce Willis. :-)

>pretty.....mimeographs were much better!

The origin of the old military phrase "cut orders" (for somebody to
do something) derives from those mimeograph stencils...using
manual typewriters with the carbon ribbon temporarily removed
or lifted. The typewriter type ends literally cut into the stencil.

Started in before WW2 times. It worked. When there was no
xerography yet, it was best for small repro jobs rather than getting
over to an offset press.

>> But...some radio amateurs insist and insist and insist that ALL

>> :-)
>
>Time marches on, however - and mandatory Morse will go with it. Morse
>has been with us for a long, long time - but its time has come.

What you mean by "us," kimosabe? :-)

The whole reason I brought up my military experience at ADA was
that military radio did NOT use morse for any fixed-point to fixed-
point traffic...from 1948 onwards. In 1955 the monthly message
traffic at ADA was about 220,000 or roughly 7300 every 24-hour
period, 2400 every 8-hour shift. And that was for only the third
largest station in the Army Command and Administrative Network
(ACAN). Washington Army Radio (WAR...appropriate callsign)
did one and a quarter million messages per month!

There's just NO way that manual morsemanship could handle
that sort of traffic without way too many soldiers devoted to
nothing but morse. For 24-hour duty there would be at least
three shifts working. Machinery would be needed to relay all
those morse things efficiently on a 24/7 basis. Inefficient.

Prior to my military assignment at ADA, I'd bought into the myth
that "real radiomen" would be good at radiotelegraphy. Got a
rude shock with sudden immersion into reality of the day a half
century ago. Was NOT used! Teleprinter was king then. I did
some rapid realignment of thinking, threw out lots of old myths,
applied myself. Teleprinter WORKED. Very well, too.

>I'd bet that 20 years from now, people will still be using Morse on
>the bands. Not because the want to be 'real hams' - but because they
>are interested in it as a communications protocol. Or a curiosity.

I have nothing against that. Lots of folks are into recreating old
times...such as re-enacting our Civil War or (shudder) our old
Revolutionary War. :-)

I'm against the requirement that radio hobbyists MUST learn
morsemanship - at any rate - in order to be authorized an amateur
radio license. That's nonsense.

I sure won't buy into the absurd idea that anyone "must do the
tests that olde-tymers took" to somehow "prove themselves and
their dedication to ham radio." Nonsense. Self-glorification by
the olde-tymers with a large dose of self-righteousness.

The very best stagecoaches are made today, either in southern
California or Arizona (depending on which guild/craft one talks to
in the movie industry). Reliable, long-lasting, made with the best
materials, driven by seasoned drivers/handlers. Looks good in
the western moom pitchas. But, not a single working stagecoach

line in the country going city to city today. Been a long time since that was fact. Licensed public transport drivers do NOT need to demonstrate stagecoach or horse handling now. :-)

As far as I'm concerned with USA radio laws, the U.S. amateur radio service below 30 MHz has always been called 'ARS' ...for Archaic Radiotelegraphy Service. De facto if not de jure.

It's way past time for that nonsense morsemanship test requirement to go.

My best wishes to the Radio Amateurs of Canada for modernization of their own rules and regulations!

Well, you finally got the limerick form down but Tanzania was never
"Tanganika" unless you're Polish, French, Italian or Spanish. The name
of the country was (a looooooong time ago) "Tanganyika". "Encyclopedica"

and "culpabilica" just don't work.
The lyrics stink but I'll give it a 65 because of the beat.

As to the "stench", the only person who tried to make anything out of my 6m operation was, well, you. It didn't work and the stench was likely not smelled beyond your own yard.

Must Len agree with everything? Some people say that cellular
telephones have no significant role in emergency communications, yet
about every footage of hurricane action film depicted an official with
a cellular telephone.

> >You just never know when you
> >might need one,
>
> If so, why have any tests at all?

Because we already have a radio service without tests which can be
used for emergency communications.

Or
> why have tests beyond the absolute
> minimum possible?

Indeed.

> >and Morse Code just isn't needed to be an effective
> >emergency radio operator.
>
> Morse Code has had a role

An incredible stretch.

> It is clear that Len's interest goes far beyond
> eliminating the Morse Code test.\

He wants to eliminate the morse code test.

> To quote a wise one:
>
> "It is not the Morse, but the hatred"

I'm not familiar with that wise one. Who is it?

Yes.

3123. POL OT: Senor Citizens: You Don't Owe The Democrats Loyalty

Newsgroup: rec.radio.amateur.policy
Date: 2004-09-09 16:05:09 UTC
From: David Stinson <arc5@ix.netcom.com>
Message-ID: <Va%%c.207$tJ1.3@trnddc04>
Source record: 96799
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.policy

NOTE: OFF TOPIC THREAD- REPLY AT YOUR OWN RISK.
Natygrams cheerfully ignored.

Why Seniors Don't Owe the Democratic Party loyalty:

Franklin Roosevelt is dead.
Harry Truman is dead.
Hubert Humphrey is dead.
Robert Kennedy is dead.
This isn't "your" Democratic Party anymore.
The *new* "leadership" talks sweet honey and gives you nothing.
The party has been taken over by unscrupulous, opportunistic
people who will say or do anything to give themselves
money and power.
Witness: they've been making the same promises
to you for forty years, yet delivered little.
They know that they can fool
at least 50% of the people into voting for them
by talking sweet trash (young people)
or just by being Democrats (Labor/Academe/some Minorities,
who would vote for Satan himself if he ran as a Democrat).

Most Seniors were raised to value loyalty,
and that included "party loyalty."
That's a *good* thing, when the loyalty is deserved.
However, if one remains loyal to an organization
that has become corrupt, then one is a part
of that corruption.
The whistle-blowers at corrupt companies were "disloyal,"
but they were also right.
Thus it is with the current crop of Democrat leaders;
They are corrupt and out for themselves,
so you don't owe them any loyalty.
Demanding "loyalty" to something that
has become corrupt is flat wrong, and you know that.

We cannot escape our *personal responsibility*
for the outcome of the votes we cast.
Supporting corrupt people
and the destruction they do to your nation
makes you just as guilty as they.
Voting for a man like Kerry-
a man proven beyond question to be utterly untrustworthy

and to lack even the tiniest shred of leadership ability,
makes you guilty of the damage he does while in office.
Moreover- if you call yourself a person of religious faith
and you vote for a man who has told you
he is going to support abortion,
then you are in part guilty of the lives
of the children killed thereafter.
"I voted for abortion when talking to voters,
but I voted against it when I wanted Communion,"
seems to be Kerry's line.
If you vote for a man who makes an issue of outsourcing jobs
while *his* companies have outsourced every job
short of the janitors,
you are in part guilty of taking those people's jobs.
It's even come to light that he "doctored" his DD-214,
claiming valor that is not his and thus cheapening
the true valor of "The Greatest Generation."
This and many other points illustrate
Mr. Kerry's lack of character,
and you were raised to value character,
even if the rest of the country has forgotten its value.

** Would you have wanted this man **
** to take over for Franklin Roosevelt? **

Just as you cannot discipline a misbehaving child
by continually giving the child what he wants,
you cannot "fix" the Democratic Party
by rewarding it for corruption with your vote.
Reclaiming the party must be done a person at a time
from within the party. Give them some years out of
power and the grass roots of the party will
move the corrupt men out and replace them
with more visionary people. There *are*
Franklin Roosevelts and Harry Trumans out there,
but the misleaders aren't going to let them
come forward if you vote for men like Kerry.
Voting for unfit candidates over and over
only prolongs and deepens the problem.

President Bush isn't an angel or a saint;
he's just a human being like you and me,
with all the faults and problems that go with that.
He isn't the perfect choice, but he is the
better choice at this time, by far.

Regards,
David S.

>Do tell.

All Americans can
see that
on the evening
news?

We cannot. Lots of
radios to
be seen, civil
government and
National Guard
radios and news
network radios.

Ham radio radios
can only be
seen in action at
ARRL website.

>> However, to claim that every
>> radio amateur must be tested on Morse

>That inexperience leads you to write things like
>"morsemanship-at-all-costs". Please explain what method you currently
>use under MS Windows (any version) to delete a file which the Windows
>program is using at that moment. Can you say "DOS"? ;-)

No problem. I can say "doss." I know that it's an acronym for Disk
Operating System.

NO Microsoft Windows product lets you delete a running file. You
have to quit the program first. [that's called "closing the file"]

Once you've quit a program that Windows had been using, you can
"drag and drop" into the Recycle Bin (via mouse), right-click on the
mouse and left-click on the "delete" in the pull-down menu, or go
to DOS level (two ways, by the way) and type in the "del <filename>"
at the Command prompt. Works at every Windows version from 3.3
to XP.

Is there anything else you need to know about file deletions? If so,
go to the Microsoft website and ask for help. They have lots of Help
items there.

Your problem, Herr uber-oberst, is that you just cannot "delete" ME.
Not no way. You not know how. Ergo, all you can play is the hand
with the personal denigrations cards. You keep losing. Tsk.

Now, did you want to remark on the ARRL proposal or are you having
too much fun peeing in the pool? :-)

You say he has no part, yet he has contributed to the amateur literature, and he has commented on amateur matters to the FCC. There are probably amateurs (the kind with a license) who have made fewer contributions than has Len. How strange that you say he has no part.

K1MAN's schedule is also widely known, and is within the bounds of the
rules.

Your understanding is incorrect, as usual.

If W1AW can "broadcast", so can K1MAN. If you don't like the content of
K1MAN's broadcast, start your own. But for now, SHUT THE HELL UP.

You have in basically correct Dan. K1MAN, is a radio bully. He seems to
think that whatever he does, thinks, or wants to do takes priority over
everyone and everything else. Case in point...

For a period of about 2 years K1MAN vacated the frequency of 14.275. During
that time several stations began operating there. One day up comes Glen
Baxter and he tells us to get off because it is time for his broadcast. He
didn't ask, he didn't even attempt to be polite. He just decided it was
time to resume his trashcasting on ''HIS" frequency. A major fight erupted
and the latest FCC action against him is the result of it.

Recently he decided to finally move off of the GA Sideband net frequency of
3975, he moved up the band a bit and ordered the UFO network to get off his
frequency. Same same from Baxter boy.

Several years before he had a major fight with the 3975 crowd. Unfortunatly
the rebels capitulated.

Mr. Baxter is 'real popular' with the AM crowd in New England. Ask them
about his ''full carrier AM'' signal on 3890 nightly.

Dan - Glenn has been running over nets and broadcasting inappropriate junk so long (in 1998 he was wiping out the Sunday morning Bermuda Net on 14.275mHz) that I begin to wonder if current FCC people realize that it has been 17 years or more since the FCC was first going to fix the problem. Baxter is not only a domestic problem, but an international embarrassment. Hams in other countries are incredulous that the FCC cannot or will not do something about him.

Gone are the "good old days" when the FCC could get a court order
and the US Marshals to enforce same "just for the asking". Neither
the courts nor the Justice Department are interested in doing that
anymore where the sole issue is violation of FCC Rules without
anything else, such as national security or criminal activities
involved..... but that doesn't mean that they won't whenever they
so desire.

The present Enforcement Bureau people are used to working problems
out by exchange of correspondence and lawyer-to-lawyer however long
that takes, rather than getting a task force together with raid
jackets and bolt cutters and taking care of business.

> Odd; Blackguard was away for a week.

What is odd is that you would say that.

To verify Blackguard and my absence from the list, I went back through the postings to check this out.

My last posting before leaving was on the 27th of August, subject Ham Haiku. Upon coming back, my next posting was the start of the "Who Peed in the Pool?

I was in town on the 28th and 29th of August and had access to a computer, but was busy with housework, and didn't post. I left town on the morning of the 30th. The next time I had access to my computer - home *or* work was on the 5th I got back in town late on the 4th.

Now let's look at Blackguard's posting during that time. Blackguard made a number of posts over the weekend. On the 28th and 29th he or she made a number of posts.

It's possible that I could have made those if I was Blackguard. That is just the same as anyone else here could have made those posts.

But on the 30th of August, Blackguard made 3 posts, and on the 1st of September, Blackguard made 2 posts.

So at the very least, the Blackguard character made 5 posts in this newsgroup while I was away.

So your contention that this character Blackguard was "away for a week" is inaccurate, at least as far as a correspondence with my out of town work. I have noticed that Blackguard did not make any posts between September 2nd and September 8th. I was out of town for a couple of those days.

Doesn't add up, William.

I could provide references that can tell you that I was out of town
that week. I don't know that you you wold believe me though.

Hmmm. Sounds like the cell phones went dead, then the land phones went dead, and the cell phones went out due to overload after the land lines went out.

My lesson is that phones are *not* a good comm method during and after a hurricane type event.

And he is correct that a simple phone is a real good thing to keep around the house. At the University where I work, Salvage often has a number of the first generation touch tone phones available at rock bottom prices. Those phones were made with to the construction standards of the moldy oldy Bell (or was that Western Electric?) dial phones. Side note, my parents had one of those old dial phones from 1960 until 2000. 40 years of service. Most phones I buy now last around a year.

But hasn't enough time passed for resolution of this problem even done that way, Phil? Here is a person in clear violation of many rules, and also in violation of criminal statutes too, and yet they must be powerless to do anything.

Or IS the fact that the League has it's own broadcasts a nasty sticking point?

> are so dead that it would be just necro-equine flaggelation.

Welp, if they can't have the Amateur Service that they want, they'd
just as well see it dead.

> A few newbie newsgroupies have shown up, see the PCTA
> extra regulars frothing worse than a latte machine, and leave for
> (hopefully) a better venue. Sigh.

I remember a cordless Tech named Val Germann. Showed up here a newbie
singing the praises of Morse Code; how he was going to learn the Morse
Code and sit to the right of God. Every one of these PCTA sychophants
were fawning and frothing all over Val.

Did Val ever report back that he is now copying 20+ on the low end of
any band?

Nope. He sure suckered them, and they were so willing to be suckered.

> This newsgroup isn't about radio. Or policy.

Cecil moved some time after the "rrapnet."

He also moved physically...to take care of his elderly parents.

In the light of reality, the foolishness of a few morsemen fantasizers
in here looks silly. Can't blame Cecil for exiting.

>> >I wonder if Steve will still focus on male genitalia, homosexuality,

>I wonder if they rehearse before they get on-line? Hi, hi!

Don't laugh too much. I observed one individual on the former
Talk Channel BBS who had a "girlfriend" personna. So much so
that he even paid for her subscription! Sysop Gary made him
leave once that was discovered, refunded his remaining
subscription money.

Local BBS sysops were warned of several such nutsos in a
self-regulating system. Not a great percentage, less than 1%.

None of those will work with something which is running as part of the
operating system *or* with a running executable such as a virus.
Typically, one must exit the Windows program, go to DOS and delete such
a file.

> Is there anything else you need to know about file deletions? If so,
> go to the Microsoft website and ask for help. They have lots of Help
> items there.

Good. Go there. Read them.

Literature? I'll concede that Leonard authored some articles for a
commericial venture in the form of an amateur radio magazine. That
didn't make him a radio amateur.

> and he has commented on amateur matters to the FCC.

By your logic, comments to the Commission on broadcast station ownership
make one involved in broadcasting. Len's comments didn't make him a
radio amateur.

> There
> are probably amateurs (the kind with a license) who have made fewer
> contributions than has Len.

Is something one does for money a contribution? Is something which results in a negative action a contribution? Is something which results in no action a contribution?

> How strange that you say he has no part.

Len has no amateur radio license. Len may not operate radio equipment under Part 97 of the FCC regs. Len is not a regulator of amateur radio. I don't find that strange at all. I find it fitting.

Let's be a bit more precise, Dave.

We can concede that Lennie's name appeared as having authored those
articles.

We have no evidence that it WAS his work.

His conduct in this forum as evidence leads me to believe that the
originality of the articles is dubious, at best. Conversations with people who
knew him tend to cement that opinion.

>> and he has commented on amateur matters to the FCC.
>
>By your logic, comments to the Commission on broadcast station ownership
>make one involved in broadcasting. Len's comments didn't make him a
>radio amateur.

Lennie's "comments" are the same stuff over and over.

The military and maritime services don't use Morse anymore, so Amateurs
shouldn't either.

Not one bit of understanding about what he's commenting on. Still can't
separate the "AMATEUR RADIO SERVICE" from anything else. He left the Army
during the Eisenhower administration and with it his last "exposure" to ANY HF
radio operating...save for maybe CB...

And what "points" he can't make repeating that over and over he "makes" by
attacking the other writers...Of course when someone suggest HE'S less than
adequately informed on matters, he can't stop wailing about it for years...

>> There
>> are probably amateurs (the kind with a license) who have made fewer

Better yet...

Find me ONE article in any OTHER Amateur periodical that cites Lennie's
"work" as theoretical basework for some project.

>> How strange that you say he has no part.
>
>Len has no amateur radio license. Len may not operate radio equipment
>under Part 97 of the FCC regs. Len is not a regulator of amateur radio.
>I don't find that strange at all. I find it fitting.

He could have been a contender.

Since he won't enter the race, he won't even be a runner up.

>
>Instead, you defend it.

That's because I believe it. AND I am willing to sign my name to it.

If you had been any part of it you'd understand.

You are a person of no convictions, Brain.

It really is THAT simple.

YOU, on the otherhand, have also had "months" to provide some evidence that backs up your "unlicensed services play a major role in emergency comms" faux pas, and YEARS to provide some documentation that your alleged Somalia "operation" was legitimate.

Still a big fat ZERO on either account.

But then you've conditioned us to expect just that...

>> Still sucks to be you. Still not getting it right.
>>
>> Oh well......

>Some civil discourse...
>
>You're simply incapable of it.

Of course I am being civil.

You act stupidly, I point it out. That is not "uncivil".

You don't like it, but you keep doing it.

If I were being uncivil, I'd use profanity and speak in baby babble.

There's nothing of what I said that's "uncivil", Brain.

Lennie's spent a long time building his foundation of hatred.

One of these days someone is likely to react. It happens everyday. Read
the papers.

The ones I feel sorry for are Mrs Lennie and thier cats. I doubt she has
a clue as to how he acts in this open, public fourm. She will be the one
terrorized as a result of HIS actions.

Oh well.

Probably a combination of both Mike.
The only thing that MAN has going for him
is that he lives way up in the boonies of Maine.
If he were located in a more 'urban populated' area
it's a guess someone would have probably either cut 5'
sections out of his coax, or took a power saw
cutting wheel to the base of his antenna tower at
3:00 AM a long time ago. (Not that I am condoning or

suggesting any such activity by anyone mind you. I do
not in fact!) Just that for the most part I have observed
that ham QRM'ers and people like CB'er's who cause TVI
located in the more densely populated suburban areas seem to have
their neighbors find the source of the problem and
take 'corrective measures' rather sooner than the FCC does!

****
BULLSHIT you lying and utterly inconseqential Putzlet!!!
****

You really do need to pop for that tome on "recovering from assholism"
and read it as many times as it takes to get it's message.

As if . . !

It was Cecil himself who triggered the one-shot RRAP CW net in the
winter of 2001. Cecil posted that Larry Roll failed to show up for a
couple CW skeds they'd arranged since Larry had challenged Cecil's
claim to being CW conversant. I jumped in at that point and tossed out
a proposal for any and all RRAP lurkers able to do so to gather around
7.037 Mhz some night or another so that Cecil could firmy establish
the fact that he's CW-capable. Which he did and we did. In spades.
Cecil suffers a sort of palsy which makes using any sort of keying
widget difficult to operate so he uses a straight key. He showed up on
the freq during a nasty T-storm that nite but never missed a lick.

Net result has been a helluva lot of ongoing respect for Cecil's CW
and technical skills and doggedness amongst us PCTAs.

In refutation of your bullshit the following were posts tossed out by
some well-known hardcore RRAP PCTAs after that net happened.

- - - - -

At 1010PM EST Feb 27 W3RV called the first session of the RRAP CW
Net.

Checking in were;
W3RV Brian- NCS
W0EX Dick
AC6XG Jim
K0HB Hans
N2EY Jim
W6RCA Cecil

All signals were good in spite of considerable QRM and some QRN from early spring thunderstorms in the South. Cecil W6RCA reported thunderstorms in his area (southeast Texas), with sparks in the hamshack! That had to be noisy, and risky too. Gutsy guy, our Cecil. None of that for me!

Jim AC6XG initially was weak (549 here) and W6RCA wasn't able to copy through the storm static, but the skip distance on 40 meters changed and
his signals improved (to 569 here) and all stations made direct contact
with each other.

The same band change caused N2EY and W3RV (both in E.Pa.) to shift signal levels. Initially W3RV had been considerably stronger than N2EY but changing band conditions nearly reversed their signal levels as received in Missouri. That's a phenomena that occurrs on 40 meters when
two close stations work a distant station and propagation shifts occur.

Anyone who thinks that "CW is dead" should have heard the clamor between 7035 and 7040, with a PACTOR signal occupying 7038-7040 for a time. I wondered for awhile, before the announced time, whether or not we would be able to find a free slot in the activity. Fortunately the PACTOR station left the air and we took that frequency.

Hey Jones, why didn't you check in??? <g>

(Dick Wï¿½EX)
- - - - -

Nope, wasn't me tuning up on frequency.

I think we ought to make the net a regular event, 03:00 UTC WED (TUE local) 7.038MHz (=/- QRM).

Best signal: W0EX

Best bug: N2EY

Best straight key: W6RCA

Cecil -- if your feedlines are sparking from an electrical storm, it's time to evacuate the radio room! dit dit 73, de Hans,

K0HB

3162. Jim = Quitefine?

Newsgroup: rec.radio.amateur.policy
Date: 2004-09-10 15:40:01 UTC
From: Mike Coslo <mjc5remove@psu.edu>
Message-ID: <4141CAD1.8090805@psu.edu>
Source record: 96838

Okay folks,

We have a few posters here that are anonymous.

I decided to look into the N2EY-Quitefine connection

What is your evidence for Jim being Quitefine?

Most of Jim's posts - interestingly enough with his callsign - are posted from google, whereas Quitefine's are all posted from AOL. A small number of Jim's are posted from AOL, although from the headers, Quitefine could also be Steve too.

But I doubt it is either of them.

More importantly, it is of interest that some of the people that are so concerned about these anonymii are more concerned about that anonymity. not either one is engaging in name calling, although Blackguard seems a bit coarser.

Can't you guys handle it?

I am -
at least
I think I am -

- Mike KB3EIA -

I think! ;^)

>I don't find that strange at all. I find it fitting.

Davie boy is NOT a regulator of amateur radio.

Davie boy is NOT keeping within bounds of the subject thread.

Davie boy still puts on the ASS rental uniform and makes like
a bad imitation of Otto Preminger's character in "Stalag 17."

Davie boy...I am fully qualified, by long experience and training
to "operate" radio equipment. I'm just not AUTHORIZED to emit
RF within U.S. amateur radio bands as a civilian.

You have self-established "definitions" which are incorrect outside
of amateurism. To use your definitions in your own quaint way of
defining things, I couldn't even check out radios on a bench in a
clean room. :-) You imply (incorrectly) that I could not, ever,
"operate" any radio in any HF place...which is not truth according
to U.S. radio regulations.

Amateur radio operators are NOT authorized to emit RF outside of
amateur radio bands...unless they have a valid commercial radio
operator's license.

Some amateurs, like Davie boy, seem to think they are authorized
to emit all sorts of feces-surrogate remarks on the Internet. :-)

Tsk.

No "foundation of hatred" here. That's all in nursie's disordered
imagination and psychosis.

> One of these days someone is likely to react. It happens everyday.
>Read the papers.

In the Podunk Valley, TN, weekly newspeper?

More likely in this newsgroup. Nursie REACTS like a CB-plusser.

> The ones I feel sorry for are Mrs Lennie and thier cats. I doubt she has
>a clue as to how he acts in this open, public fourm. She will be the one

>terrorized as a result of HIS actions.

Anyone attempting to "terrorize" my wife, me, or this household
will be in for a rude, painful surprise.

Google will, of course, archive this message made in a public venue.
The LAPD can access that. So can the telephone company security
people. So can AOL.

Intimidation "threats" made over a newsgroup are puerile rantings of
a deranged mind. No degrees or certificates needed to verify that.

> Oh well.

Nursie is IN a well...one that is of despair, deep, cold and was dug
by herself in the unfertile imagination of her own mind. It has no
water and the bucket is filled with unmentionable waste...

Get help for yourself, nursie.

Der uber-oberst is on a nastygram roll? You slipped in the butter...

>> NO Microsoft Windows product lets you delete a running file. You
>> have to quit the program first. [that's called "closing the file"]
>
>Remember that you've written the above.

I've remembered it since the first time I installed Windows 3.3.

Long time ago.

You finally get around to reading your MS manual, olde-tymer?

You CAN turn off your computer power completely in the middle
of running a program. That's about as "delete" as you can get.

Whether or not your program or operating system survives intact
is solely up to the whims of the operating system. :-)

But...this is NOT about computers, is it?

It's all about Davie trying his very best (really the worst for others)
to misdirect and try to lay blame of others for "saying wrong
things." Davie do dat often. Almost all the time in here...

>> Your problem, Herr uber-oberst, is that you just cannot "delete" ME.
>

>Sure, I can delete Millenium Edition.

Delete it? Heck, Davie boy, you aren't IN the new millennium yet mentally.

[yes, ha ha, we all saw the "pun" of "ME" = Millennium Edition, even if you forgot there are two Ns in millennium...ha ha]

>> Now, did you want to remark on the ARRL proposal or are you having
>> too much fun peeing in the pool? :-)
>
>Might I ask you the same after your computer dissertation, followed by
>your swipe at those who campaign for the retention of morse testing? :-)

Davie boy, y'all aren't interested in the subject.

All you want to do is Vent whatever frustrates you in here by personal denigrations of those you disagree with...

Davie boy, you ought to get off your computer and go play with your Orion thingie, amaze all with your "cleverness in computers" by jawing about your expertise on the air. Make yourself bigger than anyone by attitude.

You waste everyone's time.

"Gareeb" (another anonymouse) who wasn't here, wasn't there,
wasn't much of anywhere...seems to want to vent.

Poor baby.

"Gareeb" can't stand Cecil, wants to take swipes at Intel Corporation.

Why? Intel isn't any subject for AMATEUR policy discussion.

Cecil retired from Intel, his last corporate employer in a long career
of electronics industry work. Cecil has a number of patents granted
(more than the Katapult King) and is an independent thinker. Not a
whiny parody of those who wish to have CW as king and continue to
make U.S. amateur radio into the Archaic Radiotelegraphy Service.

Perhaps Paul Schleck ought to take a poll and establish the Archaic
Radiotelegraphy Service "policy" newsgroup...where all the
anonymousies can go and Vent all their bilge and bile to their heart's
content?

NO independent thinking to be allowed in this new Anonymousie
Policy newsgroup! All must slavishly follow The Old Man, worship
at the Church of St. Hiram, extoll the "virtues" of CW until the last
code key is pried out of cold, dead fingers.

Okay, Paul, where be you? :-)

>You really do need to pop for that tome on "recovering from assholism"
>and read it as many times as it takes to get it's message.

Ah...another "civil discourse" PCTA extra heard from. :-)

Kellie seems to have roared after building up more steam in his
mighty catapult!

Tsk.

So, three years ago all of four CW-using-fans made a "net" after
arranging the contact time and frequency through the newsgroup?

Wow. Great "pioneering" of the airwaves...plus awarding "best of"
ratings for the four (or was it five?).

Did the "net" all with CW to show "CW isn't dead!" :-)

Well, that just goes to show everyone that ALL newbies on HF
MUST learn CW in order to be in company with Giants of the Air!

Marvelous "reasoning." Too much seasoning. A broth of frosh oar.

:-)

>K1MAN's broadcast, start your own. But for now, SHUT THE HELL UP.

I refuse to be drawn into a flame war, sir. Ovbiously I know
enough about Part 97 of the RULES to know that K1MAN is violating
them. I supposed I shall have to take the time here to bolster my
opinion with a few cold hard facts as stated in the commission rules.
ï¿½97.113(b) states "An amateur station shall not engage in any
form of broadcasting, nor may an amateur station transmit one-way
communications except as specifically provided in these rules; nor
shall an amateur station engage in any activity related to program
production or news gathering for broadcasting purposes, except that
communications directly related to the immediate safety of human life
or the protection of property may be provided by amateur stations to
broadcasters for dissemination to the public where no other means of
communication is reasonably available before or at the time of the
event." Is K1MAN violating this section of the rules...According to
Riley, that's a yes.
The commission rules also state that frequencies are open to
all licensed amateurs, correct? No one has the right to demand
someone depart the frequency because a person wished to use it.
Standard amateur practice ssays that an Amateur liosten to the
frequency and make a short question asking if the freq is in use.
Does K1MAN bother or just say "Get off MY frequency!"
ï¿½97.111(b) states "(b) In addition to one-way transmissions
specifically authorized elsewhere in this Part, an amateur station may
transmit the following types of one-way communications:

(1) Brief transmissions necessary to make adjustments to the station;
(2) Brief transmissions necessary to establishing two-way
communications with other stations;

(3) Telecommand;

(4) Transmissions necessary to providing emergency communications;

(5) Transmissions necessary to assisting persons learning, or
improving proficiency in, the international Morse code;

(6) Transmissions necessary to disseminate information bulletins;

(7) Transmissions of telemetry. "

W1AW falls under Sub-Paragraphs 5 and 6 in that they issue
daily code practice runs as well as weekly bulletins or even relays
the word that the FCC is suspending the rules due to an emergency
situation. Tat's covered under sub-paragraph 4. All done in
accordance with the rules. buddy.
Does K1MAN do daily code practice sessions? Does K1MAN relay
information bulleting? and does K1MAN engage in transmissions to aid
emergency communications?
From what FCC is saying. the answer to all three is "No", but,
he stays just far enough below the FCC "radar" that nothing's being
done that people would want done.
Now...I've made the case here. Find a reason to knock it
down...if you dare.

Amateur Radio Newsline™ Report 1413 – September 10, 2004

Amateur Radio Newsline report number 1413 with a release date of
Friday, September 10th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Hurricane Frances strikes Florida and ham radio is prepared. Hear the ham radio first responders in action on Amateur Radio Newsline report number 1413 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HURRICANE FRANCES VS. HAM RADIO

Hurricane Frances pounded Florida with high wind and heavy rain after it smashed across the state's East coast. Close to 4 million residents lost power and telephone service. Cellular phone networks that survived Frances’s gale force winds quickly became overloaded. Enter ham radio. Amateur Radio Newsline’s David Black, KB4KCH has been following the story from our South-East bureau in Birmingham, Alabama:

--

When Hurricane Frances hit Florida on Labor Day weekend, the storm ripped roofs off buildings, toppled trees and cut power to about 4 million people. Also lost was part of the states telephone and cellular service. This created a communications vacuum.

But hams affiliated with SATERN - the Salvation Army Team Emergency Radio Network, A-R-E-S, and the Hurricane Watch Net were expecting Frances. Radio amateurs had been tracking this storm as it ravaged its way across the Caribbean. And it was ham radio that let the world know of the destruction the giant storm had caused as it hit some of the islands:

--

“Roger roger. On Elutheria Ill say about 40 percent of the structures have damage. In the Rainbow Bay area where I live I would say about 70% of the hhomes here have structural damage. Over.”

--

Once a Category 4 hurricane with winds of 145 mph, Frances had weakened to a Category 2 storm as it neared Florida. Winds dropped to a peak of 105 mph as it made landfall at Sewall's Point, north of Palm Beach, around 1 a.m. Eastern Daylight Time on Saturday, September 4th. Ham radio operators affiliated with

the Hurricane Watch Net tracked its approach:

--

“This is KA5E with the Hurricane Watch Net. We are currently taking measured weather reports out of the affected area for Hurricane Frances. Do I have any stations on with pdates or signifigant weather reports. KA5E, over.”

--

The powerful storm hit Florida with ferocious winds and sheets of rain. The hurricane was so large and slow moving that its western outer edges had began arriving on the east coast on Saturday morning. On Sunday morning its eastern edges were still pounding the coast from which 2.5 million people had been told to flee. Repeaters interconnected using I-R-L-P and Echolnk were pressed into service to help coordinate the latest round of evacuations:

--

“KC4PNC KB1CYO net control. Go ahead sir,”

“They have called for mandatory evacuation for Hillsboro county for manufactured homes and also mobile homes. They have not ordered a mandatory for low lieing areas but they are strongly recommendng it.”

--

And as evacuee’s poured into shelters, communications volunteers were needed. A call was put out over the interlinked repeater network and the hams responded

--

“We are looking for any volunteerr Amateur Radio operators to help with shelters. We have eight shelters open right now. Those are being manned. However, since its a declared evacuation all of the other shelters will be opened and we are looking for vlunteers to man those shelters. KC4PNC.”

--

As Frances path of destruction hit Florida's central Atlantic coast counties, blinding rain squalls drove clouds of sand into the air. At the same time high waves thundered onto the beaches. One ham watched as his rain gage was torn away and white caps pounded ashore:

--

“Any kind of rainfall accumulation?”

“No, that gage blew away but I can tell you that we are in a high tide area right now and I can see the tides up about a foot and a half and I have water coming over my seawall. But its not a problem. We are still at a much higher elevation. The water is over the seawall along the Intercoastal Waterway.”

--

As palm trees rained coconuts and then toppled over and buildings suffered extensive damage there was also a tragedy at sea. And the U-S Coast Guard turned to Amateur Radio for help:

--

“I want to remind the net that the Coast Guard has asked us to lend assistance in the search for the Anna Marie. It is a vessel that went down off the coast of Sarasota this evening about 10 to 12 miles out. Any assistance or any information on the Anna Marie that went down with the crew 10 o 12 miles out of Sarasota, the U.S. Coast Guard would appreciate your assistance.”

--

At airtime its not known what happened to the Anna Marie nor the fate of its crew. But as the search continued, there was yet another threat. Early on Sunday the 5th, the massive weather system spawned a tornado, and the warning went out over the I-R-L-P ham radio network:

--

“The tornado is expected to be by Bostwick by by 2:45 Eastern, Forholm by 3:00 a.m. and thats all I have.”

--

As that twister touching down the National Weather Service office in Jacksonville issued a tornado warning for Northern Clay County including the city of Orange Park. Also affected were St. Johns, Clay, and Putnam Counties. And as dawn was breaking radar picked up a developing tornado near Doctors Inlet moving West at 45 mph. Only some damage to roofs was reported.

But reporting weather was not the only chore radio amateurs were involved in. Another as health and welfare. Letting worried relatives and friends know about those stuck in Frances path. Many like this central American station who was happy to hear that the hurricane was headed away from his daughters location:

--

“OK. Great. Thank you very much. I appreciate that information. We are here in a location where we do not have any TV or any other communication. We are on the beach on the West coast of Panama. So thanks very much I do appreciate it. This is HB1XRO and the handle is Bob.”

--

By Monday afternoon, Frances had crossed the eastern Gulf of Mexico and made its second landfall in Florida's northwest Panhandle section some 20 miles south of Tallahassee. Now it only a tropical storm with sustained wind near 65 mph. Damage was mainly to power and telephone lines. At that point the forecasters were predicting the storm would move north-northwest at about 8 mph, and was not expected to regain hurricane strength.

Frances soaked Georgia, dumping 11 inches of rain in a 24 hour period in the town of Patterson.

Media reports blame Frances for at least seven deaths in Florida, including two people who were killed Saturday when the roof of he building they were in collapsed. There were also two deaths in the Bahamas. One of these was a teenager who was reportedly electrocuted when he tried to hook up a generator to a power mains that was still on.

With thanks to the hams who supplied the storm audio over the Internet used in this report, I'm David Black, KB4KCH at the South-East bureau in Birminham Alabama for the Amateur Radio Newsline. (ARNewsline(tm))

--

**

RESCUE RADIO: HAM RADIO PREPARES FOR IVAN

And its not over yet. As we go to air Hurricane Ivan is making its way cross the Caribbean and could strike the United States. CQ's newsdesk reports that Amateur Radio at the National Hurricane Center, WX4NHC, was to be reactivated for Hurricane Ivan at 2 PM EDT Thursday, Sept. 9, and will be active on Friday-Sunday 8 AM-11 PM EDT. The Hurricane Center will be on the Hurricane Watch Net on 20 meters as well as the VoIP Hurricane Net,. The latter is a combination of IRLP and Echolink stations.

The Cayman Islands and Jamaica are the next locations in the path of this extremely dangerous Category V Hurricane which now has maximum sustained winds of 160 MPH per the latest advisory issued at 5 AM EDT Thursday morning.

VoIP Net Control Station Rob Macedo, KD1CY, says they are trying to coordinate with the IRLP node owners on the Cayman Islands and Jamaica on usage of their nodes and liaisons to those affected areas. Currently there are no Echolink or IRLP nodes in Cuba.

National Hurricane Center advisories indicate that the path of Hurricane Ivan is not clear after it passes over Cuba on Sunday. Residents in the affected area should monitor the situation closely. There is a possibility that the hurricane's forward progress could slow and emergency nets may be activated for an extended period of time. It also means that ham radio communications volunteers could have a lot more to do in the coming days. (CQ)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the repeaters of the Condor Connection intertie serving the great American South-West.

(5 sec pause here)

**

RESCUE RADIO: FIRST RESPONDERS SAY THEY NEED INTEROPERABILITY

Meantime, three years after the nine eleven terrorist attacks, thousands of police and fire divisions in cities and counties across the United States still

do not have coordinated communications capabilities. So says the First Response Coalition and Amateur Radio Newslines Norm Seeley, KI7UP, has the details:

--

The First Response Coalition calls this lack of interoperability an unresolved national crisis and it has decided to take on the FCC and big business to solve it. This as the organization reaches out directly to more than 43,000 local police and fire officials to solicit their help.

First Response wants Congress to overturn the FCC decision to award spectrum to Nextel in favor of a plan that deals both with interference problem and the interoperability crisis. Gene Stilp, who is the First Response Coalition coordinator says that the FCC plan involving Nextel is wrong for police officers and firefighters. This is because it only takes on only part of the interference issue. Moreover, it does not do anything about the lack of interoperability between emergency response groups.

The First Response Coalition says that this outreach program is getting a very favorable grassroots response. So far over 17 fire chiefs have joined ranks with the group in opposing the FCC's current plan for what they call a give away of taxpayer-owned spectrum.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.

--

About the only emergency responders these days who have full two way radio interoperability are radio amateurs. Hams had voluntarily set world-wide communications standards many years ago. (First Response Coalition release)

**

RESCUE RADIO: AMBER ALERT LINKS UP TO THE WEB

The nation's Amber Alert system has become a web available tool. This, thanks to a portal made available by the E2C company of Scottsdale, Arizona.

Until now, Amber Alerts have been a primarily radio based technology. This meant that messages had depended on the nation's Emergency Alert system for relay and delivery. The new Web-based system can process and transmit the same emergency information more quickly and make it available to a wider variety of devices. It also comes with software that pinpoints the location of a child abduction and sends out emergency notification targeted to that geographic area.

As of now, Amber Alert managers in 11 states have access to the new portal. Use of the system is expected to expand to the 49 states that have statewide Amber Alert systems. Hawaii has no statewide system but has several local alert networks. (E2C)

**

THE BPL FIGHT: VK 4-WHEELERS JOIN BPL FIGHT

A Four Wheel Drive hobby group has joined the fight against BPL. Its happening down-under. WIA Newscaster Phil Waite ,VK2DKN, reports:

--

The VKS737 4WD HF Radio Network, joined the fight against BPL last week, following the recent WIA news broadcast by Jim Linton, VK3PC, highlighting the BPL industry's attack on interference protection for so called `recreational radio services' and an approach from WIA Director, Glen Dunstan, VK4DU.

VKS737 are currently circulating their members with information about the threat BPL poses to their activities, and encouraging their members to lobby politicians on the issue.

The VKS737 network is used extensively for emergency communications in remote areas, as well as serving the communications needs of outback travellers. Their current membership is around 7,000 and they potentially reach 250,000 Australian 4WD owners.

Many of their network base stations are in urban areas potentially affected by BPL and VKS737 members are rightly concerned about the threat presented to their HF communications. Their organisation is also associated with the Australian Citizens Emergency Radio network, who provide similar services on citizens band frequencies.

Phil Waite, VK2DKN, for the WIA National News.

--

The Wireless Institute of Australia is discussing ways the two organizations can assist each other in the fight against BPL. (WIA News)

**

INTRUDER WATCH: STRANGE SIGNALS AT 7238 KHZ

According to Bob Gonsett, W6VR, for the past three weeks, hams in the southwestern U.S. have been reporting a mysterious signal in the 40-meter band. One party described it as a "mechanical sound." Another speculated that it was "data."

Engineers at Communications General Corporation in Fallbrook California took a quick look at the situation on Septeember 6th. And at 3:20 P-M Pacific Daylight Savings Time the company found several close-spaced CW carriers. The four strongest signals at CGC's lab were on 7238.063, 7238.150, 7238.237 and 7238.412 kHz. The signal on .237 was the strongest of the group and the frequencies reported should each be accurate to better than plus or minus 30 Hz.

Communications General says it is not sure if the signal was coming from one specially modulated transmitter or from transmitters at different locations. Bob Gonsett adds that it will be interesting to learn the source or sources of these transmissions. (W6VR, CGC)

**

SAFETY: RADIO ENGINEER ELECTROCUTED WHILE WORKING ALONE AT TOWER SITE

The hazards of working near power lines has been brought front and center again. This with word that a Wyoming broadcast engineer has killed while working at a transmitter site in Colorado.

Thirty nine year old Robin Bradley Thomas was killed while working alone, trying to install a radio transmitter. The accident happened about 18 miles northwest of Red Feather Lakes in northern Colorado. Indications are that Thomas of Cheyenne died when he accidentally came in contact with high-voltage and was electrocuted. Thomas was described as an experienced engineer who contracted out his services. (CGC)

**

RADIO LAW: CELLPHONE PROVIDERS SUED OVER LOCKED PHONES

A consumer watchdog group sued three cellular telephone companies. This. for "locking" their phones to make it harder for customers to switch carriers.

The Foundation for Taxpayer and Consumer Rights is the group that filed the suit in Los Angeles. It accuses AT&T Wireless Services Inc., T-Mobile USA Inc. and Cingular Wireless, of using software in their handsets that prevents them from being used on a competitors' network.

All phones in question use Global System Mobile communications, or GSM technology which effectively limits a handset to a specific carrier using a non interchangeable SIM card. The lawsuit complains that this is an unfair and deceptive business practice under California state law.

The phone companies are defending their policy. They say that they routinely subsidize handset cost and would loose substantial revenue if they allowed customers to easily use those phones with another carrier. (Foundation for Taxpayer and Consumer Rights)

**

REPEATER COORDINATION: METROCOR MORITORIUM TO END DECEMBER 15

Attention repeater owners in the New York metro and surrounding area. An impoerant deadline is aproaching.

You may remember that your new area frequency coordinator MetroCor had put in place a two year moritorium on new co-channel coordinations when the group came into being. It had also asked existing repeater operators who have documented proof of expired coordination from the now defunct Tri State Amateur Repeater Council to update their coordinations with MetroCor.

In a posting to QRZ.com, MetroCor's Mario Sellitti, N2PVP, says that this moratorium had minimized the possibility that new coordinations might inadvertently displace longstanding users of the spectrum. It also helped to avoid creating disputes where none previously existed.

Now, says Sellitti, this period must now come to an end. He says that MetroCor will be terminating the moratorium as of midnight, Saturday, December 15th.

But he adds this qualifier. Sellitti says that anyone in the area having a repeater or knowing of one belonging to another ham, and that repeater qualifies for this exception, to please refer to MetroCor's on-line F-A-Q in item No. 11. This will give you or the person with the other machine the information needed to gain new coordination through MetroCor. Those in need will find it on-line at www.metrocor.net/faq.htm. (MetroCor, QRZ.com)

**

THE SOCIAL SCENE: W9DXCC CONVENTION IN ILLINOIS IN SEPT

Turning to upcoming social events, Joe Shrader, W9JUV says that the 52nd annual W9DXCC Convention and Banquet takes place Saturday, September 18th. This years venue is the Holiday Inn Chicago in Elk Grove, Illinois with noted DXer and author John Devoldere, ON4UN, as the featured banquet speaker.

John Devoldere leads the world in countries worked on 80 meters with over 350, and is first ham outside of North America on 160 meters with over 290 contacts. He is also an avid contester was elected to the CQ Contest Hall of fame in 1997. Devoldere is also one of the best speakers in the hobby.

This is a show you won't want to miss. For registration and lodging information visit the www.qth.com/w9dxcc on the world wide web. (W9JUV)

**

THE SOCIAL SCENE: SVHFS IN NC NEXT APRIL

And make plans now to attend the 9th Annual Southeastern VHF Society Conference. The 2005 gathering will be held in Charlotte, North Carolina next April 29 and 30.

Guy Titman, K4NUS has offered to be host and facilities chair for 2005 gathering. More information is on the web at www.svhfs.org (VHF Reflector)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM TECHNOLOGY: HAM DREAM DIGITAL VOICE QSO

What is believed to be the first two-way digital voice contact in South Africa took place between ZS1AN and ZS1AU on August 10th. Contact was made on 15 meters with both amateurs using Ham Dream software for the QSO. Amateur Radio Newsline's Bruce Tennant, K6PZW has the details:

--

Ham Dream is an open-source version of the Digital Radio Mondiale broadcasting standard. It was adapted for amateur use by HB9TLK and gives hams the ability to talk almost noise free. Here’s how.

Speech is converted to digital data using a low-bitrate vocoder analog to digital converter. The data is then transmitted using a high-speed modem. At the receiving end the data is decoded to recover the audio at the receiver. Although still in the evelopment stages, there is worldwide interest in Digital Voice, which can deliver very high signal-to-noise ratios over medium quality narowband S-S-B channels.

For those who want to experiment, HamDream software can be downloaded free of charge from the South African Radio League's website at www.sarl.org.za.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, reporting.

--

Further information on digital voice in ham radio is available on HB9TLK's website. Its in cyberspace at www.qsl.net/hb9tlk (GB2RS)

**

EMERGING TECHNOLOGY: TiVO OVER THE NET

Federal regulators have approved technology allowing TiVo subscribers to send copies of recorded shows over the Internet. In its decision, the Federal Communications Commission said the new feature by Alviso, Calif.-based TiVo has enough protections in place to prevent mass distribution of copyrighted material.

The technology would allow a TiVo subscriber to download broadcasts to a computer and send copies of recorded shows over the Internet to an office or home or to a small circle of friends, as long as they are on the subscriber's registered account. The Motion Picture Association of America, the National Football League and others complained that the new service would allow the 1.6 million TiVo subscribers to redistribute shows over the Internet to virtually anyone, anywhere. (Published news reports)

**

EMERGING TECHNOLOGY: FCC TAKES NEXT STEPS TO PROMOTE DIGITAL TV TRANSITION

Its full speed ahead with the conversion to digital television. So says the FCC as it issues a Report and Order that it says implements several steps necessary for the "continued progress of the conversion of the nation's television broadcast system from analog technology to digital television.

The paper covers almost every aspect of the conversion process over the next several years. It also highlights the coming events and should be considered "must reading" for those interested or involved in the future of digital T-V. You will find it on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-250542A1.doc (CGC, FCC)

**

WORLDBEAT: NEW UK REPEATER SERVES LONDON AND KENT

And if you are planning a trip to the UK, don't forget your reciprocal license and your HT. And be sure to try out a new repeater serving the needs of hams in the North Kent and South East London England area.

Its call is GB3OK and it is sponsored by the Bromley Repeater Group and it went on the air on the 16th of August. It transmits on 145.650 MHz with the standard 600 Kilohertz input offset and requires a 103.5Hz tone to access the receiver. The trustee of GB3OK or repeater keeper as the British call them is Tony Ravelini, G1HIG, in the city of Kent. (GB2RS)

**

DX

In DX, HA3JB tells the Ohio Penn D-X Newsletter that he will operate as SU8BHI from Cairo, Egypt. This, from September 21st through December 20th. Activity will include CW, PSK, RTTY, SSTV and some SSB. QSL direct to HA3JB. (OPDX)

And UA9OBA, has been active as JT100M. This is a special callsign being used until September 13th during the Mongolian leg of the Altay-Himalaya Transasian off-road expedition. Activity has been mainly on 20 meters SSB around 14.180 Mhz. QSL via UA9OBA. (OPDX)

**

THAT FINAL ITEM: THA FINAL ITEM: A KEYLESS T-HUNT

And finally this week, a Michigan ham radio operator from the Ford Motor Company was part of a two man team that has solved the mystery of malfunctioning remote keyless car door openers, garage door openers and other such devices in Las Vegas, Nevada. A problem with R-K-E devices that had baffled many residents since a massive outage began last February.

Las Vegas resident Bill Zawistowski was one of those complaining. He and others vented their frustration to anyone who would listen including the FCC. Ford responded by flying in two R-F detectives. Earl Morse, N8SS, represented the auto maker and Nabil Hachem was from Alps Automotive, which makes the keyless car-door devices. And it did not take very long for Morse and Hachem to figure out what was happening:

--

Morse: "When we got there we discovered a signal in the paassband of the RKE receivers which was actually strong enough to keep the RKE from activating its own receiver in the vehicles. We investigated further and found it to be a stuck repeater. We can leave it at that."

--

Morse says it was not much different than a ham radio T-hunt except for the frequency:

--

Morse: “Having experienced Fox Hunting first hand. the only difficult art was shifting all my equipment to that frequency. All of my antennas were relatively useless because they were cut to 2 meters an 440 so we had to make some new antennas for the 315 Mhz. band.”

“We did have one advantage in that the RKE group had purchased a Doppler direction finder and we utilized that a lot.”

--

Morse tells Amateur Radio Newsline that once they found the transmitter it only took a few phone calls to get it turned off. The problem did surface again a week later but this time one landline call got it to go QRT for good. (ARNewsline (tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Blatant sophistry!! (Sometimes abbreviated: BS)

Those of us who can remember or have studied the 1930s and WW2 can recognize how the Cheney-Bush grab for power parallels the path that Goebels and Hitler took before they got into a position where they could squash the opposition. Let them in again and our children and grandchildren will pay for our gullibility. It can't happen here? That's what the Germans said.

I'm a life-long Republican. I personally knew Barry Goldwater (a great ham) . I am ashamed of the current crowd in office. We elect conservatives to : 1. balance the budget, 2. avoid foreign entanglements, and 3. foster traditional values. The current W crew has failed to do any of that.

Their economics are clearly slanted to mega-corporations. Their foreign record is abominable. We are entangled in Vietnam in the desert. They hardly foster traditional values when they allow mega corporations to ship jobs overseas, and wink while the Chinese end up owning 20% of all our treasury bills due to our ridiculous foreign trade policies.

In fact, the record of W is akin to my most hated president, Lyndon Johnson. Both got themselves into extended foreign wars, both blew the budget, and both allowed their cronies to run amok with more pork than we can imagine.

Just because a candidate wears the hat of Republican doesn't mean he/she is really a Republican. Check the records, look at what they've done, and ask yourself: are you better off than you were 4 years ago?

Sorry, here is one very Republican that won't vote for W. You shouldn't either.

Now threats of terrorism to his spouse, and unspeakable acts to "thier" cats.

> Oh well.
>

> Steve, K4YZ

Yeh, oh well.

So much for your civil discourse - you're simply incapable of it.

It's "Brian," not Brain. Your choice is to get my name wrong, call me
other names, and to plug in lots of CAPS (generally accepted as
yelling on usenet).

You choose to be uncivil. That you keep doing it and I point it out
should not cause you to be defensive about it because you simply have
no conscience or soul.

Best of Luck.

Broadcast stations have a responsibility to the community.

People with radio receivers play a part.

People who make comments WRT a broadcasts stations activities play a part.

Regulators of broadcast stations play a part.

> > There
> > are probably amateurs (the kind with a license) who have made fewer
> > contributions than has Len.
>

You're so full of ???'s today. You'll have to ask the FCC.

> > How strange that you say he has no part.
>
> Len has no amateur radio license.

Neither does that Powell kid.

Len may not operate radio equipment
> under Part 97 of the FCC regs.

Len may operate -amateur- radio equipment while you are the control operator.

> Len is not a regulator of amateur radio.

Are you a regulator of amateur radio?

Am I to understand that only regulators of amateur radio "play a part?"

> I don't find that strange at all. I find it fitting.
>
> Dave K8MN

I find you strange.

Absolutely not.

Nor did I say I suggested someone DO it, Brain.

What I SAID was that Lennie makes it a habit of making enemies with his insults and arrogant behaviour. I would not be surprised if it DID happen, knowing the part of the United States he lives in.

Please read what I wrote...Not interject what you want.

>> Lennie's spent a long time building his foundation of hatred.
>
>You have credentials to be making such judgements?

Yep. It's called an "archive". It's right here in front of you, Brain.

>> One of these days someone is likely to react. It happens everyday.
>Read
>> the papers.
>
>I see a threat in your remarks. A violent threat. Thrown bricks and slashed
>tires.

It IS ugly, Brain.

And the thought of what pushes people to DO ugly things is almost as ugly.

I reiterate...I do not suggest nor condone such behaviour.

That YOU see a "threat" there is soley based upon guilty concious.

>> The ones I feel sorry for are Mrs Lennie and thier cats. I doubt she

It's still not uncivil, Brain. I stated that one day he's likely to push the wrong buttons and infuriate the wrong people.. Knowing him from this forum plus what has been told to me by persons who knew him, albeit many years ago, Lennie lends himself to such reactions.

Get a grip, Burke, and please try to just read the words, NOT read INTO them.

Steve, K4YZ

Oh I know......I've been aware of MAN and his antics for many many years.
In fact I just turned on my 20 meter rig and I had it on 14.275....guess
what ? MAN must have decided to move back to 275 from 272.....but this
time he is playing THREE SEPERATE TAPES at the same time. I guess this is
his version of ''simotrash', eh?

>>
>> Steve, K4YZ
>
>It's "Brian," not Brain. Your choice is to get my name wrong, call me
>other names...(SNIP)

YOU call yourself other names, Brain.

"William"..."billybeeper".

If you want to be called Brian, then sign your posts "Brian"

>(UNSNIP)...and to plug in lots of CAPS (generally accepted as
>yelling on usenet).

IT'S ONLY YELLING WHEN THE WHOLE STRING IS CAPPED, BRAIN!

Single words capped are done so for EMPHASIS, not yelling.

>You choose to be uncivil.

I choose to make a mockery of you and point out your silliness.

You provide me with numerous opportunities to do so.

>That you keep doing it and I point it out
>should not cause you to be defensive about it because you simply have
>no conscience or soul.

Now you're a moral leadership counsellor. Woooo-Eeeeee!

Here's some pointers, Brain:

(1) Have the guts to put your real name on your posts.

(2) Don't follow Lennie's lead with calling others names then duck and cry foul when it happens to you.

(3) Don't make outlandish claims that are so easily disporven and then get defensive when asked to back them up.

Now I know that was a bit much in one bite for you to digest, but I think if you chew on it carefully, MAYBE some of it will sink in.

There's been a couple of times in the last few weeks when you've relented with the "yell-yell" silliness and actually acted civil yourself, and I IMMEDIATELY reciprocated. Then you lapse right back to "billybeeper" and it starts all over again.

Act like an idiot, get treated like one.

Be insulting, get insulted.

Act like a man, get respected like one.

It really is THAT simple.

A cellphone is not an "unlicensed" device. The end user does not have a license, however the provider of the service sure does and could not operate the system without one.

Ask the FCC.

The thread in which you made your pronouncement on "unlicensed devices" specificallly asked you about Part 15 and Part 95 issues. You said, yes, those.

I really don't want to spend a lot of time wading through all those posts to find it, Brain, but if it means one more opportunity to plant a flag in your ear after having again disproven even more of your silly assertions, then I will.

I'm merely amused by the lack of consistency with which Steve
approaches the anonymii.

Call it PCTA double standard if you will - all perfectly acceptable on
RRAP.

What you see is what you get, Steve. Just to clear up any confusion on your part, here are my thoughts on the predominate topics regularly discussed here on rrap.

1 -- I think that Morse (CW) is a fun operating mode, sort of like restoring old-time automobiles.
2 -- I do not think that Morse testing ought to be required to obtain an amateur radio license of any class.
3 -- I think that you, Len, and Brian are a modern-day reincarnation of the Three Stooges. You guys ought to petition NBC or CBS to revive that show on TV.

With all kind wishes,

de Hans, K0HB

> here, Brain...
>
> And it's NOT me...
>
> Steve. K4YZ

Steve, you've just made an interesting statement. You do realize that
as a "medical professional" you are >>>REQUIRED<<< by law to report
cases of child abuse and child sexual abuse.

Also, you say "we've already proven..." Are you implicating others of
having knowledge of these crimes? You guys might want to get a
conference call going and decide who's in and who's out before

committing "them" to your situation.

There is a legal penality for not reporting what you know, what "we" know.

Remember, you say that you have >>>proof<<<, so you must report. But there are penalties for libel.

Best of Luck.

Ha ha ha lenover21@aol.com, stick it where the sun don't shine you old retired fool. I was here in 1995 which is way before you joined or even knew about the existence of usenet (I think you first showed your ugly face in 1997 when aol performed the ultimate insult to the internet community by availing usenet available to its 'members', who would otherwise have no clue as to how to get here). Cecil thought quite highly of himself, all you had to do was ask him. Your greatest accomplishment in life is 30 years of 1 years experience. I will say that Cecil did have the intellect to learn code (or at least how to pass the test), you can't even do that. Get out of my face aol'er. As we used to say in those days, find a real ISP.

Come to think of it, it occurs to me that there may be a relationship between aol'ers and those who can't learn code. Hmmmm....

3203. Radiosport contesting --- an idea to validate 97.1(a)

Newsgroup: rec.radio.amateur.policy
Date: 2004-09-11 04:11:58 UTC
From: K&#65533;HB <groupk0hb@earthlink.net>
Message-ID: <iWu0d.3206$xA1.921@newsread3.news.pas.earthlink.net>
Source record: 96879

N0FP posted an idea to the CQ-CONTEST reflector a couple of years ago about a contest that could prove to provide considerable exposure to contesting, ham radio, and emergency preparedness.

The purpose? To demonstrate that US hams are capable of originating and delivering significant and meaningful traffic to central collection points. We are not rank "amateurs".

Imagine a contest where the purpose is to publicly simulate a significant national disaster--a thermo nuclear device detonated over Chicago for example. The FCCs Mr. Powell would send out a press release to the ARRL and all media (CNN, NBC, ABC, etc.) at high noon EST on a Friday or Saturday between two dates (e.g. 9/11 and 3/31) stating: "All amateur radio operators are instructed to begin the emergency communications simulation beginning today at 02:00 UTC and ending 06:00 UTC. That would be the kick-off of the mother of all US contests. All amateurs on all bands on all modes all at once. Every scrap of equipment you own would be pressed into service.

Starting at 22:00 hours the same day, W1AW would begin posting instructions for the contest using digital modes to provide the "rules of engagement" for the contest. The contest exchange, log routing, collection points, etc., would be sent from W1AW during the entire contest. Specific instructions from W1AW will direct appropriate band limits, restrictions, regional information, etc.

The goal for contesters would be to collect valid QSOs using the instructed exchange. Any station may be worked for valid QSO points, on any non-WARC band more than once, but never more than once per hour. All US amateur ops on all bands except the WARC bands would be eligible to collect valid Qs. Each US section would be a "team." Logs would be routed to section managers using ARES people to man the traffic. The traffic would be the logs of contesters.

The goal? Deliver logs to section managers as often and quickly as possible. Points would be assigned to sections based on the number of Qs in the log and the time received by the section manager. Relays of logs are encouraged. The use of VHF frequencies is encouraged. Every scrap of equipment you own will be pressed into service, except your phone line. No internet is allowed. No twisted pairs allowed. Only RF delivered traffic allowed.

Section managers will accumulate the data and summarize the results. Email the results to a central collection point -- W1AW. Mr. Powell will get a report on Monday morning outlining the success of the operation. Number of Qs, counties covered, time delivered, number of

stations, etc. would all be proudly displayed to the FCC and the media. We are not rank "amateurs" as some congressmen have proclaimed recently.

This is rough but I think you get the general idea.

*****

Imagine the press. Imagine the questions you will get at work. Imagine the pride in Mr. Haynie's heart when he delivers the 6" thick printout to Mr. Powell, in a ceremony on the following Monday morning. Congressmen will no longer be able to call us rank "amateurs" any more. I wonder if the BoD will question whether these line scores should make it into print? Contesting will be front page news on QST for sure. Page 2 on NYTimes, Wall Street Journal, CNN Headline news and on-and on-and on.

Imagine the local press in your neighborhood anxious to get the local scoop on this mysterious press release the previous Friday noon. Equipment sales will soar. Contesters will be asked to Elmer the capable hams that have shun contesting all these years. I get goose bumps.

You want to contribute. Give this idea legs and the ranks of ham radio, and contesting, will grow more than at any other time in our history. The only way this will fly is if contesters get involved. The time is ripe (9/11).

Real traffic in a real emergency simulation.

> People who make comments WRT a broadcasts stations activities play a part.
>
> Regulators of broadcast stations play a part.

Oh, you've left so many out of the list of those playing a vital role in broadcasting, "William". There are the battery sellers, those who provide electrical power to your home, telephone and cellular company employees who enable "talk radio" to work, thousands and thousands of musicians (living and dead), all the Chinese laborers who produce the crappy radio equipment sold in the millions of units, the folks at Radio Shack and Wal-Mart who sell us those Chinese radios. Yes, young "William" all of these play a vital role in broadcasting. Lord almighty, you are such a Jeter!

> > in no action a contribution?
>
> You're so full of ???'s today. You'll have to ask the FCC.

I don't think so. The FCC isn't likely to have the answers. You're awfully big on asking questions. Why don't you take a stab at answering some of them?

> > > How strange that you say he has no part.
> >
> > Len has no amateur radio license.
>
> Neither does that Powell kid.

That "Powell kid"? Do you mean the chairman of the FCC--the one who receives a salary for overseeing the regulation of communications in the United States? Len H. receives no such salary and has no such power. Is that clear enough? Powell regulates. Anderson does not. Powell receives a hefty salary to regulate. Anderson does not.

> Len may not operate radio equipment
> > under Part 97 of the FCC regs.
>
> Len may operate -amateur- radio equipment while you are the control operator.

Like hell he will with me as the control op.

> > Len is not a regulator of amateur radio.
>
> Are you a regulator of amateur radio?

I'll bet you've seen this before: No, I'm not a regulator but I am an active participant in amateur radio.

> Am I to understand that only regulators of amateur radio "play a part?"

You might understand that. It would likely be incorrect. Those who are participants play an even bigger part that regulators.

> > I don't find that strange at all. I find it fitting.

> I find you strange.

But then, you seem to find it tough to tell the difference. You seem to think Leonard H. Anderson is normal.

Len plays no part in amateur radio despite your convoluted attempts at reason.

No, Davie boy is a long time actual participant. Lennie boy is neither
a regulator nor a participant. He is to amateur radio what a weed
whacker is to sky diving.

> Davie boy is NOT keeping within bounds of the subject thread.

Lennie boy hasn't done that in the years I've read his extensive output.

> Davie boy still puts on the ASS rental uniform and makes like
> a bad imitation of Otto Preminger's character in "Stalag 17."

I've been promoted? To think, when you told me to shut up, I was only a
feldwebel.

> Davie boy...I am fully qualified, by long experience and training
> to "operate" radio equipment.

So you've told us on countless occasions. Of course, that would seem to
be a mode dependent statement.

> I'm just not AUTHORIZED to emit
> RF within U.S. amateur radio bands as a civilian.

That's funny, I thought I said that. I'll not that you are not in the
military so "as a civilian" would be the only way for you to emit RF in
the ham bands. Ah, but you can't do that.

> You have self-established "definitions" which are incorrect outside
> of amateurism.

"Amateurism"? What, pray tell, is that? The only definition I'm
concerned with, Lennie boy, is the one which prevents you from taking to
the air under Part 97 of the FCC regs.

> To use your definitions in your own quaint way of
> defining things, I couldn't even check out radios on a bench in a
> clean room. :-)

...not transmitters with an antenna attached under Part 97, you
couldn't.
My "quaint way" says that you aren't a ham. It really is that simple.

> You imply (incorrectly) that I could not, ever,
> "operate" any radio in any HF place...which is not truth according
> to U.S. radio regulations.

I implied no such thing, Lennie boy. I wrote quite precisely what I
meant to convey. I couldn't care less about where you operate HF as a
non-radio amateur which, after all, is what you are.

> Amateur radio operators are NOT authorized to emit RF outside of
> amateur radio bands...unless they have a valid commercial radio
> operator's license.

Do you think that comes as a surprise to those of us who are radio
amateurs? Is it your feeling that we'd feel hurt by such a statement?

> Some amateurs, like Davie boy, seem to think they are authorized
> to emit all sorts of feces-surrogate remarks on the Internet. :-)

If you're the feces-surrogate, I'm authorized. :-) :-)

Operating systems have whims? :-)

> But...this is NOT about computers, is it?

You tell us. You were the one who began a lengthy post about computers.

> It's all about Davie trying his very best (really the worst for others)
> to misdirect and try to lay blame of others for "saying wrong
> things." Davie do dat often. Almost all the time in here...

No, I think it about Lennie Leghorn attempting to use his long piece on computers to take a slap at anyone anywhere who uses morse or who supports morse testing.

> >> Your problem, Herr uber-oberst, is that you just cannot "delete" ME.
> >
> >Sure, I can delete Millenium Edition.
>
> Delete it? Heck, Davie boy, you aren't IN the new millennium yet

Lennie boy, meet Leonard boy.

> Davie boy, you ought to get off your computer and go play with your
> Orion thingie,

It is an amateur radio transceiver, Len. I operate it frequently. I use my computers as well. I'll do as I choose. You continue to do what you can.

> amaze all with your "cleverness in computers" by
> jawing about your expertise on the air.

I could do that or I could do it here. In fact, I did it using far fewer words than you.

> Make yourself bigger than
> anyone by attitude.

Speaking from experience again? Well, at least you're experienced in something.

> You waste everyone's time.

You aren't everyone.

When I was refering to your multiple faces, I was refering to the one where in one breath you chastise others for name calling, flaming, personal attacks and other such conduct, then turn right around and do it yourself.

And we can include you as the fourth Stooge.

There was no confusion, except perhaps in YOUR mind, as to what was being said, about what and/or whom.

>military so "as a civilian" would be the only way for you to emit RF in
>the ham bands. Ah, but you can't do that.

Nor is Lennie AUTHORIZED to emit RF within any OTHER band, except within
the limits of the STATION LICENSE of the person or entity who retains his
services, and then ONLY when acting under the auspices of that license.

So sayeth the FCC.

>> You have self-established "definitions" which are incorrect outside
>> of amateurism.
>
>"Amateurism"? What, pray tell, is that? The only definition I'm
>concerned with, Lennie boy, is the one which prevents you from taking to
>the air under Part 97 of the FCC regs.

I am wondering about those "self-established "definitions"" too.

Seems to me that all of the licensed persons here (with the exception of
Vippy) pretty much understand all of the "definitions". The one who is
confused and keeps trying to re-write any "definitions" is the guy without the
license and without any practical experience in AMATEUR Radio.

>> To use your definitions in your own quaint way of
>> defining things, I couldn't even check out radios on a bench in a

>
>> You imply (incorrectly) that I could not, ever,
>> "operate" any radio in any HF place...which is not truth according
>> to U.S. radio regulations.

You MAY operate an HF radio on 11 meters without further licensure or exam. You may also do so under Part 15 in certain bands.

You may only operate a maritime radio that has a proper FCC station license, and with the permission of the owner or Captain. (assuming you are on a US-flagged vessel.)

>I implied no such thing, Lennie boy. I wrote quite precisely what I
>meant to convey. I couldn't care less about where you operate HF as a
>non-radio amateur which, after all, is what you are.

Seems Lennie's a "non" in a LOT of things.

>> Amateur radio operators are NOT authorized to emit RF outside of
>> amateur radio bands...unless they have a valid commercial radio
>> operator's license.
>
>Do you think that comes as a surprise to those of us who are radio
>amateurs? Is it your feeling that we'd feel hurt by such a statement?

Why does Lennie seem to think that uttering all sorts of obscure "revelations" about radio regulations presents him as "enlightened"...???

With the aforementioned exceptions not withstanding, Lennie is not authorized to emit RF ANYwhere where the Stars and Stripes flies.

It really is THAT simple.

> paper airplane.

I was talking about header info, and definitely not posting styles. I doubt that Steve's innate posting style would adapt to Quitefine's. Certainly he wouldn't have any fun with it, since his style is more the head-on, call ya out sort of thing.

I don't condone everything that Steve posts, but I respect him nonetheless. And after his description of himself being the guy "whacking at the Pinata,"

Remember that there are equal and opposite antagonists for him, which is to say that I don't see him treating any of us in the same manner as he does them. He doesn't even treat you as he does them. But I suspect that if you started calling him "gunnery nurse, Nursie, or any of the other dumb names he's called by some, he would reply in kind.

And I suspect that his lack of condemnation of Quitefine or Blackguard is that they are not doing what a lot of anonymii do, which is to post libelous and extremely insulting material.

There is a difference between civil anonymity and non-civil anonymity. To not get that is to not get it.

You are taking in the data, and coming to the wrong conclusion.

It isn't the base content but the underlying tone which gets the response. I simply look at Steve as a feedback generator. Feedback is derived from input, as it were.

The objections to Quitefine and Blackguard are their anonymity, not their content. Okay. Your answer to all their questions is "you're anonymous"

Clever answer, that! And not an answer at all.

>Steve, my name is "Brian." Why do you insist on being uncivil?

Your name is...WHAT?

>From: billybeeper@juno.com (William)

Then WHO is "billybeeper" and WHO is "William"...?!?!

YOU aren't even sure what your name is, so why hassle me about calling you "Brain"...?!?!

Were you named after some obscure uncle you didn't like, so you've taken to these alter egos?

You figure out who it is you want to be and then be that person.

If you can't be man enough to sign your own given name to your posts, why should you expect anyone else to acknowledge it?

You start signing your posts "Brian" and that's how I'll addressed you.

And forget the "Yell Yell" and other nicknames your stringpuller have endeared me with, and I will recioprocate...HAVE reciprocated even in recent exchanges. That's archived here too.

You want "civil discourse", then BE civil!

Steve, K4YZ

I got called "yell yell" because you NEED to feel as though you are being
victimized, ergo if you make it appear I am yelling at you, you try to gain
sympathy.

It doesn't work.

Everyone has thier psoting style. I occassionally "cap" a word for
emphasis.

If you consider that "yelling", I guess there's nothing I can do about it.
However I have explained my intent and if that's not adequate for you, I can
mail you a pre-paid calling card so you can call someone who cares...

No I wouldn't.

All that would need be done is turn over Lennie's various screen names and
let those who "investigate" such things see how he might invite such an act.

I will not be the one doing it.

Nor will I condone anyone doing it.

>> Please read what I wrote...Not interject what you want.

Awww, cry me a river, Brian!!!

Cecil is a grown boy (he's been licensed since even before Len was a sojer), a free thinker, and not at all the type to be "dogged" into doing something he doesn't want to by a bunch of twits on rrap.

Also I'm not sure why you call him a bastard. Most everyone here, on both sides of the Morse question, respect him as a "stand up" sort of guy who voices his views in reasoned language without resorting to personal attacks.

Ok, so we are all twits except for your man Cecil (I would assume you
are implying that Cecil was not a twit). Is this because he could not
be dogged? Or is it because he was a grown boy (understatement of the
years based on pictures I have seen, especially in terms of abdominal
growth).

Your friend in kindness,

Gareeb

Wise decision, William. Perhaps there is hope for you.

Or am I dissapointed?

You worry overmuch about Quitefine's and Blackguard's identity!

Perhaps I am Mike Coslo. Perhaps I am Jim Miccolis. Maybe I am both!

I will impart some wisdom to you. You may not know this.
You hate my so-called anonymity not because I don't have courage of my
convictions but because it is no fun for you to hurl insults at that
which you cannot identify. It is fun for you to hurl insults at named
people.
You need people like Steve badly.

But with Quitefine and Blackguard, you must discuss ideas!
Or you can do as you are doing.
You can complain that we aren't real.

PAH! Whining.

as once was
and always shall be

Has the ARRL been telling the truth all those years about amateur
involvement in "real emergency situations?" Or have they been
exaggerating somewhat? :-)

Gosh, from all I see in here, radio amateurs are akin to "minutemen
of the air" ready at a moment's notice to come to the aid of their
country in time of need! [apparently their whole reason for becoming
radio amateurs in the first place!]

Remember, when real emergencies happen all the commercial
infrastructure fails! Only amateurs have the indestructible radios to
survive! [so I've been explained to by other minutemen of the air]

Field Day is supposed to be the "emergency training" isn't it?
I've been told that, too. ARRL has said it longer than me...

Ah, a fan of old Marilyn Monroe pictures of the 1950s? :-)

>Cecil is a grown boy (he's been licensed since even before Len was a
>sojer), a free thinker, and not at all the type to be "dogged" into
>doing something he doesn't want to by a bunch of twits on rrap.

Moore was licensed before 1952? Okay. Fine.

Hans became a sailor before 1952? Okay. Fine.

Tsk. "A bunch of twits on rrap!" Not a nice thing to say...specially
from someone who was on the "rrapnet." :-)

>Also I'm not sure why you call him a bastard. Most everyone here, on
>both sides of the Morse question, respect him as a "stand up" sort of
>guy who voices his views in reasoned language without resorting to
>personal attacks.

Tsk. Not my take at all. "Most everyone in here" seemed absolutely
pissed that Cecil had made replies to their postings...not of the
opinion or content that they wanted to see! :-)

With the kindest of regards...in-kind...

Nah. Only one who is emotionally disturbed, like nursie gets at times.

He once got into a habit of "signing" his posts "Steve and the Boys."
[as if he had a 'hood gang here gonna do bad tings to me...] :-)

Then too was the other veiled threat of "it takes a few ounces of
pressure [on a trigger]" to silence someone. :-)

Another PCTA Role Model of a modern mad extra for all newbies to
emulate. Nice image of U.S. amateur radio? I don't think so.

The other PCTA extras condone, even encourage him to keep doing
that. Modern amateur spirit?

I comment to the other radio amateurs in here, not you, Brian.

>
>There's the amateur spirit.

Another good example of olde-tyme hamme thinking. :-)

Might be a "spirit" that comes out of a bottle...

Actually, I've already done that "operator" thing with a fully-licensed,
all-papers-open-for-inspection-for-any-A.S.S.-offizier as the "control
op." :-)

Poor Dave. He's run out of valid replies and has to use the "I've-
been-licensed-forty-one-years-and-you've-not!" ploy. As an amateur.
<shrug>

Tsk. I was first licensed as a "first" radio operator 48 years ago...
actually 48 1/2 years to get into his uber-nit-pickyness. :-)

Three years before that I started in operating high-power HF
transmitters without any license whatsoever, without any Signal
School training on HF transmitters, without any training whatsoever
in or about morse code. :-)

Tsk. It gets worse for Dave. I've actually operated transmitters as
a civilian without once having to show or log my "first" license. All
perfectly legal, too. No need for most Department of Defense
contractors. [DoD isn't ruled by FCC or any "Riley"]

Dave ought to take up nursie's veiled threats of "using his professional license to call the authorities to 'pick me up.'" This time on emitting RF without having a valid amateur radio license!

Or, he might take to veiled threats against my wife (like nursie did) or sign his name "Dave and the Boys" at the end of a posting. :-)

Or, he could become an anonymousie lurking in the baseboards of newsgroups, afraid of the daylight, jumping out to bite at grown-ups. Nah. Davie das uber-oberst thinks too much of himself to do that...

I wonder what the Canadians think about all this "show-your-papers!" demanding? :-)

Since when does "der uber-oberst's" commands affect me? Or you for that matter?

For an ostensibly smart fella, you fall into categorization pretty easily. I'll post what I want, and if you don't post because of some "command" given by someone else here, you are the victim. But since you do post whatever you want, it shows the fallacy of your statement, so why do you keep posting that?

Of course you know! ;^)

Yes, I think that their reporting has been honest (with an
understandable tendency to "patting amateur radio on the back").

> Gosh, from all I see in here, radio amateurs are akin to "minutemen
> of the air" ready at a moment's notice to come to the aid of their
> country in time of need!

Many amateurs feel exactly that way, and keep their stations ready to do
exactly that.

Apparently the USG and other non-amateur organizations feel that way
also, given the monetary grants made to enhance emergency communications
training in the amateur community.

> Remember, when real emergencies happen all the commercial
> infrastructure fails!

Is Leonard Anderson telling the truth about "all the commercial
infrastrure fails" or is he "exaggerating somewhat"?

> Field Day is supposed to be the "emergency training" isn't it?

Yes, that is one of the reasons for that operating event.

With warmest personal regards,

Powerless they are not, but I don't walk in Riley's moccasins as to
whether the power is going to be exercised or not. HQ and I had
differening views on using letter-writing versus on-scene enforcement
over the years.

So who are the "four Morsemen of the Apocalypse?"

Dee D. Flint, N8UZE

3253. 3 Stooges!

If my memory serves me right, the four Morsemen were:

Larry Roll
Dave Hiel
Dick Carroll
Jim Micollis

Lenover21 would know exactly - he coined it.

Phil,

Whenever the subject of K1MAN comes up there is always some block head that insists on compairing him to W1AW.

During your tenure with the Feds did you happen to hear of a anti stupid pill that would be available for these folks?

I think I have finally figured out Len's problem (s). He is impotent. Has tried all the toys, including the blow up dolls, and is totally frustrated. Even viagra don't get him fired up.

Sorry Len, nothing else to do old boy. A .45 is effective.

Gosh, after all these years, it would seem like something if a
big national news organization picked up on all that!

When did they?

>> Gosh, from all I see in here, radio amateurs are akin to "minutemen
>> of the air" ready at a moment's notice to come to the aid of their
>> country in time of need!
>
>Many amateurs feel exactly that way, and keep their stations ready to do
>exactly that.

Riiiiiight. :-)

[I'll bet you would be interested in some beach-front property in the
Mojave here...real bargain! :-)]

>Apparently the USG and other non-amateur organizations feel that way
>also, given the monetary grants made to enhance emergency communications
>training in the amateur community.

Riiiiiight. Like the "USG" awards money based "solely" on technical
and experience basis. Uh huh. Of course.

[can anyone say "pork barrel?" Or "political ploys?" :-)]

>> Remember, when real emergencies happen all the commercial
>> infrastructure fails!
>
>Is Leonard Anderson telling the truth about "all the commercial
>infrastrure fails" or is he "exaggerating somewhat"?

I'm just repeating what I've been told. :-)

Never seen it yet...but this country is big and I haven't seen all of it.

>> Field Day is supposed to be the "emergency training" isn't it?
>
>Yes, that is one of the reasons for that operating event.

So...what IS Field Day de facto? Drop this alleged de jure bit.

It is a CONTEST. A day out in the park or someplace nice, all
playing "competitive radiosport" with some buddies.

>With warmest personal regards,

Warm? :-) Like your favorite ice hole... :-)

Not at all.

I can reply to anyone.

Nursie could disappear in the next millisecond and would not affect
me at all.

>Heck your
>fishing expeditions wouldn't be half as much fun without him here.

"Fishing expeditions?" I don't fish.

PCTA bait their hooks and offer me their lines. No problem at all
to reel them in. Easy thing.

>>> The objections to Quitefine and Blackguard are their anonymity, not
>>>their content. Okay. Your answer to all their questions is "you're
>>>anonymous"
>>
>> Tsk.
>
> it a Task it, eh? 8^)

No, a "tsk," the odd human sound made by unbelievers when they
don't bother to make a verbal comment...or the sound made when
it's obvious (to everyone else) you didn't make any sense.

You are too young to have heard "Little Yellow Basket" when it was
popular. :-)

>> The anonymousies are NOT INVOLVED! No ID, nothing. [see the
>> commands uff das uber-oberst...]
>
> So what. non-involvement isn't an issue with me. Note that I post to
>you?

It is rather obvious you posted to me. You don't need to announce it.

>Last time I checked, Dave didn't control me.

Dave doesn't control anybody...despite what he may think.

Dave isn't a radio regulator...despite kissing up to Mikey Powell like
a good Republican. :-)

><yelling across the room> Hey Dave, do you control what I post?

He can't hear you. Still has his head deep into the Orion manual,
trying to figure out the instructions.

>> You've not made any "answer" in your posting. Nothing at all.
>
> Umm, it was his answer, and a comment by me.

You've still not said anything.

>But you knew that, eh?

Yes...I'm just emphasizing it for the benefit of those slow readers who
have to run their fingers under words on the screen when reading. :-)

>> What you've demonstrated is just another item in the becoming-
>> clear PCTA extra Double Standard: Anyone attacking NCTAs
>> is "OK." Anyone against PCTA extras should be forbidden
>> everything. :-)
>
> Who's attacking anyone? Paraaanoiia!

Nope. Rather obvious...unless one is a PCTA extra with the Double Standard. They can ATTACK all they want. And do! :-)

Poor babies just can't take the return fire. Tsk. :-)

Anonymousies will creep in to "defend" their "honor" and to do more "attacks" on NCTA. They will help your cheer. Or the uber-oberst or the gunnery nursie will check in with their mirrors. No problem.

Now, did you have anything of substance to say or are you just killing time on the computer when you could be playing with your radios?

All the PCTA extras in here stick together.

Like crazy glue. :-)

> For an ostensibly smart fella, you fall into categorization pretty
>easily.

"Ostensibly?" :-)

Categorization is the name of the game with the PCTA extras here.

All those who aren't "ostensibly" as good as they are categorized
as "uninvolved" or something else horribly wrong. :-)

>I'll post what I want, and if you don't post because of some
>"command" given by someone else here, you are the victim.

I am a "victim" now? Of what? :-)

>But since you
>do post whatever you want, it shows the fallacy of your statement, so
>why do you keep posting that?

Tsk. I am NOT a PCTA extra.

I call 'em as I see 'em...and one cannot possibly miss seeing those
PCTA extra commands and epistles. :-)

>Of course you know! ;^)

I know more than you care to admit. :-)

I would have told Dee...but she never reads my posts (what she said
in here). :-)

Scratch tRoll...he probably drove his bus somewhere bad...

Scratch Carroll...he probably crossed over to the other side of life.

Include Kellie the Katapult King.

Jim Kehler, KH2D, is the leader of the pack but is ailing in the
USA somewhere. Call him "morseman imperator" with his
leadership emeritus.

Toss in the gunnery nursie, graduated from a little yipping dog
on the heels of the former morsemen to getting saddle sore.

There's a bunch of anonymousies but they are NOT INVOLVED,
have NO ID and therefore don't count.

ARS = Archaic Radiotelegraphy Service.

Anything more? :-)

Tsk, tsk, tsk.

"Dan da man" went in the jock locker room again? :-)

Ah, yes, morsemanship makes the ham hard? Tsk, tsk.

Weird science, Danny boy, considering you have NO "medical
credentials" to back up your "diagnosis." You should have left
that to Dr. Strangelove, one of the alter personalities of the
gunnery nurse...you know, the one with the "hostile action"
experience.

No matter. Morsemanship makes you feel like you "know
everything" and/or "are very 'manly.'"

>Sorry Len, nothing else to do old boy. A .45 is effective.

Tsk, tsk. Just because yours won't fire off, don't get all upset.

You ought to start making veiled threats about my wife and
property. Nursie do that. She also ends postings with cute
little Yiddish pejoratives about being a "penis head." :-)

Modern-day image of Role Models for U.S. amateur radio...
do like they say or be dead? :-)

Danny boy, consider that you make a big target. Fills the
sight picture very nicely. Just a few ounces of pressure.....

[not talking about radio at all but then Danny boy wasn't doing
that, either]

Had a few moments to waste before going to bed early before a hamfest.
So I thought I'd post a bit to you.

Yeah, like apparently, like to all outward appearances. It is a perfect fit.

Noun sands! I'm a nickle extra, 5wpm and the new tests, I've only been a
ham for 5 years, and an Extra for a couple. Ostensibly, I would be one
of their targets PCTA or not.

>
> Feel free to ask "Quitefine" or the folks at www.hamdata.com.

Whoever "Quitefine" may be, he/she/they haven't posted any ARS license numbers here.

I have, for some time now.

The difference between the license totals I post and those at "hamdata" is this:

The hamdata numbers are the entire current database, including expired licenses in the grace period, club licenses, RACES licenses, etc.

The numbers I post are only the currently active licenses held by individuals. No clubs, no RACES, no expired-but-in-the-grace-period licenses, etc.

These facts are all explained in the posts and on the website in question.

Both sets of numbers are "right" as long as you keep in mind what they include.

Just clarifying the facts.

You seem to have some confusion on the concept of fishing. Let's
see...."they" bait their hooks and offer you a line. Now then, *you*
have a reel? It doesn't sound like an easy thing at all.

Double tsk. You are NOT a NCTA Exta despite your "right out of the box"
brag. You aren't a radio amateur at all.

> I call 'em as I see 'em...and one cannot possibly miss seeing those
> PCTA extra commands and epistles. :-)

Only you can read a sentence like, "Leonard Anderson is not a radio
amateur" and find a command in it. St. Leonard's epistles to the
anti-code test believers read like the work of some pulp magazine hack
who is being paid at a nickel a word.

> >Of course you know! ;^)
>
> I know more than you care to admit. :-)

...and yet less than *you* care to admit. :-)

I could have sworn that you'd explained all of that for Leonard's
benefit at least on a couple of previous occasions.

How could he have confused your postings of the license figures with
"Quitefine"?

I bet Lennie would be into that part other than radio and scuba diving.

More than a couple. Mr. Anderson sometimes has trouble with the interpretation
of facts. For example, he still has trouble with the fact that FCC has been
renewing Tech Pluses as Techs for 4-1/2 years....

He also seems to have a lot of trouble with recalling certain past events, like
when Cecil, W6RCA/W5DXP, participated in rrap and on the air.

For the record, in chronological order:

1) Cecil held W6RCA and worked for Intel
2) He retired from Intel and moved back to Texas, in part to care for aging relatives
3) He participated in the 7037 get-together
4) He and I ran antenna tests on 40 CW, checking his vertical against his all-band linear-tuner dipole
4) He got his old W5DXP call back

Somewhere in that sequence, he decided that rather than dropping the code test completely, he was satisfied with 5 wpm. He resigned his NCI membership and decreased his rrap participation to near-zero.

Mr. Anderson has it all mixed up, as usual. Not my problem, though.
>
>How could he have confused your postings of the license figures with
>"Quitefine"?

I don't know. Ask *him*.

---

btw, thinking of departed rrap folk, it occurred to me that I probably hold the record for most rrapper's QSO'd. Anybody beat this list?:

I never know what to pack for a vacation. Good to have a complete list....

Took a bit of Windex to clean my morning tea off the monitor after that one! Ranks right up there with the famous Cutie Boy promise....

Does that sort of operation help validate 97.1(a)?

Thanks Hans. I'm still sore from falling off the chair laughing, and trying to breathe....

Incorrect.

If there is no disagreement, then anonymity is just peachy.

But it is their anonymity that is -attacked- when there is a
disagreement, i.e., Steve calls them cowardly scum for hiding behind a
mask.

This is just another case where the FCC fell on it's face in the rules
making department. They tried to write a rule where only the ARRL
would qualify.

>What sayeth Part 15?

I believe I have repeatedly stated "...Part 15 and Part 95 operation notwithstanding" as it pertains to Lennie's "HF" operating, Brain.

And Lennie STILL can't operate any radio station on HF without an FCC issued station license, Part 15 and Part 95 notwithstanding...

BTW, Brain, Your Mentor spent some amount of time bragging about how he could/would get on "HF" per Part 15 within the Amateur Bands, however has yet to do it. Wonder what's keeping him...?!?!

Wonder how long it takes a professional radio engineer to slap together enough 2n2222's to emit Part 15 level RF ...???

Sheeeesh.

But there's still NO excuse for you to NOT sign your posts, "Brian, N0IMD"
at the bottom.

You continue to use "William" in the tag line.

>You've Quiteignored it.

No...I've not.

I have specifically stated that I can understand not wanting to use your
"primary" account on an open forum.

YOU have specifically ignored that spambots do not read your signature
line at the bottom, and even if they did, "Brian, N0IMD" is not a valid address
and would be useless.

You still have NO excuse other than a complete lack of conviction in the
validity of your own posts for not signing your name to them.

BRAIN.

Callsign: KC0MUB Class: Technician Codes: HAI USA
Name: Valentine H Germann

He was gonna learn the code. Said all the right things, even battled the evil NCI hams.

The Morse Code sychophants all gathered around to slap him on the back.

"Val is what's right with amateur radio today!"

Why no follow-up?

Those rules lets anyone qualify. All they have to do is abide by the rules.
K1MAN does not abide by the rules.

He has been on 14.275 all weekend. I guess he is now in 24/7 mode. He claims he is activated because of the hurricane emergency. Gee wonder why no one else has to blabcast to do things like that? SATERN ain't trashing up the spectrum with useless broadcasting of his announcements and taped play of various internet accessable info bulletins. Amazing indeed. Now he wants to call him on the phone to report traffic, tells us about HF nets on 275 that can't possible be there with his blabbing all the time. What a world class LID.

I was born in 1925. I am English, a World Citizen.

I am excluded from voting in the forthcoming USA elections.

May I say how grateful are the World's 5 or 6 billion population, of all ages, to see that at least SOME citizens of the USA are aware of the most horrible catastrophy looming before ALL of us.

He saw the error of the way of the dark side? :-)

Maybe he objected to the eyeshade and sleeve garters the PCTA
wear a la 1930s?

Maybe he took the beeper's battle flag motto literally? ("Learn code or
die!")

You might have spelled a word wrong. Ought it not be "ele-"
instead of "sycho-"? Hi hi. [I heard a herd...]

Tsk, tsk. How many times has nursie used the word PUTZ in a "sign-
off" to a message? Hundreds? Thousands?

That word is not exactly an endearment in any language.

>> You want "civil discourse", then BE civil!
>>
>> Steve, K4YZ

PCTA extra once again demands of others what he doesn't do
himself. Tsk, tsk.

Once again he becomes the Role Model for all U.S. radio
amateurs of the extra persuasion...not.

>You have a vivid imagination. Get back on your meds and the pink
>elephants will go away.

He has more than just hallucinations. Whatever goes on in there
must be a terrible thing. [I'm glad that medical science can't
record those images...too scary...]

If he were only a painting then we could hope the "Scream" would
be stolen from this museum of olde-tyme hamme raddio.

Thank you. :-)

All of the "dullardism" in here blinds them.

They are too busy seeking retribution for their self-perceived wounds
to their "honor." Tsk.

Sort of like some Revolutionary War re-enactment, their standard showing crossed J-38s with snarl background and the motto above, "Learn code or die!"

They keep falling on the field of battle, the ground littered with pieces of ham-band-aid wrappings. Snarls and epithets they still have, a sort of dying gasp of egos...all they have left.

All that about a hobby. Hi hi.

Heh heh, the Darth Vader of RRAP "turning someone from the
dark side?!?"

Hi hi.

Ackshully, "Darth" Heil manages to entertain himself mightily.

That would make him his own "churl." :-)

Yes, thankfully we have the Bush Administration to thank for trying to
stop this catastrophe and carry the war back to the land of the
perpetrators.
Killing 3000 Westerners within 2 hours was a very dramatic opening act.
I don't want to see Act II.

Might I suggest that an "English World Citizen" has approximately 1000 years
of shit to atone for, starting with the Duke of Normandy, leading through
Richard the III, and culminating in Allenby. Mere words cannot express our
gratitude.

Ed

You should be thankful the US bailed you out of two WW and be even more
thankful that Bush is in office now.

But knowing a bit of your current state of affairs in the UK, it's easy
to understand why you are so for the Liberal Democrats, it's your
welfare state style of living.

Dave, if you're a big enough fish, the fisherman becomes the quary.

>Must Len agree with everything?

No.

However, logical consistency
requires that if someone is
going to claim make the
emergency radio operator
argument, then they must also

agree that amateur radio plays
a significant role in emergency
communications.

Of course, we have noted that
logical consistency is not one of
Len's strong points.

>Some people say that cellular
>telephones have no significant role in emergency communications,

Those people are mistaken.

>yet
>about every footage of hurricane action film depicted an official with
>a cellular telephone.

Of course.

Some people say that amateur radio
has no significant role in emergency
communications, because of cellilar phones.

They are mistaken, too.

The valid point is that cellular phones
cannot
be absolutely relied upon for emergency
communications.
>
>> >You just never know when you

You are neither qualified nor authorized to
operate an amateur radio station.

Your opinion on the issue does not matter.
Our opinion on the issue does not matter.
FCC's opinion on the issue does matter.

At the time, yes, they were soliciting funds and stated that they were
non-profit, but they had not stated whether or not they were a qualified
charity for which such solicitations would be deductible. However, even if
they weren't such, just the fact that they claimed non-profit status would have
been enough for them to have an IRS Form 1024 (instead of form 1023) filing and
the IRS computer would then show WHICH paragraph of IRC 501(c) their exempt
purpose fell under (only if it were paragraph (3) would donations be deductible
as charity by the donor).

Try offering an argument that explains the problem. Simply saying that I am wrong without such will get you nowhere.

3327. COPS! Not Diversified

Newsgroup: rec.radio.amateur.policy
Date: 2004-09-13 04:43:36 UTC
From: Gareeb <nospam3@nospam.org>
Message-ID: <sm8ak05k3rd59g1jbioqaudvep3b51se19@4ax.com>
Source record: 97004

Can any of our more socially sensitive members take a crack at explaining reason for the very large disparity of minority groups in the COPs shows? The cops seems to be in the majority ethnic group with approximate proportional represetation of minorities. while the arrestees represent almost exclusively two minority groups of color with almost no one 'caucasian'. Why do we not have more diversity in the arrestees numbers? Why are whites not pitching in to integrate and diversify the large overrepresetation of Negro and Hispanic detainee/suspects? Perhaps this could be alleviated by bussing minority criminals into the white areas?

> dollars in outstanding bills that must be paid right now to keep
> Amateur Radio Newsline coming your way. ...
> ----------

The above is from their own, recent report.

You see, THERE IS something wrong with their disclosed expenses. They are apparently counting the funding of their annual scholarship as a "news gathering expense," included in the $1,000.00/month cost, along with any related expenses in presenting the scholarship.

Such misclassification is not just a one-time occurance. There's a name for this type of "problem:" Accounting FRAUD. It does NOT cost $1k/month to "bring the news to us." It may cost $1k/month averaged for ALL their operating expenses, but their scholarship program is not news gathering; it is a separate and concurrent activity by the same organization.

OK, so perhaps some of the members of this group are correct. I don't have a complaint about AR Newsline to the IRS - since a scholarship program is also a valid 501(c)(3) purpose. However, perhaps the local District Attorney should be the one to hear from me instead....

It's not meant to be an "endearment".

It's a fairly accurate description of a certain newsgroup
aggitator who can't ever seem to get his "facts" straight or do the
things he says he's going to do, this despite bragging about his
"professionalism".

Since the "vivid imagination" was Brain's, I guess we'll have to
get it from somewhere else.

Steve, K4YZ

Please tell us how much money DIETER STUSSY has spent promoting
youth awards and providing a near-real-time "news" service for Amateur
Radio.

> Such misclassification is not just a one-time occurance. There's a name for
> this type of "problem:" Accounting FRAUD.

OK. Perhaps it's time some of us start a campaign to donate
money to Bill Pasternak so he can sue your pants off for even more
assinine allegations.

>It does NOT cost $1k/month to
> "bring the news to us."

Your opinon, and nothng else, Dieter.

>It may cost $1k/month averaged for ALL their operating

Not moronic.

You're whining, Dieter.

You've been trying to beat up Bill Pasternak in this forum for
two years without shredding ONE IOTA of VALID, DOCUMENTED PROOF.

Nothing but your opinion and some guesses as to what YOU think is
"fair" in the operational costs of A.R.N.

If you can do better with less, then do it.

As for moronic, I refer you back to your other post this same day
about approaching the District Attorney because A.R.N., a charitable
organization, is sponsoring a scholarship program for kids.

THAT is "moronic".

> My reasonable basis has been that his expenses, as AR Newsline and he describe
> them, appear excessive as compared against the activity that generates them.

Still no PROOF. Just a "suspicion" that you THINK they shouldn't
be that high.

> wrong without such will get you nowhere.

YOU are the one suggesting there is a problem, Dieter, not me.
You've created this entire strawman in order to validate your on-going
anti-BP crusade.

I SAY that you are whining.

It's not up to me to "justify" any argument.

YOU have not provided a single shred of DOCUMENTED, VERIFYABLE
PROOF, let alone "resonable suspicion" that there's ANYthing afoul
with the way Bill operates "Amateur Radio Newsline".

Until you've provided something OTHER than your "guesstimated"
opinion on what you THINK should be happening, all you are doing is W
H I N I N G ! ! ! !

And I am all for creating a grassroots effort to raise funds to
give to Bill to retain a lawyer to stop your incessant public slurs.

Steve, K4YZ

> Double standard?

No. I'm not the least bit worried about about your identity. Makes
no real difference. However, the reaction of the PCTA, specifically
Steve/K4YZ/K4CAP, to any anonymous post that disagrees with him is a
call to arms, and usually results in a "cowardly scum" accusation.

> >Perhaps I am Mike Coslo. Perhaps I am Jim Miccolis. Maybe I am both!

I complain only that you receive preferential treatment for anonymii.
It is merely my way of making another point with respect to the PCTA
Double Standard.

That is important enough to point out again and again.

You tolerate it, even condone it.

What a broad zone of tolerance you have for the PCTA, and how narrow it gets...

Yo Dieter,

I've been thinking (yeah, I know I shouldn't be doing that at home) and maybe
there's another interpretation. Since ARN has been making these "pleas" for a few years now, might it be possible they're a really good news org and and really bad at managing a 501(c)(3) organization? There's gotta be something wrong when they're constantly out of money and need to "plea" for money. This is not a slight to Andy Jarema. But maybe they also need to find a professional business development (a.k.a.fundraising) person who is also a ham and set up a real fundraising program instead of resorting to "pleas". See ya at the session.

So WHAT, Brian? Steve is Pro code test, so you decide everyone who is
pro code test is like Steve?

If Steve has a problem with anonymous posters, so what?

I'm certainly not going to condemn every anonymous poster no matter if
they disagree with me or not. I won't condemn Blackguard or Quitefine or
Leo or any of them.

It ain't my fight, and you'll not be able to make it my fight. I may
occasionally have something to say if one of them makes a particularly
offensive post, but none of them have.

You are taking two different things here, notably the fact that some of
us don't condemn anonymous posters, and furthermore, we also don't
condemn anonymous posters that may agree with us, and expecting
something that just isn't human nature. Now when the anonymous poster
disagrees with us, its more likely that a person will say something
negative about the anonymous poster, but that doesn't mean we all have to.

You can post as Billybeeper all day as far as I am concerned. Leo is
civil, and I have no problem with that.

Steve thinks elsewise. Argue the point with him.

Not our argument, Brian. I don't think I've ever made a condemnation of an anonymous poster, with the possible exception of a fellow that I outed a year or so ago. And I'm not sure if I dissed him or just outed him. But even if I did, it may have come across in a post in which I was arguing with someone. At which point it was part of our argument. And If I did, it was not a good point.

No PCTA double standard
No NCTA double standard

3346. new 2m repeater on space station

Newsgroup: rec.radio.amateur.policy
Date: 2004-09-13 13:20:36 UTC
From: g3zhi@hotmail.com
Message-ID: <41469e77.613091@news.btinternet.com>
Source record: 97022

new 2m repeater on space station
a new 2m repeater is now operating on the
international space station 24 x 7
the uplink is on uhf 437.800 and the downlink is on vhf 145.800
no tone burst or ctcss is required
the radio is a kenwood tmd700 operating in remote crossband mode
it just retransmits on vhf what it hears on uhf
so if you are getting through you can hear yourself
on the downlink

anyone can work it using a co-linear

to see where the space station is 'live' check

http://science.nasa.gov/temp/StationLoc.html

for 3 days in advance predictions download the pcsat decoder program

http://www.ui-view.com/uiview32/pcdec242.msi

when the iss repeater is being worked the audio may be streamed in the
amsat
conference server on echolink so anyone anywhere in the world can
listen in

There ya go with typos again after having "chastised" me on several
occassions for doing the same thing.

More of that "NCTA Double Standard" stuff.

I DO believe it. I have said it. You may ask around the NG.

Your "mentor" insists that typos are evidence of anger and rage. What are
you in an angry rage about, Brain?

>> And Lennie STILL can't operate any radio station on HF without an FCC
>> issued station license, Part 15 and Part 95 notwithstanding...
>
>Really?

Really. It's clearly stated on the back of his GROL. It's clearly stated on the back of >>EVERY<< GROL ticket for that matter. Again, feel free to ask around.

No station license or grant from the FCC...No "operating".

>> BTW, Brain, Your Mentor spent some amount of time bragging about how
>he

Most incredibly Kewl!

Let's look at the personalities:

Moe - impatient, grumpy, and given to yelling, temper tantrums and name calling.

Out of the three, Lenover21, William, and Steve, the person showing the biggest tendency to do this is of course Lenover21. While Steve can certainly throw out the insults with the best of them, he reserves it for when he is provoked. Len apparently finds my middle of the road and mild posts provoking.
Next is a problem. Larry is a relatively mild mannered straight man that bears half or maybe more of Moe's angry outbursts, plus an unending stream of name calling. I have to see Larry as more like myself or even you, Jim!

Now to the others. William appears to feel kind of put-upon lately, judging from his posts. I think that the stooge that most fits his present situation is Joe Besser. I can still hear Joe' "Stopp iit" when I think of him.

Now for the last of the trio. Remember how Curly Howard would get all spun up and make noises when Moe would poke him in the eye or smack him on the head with a hammer. He was good for a "hmmmm.. wise guy!", barking at Moe, and even getting in pokes at Moe of his own.

Yes, Curly Howard in this poll is our own Steve.

Isn't it fascinating that the Stooges were lind of looked down upon in their time, and now have truly achieved immortality? And all that, when they apparently never read a script that they didn't like. That is a talent they shared with Lucille Ball. Both could take garbage material, and make us laugh with it. Genius.

I kinda liked your version: "synchophant". You used it quite a number
of times.

> "Learn code or die!"

J-38's in the Revolutionary War? Could you describe what a "snarl background" might look like? Would it involve any of those "message knuckles" you described in an earlier post?

> They keep falling on the field of battle, the ground littered with pieces
> of ham-band-aid wrappings.

That's quite an active imagination you have.

> Snarls and epithets they still have,

Are you certain that it isn't Sneers and epaulets?

> a sort of dying gasp of egos...all they have left.

That would seem to describe your place in things.

> All that about a hobby. Hi hi.

Ever since I used the term "branch water" you seem to have had a
fascination with it.

Back to your query though: "Must Len agree with everything?"
I find it very, very funny.

We know for certain that the things he does not agree with are described
by him as "jack-booted, ober uberst, feldwebel, J-38, snarly
backgrounds, Revolutionary War, battlefields littered with, Archaic
Radiotelegraphy, Church of St. Hiram, Gunnery Nurse, Murine" and the

like.

Len's a real peach of a guy. Who wouldn't want to have him as a pal or a neighbor?

Legislators do this all the time. The U S Tax Code is loaded with
exemption clauses like "this does not apply to corporations
incorporated before 1930 for the purpose of transporting lumber
products along the Columbia River whose gross income is more than
one million dollars per annum...."

Let us not forget the famous Arizona law which makes it illegal to
buy an "Indian" a drink, which was intended for a particular "Indian"
but had to be broadly stated to escape Constitutional challenge, albeit
it was never broadly enforced.

> School training on HF transmitters, without any training whatsoever
> in or about morse code. :-)

Bully for you. I keyed my first government transmitter 36 years ago at age 19, well ahead of your schedule. It didn't make me a radio amateur. Of course I was *already* a radio amateur...

> Tsk. It gets worse for Dave. I've actually operated transmitters as
> a civilian without once having to show or log my "first" license.

Bully for you, though I don't see how it is bad, much less "worse" for me.
That has nothing to do with obtaining an amateur radio license. If you're just out to trot out your tired, old brag, might I suggest alt.radio.commercial.look.what.I.can.do.

> All
> perfectly legal, too. No need for most Department of Defense
> contractors. [DoD isn't ruled by FCC or any "Riley"]

Nope, nuthin' here about amateur radio.

> Dave ought to take up nursie's veiled threats of "using his professional
> license to call the authorities to 'pick me up.'" This time on emitting
> RF without having a valid amateur radio license!

As far as I'm concerned, you're right where you belong already. Just continue to pad around in your small but paid for, expensive home. Occasionally, you can look out the window and see some of the other inmates.

> Or, he might take to veiled threats against my wife (like nursie did)
> or sign his name "Dave and the Boys" at the end of a posting. :-)

There's no need, Leonard. Your wife already has her cross to bear.

Yet ANOTHER point, Dieter.

You have point blank accused Bill of "...practically living off of the
proceeds.." of ARN donations.

QRZ puts Bill in Saugus, CA. Saugus is not exactly the "low rent
district". Just HOW MUCH money do you figure Bill is bringing in in order to
sustain a California home, live off the economy, AND provide the level of
services he does...EVERY MONTH...?!?!

Furthermore, I can't believe that in this day and age, that if he HAD done
something along the lines of which you accuse him, that SOMEone wouldn't have
said SOMEthing by now who was in an immediate position of knowledge, ie: a
confidant, accountant or "officer" of ARN.

Absolutely.

I grew up in NE Ohio and there was always something special about being in my "shack" with some hot coccoa watching the snow fall and tuning 80 meters.

Brain, from time to time you do something that specifically exemplifies my conceptualizations of you, but this one's a goodie...

Your post suggests that there's something "uncivil" about taking a poll.

Now HOW does suggesting a poll insinuate a less-than-civil debate?

I thought polls were the very essence of "free speech"...And I certainly didn't see anything in Jim's post that would have restricted participation to any one subset of the group or exclude any one or more person...including you.

So...HOW did you come up with "More Extra Class civility?"

We are nearing the point where if a PCTA writes "I must respectfully disagree" is going to get a replay of "More Extra class civility?"

All this is just fun stuff. If Brian told me I reminded him of Shemp, I would get a big laugh out of it.

Brian, this is a wrong tack to take, in respectfully disagreeing....

There are exceptions...I merely said there 'may' be a 'relationship'
in the statistical sense, certainly not the absolute sense. Did you
learn code only to pass the test? Can you still do 15wpm? Do you beat
your wife? See, there are many other considerations to factor in.

I think Cecil was self-adulating crank but that is only my (most)
humble opinion. He certainly was not the genius he made himself out to
be but hey, no one who ever makes that claim is. No one who claims to
be in mensa ever really is. There were only two really intelligent
people in this group, both of whom were anti-code and whom I utterly
detested: Todd Little and Gary (you make 'em we break 'em) Coleman.

>
> We're not talking about Bruce or Jim.

You said "professional radio engineer." Forgot that Bruce was a VCR
tech, and ... what does Jim do again? Oh, yeh, he builds radios from
kits. Or maybe you were referring to the guy with "real military
experience."

What an odd bunch.

Then there's that nut with seven hostile actions.

> >> Sheeeesh.
> >>
> >> Steve, K4YZ
> >
> >Sheeeesh indeed.

Is there a way to tell what class has the most vanity call signs? If I had to bet, I would say the Tech, I wonder if they just want people to think they have been hams a long time? I do understand a few have calls that were their fathers, elmers, mothers, ect. Some even have calls that are their initials, most of those start k7*** not N7*** , but most I have asked and they say just cause?

No???

NO!!!

Then what must Len agree with?

> However, logical consistency
> requires that if someone is
> going to {{{claim}}}} make the
> emergency radio operator
> argument, then they must also
> agree that amateur radio plays
> a significant role in emergency
> communications.

Not everyone need make that argument.

Need everyone with an amateur license perform emergency comms?

Some only have a license so they can get cool personalized license
plates.

> Of course, we have noted that
> logical consistency is not one of
> Len's strong points.

But it is. Yet logical consistency would demand that upright amateurs
disapprove of Steve Robeson/K4YZ/K4CAP's behavio[u]r.

But you don't.

> >Some people say that cellular
> >telephones have no significant role in emergency communications,
>
> Those people are mistaken.

Well, well. If only Almostintimefine had chimed in six moths ago.

As it is, you've allowed the naysayers to think legitimate civilian
communication systems are to be shunned.

> >yet
> >about every footage of hurricane action film depicted an official with
> >a cellular telephone.
>
> Of course.

Of course.

> Some people say that amateur radio
> has no significant role in emergency
> communications, because of cellilar phones.

cellular.

> They are mistaken, too.

Of course.

> The valid point is that cellular phones
> cannot

> be absolutely relied upon for emergency
> communications.

What can be absolutely relied upon for emergency communications?

> >> >You just never know when you
> >> >might need one,
> >>

>
> What radio service is that?

The services presently covered under Part 95.

> How well does it function in emergencies?

Depends on how many trash mouths have emergency power, or how many
trash mouths in the unaffected area want to interfere in legitimate
emergency comms.

> >> >and Morse Code just isn't needed to be an effective

An impossible stretch, re: 1991. Now let's discuss HF.

> >> It is clear that Len's interest goes far
> >> beyond
> >> eliminating the Morse Code test.\
> >

> >He wants to eliminate the morse code test.
>
> And much more.

I'm the one who wants one license. I don't recall him calling for any particular license structure other than the elimination of a Morse Code Exam for HF access.

If you have information that contradicts what I've just posted I'd like to see it.

> >> To quote a wise one:
> >>

(repost)
==========
This list contains everyone that has posted 5 or more articles to this
newsgroup since January 10, 1994. I tried to make the script handle
all the
various name changes people made over that period. Some have as many
as 12 different variants they posted under, sigh. I know I didn't get
them
all as I just noticed Bill Sohl and William Sohl, and I know some of
our
Brown friends posted from root accounts.

Anyway, here are the top 134 out of a total of 577. I didn't total
the
number of articles this list represents (left that as an exercise for
the reader), but my archive contained 5149 articles.

73,

Odd that you say that. I see him posting to David.

I guess it's all a matter of relativity.

I stand out in the light, and can see clearly. You stand in the
dark...

It is not accurate?

The only thing I find inaccurate is the smiley emoticon at the very
end.

> Do not be too cruel to these people you disdain. You need them much
> more than they need you.

Dave refused to entertain the idea of Len operating from his shack.
Great posterboy for amateur mentorship (formerly known as "Elmer.").

> > Pbthththth...
> >
>
> Finally, you write something that makes sense.

Ptui!

> But is the first part pronounced "pib" or "Pub" or "puhb"?

You say it makes sense, but you don't know what it is?

And yet you are acclaimed as the wise one?

> I am
> curious
> but yet
> still

in need of a vowel.

...Curi_us Ge_rge _f the Jungle?

Wonder if he's drunk? And abrasive as all sailors can be.

Reencacting Cinderella Liberty.

That's why they got their name stenciled over their back pocket. So
you can tell one dumbass from the next.

Then you've got multiple-personality Steve asking what face someone is
presenting!!!

Hi, hi!

Such comedy, such slapstick!

Let me know when one of these guys goes over Niagara in a barrel.

But they have to do with radio, unless the physics of radio have
changed since 1953.

Have the physics of radio changed since 1953?

> YOU try to understand that your experience in "professional"
> electronics, other than discussions of a purely theoretical technical
> nature, have NOTHING to do with Amateur Radio.

That's kind of a huge slam on amateur radio. I feel insulted.

> YOU try to understand that your wife's alleged professional
> standing in the mental health industry does not qualify YOU as such,
> and in either case has nothing to do with Amatuer Radio.

Then it's a damned good thing that Hillary never had the ear of the
President.

Hi, hi!

> YOU try to understand that your brief fling as a student pilot in
> the 50's did not result in an Airman's Certificate, did not qualify
> you in aerial navigation, and in any case has nothing to do with
> Amateur Radio.

Nor does your fling with aviation have anything to do with amateur
radio.

Unless, "Sorry Hans, CAP >>>IS<<< Amateur Radio!"

Hi, hi!

> YOU try to understand that your acquaintance with a "real extra"
> (who was nothing of the sort when you served in the Army with him the
> 50's) does not qualify you as "experienced" in Amateur Radio issues
> in the 21st century.

It's as good as anyone elses!

> > YOU ARE NOT A MEDICAL DOCTOR.
>
> Nope.

Couldn't afford the insurance.

> But Medical Doctors come to me to get the things done that save
> people's lives. Maybe even yours someday.

Fat chance, as you've previously posted!!!

> > various adminstrations' law on use of radios.
>
> This forum is not about the "physical laws" of radio.

It's about you yelling and intimidating people.

> This forum is about Amateur Radio POLICY...The rules, regulations
> and programs of how Amateurs apply those physics.

And Part 97 is how many kilobytes?

VS the remainder of professional radio?

You make a joke of amateur radio by shunning professionals.

> While I am sure that you are eminently able to discuss the laws
> of physics as they pertain to radio design, you are grossly
> ill-prepared to discuss, from an informed perspective (read that "no
> practical knowledge") matters pertaining to those policies.

You must also say the same thing of that Powell Kid.

> Your discussions herein solrely reflect your OPINION.

Ditto (except "solrely").

What a great idea. Channel 26, the perfect place!

August 21st. 1989

Mr. E. Pitman,

Government Telecommunications Officer,

Department of Telecommunications,

Hamilton.

Dear Ted,

I am faxing a transcript of the broadcast put out by K1MAN last week.

When you have read this I would like to have a meeting with you, maybe we could have lunch and discuss it then, to fill you in on what actually happened.

Your support with this would be appreciated. I have been to the American Consulate and will be writing a formal letter of complaint this week, requesting a public apology from K1MAN. He is advocating that I should lose my license for NOT passing third party traffic when the "world needed to know" and he had declared an emergency. He was doing this under the authority of the "FCC" according to him. I reminded him that we were not a State of the United States of America and that we were governed by the Department of Telecommunications and also the British arrangements for third party traffic. He could declare whatever he wanted to but until we had clearance, we would not pass it

No emergency had been declared and as far as we were concerned it was an unofficial net standing by in case we were needed should an emergency be declared. He did not like being informed that we were handling the situation ourselves very efficiently, without his help.

Please telephone me when it is convenient and I will explain more, or as I said, maybe we could have lunch.

Yours sincerely,

[AS] VP9--

Suite 201 . International Centre . Bermudiana Road . Hamilton . Bermuda

---

This is a response to the editorial broadcast

by K1MAN after Hurricane Dean.

STATEMENT

K1MAN stated "IARN activated for Hurricane Dean as it neared Bermuda, Sunday August 6th. 1989 at 11.30 UTC. IARN Headquarters in Belgrade Lakes etc. received a call from [TS], VP9--, requesting assistance from IARN on 14.275mHz. Tony wants to activate 14.275mHz. . .etc. "

FACT - At 11.15 UTC, VP9-- & VP9__ activated the Bermuda net.

A broadcast was in progress and VP9-- decided to telephone KlMAN.

"We want 14.275mHz cleared due to the impending Hurricane."

Response from Glen Baxter, "No problem" and the telephone conversation finished.

FACT - At no time was a request made for IARN to assist or to activate.

FACT - KlMAN checked into the Bermuda net at 11.45 UTC and he was informed, (as were many others who had checked in) of the current situation in Bermuda.

STATEMENT

"Associated Press and therefore the entire world, was, de facto, cut off from the world of public information dissemination..... up to the minute detail report, now assured that ham radio and IARN had a well established and well maintained link to Bermuda"

FACT - Glen Baxter was not on a well maintained link to Bermuda. He checked in and was given information the same as many other hams. The so called emergency was K1MAN generated and not an emergency in Bermuda. The reports of lack of readiness at 20.00 UTC were absolute poppycock. All of this information had been issued by the Bermuda Hams between the hours of 11.15 UTC and 13.00 UTC that Bermuda had been well prepared.

STATEMENT

by Glen Baxter ".....festival the previous Thursday which included a soccer match between teams on either end of the Island."

FACT - Again, poppycock. K1MAN had been informed that the Cup Match was a cricket game between St. Georges and Somerset, had been played, the result was a draw and everyone had a good time. The match was on Thursday and Friday when the storm was hundreds of miles away. This Information had been given hours earlier.

FACT - IARU had generated an emergency, no one else. Totally uncalled for "here is the important news we gathered for Associated Press." IARN were more interested in promoting themselves and Glen Baxter in particular and when he found that he was not wanted on the net and did not have control of it he resorted to terminological inexactitudes to achieve his ends.

FACT - Glen Baxter relayed conversations he had with VP9-- to Associated Press without the consent or knowledge OF VP9-- at the time. This is in contravention of International Law.

As an American citizen he has no right to assume Governmental authority and issue edicts to hams in other countries. At no time can he advocate publicly that licenses should be revoked and should he have any complaints then these should be directed through the Department of Telecommunications in Bermuda. His pontificating on people's attitudes and his declarations of emergencies allows him to promote himself and his organization in such a way that his approach does sound plausible. As they say you can fool some of the people some of the time but not all of the people all of the time and K1MAN does not fool any Bermuda Ham. His trip to Moscow paid for by the Young Communist League leaves one to suspect his motives and his reporting.

...

If someone is nutty enough to support K1MAN, as this mrhamradio appears
to be, then reasoning and facts aren't going to have much effect.

> Hmmmm?

We all know that you consistently manage to add two and two and
usually get seven something so I'll try again: Cecil was looking for a
40M CW contact with another RRAPer. Which is what TRIGGERED the
proposal for the gathering on 7037 that night.

> > Cecil suffers a sort of palsy which makes using any sort of keying

Bilge. Typical mindless, transparent Burke duck the bullet maneuver.

Again.

> > Net result has been a helluva lot of ongoing respect for Cecil's CW
> > and technical skills and doggedness amongst us PCTAs.
>
> You don't make any sense at all. You dogged him for years for not
> being a PCTA.

Hey Burke, treat yourself to a dictionary and find out what the
differences are between "dogedness" and "dogged". After, of course,
after you take remedial reading comprehension 101.

Again.

> He switches and then he's Golden! with fond, fond memories posted
> below.
>

Cecil didn't "switch" anything, a bunch of us PCTAs worked Cecil, a NCTA and a good time was had by all, nothing more, nothing less Burke. Better luck the next time you you try to twist documented reality by lying about it.

> You guys dogged the poor bastard so much that he risked his property
> and his life to prove that he was Morse Worthy.
>
> You guys ought to be proud.

Actually yes we are. Sorry you weren't there to join that exercise Burke but we understand, you can't put up HF antennas because you have kids. Slick excuse that one is, quite creative, blame your lack of performance on yer kids.

Yep, I'm one of 'em. There are lots more.

>I merely said there 'may' be a 'relationship'
>in the statistical sense, certainly not the absolute sense.

Of course.

>Did you
>learn code only to pass the test?

At first. I became a ham 37 years ago in large part because I wanted to join
the folks on 75 AM. But once I was exposed to the code and used it on the air,
I found I liked it, and just kept on using it. Wound up passing all six code
tests (5/13/20 wpm, sending and receiving).

>Can you still do 15wpm?

Oh yes. More than double that, in fact. Also much less. 5-40 wpm or
thereabouts, what ever the situation calls for.

>Do you beat
>your wife?

I haven't mentioned marital status here. Not relevant. But I don't beat anyone.

writes:

>> >Callsign: KC0MUB Class: Technician Codes: HAI USA
>> >Name: Valentine H Germann

Fun facts:

If a Technician passes Element 1 (5 wpm code) but not Element 3 (General
written), their license database entry still says "Technician" because Fcc does
not issue Technician Plus licenses any more.

Existing Technician Plus licenses are being renewed as Technician. In about 5
years and 7 months there should be no more Technician Pluses at all due to this
fact.

So it is impossible to tell whether someone with a Technician license has
passed the code test simply by checking the database.

In article <B7ydnXH3K6R51NvcRVn-ug@centurytel.net>, whoever <whoever@wherever>
writes:

>Is there a way to tell what class has the most vanity call signs?

Yes, but it's not easy.

The license database information includes various letter codes - you can see
them in QRZ.com. For example, "HVAE". I don't recall all of the codes but one
of them indicates whether the call was issued under the 'modern' vanity call
program.

So all you need do is download the entire database, filter through the info for
license class and vanity, and there you are.

>If I
>had to bet, I would say the Tech, I wonder if they just want people to
>think they have been hams a long time?

I'd say it has more to do with not wanting a six-character callsign. They can
be long and unwieldy. I had six-character callsigns for the first 10 years I
was a ham, and a shorter call has definite advantages. But my callsign was not
issued under the modern vanity program.

> I do understand a few have calls
>that were their fathers, elmers, mothers, ect. Some even have calls that
>are their initials, most of those start k7*** not N7*** , but most I
>have asked and they say just cause?

Why not?

If you don't like the callsign blocks available to the various license classes,
you can petition FCC to change them.

Whatever you do, don't >>>Ever<<< leave David Heil off of a list!!!

Loves those lists!

I caught hell for months for not realizing that Dave was an ARRL #1 Op
or some such thing. Phew! Glad those days are over.

Even without it.

Note the lack of smiley - not that a smiley excuses such a threat.

It's not the first time - I recall Len mentioning "one by twos" needing a whack
with a two by four or some such. (referring to assult on holders of certain
amateur radio callsigns)

Civil discourse, huh? Easy to do from a continent away.

>

Most of the people I know with vanity call signs got them because they wanted a shorter call. All new Techs are issued 2x3 call signs as is anyone who goes straight to General as their first license. Both Techs and Generals are eligible for 1x3 calls. However sequentially assigned 1x3 calls were used up approximately 10 years ago. For a vanity call, one can pick from calls no longer in use. The 1x3s beginning with N however are, for the most part, generally still current as they weren't issued all that long ago (10 to 15 years). Thus people wanting to change their call have better luck looking at calls beginning with K or W.

NONE of the people that I know are trying to make anyone think they have been a ham a long time. The just want a shorter call and are entitled to it if they can find one available.

The only way I catch a glimpse of lenover21 is when someone such as yourself responds to him. I have him filtered out as I don't care to read his rambling, disjointed, and multitudinous posts. Usually when I see that a post is a reply to one of his, I'll skip over it. Not always though such as this one.

Perhaps you didn't notice that many of the regular poster here were not
included, "William". The point is that the list is very inaccurate.

> I caught hell for months for not realizing that Dave was an ARRL #1 Op
> or some such thing. Phew! Glad those days are over.

Perhaps you have trouble remembering the facts. Brian Burke listed a
couple of names of those posters here who are members of the A-1 Op
Club.
Burke then went out of his way to list PCTA posters who are not A-1 Op
members. As I recall, he wrote something like, "Dave Heil K8MN is NOT a

member". Of course that made Brian look pretty silly, for not having his ducks in a row and for making it obvious that he was pushing an agenda.
I'll be happy to google it up for you, should further clarification be needed.

Dave K8MN

[alex@homer alex]$ cat haiku.c

It is cold outside
My radio heats the shack
Electrons dancing
[alex@homer alex]$ cc haiku.c
haiku.c:2: error: parse error before "is"

it does not work....

We're already way past that point. Which is why I don't bother to read
most of what Len, Brian or Steve post here.

Remember when I pointed out (respectfully) to Len that Fessenden was
transmitting voice by radio in 1900, not 1906? The response wasn't
exactly respectful...

It was at a film festival in NJ. Several hours of classic Stooges.
Guest of honor was Moe, who did not look at all like he does in the
films - until he took off his glasses and combed his hair forward.
Then, except for the silver hair, he *was* Moe.
>
> Let's look at the personalities:

> mild posts provoking.

Len finds *anything* other than complete agreement with his stated
opinions to be provoking. That's just the way he is. His act here
jumped the shark years ago.

> Next is a problem. Larry is a relatively mild mannered straight man that
> bears half or maybe more of Moe's angry outbursts, plus an unending
> stream of name calling. I have to see Larry as more like myself or even
> you, Jim!

Agreed - except that in some cases Larry will take part in the
violence chain (Moe slaps Larry, Larry slaps Curly, Curly
slaps...nobody there to slap)

You and I don't do that, which further provokes Moe....er, Len.
>

You do make a good point.
>
> Isn't it fascinating that the Stooges were lind of looked down upon in
> their time, and now have truly achieved immortality? And all that, when
> they apparently never read a script that they didn't like.

Much of their stuff was adlibbed. The scripts were extremely basic.
The point was the visual gags, special effects, and the juxtaposition
of proper society and the Stooges' antics.

Nobody before or since has done a better piefight or sound effects
associated with bonks on the head, etc.

> That is a
> talent they shared with Lucille Ball.

I loved Lucy in the original show. The key to her humor was that she
would do absolutely *anything* onscreen if it were funny. The giant
bread loaf - the "meatavegavitamin" commercial - the pregnancy sight
gags - the classic mirror scene with Harpo Marx... Sadly, after she
split with Desi Arnaz the followup shows did not have that quality,
IMHO.

It is not generally appreciated that Lucy invented many sitcom
standards. The use of 3 cameras and the separate production company
(Desilu) are but two of her ideas.

Oddly enough, "I Love Lucy" and "The Three Stooges" were not imitated
to any great degree. Perhaps that explains part of their appeal.

Consider "The Honeymooners" which is the source of almost every family-based sitcom for over half a century, from "The Flintstones" to "Mad About You" to "According to Jim". Been copied a zillion times because it works. Yet the originals are still funny.

Simple formula: Big, loud, bombastic husband and smart, pretty, assertive wife. Neighbor/relative couple composed of slightly-older somewhat-dim-but-likeable husband and smart-attractive-friendly wife. BLB hubby gets into various jams, finally realizes his mistake, SPA wife always forgives him. Wife is never fazed by anything hubby does - stands right up to him. Jim Belushi and Courtney Thorne-Smith are just channeling Jackie Gleason and Audrey Meadows.

Almost all sitcoms were based on the Honeymooners formula until the mid-late 1970s. The only real change was the addition of kids (usually precocious and smart-mouthed).

Then "Barney Miller", "WKRP" and later "Taxi" invented the workplace ensemble comedy. Which is also highly imitated.

"Home Improvement" blended the two genres almost perfectly.

Of course for every classic, there are many many which were a waste of time from the beginning.

> Both could take garbage material,
> and make us laugh with it.

Not garbage at all! Elegant. Not a wasted line or shot in the shows.

> Genius.
>
Agreed!

Jim, I noticed that you were silent with respect to Steve's remarks
about bricks through windows and terrorizing Lens wife.

I used to think that, but after a while I realized he was just a champion
leg-puller.

>He certainly was not the genius he made himself out to
>be but hey, no one who ever makes that claim is. No one who claims to
>be in mensa ever really is.

I remember telling him something to the effect that if you have to *tell*
others that you're a genius, you ain't.

It's like comedy - the audience decides what's funny and what isn't, not the
would-be comedian.

Do you mean as original posters (thread starters) or also replies
to existing threads? I would have thought that I would show
somewheres on this list, likely in the lower third.
I used to be wa2ise@netcom.com and migrated to wa2ise@ix.netcom.com
about 4 years ago.

In any event, what is your point?

Neither Dick, Bruce, nor Larry are members of the A-1 Operators Club.
So
far, so good.

But, of note,

I am not an A-1 member
Ed Hare is not
Dave Heil is not
Jim Miccolis is not
Steve Robeson is not
Phil Kane is not
Cecil Moore is not
Dennis Ferguson is not
Robert Casey is not
Ryan Luhgermo is not
Dan Jeswald is not
Mike Coslo is not
Dick McCollum is not
Jim Hampton is not
Eric June is not
Rick Tannehill is not
Jon Bloom is not
Bill Sohl is not
Dan Finn is not
Jim Bromley is not
Leland Scott is not
Stewart Teaze is not
Jeff Herman is not
Mike Deignan is not
Steve Adell is not
Jim Haynie is not

Rod Stafford is not
Chris Imlay is not

Arnie Macy is a member
Hans Brakob is
Riley Hollingsworth is
Dave Sumner is

So there must be something to this. Arnie and Hans, at least when on the
radio, must be model citizens. Congratulations to both of them.

73, Brian/N0iMD (end quote)

There ya go, "William". Read it and weep.

Dave K8MN

You certainly do have much in common. After all, you're his little
electrolyte.

> The only think you and I have in common is a couple of QSO's.

That and both having been in the Air Force. But all my operations from
overseas are well documented and have been accepted for DXCC credit.

I think Alex is saying that the word phrase "it is", is not correct.
I do not understand it either. Perhaps Alex can explain the error in
more detail.

as to my previous Haiku, I think this one works better;

Watching the snow fall,
while listening on 80,
Steve sips his coccoa.

Eric N7DLV

Here is another;

Rainy summer day.
Unable to do yard work,
I turn on the rig.

Eric N7DLV

This is getting kind of fun! Anyone else want to try writing some Ham
Haiku? I also would like some input from Japanese Amatuer Radio
Operators.

I was speaking of the David Heil that worked me on HF. Since you
didn't...

you were apparently left off of the list by accident. So sorry.

Anyway, that's a nice list of (mostly) historic RRAP posters. Never
saw Riley, Sumner, Haynie, Stafford or Imlay here, though.

I do not and have not used a QSL manager for my operations as K8MN.

Except that Germany in the 1930s was in economic and political turmoil
beyond anything the USA has ever experienced. They had rampant
inflation and unemployment, just for starters. Adolf & Co. fixed those
problems fast, then went on to unify, modernize and expand Germany
without any fighting until 1939, by which time nobody dared oppose
them.

That works very well for ostriches.

See only what you wish to see. Safe, secure to the psyche.

Trust in the league to tell you How Things Should Be. Tolerate
nothing else. The league is your shepherd, you shall not want.

Anything not in accordance with Standard Practice is heresy.
Shout out that heretics are "wrong" whenever you can.

There is no independence, no freedom, only Standard League
Operating Practice. [acronym SLOP]

Go outside the Official Guidelines and your amateur job is
terminated.

Tsk. If it isn't within 50 PPM tolerance of ARRL political speak,
differing opinions are "rambling, distored, and multitudinous?" :-)

Amateur radio must be Just So for Dee or she cannot tolerate words
of independence. [she hefts her mama spanking paddle...]

Too bad about fear of being downsized or outsourced if the amateur
job isn't done Just So? :-)

Tsk.

Actually irrelevant. Mama Dee doesn't have long enough arms to
wield her spanking paddle again "children" far away. Tsk.

She makes Pronouncements...sounding like ARRL-southwest.

Proper etty-kett at all times, using "official" How To Act notices.

Job fear can drive many over the edge. If one doesn't behave like
'real' hams are 'supposed' to be, they will be fired, downsized, or
outsourced.

Why do you state the obvious?

PCTA don't allow a single bit of tolerance for those who do not love, honor, and cherish the beloved morse code.

A few might blow air-kisses at NCTA in an attempt to demonstrate their "tolerance," but that is just lip-service.

ARS = Archaic Radiotelegraphy Society to the PCTA.

it isn't art, or even close to it. There is a "con man" element in the art world today that seems to want to push the borders with every new showing. It is how we get exhibits such as "Piss Christ", exhibits of decomposing cow carcasses, and now this abomination. Certainly the Christ exhibit didn't harm any helpless creatures, and was mainly extremely offensive. But anyone that thinks torture is art needs a visit from Karma. In the meantime, since there is a element of "art is whatever you can get away with" in the art critic world, people try to get away with anything.

>
> How is Canada disgusting because of what those three bums did?
>
> 73 de Jim, N2EY

They gave light (almost no) sentences to the bastards.

The people who did this should be either incarcerated or permanently in a mental institution. They are out on the streets. To say that the torture and mutilation of an animal is "art" of some form is merely justification of their sociopathic condition.

Did you know that people that do that sort of thing (torture and kill animals are more likely to turn into serial killers? To the extent that it is considered a major indicator. Those three should be required to register every place they go.

Any art exhibit that includes such a sociopathic thing is complicit in the crime. I consider the promoters of this as guilty as the perps themselves. If I worked for such an institution I would quit if they were to show such a thing.

Any country where there wouldn't be a huge outcry and immediate condemnation of such an event condones it.

and there you have...the rest of the story....

This incident is indeed quite unconscionable, and the people who committed this crime in the name of 'Art' surely deserve to have a similar fate inflicted upon them. It also serves to highlight the weak laws covering animal cruelty, not just here in Canada, but in the US, and elsewhere, as well.

For example, Mike, in your own home state of PA, the penalty for torturing animals is a whopping 90-day maximum sentence:

source: http://www.aspca.org

>>>>>>

PENNSYLVANIA

Penalty: Summary offense; maximum 90 days confinement and/or $50 - $750 fine; possible forfeiture.

>>>>>>

There is an excellent chance that, given the 'artistic' nature of the offense, a fine and/or minimal jail time would quite probably be imposed there as well. Note the 'possible forfeiture" above - the perpetrator of this type of crime may not even have the animal removed from his or her possession as part of the sentence!

Here, as well as there, exists no penalty whatsoever for killing an animal outright - pet or otherwise - so long as it is done in a humane manner. In both Canada and the US, any owner can walk in to the neighbourhood vet's office and have an animal put down, no questions asked. Or, one could take the old family dog out behind the barn and shoot him. Perfectly legal, so long as no 'undue suffering' is caused.

Is there an outcry? I live in Toronto, and can assure you that this despicable psychopath and his sick film are the subject of public protest and considerable hostility. The law, however, is the law.

As long as we, as a society, continue to pass animal rights legislation which considers them simply as property rather than as living entities, this sort of vileness will continue to proliferate.

Here in Canada, and in your own backyard too.

There is indeed law.

However, there is law and then there are the anguished "chop
busted" souls who wish all to be as disgusting...er, disgusted as
they about whatever they think.

All must follow their path or be subject to all manner of condemnation
for ever and ever.

Hi hi.

>As long as we, as a society, continue to pass animal rights
>legislation which considers them simply as property rather than as
>living entities, this sort of vileness will continue to proliferate.

Not in HIS backyard, Leo... :-)

>> and there you have...the rest of the story....
>

>Not quite - but you have a bit more of it now...!

Tsk. All this bandwidth on subjects which aren't even about
RADIO, much less about radio policy. Hi hi.

Better the subject should be Presidential Politics...something
which the PCTA extras think is "radio policy." Hi hi.

Ho ho.

It's quite obvious there is little (nearly zero) tolerance of NCTAs by
the PCTA. In here.

You knew that...but, lacking a good comeback, you mumble into
your keyboard a lot of null sentence content. :-)

>> PCTA don't allow a single bit of tolerance for those who do not love,
>> honor, and cherish the beloved morse code.
>
>Uh huh.

Well, that's how it is with the ARS [Archaic Radiotelegraphy Society]

If the code test goes, the PCTA extras lose their main bragging
right statement. Tsk.

>> A few might blow air-kisses at NCTA in an attempt to demonstrate
>> their "tolerance," but that is just lip-service.
>
>How do you *know* that?

Observation. With open eyes. :-)

Take in all, don't bury head in sand to avoid hearing independent thoughts.

Let the ARRL by your radio hobby "Miss Manners" and Tell You What
You Should Do, implant all the "correct" thoughts you should think.
They've done that for many years. Lots of hams follow their lead to the
letter. [in psywar circles that is termed "brainwashing"]

Always reject "improper" thoughts expressed by anyone else. League
would like that. Follow them like lemmings.

Not me. Been in real communications radio on HF and am open to
all ideas, not those that were "official" back before I was born.

Independent thinking is not for the faint of heart...or those who feel
they get their "chops busted" when someone rejects their "official"
opinions.

Right. Another example of the PCTA extra Double Standard. Hi hi.

>I don't particularly care for it, but he and you and
>Brian have carved out a relationship that seems to give all of you what
>you seek in here.

I don't have the slightest idea of what you are talking about.

We "have a relationship?"

I have no "relationship" with any uncouth left-over marine who
thinks that a purchasing agent job equals "engineering." Hi hi.

I don't have any "relationship" with some SOB (the B stands for
Beeper) who wants to insult my wife and imply harm is coming
to me and my family.

You have a very strange comment and have driven way out of the
limits of definitions of the word "relationship."

>>> Not our argument, Brian. I don't think I've ever made a condemnation of

>>>an anonymous poster, with the possible exception of a fellow that I
>>>outed a year or so ago. And I'm not sure if I dissed him or just outed
>>>him. But even if I did, it may have come across in a post in which I was
>>>arguing with someone. At which point it was part of our argument. And If
>>>I did, it was not a good point.
>>
>> Take your moderator's job up with the Bored of Arbitration.
>
>I believe that is the job you are attempting to do.

I'm not bored. :-)

>> Meanwhile, look up a bunch of cute Yiddish pejoratives, find out
>> what they mean. Or demean. Then check back who has used them
>> repeatedly.
>
> Why? I don't use Yiddish.

You would if someone called you a "Putz" for over a year in public.

You'd learn what it would be if you were called a Schmuck in public.

>You and Brian certainly have a strange
>obsession with Steve that seem to make it impossible to post to anyone
>else without mixing *them* up with Steve.

I have an "obsession?" With whom? :-)

I am doggedly persistent in showing how the morse code test is a
Dump Huck idea, worthless in this day and age of radio hobbyists,
and good only for bragging rights of the olde-tyme hammes of the
ARS [Archaic Radiotelegraphy Society].

Call that an "obsession" if you must. You are non-conformist in
your definitions of words.

Coslo, you started this particular thread. Did you do that because your "chops got busted?" Hi hi.

What are you going to do for an encore? Try to have the last word?

Hi hi.

It isn't the punishment Leo, at least beyond the fact that there should
be a more severe punishment.

What it is about, at least to me, is that these people would be able to
continue to get publicity about this act.

If I lived in Toronto, I would be in contact with the organization
displaying this activity, my political representatives, and whoever else
may bring legal pressure on them.

Maybe they could do a documentary of the "cat man" in Ottawa. There's
something that could stand some coverage. I don't know if you've seen
that, but I was impressed by the cathouse on Government grounds. That
poor guy is probably reeling about this sordid story.

Thinking a bit on the subject, I should probably apologize for the over the top reaction. Reading that story got the old rages going at a weak moment.

Still I hope you good folk do something to stop the sicko's that made the film, and the sicko's that are displaying the documentary of it.

Without them, you have less people to join in your posting tirades. I
doubt I'm much fun to post to, certainly nowhere near as much fun as
your battles with Steve.

You get what you want out of those battles, all three of you.

Unless you take all of this seriously. Tell me you *don't* take any of
this seriously. Do you think that you will change Steve's, or Jim's, or
Dave's or even my own mind?

Unless you do take it seriously you are just here for the fun of it, to
call Steve and the rest of us names, do whatever arguing you want to do,
and get whatever response we give back to you.

And that, my dear Lenover21, is a relationship that is carved out
mostly between You, Brian, and Steve. Dysfunctional to be sure, but hey,
I'm not going to judge. 8^)

Who is K8MN? I'm talking about David Heil. Ever heard of him? Does
he use a QSL Manager?

Yo Counselor FYI I came up with a *really* decent London broil
marinated overnight in Jack Daniel's original #7 sauce this Saturday
past. Nice bite, A-1 would have screwed it up.

Your cutesy-stupid routine can run only so long, "William". I'm certain that you can read after a fashion; otherwise you'd be unable to respond without dragging a family member in for a "what's this say?" session.

Take your time in digesting the material. Soak it all up. Absorb it. I've never sent a "David Heil" QSL. All my operations have taken place from a given spot with a given callsign.

How about a lengthy yarn about your operation as T5/Brian?

Tsk, tsk. You want a meeting with charts and graphs and an
experienced presenter to show you examples of the infamous
Double Standard?!?!?

You don't have that kind of time. There are many, many examples.

They are all in Google, safely archived. :-)

>>>I don't particularly care for it, but he and you and
>>>Brian have carved out a relationship that seems to give all of you what
>>>you seek in here.

>
>Oh yes you do. Don't get so excited now!

Coslo, you must have been sticked in the helmet in recent past
hockey games.

Or you may be smoking some "good stuff" that Bob Casey said I
was... :-)

If you want to see where your faulty reasoning on "relationships"
is, just look back over the last two weeks or so of newsgroup
messages.

>> I don't have any "relationship" with some SOB (the B stands for
>> Beeper) who wants to insult my wife and imply harm is coming
>> to me and my family.
>
>Oh yes you do.

Tsk, tsk, tsk. Now you are condoning threatening behavior...and
thereby showing the PCTA extra Double Standard!

>> You have a very strange comment and have driven way out of the
>> limits of definitions of the word "relationship."
>
> Without them, you have less people to join in your posting tirades. I
>doubt I'm much fun to post to, certainly nowhere near as much fun as
>your battles with Steve.

What "battle?" Do you perceive "battles?" Tsk.

But, you've never been in the military, don't know what "live fire" is
about (from weaponry, that is).

"Steve" who? :-)

> You get what you want out of those battles, all three of you.
>
> Unless you take all of this seriously. Tell me you *don't* take any of
>this seriously. Do you think that you will change Steve's, or Jim's, or
>Dave's or even my own mind?

I don't take these things seriously. :-)

It's fun to poke holes in some of the cherished, beloved mythology
found so abundant in olde-tyme hamme lore.

Most of that lore is passed from generation to generation, preserved
and cherished even though much of it is false...or appears false
because alternatives aren't presented for modern-day radio.

> Unless you do take it seriously you are just here for the fun of it, to

>call Steve and the rest of us names, do whatever arguing you want to do,
>and get whatever response we give back to you.

"We?" Do you have several alternate personalities also? Or are you
just wanting to shake your "we-we?"

It appears you've joined what you think is a "battle." Go for it.

All you will waste is your own time...which could be spent playing
with your radios (when not posting from workplace).

> And that, my dear Lenover21, is a relationship that is carved out
>mostly between You, Brian, and Steve. Dysfunctional to be sure, but hey,
>I'm not going to judge. 8^)

You have ALREADY "judged." And ruled, sentenced, etc. :-)

I don't have a "relationship" with olde-tyme hamme raddio...or its
lifestyling fans. I'm just showing what a ridiculous thing the
morse code test is for a civilian hobby...to a bunch of twits who
still think ARS stands for Archaic Radiotelegraphy Society.

The FCC is on public record saying they don't think the code test
serves as an indicator to them for an applicant's licensing.

Oh, my, isn't that a "sunnuvagun?"

If you still believe the morse code test is a valid requirement for
a civilian hobby of amateur radio, then YOU are the "dysfunctional"
one, not I.

Have fun peeing in your own pool, Coslo. I don't swim there.

Not for me, it isn't.

> You weren't in Korea, you weren't in the French Foreign Legion,

To be fair to those who have been to Korea and those in the French
Foreign Legion, I've tried very hard not to haunt newsgroups dealing
with those topics. I've not once told those in the French Foreign
Legion that I know best how it should be regulated.

> and
> aren't a nice human being in newsgroups.

It isn't nice to let you know when you take a shot at someone's
background, you know nothing of what you write? Awwwwwwww.

>
> What "battle?" Do you perceive "battles?" Tsk.

Do you? You brought up the things safely archived in Google. Allow me
to refresh your memory with the following Len Anderson quotes:

from 1997

"You yield no actual sympathy. What you have just demonstrated is a
need to fight, to battle someone who has opinions opposite to yours.
The subject matters little and is only an excuse to fight."

"Am I avoiding your challenge? Yessir. What you CHALLENGED (in the
heat of message battle) is tantamount to DEMANDING an answer that
will take a couple of man-weeks of effort to generate."

"Whether or not to eliminate the U.S. code test
is a battle between objectivism and subjectivsm.[sic]"

"If Deignan wishes to argue for argument's sake, to do "battle" on the
Internet, he can find many other newsgroups to vent personal hatreds..."

"If the original communicator is passionate in opinion, the opponent is
replied to in-kind and the battle is joined...a flame war is created and

others join in."

from 1998

"CECIL! Shame on you for introducing technical competence in
this religious battle!"

from 1999

"For the purposes of his newsgroup 'battle,' Robeson will not
acknowledge conditions today outside of the 'official' ARRL
publication area."

"It is
readily apparent that the SUBJECT is no longer under discussion,
only another ego wounded in imaginary battle."

from 2000

"Is there to be some wordy 'battle to the death' in the newsgroup
on history?"

"That quickly
turned into a Personality Battle between the Haves (noble,
proud, tenured, morseodist esperts in radio) and the Have-
Nots (evil, slime, CBers who don't know Code)."

"Jeffie, all you've got going here in this new misdirection is just
a personal battle involving a very small part of telegraphy
history...landline telegraphy at that."

from 2001

"Robeson has nothing else in his
discussion-debate-argument arsenal except insults and
exaggerations so each and every 'reply' of his consists of little
more than an obsessive 'battle' comment on personalities."

"From there on, Miccolis wanted a Battle To The Death in a
newsgroup. :-)"

"Kelly cannot understand that,
wants to put words in my messages that weren't there, and
prefers a 'personal battle' (mild, sustained flame war) over
morse code ability."

"This whole thread has disintegrated into a personal battle of
wills over messaging and message contents."

"Well, that may be 'defaming' to barbarian mindsets that
can only 'battle to the death' in insult messages."

from 2002

"Trolling for a word fight on my document submitted to the FCC
and in their database as of 13 January 1999 is frivolous and

immaterial. It indicates only that Miccolis wants to 'do battle'
in words to satisfy his suddenly-prissy attitude over the
double standards employed by PCTAs."

"Lissen up, Masters of Radio! The battle is joined...off your cots and
grab your KEYS! Show them who is BOSS in amateurism!"

from 2003

"You insist on making this some kind of personal 'battle' over some
imagined 'superiority' in amateurism and the 'elitism' as well as
'superiority' of your status, rank, title, etc. in nothing but amateur
radio."

"Lissen up, Masters of Radio! The battle is joined...off your cots and
grab your KEYS! Show them who is BOSS in amateurism!"

from 2004

"Maybe he took the beeper's battle flag motto literally? ("Learn code
or
die!")"

"They keep falling on the field of battle, the ground littered with
pieces
of ham-band-aid wrappings."

"Their need to
triumph over others through that archaic skill (since 1844) is so strong
that they forgo any societal niceties and engage in a battle of words
to the death about it! Dumb. Waste of effort."

"RED ALERT! ALL HANDS TO BATTLE STATIONS!"

"Perhaps you and the other personal-battle "fighters" should
comment on Access BPL to the FCC instead of playing verbal
paintball in a newsgroup?"

"That's what it boils down to...a battle of newsgroup wills."

"Destroying the code test requirement is a never-ending battle."

"This has gotten off the subject of phonetic alphabets. Most threads
do that, given enough Flame Warriors chomping on their bits ready
to do message battle to the death, unable to skip a single message."

It surely looks as if you have some familiarity with the term "battle".

> But, you've never been in the military, don't know what "live fire" is
> about (from weaponry, that is).

Wuz there a lot of that in Japan during your time there, Leonard?

>
> I don't take these things seriously. :-)
>
> It's fun to poke holes in some of the cherished, beloved mythology
> found so abundant in olde-tyme hamme lore.

As someone who isn't involved in amateur radio, I'm sure you know a
great deal of the lore of amateur radio.

> Most of that lore is passed from generation to generation, preserved
> and cherished even though much of it is false...or appears false
> because alternatives aren't presented for modern-day radio.

Groups of old timers often sit around the campfire on crisp Autumn
nights
instructing the newcomers in the old ways. There is much derision of
those who simply can't make the grade. Your name comes up.

> I don't have a "relationship" with olde-tyme hamme raddio...or its
> lifestyling fans.

That's right! You don't have a "relationship" to amateur radio past,
present or future. You're the Ebenezer Scrooge of ham radio.

> I'm just showing what a ridiculous thing the
> morse code test is for a civilian hobby...

What kinds of non-civilian hobbies are there, Leonard? How would you
know about this morse testing "thing"? Is anything you cannot do
"ridiculous"?

> to a bunch of twits who
> still think ARS stands for Archaic Radiotelegraphy Society.

I don't know anyone but you who thinks that the Amateur Radio Service
stands for "Archaic Radiotelegraphy Society".

> If you still believe the morse code test is a valid requirement for
> a civilian hobby of amateur radio, then YOU are the "dysfunctional"
> one, not I.

Sure, Len. It appears that your are the one on the outside, looking in.

> Have fun peeing in your own pool, Coslo. I don't swim there.

Not in the amateur radio pool, you don't. I think Mike means the
r.r.a.p. pool. Here, where you swim, you're one tired, old, incontinent
piranha.

I think almost everyone views the concept of intentionally torturing an
innocent animal as unacceptable. Doing so and recording it is even worse.

The big question for me is - what's up with those three that they would even
think of doing such a thing?

"Glad to be an engineer"
>
> it isn't art, or even close to it.

All depends how you define "art", Mike.

>There is a "con man" element in the
>art world today that seems to want to push the borders with every new
>showing. It is how we get exhibits such as "Piss Christ", exhibits of
>decomposing cow carcasses, and now this abomination. Certainly the
>Christ exhibit didn't harm any helpless creatures, and was mainly
>extremely offensive.

Some folks define "art" as "anything that makes the viewer have an emotional
experience". IOW, if it makes you feel something, it's "art". Since that film -
heck, the *concept* of the film, even unseen - makes us feel something, its
creators think it's "art".

>But anyone that thinks torture is art needs a visit
>from Karma.

And they'll likely get it.

>In the meantime, since there is a element of "art is
>whatever you can get away with" in the art critic world, people try to
>get away with anything.

It did make you feel something, though, didn't it?

>> How is Canada disgusting because of what those three bums did?

>They gave light (almost no) sentences to the bastards.

As Leo points out, here in PA they'd not have gotten worse.
>

>The people who did this should be either incarcerated or permanently in

Hello???

Is that anything like your cutesy-stupid "CQ Magazine as a Membership
Organization" routine?

I'm certain
> that you can read after a fashion; otherwise you'd be unable to respond
> without dragging a family member in for a "what's this say?" session.

When you used the noun "I", as in "I've worked four from the list and
you," I must have wrongly assumed that you meant yourself, as in David
Heil.

Did you use surrogates at your DX operations?

> Take your time in digesting the material. Soak it all up. Absorb it.

No thanks. Your material is toxic.

> I've never sent a "David Heil" QSL.

Given that you have a QSL Manager, I suppose that is possible.

All my operations have taken place
> from a given spot with a given callsign.

Try mobile operation sometime, Oh Greatest of Hams!

> How about a lengthy yarn about your operation as T5/Brian?
>
> Dave K8MN

How about a ditty on "how to" on snagging rare, out-of-band, French
Hams on 6M?

Sheesh! I think you are more indignant about working me on HF than
you were about me leaving you off of the A1A Op list. Doesn't matter.
You'll always find something to become indignant about.

Best of Luck

All we'll do is confuse this idiot with the truth, Brian.

Leonard H Anderson is a lying, decieving antagonist with no intent other
than to create as much hatred and distrust as he can.

He's a creep of monumental proportion.

Anyone who "admires" or takes after him is as monumentally creepy and
idiotic. I think his actions and words speak for themselves.

Pretty good stuff, Dave.

Nice job.

It's just like the Lennie/PuppetBoy duo to actually QUOTE a link that
DISPROVES thier very assertion contained within that post.

What an idiot.

3512. Re: ARS License Numbers

Newsgroup: rec.radio.amateur.policy
Date: 2004-09-16 14:01:17 UTC
From: N2EY@AOL.COM
Message-ID: <c2356669.0409160601.5fda863b@posting.google.com>
Source record: 97188

These are the number of unexpired FCC ARS
licenses held by individuals on the dates listed:

As of May 14, 2000:

Novice - 49,329
Technician - 205,394
Technician Plus - 128,860
General - 112,677
Advanced - 99,782
Extra - 78,750

Total Tech/TechPlus - 334,254

Total all classes - 674,792

As of September 15, 2004:

Novice - 30,349 (decrease of 18,980)
Technician - 263,613 (increase of 58,219)
Technician Plus - 56,802 (decrease of 72,058)
General - 138,738 (increase of 26,061)
Advanced - 78,765 (decrease of 21,017)
Extra - 105,727 (increase of 26,977)

Total Tech/TechPlus - 320,415 (decrease of 13,839)

Total all classes - 673,994 (decrease of 798)

This is the first time a decrease in the total number of individual
licenses has been observed since the restructuring of April 15, 2000.

Of course, Dave.

If you and I make a "mistake", we're expected to "retract" what we've
said, issue apologies, and otherwise turn tail and hide for our errors...

Brain, of course, even after having been proven wrong with his OWN post,
issues what can only be called a lame, insincere "So Sorry".
```

Just more proof of my assertions as to his weakness and lack of manhood.

As if there was ever any doubt.

He's not "AUTHORIZED" to emit RF >>OUTSIDE<< the U. S. Amateur Bands as a civilian, either, except under the auspices of someone else's STATION LICENSE.

So sayeth the FCC.

> Your opinion on the issue does not matter.

Only becasue his "opinion" is usually NOT based upon practical experience or facts. A bad combination.

> Our opinion on the issue does not matter.

Sure it does! It is from the perspective of practiced and experienced knowledge.

> FCC's opinion on the issue does matter.

And they stated it right there on HIS license. No station license, no "operating". No ambiguity at all.

3519. Doing Battle? Can't Resist Posting?

Newsgroup: rec.radio.amateur.policy
Date: 2004-09-16 14:53:29 UTC
From: k4yz@aol.com
Message-ID: <20040916105329.03671.00000736@mb-m04.aol.com>
Source record: 97195

Hmmmmmmmmm.......

Just came back from a 2 day out-of-town assignment to find 126 RRAP messages pending.

When I did the math on the one's that WEREN'T in the filter file, over 70 of the posts were from one of three posters...WA8ULX, Lennie or Brain. Theya re the only three I have filered. That way I can read the meaningful stuff first.

WA8ULX was NOT in any of the posts, except by mention of another.

That put all 72 in the laps of Lennie and Brain.

Why do I make mention of this?

Probably because it's Lennie who insists that no one here posts "on subject" and only post to "do battle". Interesting, considering his flagrant, frequent attacks on "Jimmy", "der Oberst" ,"Dill Sergeant", "Mama Dee" and others.

The other is because last month Brain stated others "can't help yourself, you have to respond...".

Guess they have a hard time with objectivity, not that we had any doubts.

Interesting. Someone needs to make it clear to the overall population that with the reduction of the code requirement to 5wpm across the board (none for Tech) that they were supposed to jump into ham radio in overwhelming numbers and lead to magnificent growth in the number of hams.

Jim, any way to determine whether the decrease is due primarily to drop outs or to silent keys?

Dee D. Flint, N8UZE

Exactly, Mike!

Freedom of speech means Len can post all sorts of stuff here.

Freedom of choice means I don't have to read all of it.

Experience and common sense tells me that the content of his posts isn't worth
my time.

The only way to determine that for sure would be the SK lists in QST.
Even if a license is returned to the FCC by the NOK, it will still be posted as
"CANCELLED". The FCC doesn't state why.

The database does distinguish between canceled and expired. Unfortunately, this doesn't help. Expirations occur due to lack of action by the ham at renewal time but the ham can be living or dead. Cancellations occur due to action on the part of someone but that action can be by the ham, next of kin if deceased, or the FCC as a penalty.

I don't think the SK list would necessarily be that accurate. Someone has to send them the info before they can publish it.

hmm, maybe. *Your answer* is what needs explaining. If I don't care
about your mode, nor Steve's mode of expression, and you two are on
opposite sides of the discussion, I need an explanation of why that
means that I have a double standard.

> thereby showing the PCTA extra Double Standard!

Now this ia a bizarre conclusion. I do not condone violence against anyone. If he does or does not threaten violence against you, or you do the same with him, does not affect the co-dependent relationship you have all developed. It only shows the true nature of the co-dependance.

>

No denial needed here, Mike.

Lennie and Brain have both asserted that I "can't help myself" from responding to their trash, but some quick math will show that they are up on me at least 4-to-one...Both of them frequently "divide" one of my responses into several for responding purposes, making several "responses" to one post.

I do nicely without them. I wish they'd both go away...Not because of thier differing opinions, but rather because neither of them can work on getting thier "point" across without being mistruthful, abrasive or out-and-out deceitful.

Putzii.

Nah, you know full well that Cecil dogging-proof Burke. If the results
of that nite had anything to do with his change in thinking, which I
seriously doubt, it was because us coders did real ham radio with him
and not your "RRAP is my ham radio" nonsense.

> > > You guys dogged the poor bastard so much that he risked his property

**There it is Burke. Blaming your little kids for not being able to
get on the air.**

**By the way, did you take yer kids to T5 and couldn't put up an
antenna there either? ? Izzat why nobody ever worked NoMind/T5?**

Ya flaming nitwit, you had no clue what an inverted L is until myself
and others patiently and labororiously explained it to you over many
early posts in this thread before you finally got the drift. That
ain't gonna happen agn on my part. At which point you finally decided
an L wouldn't be a solution for you. If you had half a brain you would
have posted a request for advice on antennas at the outset and
provided the specific installation limitations you have which you
eventually revealed late in this idiotic game. Ed asked you what your
installation conditions were but you ignored his offer and went back

to mindlessly hammering yer keyboard here instead.
>
>
But of course as we all know you don't have half a brain so
predictably your history has repeated itself. Somebody gotta be the
dunce around here so I guess you'll hafta do until Kim "un-retires"
from RRAP agn.

> Brian, have a nice life.
>
>
Been there, done that, great life this, HF antennas being the
no-brainers that they are.
>
>
Oh, and by the way: I had a 135' L up for decades. 110ft x 50ft urban
lot. Tuner was a couple feet above grade in the back yard. Could get a
1:1 match outta the thing on any freq between around 3 to maybe 15 Mhz
by simply twisting a turns counter in the shack. Glomed 40% of my
5BDXCC with that inverted L. Not a tree in sight either.

During those decades my three daughters arrived and grew up with that
tuner in their back yard. The yard was kid magnet, pool, monster
homebrewed swingset, homebrewed 8' x 16' sandbox. There were times
when I counted 15 and more of the 2-10 year old set going at it only a
few feet from the tuner.
>
>
I'd "kid proofed" the tuner. Involved some intelligent design. That
drops you outta any further discourse on the matter. Stick to rubber
duckies Burke, everything else is over your head. What little there is
of it.
>
>
> 73, Brian
>
>
w3rv

- - - -

You can wriggle and you can squirm Burke but you can't help hanging yourself by your own petard, you were born to shoot both of your feet as often as you can in public. That's just the way you are.

w3rv

When I read your post comparing yourself to the "guy that runs in the
room and takes swats at the Pii¿½ata, I figured you out, as well as had a
good laugh - the visualization is priceless. But that told me a lot.

I've noted that you will be just as civil as you are treated.

I don't always agree with what you say, but that hasn't been a problem
between us, has it.

I've not had any particular trouble with Brian, but the other half of
the duo obviously has trouble with me, despite my refusal to get down in
the mud with him. just in his last couple posts to me, I'm accused of:

being mentally deranged from head trauma
smoking an apparently controlled substance
Having some undefined "problem

possibly called a schmuck

hmmmm, civil discourse indeed!

I'm firmly convinced that if they were to go away, or to start posting in a civil manner, it would be just fine with you.

But I don't think the reverse is true.

>> one, not I.
>
> If you wish to believe that, go right ahead.

No "belief" necessary.

The FCC doesn't believe it...every other radio service doesn't believe
it.

Those who believe it are just olde-tyme hamme raddio jocks who
managed to pass high-rate morse and Demand Respect as "radio
ops" for having done so.

They've managed to create the Archaic Radiotelegraphy Society
(ARS) that keeps trying to recapture the "pioneering days" of a past
that existed before they were born. [they get very angry if one
doesn't respect their meeting 1934 standards and practices in the
year 2004]

>

>
> This group is the pool I speak of, and you are the majority poster, so
>I'd have to say that you are swimming in the deep end. 8^)

No problem. Sooner or later some agency will install cleaning and
filtrating equipment to sanitize whatever area you PCTA have
polluted...by yourselves.

Like all agencies, that sanitizing installation may take time. But, it
will eventually happen. I'm not worried about time...but such
sanitizing is long, long overdue.

I've had a full career in radio-electronics and am happy for the experience.
[not to mention monetarily independent] Never once in a half century
have I been required to learn or use morse code for any communications
purpose...nor even have to obtain an amateur license in order to show
"interest in radio." Hi hi.

The regulatory end of the amateur radio "pool" needs some sanitizing.
If nothing else, it is clogged with outdated debris from long ago that
makes it sluggish, slow-moving. All that seems to keep it moving is a

lot of fraternal-hall emotional rah-rah of everyone saying how "good" they are for performing the same job tasks outlined long ago.

Amateur radio is a hobby. It isn't a job, isn't a guild, isn't a union, isn't some sort of para-military "service" that is essential for national security. It is regulated by a federal agency which does not require a single agency staffer to have any amateur radio license.

Hobbies are supposed to be fun. I don't see much "fun" in this particular wading pool...just a bunch of very angry PCTA calling names and demanding strict adherence to their particular brand of "fun." Tsk.

In article <4149CC0D.8050201@psu.edu>, Mike Coslo <mjc5remove@psu.edu> writes:

>I'm firmly convinced that if they were to go away, or to start posting
>in a civil manner, it would be just fine with you.
>
>But I don't think the reverse is true.

Tsk, tsk. Hypocrisy is the watchword of the PCTA extra Double
Standard.

Here's some quotes of the "civilized discourse" of another PCTA:

==========
Ya flaming nitwit, you had no clue what an inverted L is until myself
and others patiently and labororiously explained it to you over many
early posts in this thread before you finally got the drift. That
ain't gonna happen agn on my part. At which point you finally decided
an L wouldn't be a solution for you. If you had half a brain you would
have posted a request for advice on antennas at the outset and
provided the specific installation limitations you have which you
eventually revealed late in this idiotic game. Ed asked you what your
installation conditions were but you ignored his offer and went back
to mindlessly hammering yer keyboard here instead.

But of course as we all know you don't have half a brain so
predictably your history has repeated itself. Somebody gotta be the
dunce around here so I guess you'll hafta do until Kim "un-retires"
from RRAP agn.

You can wriggle and you can squirm Burke but you can't help hanging
yourself by your own petard, you were born to shoot both of your feet
as often as you can in public. That's just the way you are.
==========

From someone named "W3RV" in this latest group of "pool" mail.

I don't find going back through Google to endlessly rehash old, old
newsgroup "battles" where the long-ago wounded are still suffering
suppurating ego damage. Since this was in the current newsgroup
mail, the hypocrisy of "civil discourse" was funny... :-)

In here, the discourse of the PCTA should really be spelled
"Diss-curse." Hi hi.

Just for starters. Actually I've lost track of how many different names Len has made up for me. Seems he just can't bring himself to call me "Jim" or "N2EY", even though I call him "Len" or "Mr. Anderson".

But Len and Biran get you to call them "Putz", "Loser", "Brain" and "PuppetBoy", just for starters. Which is probably their entire game, really.

Or maybe it wasn't the code test after all....
>
>Jim, any way to determine whether the decrease is due primarily to drop outs
>or to silent keys?

Not really. Here's why:

1) The "Silent Key" listing in QST isn't necessarily complete nor timely. Many hams pass away and are not recorded in that column, because it depends on proper documentation. Which also takes time.

2) FCC also requires documentation to cancel a license due to death. So unless somebody sends in the right paperwork, the license is simply allowed to run its term. In an extreme case, a ham could send in renewal paperwork, pass away on the way home from the mailbox, and yet be carried on the FCC database for 12 more years - 10 of them as an active licensee.

3) Changes in the renewal process and the 10 year license term mean that many hams are unwittingly letting their licenses expire, then renewing in the grace period. You only have a 90 day window at the end of a 10 year term to renew without being counted as an expiration. (Of course you have two years to reup after the license runs out, and you'll get the same call, etc.)

Strange that we're not allowed to know another country's rules and
regs of amateurism, but now miracuously Steve Robeson does. Maybe
Earnest Angely said a prayer for Steve.

> So sayeth the FCC.

I'm sure there are some French Six Meter Ops that could help him out.

Perhaps David Heil could make the introductions.

Steve, then I guess it won't suprise you when I tell you that I'm not Cecil.

I wonder where Darkguard and Quitefeind have been?

Don't be stupid, Steve. Ooops, too late.

I did issue an apology after I finally found out what the problem was.
If only David had been up front about what he wanted...

Instead, he whined and whimpered for a week.

Yes, what an idiot. Where did I say that I didn't say it? Even at
the time I made the mistake, once we figured out what David's hemming
and hawing was all about, I apologized for it. What an idiot, indeed,
Steve.

Always.

One of my most productive "people skills" at work is putting a foot
forward to make people comfortable and allay thier fears. Not only the
patients, but thier families, too. You'd be surprised how the offer of a
simple cup of coffee or a soda can put people at ease.

>I don't always agree with what you say, but that hasn't been a problem
>between us, has it.

Nope. And I seriously doubt it ever will, Mike, if for no other reason
that you, like most of the folks here, can agree to disagree without having to
delve into the antics of Lennie the Liar and his oblivious sidekick, PuppetBoy.

>I've not had any particular trouble with Brian, but the other half of
>the duo obviously has trouble with me, despite my refusal to get down in
>the mud with him. just in his last couple posts to me, I'm accused of:
>
>being mentally deranged from head trauma
>smoking an apparently controlled substance
>Having some undefined "problem
>possibly called a schmuck
>
>hmmmm, civil discourse indeed!

Of course.

And we've all been treated to the "one of the guys" routine byt Lennie
until he's decided that you will not be his serf. He called me "Steve" and
"Gunny" until it was clear that I thought that Amateur Radio had much more it
could benefit from Morse Code use and testing.

I still believe that Morse Code testing would benefit Amateur Radio,
however the die has been cast and it's time to move on. I think Lennie hates
that of me more than he hates the fact that I can go toe-to-toe with his
assinine antics.

>I'm firmly convinced that if they were to go away, or to start posting
>in a civil manner, it would be just fine with you.

Yes, it would.

And in those times where either of them have been civil to me and weren't
making outrageous, obviously flawed statements either about Amateur Radio in
general or me in particilar, I have treated them accordingly.

The problem is Lennie WANTS to fight, and Brain just doesn't know any
better.

>But I don't think the reverse is true.

About four months ago (give or take) Brian (since he was being civil at
the time) and I had several exchanges wherein we discussed his autistic child
and other such matters. It lasted about as long as it took for Lennie to rear
his head again after a brief sabbatical, and then it was right back to

"YellYell", "Murine", etc etc etc...

Once in a while Lennie throws us for a loop too. Once I posted an "Off Topic" request looking for a particular aircraft model. "Len" offered a couple of suggestions where it might be found. I relplied to "Len" with a heartfelt thanks for his suggestions. His very NEXT post, however, was a scalding chastising for being "off topic", etc. "Off topic" now that he'd had a chance to have HIS say, of course, and now it was time to put the gloves back on.

The same thing happened when I was looking for a radio handset. "Len" offered a suggestion as to where to look, but then "Lennie" went off on a tirade about militias, the CAP, and being a "sojer in da woods".

Lennie can't stand being nice for very long. It's not in his character. It's probably why his average job was about 24 months (according to one of the many "CV's" he's listed here).

It's unlikely to change, Mike. Myself and others have tripped Lennie up with his own errors and rhetoric so often that now I am sure it's a matter of "pride" for him to continue to be "the victim". As long as he can portray himself as "odd man out" rather than just the "odd man", he thinks he's got a leg up.

The leg up is just so he can get a clear shot at whizzing on the bushes. Don't be fooled.

73

Not really, not much. But the CAP pilot wants us to think so. Makes him special.

What "other country", Putzy Jr?

I've not said a single word about another country's "rules and regs of
amateurism".

The context of the posts were directly related to your mentor's lack of
legal authorization to emit RF inside or outside of the US Amateur Radio bands.

(Certain FCC exceptions to authorized unlicensed operation not withstanding).

Waiting for you to show us where you got the "another country's" business from. I say you just shot your mouth off without thinking.

ERROR WILL ROBINSON! ERROR!

You tried to drag Dave around byt he nose with that "A-1 Operator" stuff
for the longest time.

You continue to do other assinine things without thinking them through.
Your post in another thread about me allegedly knowing other country's radio
regs being one of them.

Classic Brain.

Yep - and they're relatively few.
>
>I don't think the SK list would necessarily be that accurate. Someone has
>to send them the info before they can publish it.

Because of some really poor attempts at practical jokes, both ARRL and FCC
require some particular paperwork to consider a ham truly SK. Thus a
cancellation and/or SK notice may appear quite a while after the ham has gone
to the Big Hamshack.

It really just makes you feel weak until all of your "cutesy-stupid
genes" have been altered.

> > I've never sent a "David Heil" QSL.
>
> Given that you have a QSL Manager, I suppose that is possible.

Never one, with or without a QSL manager. Have you sent QSL's using
your name rather than a callsign?

> All my operations have taken place
> > from a given spot with a given callsign.
>
> Try mobile operation sometime, Oh Greatest of Hams!

I do that about five days per week. "K8MN/M, Marshall County, West
Virginia" or "K8MN/mobile, Belmont County, Ohio" or "K8MN/mobile in
Wheeling, West Virginia" all work just fine.

> > How about a lengthy yarn about your operation as T5/Brian?

> How about a ditty on "how to" on snagging rare, out-of-band, French
> Hams on 6M?

I've never operated using my name as a callsign. My operations from any country on any band, when working any Frenchmen have been totally within regulations of the applicable governing authority.

> Sheesh! I think you are more indignant about working me on HF than
> you were about me leaving you off of the A1A Op list. Doesn't matter.
> You'll always find something to become indignant about.

There is no A1A Op list. You screwed up when you first posted the material. You told untruths when you recently brought up the topic. You acted as if you didn't believe I could unearth the original post (that must've cost me ten or twenty seconds) and you've gotten the name of the club wrong now. Being indignant has naught to do with it. Keeping you honest has been the problem.

Sure we do.

We don't all wait for months and then fabricate a story about the event which led to the necessity for the apology as you've done over the past several days.

It doesn't much matter, Dave.

Brian has already shown that he doesn't assimilate new lessons well.
He'll go right on ahead and shoot his mouth off again over some other easily
refuteable item and then spend MORE weeks dodging his errors.

"Unlicensed services provide a major role in emergency comms", for one.

Hope this stuff misses you guys farther north. Power's off in the county
west of me, and I can hear emergency crews south of Huntsville working on
flooding issues and power outages...

Ivan was one tuff SOB, that's for sure!

>
>I can be Quiteobjective. Try me with some rational discourse.

More like "Quiteobjectionable", Brian.

And try the "rational discourse" yourself. Start with some validation of your "Unlicensed services play a major role in emergency comms" assertion.

The "Code Test" has not been an issue for over 35% of the Amateur
community for over 13 years now, Brian.

Had you been paying attention...

Steve, K4YZ

Notice that I'm not interested in an antenna that is ground mounted.

> > > The 1/4 WL flattop is supported, typically, between two trees. The 1/4
> > > vertical portion drops straight down the tuner from one end of the
> > > flattop. Do you have ANY literature on ham antennas??

So your tuner is just hanging by the vertical part of your inverted
"L," blowing in the wind?

> > Brian, you must still be thinking that I live in your house in Philadelphia.
> > I don't have trees in my yard. Its newer construction with a few ornamental
> > trees. But I mwentioned that already.

Didn't I mention that already?

> > And it drops straight down to the tuner, huh?

I still think you have something mounted to the ground within reach of
small children. Bad dad.

> > Didn't I tell you that I have small children and don't want a ground mounted
> > antenna? (YES)

Yes.

> **There it is Burke. Blaming your little kids for not being able to
> get on the air.**

Blaming? You're a fool. I safeguard my children.

You probably had yours climbing the two trees that supported your
inverted "L." I said that I didn't have two trees, didn't have one
tree, and that my house has aluminum siding and I didn't want a wire
radiator running up the side of my house against the metal siding. I
didn't want a ground mounted antenna where the kids could touch it.

I >>>did<<< say that I wanted an end-fed that I could mount one end to
my chimney, and the other end to my back fence,

But no, you kept insisting that your inverted "L" was my answer even
though I said it wasn't.

My endfed works just fine - thanks for all of your advice and help.
;^)

> **By the way, did you take yer kids to T5 and couldn't put up an
> antenna there either? ? Izzat why nobody ever worked NoMind/T5?**

You may be on to something there. I didn't install the antenna that I
used in Somalia. Hi, hi!

And you're welcome to take your children on a tour of wunnerful,
sunny, Somalia anytime you feel like endangering them more.

> Ya flaming nitwit, you had no clue what an inverted L is until myself
> and others patiently and laborioriously explained it to you over many
> early posts in this thread before you finally got the drift.

I was introduced to the inverted L for 160/80 meter use by Steve Sears
in Illinois. He had the power company install some extra poles in his
yard to support it. My yard doesn't have power poles either, we have
underground utilities.

The drift that didn't get gotten was that I didn't want your inverted
L antenna and but you kept pushing it on me.

You just didn't get it then, and still don't get it now.

That
> ain't gonna happen agn on my part.

Oh Thank GOD!

At which point you finally decided
> an L wouldn't be a solution for you.

Hi, hi! You finally got it!!!

A day late and an insulator short.

If you had half a brain you would
> have posted a request for advice on antennas at the outset and
> provided the specific installation limitations you have which you
> eventually revealed late in this idiotic game.

Wrong. In your typical blowhardt fashion, you busted onto the scene
with all the advice that I didn't need or want. It just didn't fit my
circumstances. But you knew better and kept hammering on and on and
on.

Ed asked you what your
> installation conditions were but you ignored his offer and went back
> to mindlessly hammering yer keyboard here instead.

Poor Ed. He got ignored.

> But of course as we all know you don't have half a brain

Correct. I have a whole one.

so
> predictably your history has repeated itself. Somebody gotta be the
> dunce around here so I guess you'll hafta do until Kim "un-retires"
> from RRAP agn.

More Extra civil discourse?

Have a nice life.

And that had what to do with my statement to Steve? W3RV is Brian Kelly. How can we have meaningful discussions when you keep bringing in new material of unknown relevance?

After the rules changed, he said that reduction to 5 wpm for all classes was enough. He resigned his membership in NCI and soon after reduced his participation here. He's still around in rraa but not nearly as much as before.

Who knows? Cecil's certainly the kind of guy who would argue for something just to argue. He said so himself.

Point is, he did not change his views because anybody "dogged" him. He doesn't work that way.

You missed the point, Mr. Kelly.

The whole antenna discussion was a classic example of the N0IMD shaggy dog discussion method.

This method consists of Mr. Burke telling us something that appears simple, such as his antenna dilemma. Others offer solutions, he gives reasons why those solutions won't work. This is done one little piece of info at a time, using up lots of time and bandwidth.

I did a search back in that exchange and found a couple of interesting end-fed antennas. Posted all sorts of info here. One design used coax and no tuner to end-feed a wire - very interesting design. But none of them were suitable, according to Mr. Burke. I soon realized that he could have done the search himself, and found a workable design - if he was really interested in putting up an antenna.

>But of course as we all know you don't have half a brain so
>predictably your history has repeated itself. Somebody gotta be the
>dunce around here so I guess you'll hafta do until Kim "un-retires"

>> Let me read a little further and see what else you don't get.
>>
>> We're still waiting . . .

>>
>> > > Why do the other people on here put up with your shitty little answers?

See? *Your* information is "shitty little answers" but *his* lack of
research and information is OK. Now *you're* the bad guy, because you
can't solve his problem by remote control, given only inadequate information.

All depends what you think the goal is. You're thinking the goal is to put up
an antenna. It's not.

Hello, Mike

What makes you think that the United States has the patent on sanity
(LOL)?

They just arrested a Monroe County deputy on child pornography
charges. He admitted that he had the pornography and resigned.
Charges are pending (BTW, Rochester is in Monroe County).

Then there is Michael Jackson. Of course, he is presumed innocent
until proven guilty. No further comment.

Sigh ... I think I'll fire up and chat with a friend, Bill, VE7DTM in
Quesnel, British Columbia - either Bill or Dave, VE7DGL in Nasko, B.C.
I won't mention your thoughts tho - ;)

Best regards from Rochester, NY
Jim AA2QA

>I can be Quiteobjective. Try me with some rational discourse.

The PCTA's only "game" is that they've lost at validity of keeping
a morse code test and try to "get back" at NCTA using all manner
of personal insults and denigrations.

"Rational discourse" to the PCTA means having to like morse
code...anyplace, anytime.

Speak the least thing negative about morse code and the PCTA
immediately go ballistic, holler and shout that NCTA are

"insulting their honor" (or whatever they bitch about du jour).

Boils down to that in here.

Seems to me that the PCTA code lovers should be on their radios happily beeping away...instead of sitting at keyboards snarling nastygrams at any NCTA within sight or hearing. :-)

Hi hi.

It really doesn't mean diddly squat what it seems to you that radio amateurs should be doing. You aren't one of them. They can operate or not. They can use morse code or not. They can post here or not.

You, on the other hand, have little to do but post--what do you call them--nastygrams?--in a newsgroup dealing with something in which you play no part. :-)

The tired, old, incontinent California landshark can't help being what he is. Keep a stiff dorsal fin!

"Jeff, you've never been under Incoming, have you? While
trying to get return artillery support on a radio while your
ears, your whole body is numbed by HE infall on your
position? Most folks in that position don't wet their
pants...every sphincter tightens up, ears go deaf, eyes
close tight, and every breath may be the last."

--Len Anderson, 2000

:-)

Well, you aren't *exactly* claiming it. You described the terror of being under incoming artillery without explaining that you'd never actually been under any. Perhaps you should have ended that now famous paragraph with "...or so I've been told".

Come to think of it, that spiffy illustration sort of parallels your amateur radio experience, doesn't it?

How many minutes flying time were you from death by Soviet Bears were you?

Hello Steve!
I couldnt resist writing a Haiku based upon your experiences during
the Ohio winters. I'm glad you liked it. Here is another Haiku.

Winter is coming.
I dream of working Top Band.
Time for a new rig.

> I still think you have something mounted to the ground within reach of
> small children. Bad dad.

For the record: I sank a length of 2" steel pipe into the ground
against a fence. I bolted the tuner to the pipe at adult eye level.
The tuner and pipe were grounded via an 8ft ground rod. The vertical
portion of the end-fed wire above the tuner was fully insulated
electrically to the 10ft AGL level. We didn't have many ten foot kids
hanging out in the Kelly family's back yard sandbox in those days.

> My endfed works just fine - thanks for all of your advice and help.
> ;^)

Wunnerful: Time to cut your crap here Burke, it's time for you to put
up or shut up with your endfed wire. At the moment I can most
conveniently get on 20 & 40 ssb. Or with a bit of work on my part any
other band of your choosing.

Gimmee a date/time/freq and I'll be there.

Oh yes, the classic "sphincter post". You shoulda posted the whole thing, Dave
- it was classic how Len tore into Jeff/KH6O's recollection of experiences in
big-time radio. (If running 500 kHz at NPM, handling all sorts of traffic,
weather and SOS operations wasn't big-time radio, nothing was).

>Well, you aren't *exactly* claiming it. You described the terror of

I just read a David Heil post where he thinks you shouldn't suggest anything. But I can recall post after post after post scolding me for spending my spare time on RRAP rather than with a code practice oscillator.

These guys are PCTA, and exhibit the PCTA double-standard at every opportunity.

Lennie doesn't HAVE a "Double Standard" that he can use as an example,
Mike. That's why he dodged answering your post.

>>> Nope, I took the summer off to rest a torn meniscus. Takes longer to
>>>heal as time marches on.
>>
>>
>> Who filled in under your name in here "all summer?"
>
> What are you talking about?

You'll have to forgive Lennie...If you posted even once in that time
period, he assumes that you anxiously devoured each and ever word he wrote as
if there were no other nourishment to be had.

>>>> Or you may be smoking some "good stuff" that Bob Casey said I

Of course. "The Dodge" (not the automobile). A typical Lenniesque
diversion from having to acknowledge a comment which might embarrass him.

>> Tsk. You should get a subscription to Psychology Today and
>> fill yourself in on what "relationships" are.
>
> It is okay. This happens all over Netnews. Don't let it bother you too
>much.

This is where Lennie gets most of his "education"...Periodicals that his
wife subscribed to...Of course he'd have everyone here believe that it was HIS
education that carried the day.

>>>Now this ia a bizarre conclusion. I do not condone violence against
>>>anyone.

>> But you made no comment on his implied threats.
>
> Nor I to you on your's to Dan Jeswald. That's between you and Steve,
>and you and Dan. Making threats is bad and makes for bad karma.
>
> Why do you want to dictate the content of my postings? Want to be the
>moderator?

No threats were made. (By me, anyway...) Of course Lennie's quick to
want to be the victim, and to absolve himself of the fact that his antics and
behaviour here invoke that kind of mischeviousness in others.

>> Tsk. If you want to think someone who works Frenchmen out of band
>> on 6m is "correct," then feel free...
>
> Thanks for the chuckle. I *really* didn't expect that! 8^)

How many Frenchmen has Lennie worked?

And did DAVE operate illegally?

>>>> But, you've never been in the military, don't know what "live fire" is

>>
>>
>> Tsk. Another "hostile action" hero claiming what? :-)
>

>No hostile actions.
>
>> Sounds very rank to me...
>
>and no rank.

Lennie loves to berate othrs for "assuming", "rank and priviledge", and
swears he does NOT berate others for thier services regardless.

The above, of course, proves him to once again lying, but then hey, after
the first 20 or 30, who could keep track?

>> They've managed to create the Archaic Radiotelegraphy Society
>> (ARS) that keeps trying to recapture the "pioneering days" of a past
>> that existed before they were born. [they get very angry if one
>> doesn't respect their meeting 1934 standards and practices in the
>> year 2004]
>
>any more?

The only one here, of course, who is trying to deamnd stagnation at any
point is Lennie himself. His entire world pivots around 1950's era Japan and
his "career" as a radio mechanic at ADA.

None of us who have been licensed more than 3 years has any doubts about
the changes that occur frequently in our Regulations.

Leonard is AGAIN lying. Or even worse...fantasizing.

>> I've had a full career in radio-electronics and am happy for the
>experience.
>> [not to mention monetarily independent] Never once in a half century
>> have I been required to learn or use morse code for any communications

>
>Oh good, we're going on another side trip. It is good to hear a success
>story. Hopefully you give thanks for every day that you don't have to
>use Morse code... 8^)

Yes...the "side trips" are frequent and colorful for Lennie. Of course he
screwed up by being so "detailed" in one of them...Gave me enough information
to go to afriend of mine whoi was a career engineer at one of the places he
(Lennie) "worked" at...The ensuing conversation was enlightening.

>> Amateur radio is a hobby. It isn't a job, isn't a guild, isn't a union,

>> Tsk.
>
> The anger is there, and it is real. Perhaps there is some confusion as
>to just *who* is feeling the anger.

There's no doubt about who's feeling the anger, Mike. It's not you or I.
We're on thie air every day, enjoying the priviledges bestowed upon us by the
FCC.

Anderscum is a very bitter, angry and disappointed old man, and he's
intent on taking his inadequacies out on Amateur Radio, for what ever reason he
thinks we "owe" him that.

He's just pitiful.

Excellent of job of being a jerk and clogging up the ham bands with broadcasting garbage.

Odd. Very odd.

>
> Never one, with or without a QSL manager. Have you sent QSL's using
> your name rather than a callsign?

Do your cards not have you name on them?

Just by coincidence, my QSL cards have both my name and my callsign on
them!

Plus the other usual stuff like my address, county, grid square, etc.

> > All my operations have taken place
> > > from a given spot with a given callsign.
> >
> > Try mobile operation sometime, Oh Greatest of Hams!
>
> I do that about five days per week. "K8MN/M, Marshall County, West
> Virginia" or "K8MN/mobile, Belmont County, Ohio" or "K8MN/mobile in
> Wheeling, West Virginia" all work just fine.

Then you shouldn't give misleading information such as, "All my
operations have taken place from a given spot..."

Another ham on rrap would have called you a liar for that.

> > > How about a lengthy yarn about your operation as T5/Brian?
>
> > How about a ditty on "how to" on snagging rare, out-of-band, French

> club wrong now.

No. I think I my original premise was right. Some amateurs are nice guys and deserve to be on that list. Then there are others who are jerks and shouldn't be on that list. How you got on it is a mystery to me, but I do stand corrected. You did get on the list somehow.

> Being indignant has naught to do with it. Keeping you
> honest has been the problem.
>
> Dave K8MN

Your cutesy-stupid routine and acting indignant is wearing a little thin.

Best of Luck.

This may sound odd, Steve, but the side trips *are* really my favorite
part of Lenover21's posts. That above sample wasn't all that good, but I
always like to read or listen to old timers stories. I am very
interested in radio history.

As for the rest of the content..... sometimes okay, sometimes not... 8^)

I believe so. I have always tried to keep the tone civil, and yet that
seems to anger him. I have been known to point out when his reply to
something makes no sense to me, but perhaps that is my own stupidity,

no? Yet he is angry with me.

> Anderscum is a very bitter, angry and disappointed old man, and he's

> He's just pitiful.

It *is* sad. I think that Lenover21 has much to offer, and yet ends up
alienating those that may be able to benefit by what he has to offer.

But there is still time, and there is still hope.

The bottom line is that Cecil and many others are ahead of the power
curve as usual but thee and me and a few other PCTAs are silly enough
to still hang out around here. This USENET group was a huge deal back
when the code test flap was The Big Thing. Which at this point is a
dead topic since the code test is obviously not going away within any
visible timframe if ever. So Cecil, Hare, innumerable others and even
Carl Anderson for cripes sake, the Honcho Maximo of NCI wised up and
bailed out of here long ago leaving us to bicker mindlesssly,
circularly and endlessly with dim lights like Burke and the other
Anderson. WE'RE the RRAP stupids for bothering with any of it
Miccolis.

> >> > Sorry you weren't there to join that exercise

> >
> >Congratulations Burke, you finally got something right.
>
> All were invited. Some of us showed up. And some of us have worked since.
>
> Remember that FD when you worked AC6XG on 20 CW?

Sure, whatta hoot. What was is it . . midnight or so at that hopeless
Clayton Park FD fiasco . . ? 20 had been slowly petering down all
evening and I was in a hurt for Qs but then suddenly the Ether perked
up and there was Jim big and bad at 40wpm. I'll do you a favor and not
get into a description your dismal encounter with my Kent paddles . .

heh . . !

Logged him.

Refresh me here James, I think it was around the time that I logged XG that I/we started to hear a lot more signals from very far off places than I/we could hear from US FD stations. So to hell with FD, let's get back to basics and go dxing I sayithed to self. Worked the JA who was in some other contest. Logged him too. Apparently Newington did not disallow that one. They simpy doan give a shit abt FD logs good or bogus. Then came Balch who finally waddled in out of the gloom of the parking lot (two hours late as usual) to take over the seat and rolled his eyes heavenward when he was copying my Q with the VK2 blaring all over the park from the 940 spkr.

. . worked the German and then the Peruvian but that was it, thus I blew a one-hour midnite FD WAC for the lack of a Q with an African. RATZ, not a ZS6 anywhere to be found!

All of 'em, I believe we agree (but check me), were worked with radiation from the shield of the coax which fed Robert's triband Mosely aircooled dummy load upon high.

I have not gotten into this topic previously anywhere with anybody because several years later it still pisses me off the extent that I can still easily go too ballistic about it and post fodder which anti-hams would just love. But fuggit, I gotta get it off my chest and let the chips fall where they might.

I don't remember which of those three Clayton Park debacles we did together but during one of 'em it was well after sundown, very late, most of the usual crowd had gone home, activity was down and I was grinding away but going nowhere in a hurry. I took a break for a pit stop. On my way back to my seat I first passed a group of the usual collection of hardcore neighborhood repeater dwellers we both know bullshitting abt nothing as usual. A few feet later there was young guy who was clearly having odd problems with the HF xcvr he was using, some POS or another. So I asked "Are you having problems guy?" "Yes I am".

The guy was blind, he was not familiar with the POS "they" finally scheduled him to operate after everybody else had gotten their jollies off with it earlier at their convenience but he could not diddle it's controls and get it on the air. I sat with him for some length of time, maybe 15 minutes or so and guided his hands around the front panel of the xcvr and got him up and running on some phone band or another. In the meanwhile the aformentioned collection of bullshiters wasn't more than eight feet from him throuhout all of it. I gotta tell you that in all my half century on the bands that was the worst of the worst of the bad experiences I've had in the game. Madonna was right: It's a material world. Yes, I fear for the future of ham radio.

>> . . . . . Ed asked you what your

I very seldom get "fired up" about anything in the usual sense
particularly in this venue but you're right, "dealing with" the likes
of Burke around here is a complete waste of anybody's time.

> >You can wriggle and you can squirm Burke but you can't help hanging

> an antenna. It's not.

Right: PLONK again.

I dumped the bait over the transom, I'm chumming for an on-the-air QSO
with Nï¿½IMD via the end-fed wire he claims he has. It's put up or shut
time time again around here. Tally Freaking Ho, this oughta be a real
gooder.

Len's view is that no one else has ever handled high volume radio
traffic; no one else has ever used high power equipment. There are some
hams who can come near, some who can equal and some who can exceed his
experience *and* who are radio amateurs as well. Some don't care for
morse code. Some use it at times. Some use it quite often. Some use
it exclusively.

Yep, that one. That was another which should have ended with, "or so
I've been told".

Len don't know but he's been told
Ten-Tec gear is made of gold
If he tempts the Russian bear
He'll have to change his underwear

> Do your cards not have you name on them?

Sure they do, in small letters. Nobody QSOs "Dave Heil", they work
"K8MN" or "5H3US". "A W4MPY QSL" is also printed on my QSL cards too.
I'm sure that nobody is under the impression that they have worked
"W4MPY".

> Just by coincidence, my QSL cards have both my name and my callsign on

It isn't misleading at all. At any point in any QSO, I'm in a given
spot.
Sometimes the car is moving. Sometimes it is not. Stick around and all
these great mysteries will be revealed.

> Another ham on rrap would have called you a liar for that.

No other did. You've as much as done so though.

> Good thing, too.

Yeah, I think it is a good thing. I heed the regulations of the country
in which I operate. It is up to other ops to do the same. None of
those involved is responsible to you.

> > > Sheesh! I think you are more indignant about working me on HF than

>
> No. I think I my original premise was right. Some amateurs are nice
> guys and deserve to be on that list.

An interesting thing about that: You don't get to decide that. Two ops
who are members decide that.

> Then there are others who are
> jerks and shouldn't be on that list.

You don't get to decide that. Two ops who are members decide that.

> How you got on it is a mystery
> to me,

I can understand that. I'm sure that a number of things are a mystery
to you.

> but I do stand corrected. You did get on the list somehow.

Two ops who are members nominate someone. That is the only way to
become an A-1 Op. Perhaps you should read the qualifications for
membership.
I don't think you'll find anything about suffering fools gladly in
usenet.

> > Being indignant has naught to do with it. Keeping you

In article <414AE753.3090604@psu.edu>, Mike Coslo <mjc5remove@psu.edu> writes:

>I believe so. I have always tried to keep the tone civil, and yet that
>seems to anger him. I have been known to point out when his reply to
>something makes no sense to me, but perhaps that is my own stupidity,
>no? Yet he is angry with me.

"Anger?" None. Coslo doesn't understand that "discussion" requires
understanding that opposite opinions are neither "stupidity,"
"ignorance," or behavior equivalent to the Antichrist.

If Coslo wants love and admiration for his viewpoints, he ought ot seek
out a private forum where all Think Alike, sharing the same opinions,
whether or not those opinions were brainwashed into them or arrived
at by group agreement.

>> Anderscum is a very bitter, angry and disappointed old man, and he's
>> intent on taking his inadequacies out on Amateur Radio, for what ever
>> reason he thinks we "owe" him that.
>>
>> He's just pitiful.

heh heh heh heh

The above is what Coslo condones as "rational discourse?" :-)

Of course it is. If said by a PCTA extra, it is most acceptible.

If said by an NCTA, it would be subject to many an angry posting
from all the PCTA in here (there's only a few, but they are
aggressively hostile whether civil in manner or not).

> It *is* sad. I think that Lenover21 has much to offer, and yet ends up
>alienating those that may be able to benefit by what he has to offer.

Oh, my. How condescending can Coslo become?

Poor baby.

Tsk. Consider the many years of morse propaganda under the
"officialdom" of the "leadership" membership organization about
amateur radio...and their faithful followers (a minority) with ten
kinds of condescension of all who didn't love, honor, and obey
morse code.

Did all those faithful followers, united in morsemanship, "have
so much to offer?"

Of course they did. They said so. Even as we view the screen
there are thousands of mighty macho morsemen waiting to come
to the aid of their country, saving all through their wonderful skill
at morse code!

In their dreams, of course. :-)

Coslo makes a grandeloquent - but condescending - blabber on
"having much to offer!" :-)

Has Coslo anything to "offer?" :-)

What will Coslo return in compensation for being "offered" anything?

His good will and appreciation? Acceptance into the group by a
self-perceived chieftan descended from gods of amateur radio?

Tsk. Coslo needs an olfactory exam. He (and others) have long
been "peeing in the pool" and now they complain about the odor!

Heil is claiming "turf" in here, trying to close off the newsgroup to
all but those He allows in.

Problem is that this is an open forum whether He likes it or not.

He doesn't like it, ergo the usual spew of denigrations to all that
don't think like He. <shrug>

Following Heilian Rules in amateur radio policy newsgroup posting,
this would turn into a cozy little conclave of PCTA elitists, all
talking about the wonder and magic of morse, giving Newington
boys high-fives for anything, indeed giving each other high-fives
for existing. They would Rule. :-)

Common enough syndrome in pseudo-fraternal orders among
humans. Happens elsewhere.

>These guys are PCTA, and exhibit the PCTA double-standard at every
>opportunity.

They do NOT see it that way. :-)

Their Way is THE Way. No dissension allowed.

If They had to take a code test for an amateur license, then
everyone has to do it! No dissension allowed.

Dissent from The Way and They wish to lock out all who do so.

These PCTA elitists take their Archaic Radiotelegraphy Society very, very seriously.

Tsk. So much for what could be a fun hobby.

It is their Lifestyle?

It should be mentioned that the NPM mentioned above was the Coast
Guard (military) station in Hawaii, smack dab in the biggest ocean on
Earth. Big-time squared. Of course the operation used Morse Code in a
big way - and not in the 1930s, either, but about a half-century
later.

So of course Len had to denigrate and disrespect such operation.
>
> Len's view is that no one else has ever handled high volume radio
> traffic; no one else has ever used high power equipment.

Naw, it's simpler than that: Len hates Morse Code, he hates most of
ham radio, particularly the traditional parts, and wants to see it
wiped out or transmogrified into something very different from what
you and I think of as ham radio.

> There are some
> hams who can come near, some who can equal and some who can exceed his

Of course. But that's not the point.

> > from Japan?
>
> Yep, that one. That was another which should have ended with, "or so
> I've been told".

Not really. Nobody back then would have told him such stories.

Len wrote that it was about 500 miles from air bases in North Korea
and the USSR to where he was. Described it as about an hour flight
time. Mentioned the "Bear" specifically, which the Rooskies know as
the TU-95.

What wasn't mentioned was that the distances are actually over 660
miles. Also unmentioned was that the Bear/TU-95 didn't enter
production until 1956 and didn't enter service with the USSR's air
force until 1957.

All of this was pointed out in a post:

http://groups.google.com/groups?selm=c2356669.0304180838.3d3f31d4%40posting.google.com&out
put=gplain

which did not get a very nice reception from Len.

Mr. Burke also chimed in, describing the source of the distances as "a
gas station map" despite the fact that it was US Army issue, and used
in combat over Japan. (7th Air Force, B-24 navigator's map - I have a
few of them).
>
> Len don't know but he's been told

> He'll have to change his underwear
>

Doesn't matter if it's made by Ten Tec, Yaesu, Icom, Elecraft, or even Southgate Radio, if it's used for Morse Code operation on the ham bands, you can bet Len will make fun of it.

So predictable.

Sort of. Who does most of the posting here, in both number of posts
and length? It ain't me or thee, by a long shot.

> This USENET group was a huge deal back

> Miccolis.

Who is bothering? I read a few posts, write a few, discuss interesting
topics with KB3EIA, N8UZE, and some others. Filtering what one reads
works wonders.

> not disallow that one.

DX contacts count for FD. They give you a signal report, it counts.

> They simpy doan give a shit abt FD logs good or
> bogus.

Not true! The QSOs were good. There was one SP handing 'em out 2-3 a
minute later on - remember? They all counted.

> Then came Balch who finally waddled in out of the gloom of the
> parking lot (two hours late as usual) to take over the seat and rolled

Yep.

DX qsos count; it's just that DX stations' logs aren't counted
competitively in the listings.

A year or two ago the definition was changed so that FD covers not
just North America but SA too. Which means N2EY/Tierra del Fuego could
compete...

> . . worked the German and then the Peruvian but that was it, thus I

> It's a material world. Yes, I fear for the future of ham radio.

I did not know that story. Makes me sick.

Now watch, somebody will spin it into being *your* fault.

But do not fear for the future of amateur radio too much. Here's why:

Back when you started, and to a lesser extent even when I started, ham radio was populated mostly by folks who took it very seriously. "Radio for its own sake" wasn't something most people were interested in. The license process, operating skill requirements and equipment costs alone insured that most hams had a considerable personal investment - and the money was the least of it. Sure, there were some clueless folk but they either learned or were really frustrated.

Then a bunch of things happened. The cb boom made 2 way radio popular and practical for lots of folks, the development of ssb and then fm transceivers and solidstate made the equipment small, less expensive and easier to use, etc. We got a lot of good hams, of course, but also a sizable number who are only "sort of" interested, and who don't take it that seriously, nor have a big personal investment. The whole code test issue is really just an iceberg-tip for the concept of personal investment.

Now we have the internet and cheap cell phones and GMRS/FRS. Which have pulled away a lot of the folks who were "sort of" interested in ham radio. That's why repeater use and 'honeydew' licensing is down - much easier to just use the cell phone or FRS.

So the future of ham radio relies on those who are really interested in radio for its own sake and are a lot more than "sort of" interested. Those folks are out there, and will continue to be. But they will not be attracted by lowering the requirements or trying to make ham radio a sort of rf version of the internet.

> > an antenna. It's not.
>
> Right: PLONK again.

Another technique to watch for is the misremembering of a past event
in order to get your panties in a snarl. Such as the whole Cecil
thing. Or the whole K8MN A1 op thing. Or the way I've been
misquoted/misinterpreted...

> I dumped the bait over the transom, I'm chumming for an on-the-air QSO
> with Nï¿½IMD via the end-fed wire he claims he has. It's put up or shut
> time time again around here. Tally Freaking Ho, this oughta be a real
> gooder.

Don't hold yer breath. Watch - there will be all kinds of reasons it
won't happen. Like a certain Extra license that is still in its box.

And it will be spun so that somehow it's *your* fault...

Hard to get a job if nobody hires. And I don't
mean the local Wal Mart. In any event I'm voting
for Kerry no matter what you have to say. GW screwed
up the economy (or at least didn't fix it) and screwed
up with Iraq.

End of discussion.

It ain't over yet, we won't get the winds you folks had but with a
stiff cold front moving down from Canada meeting the tail end of Ivan
it appears that western and central PA are about to get drenched good.
Looks like Dave in WV is in the same line and is up for some serious
"dampness" too. At least it's not another Floyd . . eleven inches in
ten hours in the Philly area.

3610. Re: ARS License Numbers

Newsgroup: rec.radio.amateur.policy
Date: 2004-09-18 00:46:57 UTC
From: Mike Coslo <mcoslo@adelphia.net>
Message-ID: <D72dneph25gcGNbcRVn-rg@adelphia.com>
Source record: 97286

Back to the thread, I think that the numbers of hams will continue to decrease until we are taken out of the limbo we have been in for some time now.

The prospective amateur has *no* idea at this time if the Morse code requirement will be kept, how long it will be kept if it is, and when it will go away if it is discarded.

In as much as most people will not imagine that the changes to come will take as long as as the will likely take, the net effect will be potential Hams sitting and waiting for the Morse code to go away.

Its certainly what I would do if I were thinking about getting a license at this point.

Whatever is done should be done and done quickly. That said, there is a mile of difference between "should" and "will". I still stand by my original prediction made some time ago.

Jim, do you still have those dates? I'd be curious to see who has fallen by the wayside so far.

Here's the question Steve. I think I know the answer already, but let's
check it out.

As long as Lenover21 continues to post in his present style, I assume
that you are happy to post in retort to him. Yes?

I'm pretty convinced that even though there are times you find him
exasperating, it doesn't upset you to make the posts?

I also believe that for good or bad, you enjoy it to a certain extent.

So you guys have a relationship. It's a pretty strange one, made easier
by Netnews, but this sort of thing has existed for a long time. It's the
old Winston Churchhill/Lady Astor thing. They traded barbs with each
other, and I have to believe they enjoyed it.

Why Lenover21 resists my suggestions that this is what is going on is
beyond me. It is no insult, its just how things go sometimes.

What "limbo", Mike? We've had a class of US ham license with no code test for more than 13-1/2 years now. The maximum code test speed has been 5 wpm for more than 4 years now - and for a decade before that, medical waivers were available.

The code test may or may not go away in the next few years/months/decades. The written exams may change similarly. The various bands may change as well.

I don't think that's the problem.
>
> The prospective amateur has *no* idea at this time if the Morse code

So? Someone who really wants to be a ham will do what is necessary to pass the tests at the time.
>

Maybe some will. I think most interested folks will simply learn enough to pass the tests and get on with it.
>
>Its certainly what I would do if I were thinking about getting a
>license at this point.
>
But it's not what you did when you got started.

And would you not get *any* license until the code test went away, or would you just hold off from upgrading?

>Whatever is done should be done and done quickly. That said, there is a
>mile of difference between "should" and "will". I still stand by my
>original prediction made some time ago.

Back in 1989-1990 we were told that a nocodetest ham license was "absolutely needed for growth". And when it became a reality, we got some short-term growth for a few years.

Then we were told that the code test had to go for the same reason - and it was dropped to 5 wpm for all classes in 2000. We got some short-term growth for a few years - now we're back *below* the level before the restructuring.

I was a ham way back in 1967, when they said incentive licensing would "kill amateur radio". There were about 250,000 US hams back then. Yet in the 10 years after incentive licensing took full effect (1969-1979 or thereabouts) the number of US hams grew by about 100,000, despite poor economic conditions, much less accessible testing, waiting period for Extra, no code waivers and a code test for all hams. And no internet or computer-based training methods.

>Jim, do you still have those dates?

Which dates do you mean?

>I'd be curious to see who has
>fallen by the wayside so far.

I'm not sure what you're asking, Mike.

Thank you for letting me know that. Now that I understand, we need to
talk (cuz I think that is sort of like how you act once in a while).
REspectfully speaking, of course.

Nahh, I don't condone it. I don't say it either. Are you sure you don't
want to be a moderator? Yahoo groups can be set up that way.

> Of course it is. If said by a PCTA extra, it is most acceptible.

I think you really would like to be a moderator. You would be able to
control how people reply to you. That is okay. Some people like that
structured kind of group.

>> It *is* sad. I think that Lenover21 has much to offer, and yet ends up

Here we go again! I'd really prefer to hear a radio story instead of a
Morse code one. THe Morse code thing is getting kind of dreary and old,
don't you think?

> Did all those faithful followers, united in morsemanship, "have
> so much to offer?"

I really do love hearing stories and experience from old timers.

Gee, if I hurt your feelings, I'm sorry.

> Has Coslo anything to "offer?" :-)

Quite a bit, it would seem.

> What will Coslo return in compensation for being "offered" anything?

I can bring cookies. Chocolate chip or Oatmeal raisin?

> His good will and appreciation? Acceptance into the group by a
> self-perceived chieftan descended from gods of amateur radio?

I don't think that the American Indians believed their chieftains were descended from the gods of any sort. Of course I could be wrong, and if anyone wants to correct me, please do.

Or is this one of those little jokes you do, like J-38 Keys on a flag from the Revolutionary war? That was a good one! 8^)

> Tsk. Coslo needs an olfactory exam. He (and others) have long
> been "peeing in the pool" and now they complain about the odor!

Did you ever notice the awful smell sometimes after eating asparagus? So what do you think, is the urine smell imparted by asparagus due to methyl mercaptan alone, or S-methyl-thioacrylate and S-methyl-3-(methylthio)thiopropionate, or possibly a combination of methyl mercaptan, dimethyl sulphide, and small amounts of sulphur-oxidised compounds?

And how would ya like to be the people that actually research that kind of stuff. Eeww 8^)

Limbo is when a prospective ham thinks that possibly he or she can get
on HF simply by waiting a few months and not having to take any Morse
code test.

Let's compare the situation to when the Governor of PA had the temporary
tax exemption on computers. I think it lasted something like a week.
Guess what happened to computer sales at the local Circuit City, Best
Buy, etc. the week or two before the exemption. When I went in and
looked around, the sales clerk at one store even told me to hold off
until next week.

Seems like a direct comparison to me.

I'd temper that. If I thought that the Morse requirement would go away
in say, 6 months, I would have waited.

And most people do not expect a long time to pass before it goes away.
I know some people were incredulous when I gave my time to expiry (if
any) in that pool we had a while back.

Some things operating there.

There was no code elimination horizon.

I'm skeptical enough and have enough experience that I knew it was going
to be a long time coming

I wanted to get on HF pretty badly.

I'm not afraid of learning something (even though it was admittedly very
hard for me)

> And would you not get *any* license until the code test went away, or would you
> just hold off from upgrading?

Hard to say. When I originally got my license, I was only planning on
being a Technician, and I was thinking about how to apply Amateur radio
to my other hobby, Amateur astronomy. I really didn't have much interest
in HF at all! then after a field day where I was allowed to operate, I
was hooked. So my experience is likely not typical. In fact, if it
wasn't for the Technician no-code license, I probably wouldn't be a Ham
now. (to my great loss!!)

It isn't the code or lack of it. It is the limbo state of not knowing
what is going to happen.

I don't think changes will make for growth, except in the short term.

Of course. Way too much emphasis is put on all the modern conveniences
and the numbers of Hams. I wouldn't care if I had to take the test,
writing on the back of a shovel with a piece of limestone, while Heidi
Klum was trying to distract me. How's that for working her into the
thread! ;^)

Didn't you take a poll of rrap people consisting of guesstimates when
we believed that Morse code would be dropped? I think it was right after
WRC-03. I remember I predicted something like 4 or maybe 5 years.

Amateur Radio Newsline™ Report 1414 September 17, 2004

Amateur Radio Newsline report number 1414 with a release date of
Friday, September 17th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio meets hurricane Ivan. Find out
the details on Amateur Radio Newsline report number 1414 coming your
way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO VS. HURRICANE IVAN - IN THE CARIBBEAN

Last week it was Frances. This week it's Ivan. Bother killer
storms
that took lives and destroyed property across the Caribbean before
making landfall on U-S shores. And as has been the case s many times
this year, ham radio was ready. Our team coverage starts here:

--

I'm Henry Feinberg, K2SSQ:

--

" The eye center of hurricane Ivan was located near latitude 17.9
North and longitude 78.7 West, or about three-zero, thirty miles or
five-zero, fifty kilometers South-West of the Western tip of Jamaica
and 190 - one hundred and ninety miles or 305 kilometers
East-South-East of Grand Cayman"

--

That was a warning relayed over ham radio in the Voice over I P
Hurricane Watch Net. Hurricane Ivan had hit Jamaica with wind speeds
near 155 mph. And as the storm approached, hams involved in the
Hurricane Watch Net relayed up to the minutes reports to the National
Hurricane Center in Miami:

--

"...wind speed sustained at 80 miles per hour. Gusts to 100
miles. Is
getting horizontal ran. Skies are darkening rapidly..."

--

The killer storm had already been blamed for at least 64 deaths in the Caribbean, including 34 in Grenada. It hit Jamaica on Saturday, September 11th packing winds close to 165 mph. In downtown Kingston, 20-foot-tall trees were uprooted, some flung onto the roofs of cars, and twisted metal roof panels strew the streets. At least 11 people were killed as the storm blew across.

Now on Sunday the 12th, reports were coming in from Ivan's next stop.
From the few hams in the Cayman Islands who were riding out the storm on the air using whatever gear they had that would run on emergency power:

--

"Zed-F-one kilo oscar has come up a couple of times reporting flooding
in areas that have never flooded before in a hurricane. They have some intermittent cellular telephone service. The land line phones are down and a lot of flooding. VP5DB with the Hurricane Watch Net."

--

Then there was this dramatic report to the Hurricane Watch Net from a crew member of the British Royal Navy ship Richmond that was anchored not far off shore. The Richmond had cut short her visit to Curacao to standby to assist islands devastated by Ivan:

--

Audio only. Hear it at http://www.arnewsline.org

--

Category 4 and 5 hurricanes can cause buildings to collapse, destroy mobile homes and flatten trees and road signs. Such storms are accompanied by a surge of sea water and require evacuation of low-lying areas within 5 miles to 10 miles of the shore. Normal lines of communications are almost always cut and this was the case with Ivan. And broadcasters in the Caribbean who were able to stay on the air had their reports passed to the outside world using ham radio. Stations like Wenty Bethune, 6Y5IC, who had survived Ivan' rampage on
Jamaica and was on the air from Kingston using battery power:

--

"We cannot confirm it, but we understand that there are people in the
Caymans standing on their roofs shouting for help. Sounds like a traumatic situation in the Caymans. This is coming off FM radio about an hour ago. QSL?"

--

6Y5IC said that he was also handling traffic into and out of the storm ravaged area. He added that he could probably operate for about to weeks using batteries.

Now Ivan was on a direct path toward Cuba. This, as Florida residents braced for a third storm to hit the state in a month. And on Monday the 12th a strengthened Hurricane Ivan headed toward the tip of western Cuba with winds in excess of 160 miles per hour:

Ivan bombarded western Cuba with the full fury of a category 5 hurricane. It damaged hundreds of homes and swamped at least two towns. The storm was so vast that its clouds simultaneously covered Cuba, the Florida Keys, the entire Florida peninsula and parts of the Bahamas, Mexico, Belize and Honduras.

Florida expected the worst. But after passing Cuba Ivan kept traveling West into the Gulf of Mexico. And even as Cuba was being hit hams on Mexico's Yucatan Peninsula like Juan Berndes, XE3AAF, were
checking into the Hurricane Watch Net to report that Ivan was being felt:

--

"Roger, OK. I can only tell you that we have been having squalls
--
intermittent squalls all throughout the morning, and that's about it.
That's the information I can give you at the present time.
Over"

--

Now, a hurricane watch was in effect the entire Florida panhandle and as far west as Louisiana, including New Orleans. Ivan, still a category 4 killer storm was on his way to the U-S mainland. I'm Henry
Feinberg, K2SSQ. (ARNewsline(tm))

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W8GK repeater serving Charleston West Virginia.

(5 sec pause here)

**

RESCUE RADIO: HAM RADIO VS. HURRICANE IVAN - LANDFALL

I'm Bill Pasternak, WA6ITF, continuing our coverage of Hurricane Ivan.

Packing gale force winds, Hurricane Ivan slammed ashore near Gulf Shores, Alabama in the wee hours of Thursday, September 16th. Anticipating the storms arrival, Alabama, Florida, Louisiana and Mississippi had declared states of emergency a day earlier. A last minute shift spared New Orleans a direct hit but some 360,000 homes and businesses were without telephone service or power in Alabama, Louisiana and Mississippi. And throughout it all, ham radio operators did their part by passing health and welfare traffic, damage assessments and those very important storm position reports:

--

"Repeating the 4 a-m CDT position: 30.9 North, 87.7 West.
Movement
toward the North near 214 miles per hour. Maximum sustained winds near 115 mph. Minimum central pressure 947 millibars."
--

Notice something interesting about that audio? The station reading that report is not in the continental United States. In fact he's thousands of miles away in Australia. But thanks the latest technology developed by hams -- a service called The Internet Repeater Linking Project -- Amateur Radio operators anyplace in the world can pitch in to help when there is an emergency like hurricane Ivan.

But long before the storm made landfall residents of the Gulf States and the nations ham radio community were preparing for the its arrival. On Wednesday the 15th, some highways were converted into one-way evacuation routes. This, after authorities from the Florida panhandle to Louisiana ordered wholesale evacuations of low lying areas. Everyone from New Orleans east to Apalachicola, Florida was on alert because even the tiniest change in the storm track now could move the location of the storm's landfall by hundreds of miles. And after taking a day off to regroup, the Hurricane Watch Net on 14.325 MHz again sprang to life. Some of those checking in were directly involved in storm relief efforts:

--

"Kilo Delta 5 Golf Golf Lima north of the Coast. I'm
operating the
Operations Center at Camp Shelby, Mississippi. Over."

--

Even though the storm was still well out to sea, it did not take long for reports from hams in Ivan's target area to begin flowing in.

--

"Kilo Charlie 5 Romeo Fox Uniform. What is your traffic?
Over"

"Thank you very much. The name is Paul and I am in Ft. Walton
Beach,
Florida. Ill give you the coordinates. Latitude 30.44 North.
Longitude 86.62 West. And the Barometric Pressure is 29.79 and
falling. The winds are estimated at coming from the
East-South-East."

--

Now it would be a waiting game for residents along the gulf coast as
they waited and watched as hurricane Ivan roared toward them with.
When Ivan did make landfall it lashed southern Alabama with 135 mph
winds and threatened much of the Gulf Coast with surging flood waters.

--

"This is K5PSB with the Salvation Army Team Emergency Net looking
for
stations with traffic in the affected areas of the Caribbean or the
Gulf Coast. Ill take anybody that I can hear. K5PSB."

"W-A-0-Lima Sierra Bravo."

And the latest advisories from the National Hurricane Center show that
Ivan still has a lot of destructive force left. The latest storm
track as of noon, Thursday September 16th shows Ivan heading
North-North-East through parts of Georgia, Tennessee, Kentucky and
Ohio as it downgrades in intensity and begins to fall apart. But
falling apart may be a bit of a misnomer because even then a hurricane
can continue to be a destructive force.

But even as Ivan is weakening, yet another storm is gaining strength.
Hurricane Jeanne intensified as it made its way to the Dominican
Republic after hitting Puerto Rico on Wednesday. Jeanne is moving
west at about 9 miles per hour with maximum sustained winds of 80 mph
and will likely be the big ham radio story, next week.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

The hurricane, one of the strongest on record to hit the region, has
killed at least 65 people. With the hurricane season not yet over
these hams could be kept busy for some time to come. (ARNewsline)

(Note: Audio of Hurricane Ivan communications was recorded off-air
and from Internet relay feeds. Our sincere thanks to the may hams
world-wide who supplied them.)

**

RESCUE RADIO: SOCAL SHADOW DRILL

Out on the U.S. West coast, twenty-five city of California's
Huntington Beach Radio Amateur Civil Emergency Service volunteers
participated in a simulated city-wide Emergency 911 system crisis on

Saturday, August 28th. Called the "Shadow Drill," radio volunteers received 9-1-1 calls and dispatched fire department equipment and personnel for an eight hour shift.

The objective of the drill was to provide an alternative dispatch communications system to all Huntington Beach Fire Department resources, including hazardous materials, ambulance and fire response apparatus. This was the third year in a row that Huntington Beach RACES performed the Shadow Drill for the city. (KH6WZ)

**

THE BPL FIGHT: PHILLY MAY GO NON-BPL WIRELESS

Philadelphia says it's looking to have wide spread Internet access available over the next few years, but it likely will not be B-P-L. This, as the City of Brotherly Love looks to create a 135-square-mile wireless network instead. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the rest of the story:

--

Philadelphia's Mayor John Street has a vision to turn this community of historic and diverse neighborhoods into a Digital City. And, he's not looking at Broadband Over Powerline Internet Access to do it.

Instead, Mayor Street, a big fan and user of technology - he carries his own Blackberry everywhere - sees the wireless world as the way to go. And, he's committed a task force to explore an estimated $10 million investment in the idea.

Mayor Street's chief information officer is Dianah Neff.

"Outdoor wireless has come on the scene and has presented an affordable entry point to create a dense, cellular mesh network that would act like an umbrella over the city," Neff explains. "And it's a transport, it's an outdoor transport that would allow wireless access that then goes to the Internet for all people in the city."

Neff says users of the system would have easy access. She notes one test site near City Hall is being getting great reviews.

"You can access it through a lap top, through a PC tablet through a hand-held device," Neff says. "You would log on, put in your code to the system. And in the case of Love Park - which is a hot spot now - it's free.

"All you have to do is go on and register. And then you get a connection out to the Internet."

Neff says the plan proposes to attach transmitters/receivers atop light pots.

"The best place to mount these in the outdoors is on the light posts because you need a power source," Neff says. "You could mount the

radio antennas actually on the light posts which reside in the public right-of-way which is owned by the government.

"And that's why this has to be a public-private partnership and there's limited space on there you can't put a dozen companies' wireless device.

"But if you had this infrastructure that anybody could either pay to connect in for profit or ride for free, based on criteria that will be established, you would be able to do it."

Neff says the system would be "hot" for outdoor use. But there is equipment available to bring the signal indoors.

"There are devices that can be placed in your window to bring outdoor wireless," Neff says. "If your proximity is close to a fixed-wireless outdoor point, you may be able to get it in your house.

"And, so we see that there's a great opportunity to be able to go either out onto your front porch and log on into a wireless environment outdoors, or through a device, if you want to bring it into your home, to all rooms in your home.

"That may be one of the fee-services that would allow us to sustain the system."

Neff says the task force is looking at a couple options in terms of fees.

"The mayor is committed to providing some level of free access whether that's in public outdoor areas or as a low cost to everyone," Neff says. "There has been a committee that's been formed - the Wireless Philadelphia Executive Committee - they're looking at fees, roles and responsibilities in the investment and the sustainability of the system."

Neff says the committee will deliver a report to Mayor Street by December. After that, bids will be sought and Neff says she'd like to see several neighborhoods up and running a few months later.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Philadelphia hopes have the whole network in operation sometime in 2006. (ARNewsline(tm))

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being

relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ENFORCEMENT: LETS MAKE A DEAL - FCC STYLE

The FCC has accepted an offer from an Iowa ham to turn in his Amateur Radio license in order to avoid having to pay a $12,000 fine. It did so in a September 7th Memorandum, Opinion and Order that partially granted a June 6, 2003 Petition for Reconsideration filed by Scott E. Kamm, N0UGN, of Sioux City.

Back on May 7, 2003 the FCC issued a $12,000 Forfeiture Order to Kamm for what the agency said were willful violations of several sections of its Amateur Service Part 97 rules. The Commission said that the offenses involved intentional interference to communications on 146.31 MHz, the transmission of music on an amateur station, and failure to identify an amateur station by call sign.

The FCC says that in support of his Petition for Reconsideration that Kamm offered to immediately withdraw his pending application for renewal of his license. He also offered to refrain from applying for any other license for a period of five years.

The FCC says that it agrees to this offer. As such it concludes that cancellation of the $12,000 forfeiture was warranted. (FCC)

**

ENFORCEMENT: $10000 PAGING FINE AFFIRMED

The FCC has affirmed a $10,000 monetary forfeiture to Jeffrey Amedro of Morgantown, West Virginia. Amedro does business as Cell Page and the FCC says he has racked up a number of violations. Cathy Anno, KB0FDU, reports:

--

The FCC says that it issued the fine for what it calls willful and repeated violation of Section 301 of the Communications Act by Amedro's company Cell Page. This, by operating radio transmitting equipment on the frequency 157.740 MHz without FCC authorization to do so.

On September 5th, 2003 the District Director of the Commission's Columbia, Maryland Office issued a monetary forfeiture in the amount of $10,000 to Cell Page. Cell Page did not contest the violation. Rather in its October 16, 2003 response, the company requested a reduction or cancellation of the proposed forfeiture.

Presumably, intending to claim its inability to pay Cell Page stated that it had been in contact with a certified public accountant to complete its tax returns. Once completed, Cell Page states that it

would forward three years of tax returns to the Enforcement Bureau by approximately October 31, 2003.

The FCC says that as of its decision to affirm the fine, neither Amedro nor Cell Page has submitted the company tax returns. Without the appropriate financial documentation, the FCC says that it can not consider Cell Page's claim of inability to pay. So it is now denying
the request by Cell Page for reduction or cancellation of the fine.

For the Amateur Radio Newsline, I'm Cathy Anno, KB0FDU.

--

The fine against Cell Page was affirmed on September 7th. Amedro was given the usual 30 days to pay or to file an appeal. (FCC)

**

ENFORCEMENT: CLEANING UP INTERFERENCE

The FCC has written to Andrews Cleaners in Andrews, Texas. This to tell proprietor Andrew White that he regulatory agency has received complaints that equipment at the business may be causing harmful radio interference to a local ham radio operator.

In its letter, the FCC tells White that the agency has the responsibility to require that such problems be rectified within a reasonable time if the interference is caused by faulty consumer equipment. It also suggests that he might want to contact the ARRL for guidance about radio interference that involves Amateur Radio operators. (FCC)

**

HAM RADIO IN SPACE: SIGNALS BOUNCED OF THE GENESIS RE-ENTRY

A group of ham radio operators have successfully bounced signals off the ionized trail of the Genesis space probe. This, as it re-entered the Earth's atmosphere on September 8th.

According to Robert Brown, KR7O, several stations trying to be heard off the probes fiery trail were monitored at his QTH from 1552 to 1600 UTC. This is part of what Robert heard:

--

Backscatter audio

Robert says that all signals heard were on 144.200 MHz in the 2 Meter band. Among them were KC6ZWT and WA6KLK who were using voice. There were also others trying to make the path using CW. K7RO adds that KC6ZWT reported hearing Robert's signal over the same backscatter

ionized path. All of the stations involved in this test were located in California. (K7RO)

**

DX

In D-X, BB2RS reports that a group of Japanese amateurs are operating from Sri Lanka as 4S7DUG from September 18th to the 23rd. Activity is on 160 to 6 meters with an emphasis on the lower bands. They plan to have four stations active simultaneously. (GB2RS)

And F4DZY is active from Corsica stroke TK through the 22nd of September. Look for him on the High Frequency bands using SSB and QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: HAM RADIO, HURRICANE FRANCES AND THE PRESIDENT OF THE UNITED STATES

And finally this week, the story of hurricane Frances, some ham radio operators who helped to keep a local commercial station on the air after the storm and two who met with President Bush on his recent tour. Joseph Lenartiene, KD4BTD has the rest of the story:

--

Pres Bush: "I want to thank the Emergency Operations Centers all across the state of Florida, the first responders, Police and Firefighters, the people working long hours here, I want to thank the Red Cross"

--

While President George Bush did not mention Amateur R radio Operators in his national Press Conference held on Wednesday, September the 8th, He did the next best thing while visiting Florida's Treasure Coast
that day when he shook hands with Bruce Reid, K9SHT and Lee Kaufmann KG4BYG at the St. Lucie County Emergency Operations Center in Ft. Pierce Florida.

--

Kaufmann: "Well we had two special visitors today, we had The President and the Governor both came in. The one nice thing is that he greeted everyone here: He didn't just walk by. He came in, said
hello and saw the ham station in the shelter here and even was aware of what we were doing."

--

Other than the President stopping by, thing were pretty normal at the EOC Ham Station according to Lee.

--

Lee: "I was running communications between the EOC and the shelters
and today was a little bit calm but yesterday was busy sending messages. I think we had somewhere in the number of a hundred messages back and fourth between the shelters."

--

Not the most glamorous work but as expressed by St. Lucie County EC Ernie Marques, KF4IHX, very Satisfying.

--

KF4IHX: "We had a busy last 6 days. We've handled over 350 pieces of
traffic during this emergency and we're very pleased because for a brief period of hours, ham radio was the only link between our shelters and we proved a point that Amateur Radio can get through when nobody else can."

--

While Frances stayed awhile to visit St. Lucie County, The Special Needs Shelter felt the wrath and when the need came to find a new QTH for the evacuees, (Sound of a Nextel) not Nextel but N9SRO answered the call.

--

N9SRO: "The Special Needs Shelter needed someplace to relocate because they had sustained some damage during the Hurricane. Nextel's
were a no go after the storm but I was able to facilitate communications via the ham radio to get that move started."

--

Hurricane Frances officially made Landfall in a town called Sewall"s Point in Martin County Florida. The next County south St. Lucie. While Amateurs down there did much the same from their EOC, A few did more. Louie Delonoy, K4LOU, Helped put Martin Counties Radio Station, back on the air.

--

K4LOU: "Martin County had been telling people all day Friday on their
Billboard to tune to WSTU for the latest news. Now there comes Monday Morning and they're off. I called Ben, N4BG and he tells me chances
are they took a major hit. I come up, he takes me around to the back,

and here's their tower on top of the dish with the two STL feeds
on
them. You know, sitting on the roof. So I go up there and inspect it
moved everything around and Boom, they're on the air."

--

And Port St. Lucie Broadcasters Vice President Greg Wyatt
couldn't be
happier.

--

Wyatt: "We now have the Louie, Ben, and Jerry show here at WPSL,
WJNX, and WSTU. Between the three of em, they managed to get two
radio stations on the air in 5 hours and now the third one today. I
tell you, its mind boggling."

--

Although it was far from over for Florida thanks to Hurricane Ivan,
Amateur radio on Florida's Treasure Coast has returned to what it
was
before the storm. The major lesson learned here was the need for
relief after the storm. And that's what Treasure Coast Hams are
ready
to do for those affected by Ivan.

For Amateur Radio Newsline, I'm Joe Lenartiene, KD4BTD, in Ft.
Pierce
Florida.

--

Joseph Lenartiene, KD4BTD, is with WQCS FM in Ft. Pearce, Florida.
(KD4BTD, ARNewsline(tm))

3618. The Pool

Newsgroup: rec.radio.amateur.policy
Date: 2004-09-18 02:24:27 UTC
From: n2ey@aol.comSPAMNO
Message-ID: <20040917222427.19264.00000423@mb-m24.aol.com>
Source record: 97294

KB3EIA asked about some dates. Here are the predicted dates when FCC will drop all code testing:

WA2SI: September 13, 2003
KF6TPT: September 29, 2003
KC8EPO: December 31, 2003
K2UNK: January 1, 2004
K2ASP: March 15, 2004
AA2QA: April 1, 2004
N2EY: April 15, 2004
N3KIP: May 1, 2004
KC8PMX: July 1, 2004
WA2ISE: August 1, 2004
K3LT: September 15, 2004
WK3C: December 30, 2004
N8UZE: July 1, 2005
KB3EIA: July 5, 2007 ("minimum 4 years from date of requirement drop")

Closest date (before or after) wins. Anyone else?

73 de Jim, N2EY

This may not be the latest list. Please add your prediction if it's not on here.

Closest prediction right now is K3LT.

In article <ovCdndJzYNFdDNbcRVn-gw@adelphia.com>, Mike Coslo
<mcoslo@adelphia.net> writes:

>I'd really prefer to hear a radio story instead of a
>Morse code one.

Here's both:

Way back about 1987, another ham and I did a 1B-2 Field Day. We had two rigs - his TS-520S and my Southgate Type 6 homebrew rig. Tent, generator, dipole for 80/40 and vertical for 20/15/10. Site was on top of a hill in Shrewsbury, PA.

We had lots of experience with big groups but doing a 2-man FD was something else again. Plus it was a long ride from either of our houses.

We set up and were ready to go on Saturday at 2 PM. We took turns operating, shifting bands and modes as the rate demanded.

It was decided that I would do the overnight shift, and the other ham would relieve me about dawn.

Around 11 PM or so he went home, and I took over. I turned off the '520 and just ran my rig. 80 and 40 CW were pretty good, with the midwest pounding in and the Rockies and Far west starting to show up. 20 and above were pretty dead by then, so it was just 80 and 40.

The generator held about 2-1/2 hours worth of gas. Refueling was about a 10-15 minute operation because the generator was over 100 feet away inside an enclosure to reduce noise. It would run great right up till the tank went dry.

By 3 AM the west coast was pounding in and the score kept growing. Soon it would be light and the best we'd be able to do on 80 or 40 was the midwest.

I'd just switched back to 40 around 5:30 AM when I heard a weak one down the low end. Turned out to be KH6WO!

Now EPA to PAC on 40 may not be DX to some, but back then it was the first Hawaiian I'd ever heard on that band. He was way down in the noise and all I had was the Type 6's 100 watts and the dipole. He was working 6's and 7's, and my calls went unanswered. I tried moving up a little and down a little - no soap. But he was soon working 8's and 9's, so maybe there was a chance.

I looked at the gas-up sheet and realized the generator was well over 2-1/2 hours gone. It was also getting quite light outside the tent. If I stopped to gas up, he'd probably be gone. When he signed with a WPA station, I gave him one last try. Back came "N2?? DE KH6WO"!

It took a couple of go-arounds to get call and exchange across. Meanwhile the generator droned on, now over 3 hours on one tank of gas. And the sky kept getting lighter.

Finally I heard in the cans: "R TU 73 N2EY DE KH6WO ALOHA..."

And the generator ran out of gas, sputtered and stopped. The lights on the rig faded and the control relays buzzed and dropped out. But I had the contact!

Ran out to the generator, tossed in some gas and started it back up. The other op showed up as I did so and we ran to the tent so he could hear the Hawaiian. But he was gone, inaudible on either rig.

Sure, it was only 4 points like all the rest, but I never forgot it.

Or how about this one:

Back in November 1996, I heard that a bunch of hams were going to put on a commemorative operation for the 75th anniversary of the 1921 Transatlantic Tests. This group had obtained the special event call W1BCG, and was going to operate on 160 meters from a site very near where the original 1BCG had been set up in Greenwich, CT. 160 was as close as they could legally get to the original operating wavelength of 200 meters (1500 kc.)

For the transmitter, they would use a replica of the 1BCG transmitter, designed by Major Edwin H. Armstrong himself. Unlike the one-way nature of the 1921 tests, they'd be making QSOs. They would be on the air about a week, giving lots of chances to work them. Or so it seemed.

Now I'd never been on 160 and had no antenna or operative rig for the band. But I figured that my 80/40 inverted V could be equipped with end loading coils and made to load on 160. The operation would be in early December, and there wasn't much time to get ready. How tough could it be to work CT from EPA, anyhow?

For a receiver, I had a WW2 surplus BC-342N. Transmitting was a question until I remembered a Johnson Viking 2 and VFO that were in the round tuit stack.

The receiver worked fine but the transmitter needed a lot of TLC. Had to replace chokes, filter caps and the LV power transformer. But I finally got the transmitter working into a lamp bulb on 160.

TR system? Didn't have one. The receiver went to my 20 meter vertical, while the transmitter fed the inverted V. Just remember to turn down the gain before you hit the key!

For this operation I did not use my bug. W1BCG was going abput 10-12 wpm, and so was everyone working them. So I hooked up the J-37 key from my Novice days. It was the very first piece of true ham equipment I'd ever owned, bought for 25 cents at a yard sale about 1965.

Every night while I was working on the setup, I could hear W1BCG! The signal was distinctive - you didn't have to hear the call to know who it was. Godley must have heard the same thing, three quarters of a century earlier.

But the antenna wouldn't load worth anything. I'd made big endload coils but they simply didn't work right. Night after night I fooled with it in the dark and rain, but it would not load. I tried calling them but the setup was no match for the properly-equipped 160 meter competition.

The window of opportunity to work them was pretty slim. They were only on for a few hours each evening, and they spent a good amount of time trying to work Europeans - which was understandable, since it was a commemoration of the Transatlantics.

Finally I tried the old-standby: Tie the coax together and feed it against ground. The Viking 2 had a wide-range pi-net, so no tuner was needed. The coax would do the radiating and the inverted V would act as a capacitive top hat. Not a precision system but there was nothing to lose as it was the last night of operation.

It loaded up! I could get almost full power into the makeshift antenna, and it seemed to be radiating, using the flourescent-tube test. But would W1BCG hear me?

I called and called, but they kept going back to other stations. Then they decided to listen for Europeans, and the NA pack went quiet. They worked split for Europe but on-freq for NA.

I knew from previous nights that they'd spend a half-hour trying to work EU, then go back to work NA stations. So I set the VFO right on their freq, and when I heard "NW QRV NA DE W1BCG" I was first in line. Right back they came: "N2EY DE W1BCG"! A quick exchange, 73s, and then the pack descended again. But I had the QSO! And some time later, the special QSL - for the first and so far only 160 meter QSO from N2EY.

I sold the fixed-up Viking 2 and VFO a year or two later, and moved away from that QTH in 1999. Someday I'll get back on 160.

I have lots more...

High prices and the druids who work there. I've gotten better
information from those who work at Radio Shack. No answer would be
better than a wrong answer.

I prefer the friendliness, straight info and better prices of R&L
Electronics in Hamilton. They also have more merchandise in stock.

Not by a mile, Mike.

You're talking the difference between someone investing the TIME to STUDY
for a radio license test, and someone saving about $100 to BUY a device that
requires no license to use.

>> The code test may or may not go away in the next few years/months/decades.

>
>I'd temper that. If I thought that the Morse requirement would go away
>in say, 6 months, I would have waited.

There's a lot of folks who waited "6 months", that turned out to be
"years", just to not have to "do something". They'll still be waiting after
the code test does go away. They'll then be waiting for the written test to go
away, and if they imposed a $1.50 fee, they'd be wating for that to go away.
If the FCC required nothing more than a piece of paper saying "pretty please"
and the cost of a stamp, they'd call the FCC collect and ask for a postage free
envelope.

> And most people do not expect a long time to pass before it goes away.

Well THERE ya go, Mike! You just proved what Jim was saying...

Depends on what you want and how badly you want it, whether it's an
Amateur Radio license, an Airman's Certificate, or the highest running score on
Slingo...

>> And would you not get *any* license until the code test went away, or would

>wasn't for the Technician no-code license, I probably wouldn't be a Ham
>now. (to my great loss!!)

I know many EMS/Fire folks and members of CAP who did the very same
thing...They got an Amateur ticket by virtue of thier participation in
"something else". Once they got in there with the rest of us, it was an open
door from then on!

>>>Whatever is done should be done and done quickly. That said, there is a

Ain't that like the FCC...fuss about wanting to get out from under Code
Testing, then when the international treaties that bound them were lifted, they
just got embroiled in an even bigger administrative nightmare to decide if
that's what they really wanted to do!

I used to think so, Mike...

At one time, I just thought Lennie was playing "Devil's Advocate".

Nope. He's just a creep.

When someone uses CBers as the example against what we should NOT want in Amateur Radio, I just redirect them to some of Lennie's posts and say "See, it CAN be a lot worse!"

If you'll take careful notice, Mike, with rare exception over the last few
months, I rare reply directly to anything he says. Most of it (like the last
couple with you here) have been as a result of someone else's posts echoing
him.

> I'm pretty convinced that even though there are times you find him
>exasperating, it doesn't upset you to make the posts?

What would upset me even more is letting a bully go unchallenged.

Amateur Radio is something that has enrichened my life and has been a
Godsend on more than one occassion.

To allow a creep like Anderscum to trash it unabated would be unthinkable.
ESPECIALLY when he is so blatantly wrong on so many occassions.

> I also believe that for good or bad, you enjoy it to a certain extent.

Only that it lends some balance to his mistruthfulness and deceit.

> So you guys have a relationship. It's a pretty strange one, made easier

> Why Lenover21 resists my suggestions that this is what is going on is
>beyond me. It is no insult, its just how things go sometimes.

He resists a lot. Common sense. Civility. Friendship. He'd rather you
slap him around a bit than shake his hand.

>> Lennie loves to berate othrs for "assuming", "rank and priviledge",
>and
>> swears he does NOT berate others for thier services regardless.
>
> I do not have now, and I never did have any military rank. That needs
>to be clear. But there are more ways than that of serving your country.

Absolutely.

Lennie did one active duty tour in the Army. Good for him.

But I know people who have made far greater contributions to the United
States who never left thier home state than Lennie ever hoped to "passing 1.2
million messages at ADA in 1953".

That's what get's his goat. The really sad thing is that Lennie COULD be
in that same boat...but just hasn't got the guts to be anything other than what
he is now...bitter and angry.

Still me. Or was.

K4CAP is just an FCC assigned call sign. It was mine briefly. Until May
of 2005 it can be mine again without waiting 2 years.

It wasn't an alias for me. I still sign my posts "Steve". The
combination of letters and number on FCC Form 660 does not dictate who I am.

Sorry, Brian. You posted in a public, unmoderated forum.

Your posts are open fare.

>Sorry, Steve, but you you've blown it in the rational discourse
>department. Try it with someone else.

Sorry, Brian, you've not proven a thing.

You still have unanswered questions vis-a-vis Amateur Radio other there.
We're still waiting and wondering...Will you ever fess up, or was your
admission of never getting DXCC approval for your "T5" operation the only
acknowledgement we'll ever see that your claims are bogus?

Although I've only managed US stations, try the ARRL 160 meter contest in January. All I've ever been able to put up for it is a random wire about 6 feet off the ground but have managed to work Texas to Maine from here in Michigan.

My entry into ham radio was also by virtue of "something else." My husband at the time saw classes listed and had always wanted to be a ham (he'd had relatives who were hams). He said "let's do this together" and basically dragged me along as I had no interest at the time. Once I got involved in the class, I found it fascinating and not only got my Tech (with code) but immediately forged ahead to get my upgrades. Well that husband and I have parted ways, but I have remained active in ham radio except for the temporary effects of moving three times.

>
> What would upset me even more is letting a bully go unchallenged.

A bully? Len only has as much power as you give him. Proof of the saying "He
who angers me, controls me. " Len works jard to anger you, so you'll come off
the handle, call him names, etc.

Note how upset he gets when people *don't* react in kind. Note how he's trying
to get mild-mannered Mike Coslo worked up so that Mike will reply in kind.

But Mr. Coslo doesn't work that way. I suspect his time on the ice is one
reason. (One trick in hockey is to do something when the ref isn't looking that
elicits a violent reaction when the ref *is* looking. Result: Penalty box and

your team is down a player for several minutes. Games are won and lost that way. So Mike stays cool and collected.

>Amateur Radio is something that has enrichened my life and has been a
>Godsend on more than one occassion.

Same for me. I think my background in ham radio got me into engineering school and into a successful EE career. Introduced me to a lot of good friends. Showed me a world many folks don't even know exists.

Why should Len's words bother me?

> To allow a creep like Anderscum to trash it unabated would be
>unthinkable.

His words have only as much power as you give them. Calling him "Anderscum" simply lowers you to his level. Can't you see that's what he wants?

> ESPECIALLY when he is so blatantly wrong on so many occassions.

Then point out the errors without the name calling.

>> I also believe that for good or bad, you enjoy it to a certain extent.
>
> Only that it lends some balance to his mistruthfulness and deceit.

When you call him "Lennie" and "anderscum" and go off on his wife or whatever, it undermines *your* credibility. Which is just what he wants.

>> So you guys have a relationship. It's a pretty strange one, made easier
>>by Netnews, but this sort of thing has existed for a long time. It's the
>>old Winston Churchhill/Lady Astor thing. They traded barbs with each

So?

For an operation to be accredited for DXCC, somebody has to submit the required paperwork.

>We're still waiting and wondering...Will you ever fess up, or was your
>admission of never getting DXCC approval for your "T5" operation the only
>acknowledgement we'll ever see that your claims are bogus?

What bogus claims, Steve?

Consider this scenario:

Suppose there was a military radio setup in /T5 that could do HF. (I'm sure Len can write a long missive full of nomenclature and other irrelevancies detailing what would be in use and how the military doesn't use Morse Code, etc.) Let's nomenclature this hypothetical HF radio set as "UP/URS-2"

And suppose said radio setup covers 10 meter SSB. (Even a civilian like me knows that most post WW2 military HF gear covers at least 3-30 MHz).

So Mr. Burke finds himself at or near said radio setup. Of course the main point-to-point military radio traffic nowadays goes by satellite, with HF as backup, right? So the UP/URS-2 sits idle most of the time. The comms folks check it out once in a while just to be sure it works.

Mr. Burke sees all this and asks "Sarge" if he can use it on the ham bands. "Sarge" says "yeah, sure, lemme make sure the autotuner works up that high". Of course it does, so T5/N0IMD is on the air and makes a few 10 meter SSB contacts. Maybe in due course a few QSLs are exchanged with hams in places like the Ukraine and Lebanon.

No paperwork is ever sent to ARRL - DXCC accreditation is not considered. Only a few contacts are made and the "mainstream DX community" never hears of the operation.

All of the above fits with the claims Mr. Burke has made here. Maybe it happned pretty close to the way I described, maybe not. He won't tell us the details anyway, so why worry about it?

> summer.

I think the code test flap is a universally dead issue at this point
in history. Except in this toxic no-counter swamp. Cecil got it right,
5wpm is "good enough" under today's condx and I agree with that and I
suspect that the FCC and the ARRL also silently agree too. The matter
was a helluva brawl back when shreikers from both poles were going at
each other here and elsewhere. Whatever. It's all worn out as is this
NG. The way I see it another reasonable and not unexpected regulatory
compromise has been reached. The NCTAs killed the 13 & 20wpm code
tests but didn't achieve their ultimate objective. Us PCTAs lost the
13 & 20wpm code tests but the 5wpm test lives on. So I expect the
5wpm test to continue to be required for some considerable time
without further ado. Nobody got everything they wanted and nobody lost
everything. It's a typical compromise solution for a regulatory hot
potato. Welcome to America.

On the other hand the FCC could drop the code test on Monday and life
would go on as usual.

That's nice. You're the reason I don't bother reading the FD rules
'cause I know that you'll have 'em memorized, analyzed and carved six
ways from Sunday into yer headbone. Which spares me from all that
drudgery. It's always nice to have a "detail guy" like you on tap.

> A year or two ago the definition was changed so that FD covers not
> just North America but SA too.

At least I caught that change. That ZF1 9A catagory bunch musta had a
blast.

Which means N2EY/Tierra del Fuego could

We'll see. The prior RRAP vaguely similar event was not put together
overnight.

> And it will be spun so that somehow it's *your* fault...

Yawn.
